This course explores different approaches to leadership on behalf of social justice with a strong focus on developing a personal leadership style and practices to deepen students' sense of vocation. Develops a number of practical leadership skills connected to discernment, leading through adaptive challenges, team development and bridge building, management, and visioning. Outcome: To understand leadership models and techniques for social justice organizations. To integrate spiritual practices and disciplines into leadership and management. To develop skills managing and interfacing with faith-based and non-profit.

IPS 672 Media for Ministry and Mission (3 Credit Hours)

For more than a hundred years, film, radio, and television have had a profound effect on the practice on ministry and pastoral care. Now in the 21st century, the explosion of new types of interactive and social media have revolutionized our interactions, our economy, and our world. Churches and social justice organizations, however, have often been slow to adopt or even explore these new technologies. You will learn to plan strategic campaigns, create content, and measure results. Coursework will include engagement with various platforms, as well as an introduction to key concepts from media history and theory.

Outcomes:

Participants will leave this course with an understanding of how to navigate the changing media landscape, think theologically about digital communications, and put media tools to work for ministry and mission

Instructional Design (INDN)

Discover, search, courses!

INDN 420 Instructional Design Theories and Models (3 Credit Hours)

This course covers how theories of human learning can be applied to the instructional process to make it more effective, efficient, and appealing. The course has a two-fold focus: the theoretical principles that have contributed to the field of ID, and how those principles can be applied within practical settings. Pre-requisite or co-requisite: CIEP 470 Principles of Instructional Design Identify/describe the basic tenets of behavioral, cognitive, and constructivist theories. Identify/describe motivational theories. Select/apply principles in practical learning situations.

Outcomes:

Differentiate/compare/contrast among learning theories, ID theories and ID models

INDN 421 Design & Development of Instructional Materials (3 Credit Hours)

This course builds upon instructional design theories and best practices introduced in the Principles of Instructional Design course. It provides an overview of a variety of instructional tools and technologies and allows students to implement design principles in the development of instructional materials. Pre-requisite or co-requisite: CIEP 470 Principles of Instructional Design Recognize/describe/apply visual literacy strategies and accessibility standards to create instructional materials. Design/develop/implement instructional materials using multiple media.

Outcomes:

Recall/describe/apply learning theories and methodologies to design/develop instructional materials

INDN 430 Performance Improvement in Organizations (3 Credit Hours)

In this course, learners will identify a problem/cause/solution to a performance problem within an organization using the Human Performance Improvement model. Learners will select a learning intervention and create an evaluation plan to assess its effectiveness. Learners will compare/contrast the instructional design process within a variety of organizations. Pre-requisite or co-requisite: CIEP 470 Principles of Instructional Design Analyze data to identify performance gaps/causes. Select a performance intervention based on needs analysis. Compose an evaluation plan. Identify Change Management strategies for implementation.

Outcomes:

Compare/contrast ID teams in organizations

INDN 431 Fundamentals of Learning Analytics (3 Credit Hours)

In this course, students will build a foundation for deploying learning analytics to be used in instructional design. The course employs a combination of theory and hands-on experience using business-intelligence tools. Emphasis will be centered on specific models and methodologies in data collection, normalization, visualization, and analysis. Pre-requisite or co-requisite: CIEP 470 Principles of Instructional Design Use reporting tools to compile/isolate/summarize data. Differentiate between learning models. Align data models to assessments. Conduct predictive data analysis. Discuss ethics considerations.

Outcomes:

Explain learning analytics theory; identify recent trends

INDN 440 Applications of Human Centered Design Principles (3 Credit Hours)

Human-centered design places humans and their needs at the center of the design, compels us to take a holistic/thoughtful approach to our designs. This course uses these principles to examine the design process to create learning experiences that are inclusive and responsive. Learners will also craft their own design philosophy. Pre-requisite or co-requisite: CIEP 470 Principles of Instructional Design Create a space for learning that incorporates principles of human-centered design. Critique the application and use of these principles. Formulate your own philosophy of design.

Outcomes:

Describe principles of human-centered design

INDN 490 Instructional Design Capstone (3 Credit Hours)

Students will apply program outcomes to real-world settings in preparation for an ID career. The course combines research and service learning towards the creation of a project, portfolio and professional artifact. Students will partner with a SME to build a module tailored to their course or institution. Pre-requisites: CIEP 470 Principles of Instructional Design, last semester of the program, program director approval. Co-requisite: 8W1 remaining course requirements must be completed. Create a training module incorporating SME content. Develop a professional portfolio.

Outcomes:

Conduct a needs assessment, compose learning goals/outcomes, and create an evaluation plan by partnering with a subject matter expert

Integrative Cell Biology (ICB)

Discover, search, courses!

ICB 401 Gross Anatomy (6 Credit Hours)

The student develops a knowledge and understanding of the basic concepts and facts of human gross anatomy as it relates to function and clinical problems. Lectures, clinical case-based and problem-based learning, computer-aided instructional materials, and cadaver dissection serve as guides to laboratory study.

ICB 403 Histology (3 Credit Hours)

The course is designed to provide the student with a basic knowledge and understanding of the structure and function of the human body at the light and electron microscopic level. The interdependence between structure and function in the different tissues and organs of the body is emphasized. Clinical and research application of the course material are also stressed.

ICB 411 Advanced Gross Anatomy (2 Credit Hours)

The study of the gross structure of the human body at an advanced level presented at conference sessions. Registrants for this course may include graduate students, advanced medical students, as well as those who hold the M.D. degree and are concurrently registered for advanced work in one of the clinical departments.

ICB 445 Scientific Litr. Review & Critique (1 Credit Hour)

Students are taught critical evaluation of scientific literature, hypothesis testing and presentations. This course involves attendance at scientific presentations by students and outside speakers and a journal club component. Both staff and students participate and the class is only offered during the fall semester. This course alternates with Review and Seminar 446.

ICB 446 Review Seminar (1 Credit Hour)

The student participates in a series of seminars and journal clubs that provide a forum for intensive review of scientific topics. Research progress reports of the students is incorporated into this course as a part of the scientific presentation. This course alternates with the Scientific Literature Course 445 and is only offered during the spring semester.

ICB 459 Research (1-8 Credit Hours)

Independent research for thesis or dissertation under the supervision of an appointed faculty adviser. Credit various upon assigned effort and time spent in the laboratory. Requires a written report.

ICB 462 Teaching of Anatomy I (2 Credit Hours)

A practical experience in the teaching of Gross Anatomy to graduate and medical students. Students assist in the planning, preparation, and teaching of laboratory sessions. The course allows students to place the experience of teaching gross anatomy on their transcripts as a graded course indicating to future employers that they have gained teaching experience.

ICB 463 Teaching Anatomy II (2 Credit Hours)

A practical experience in the teaching of histology to graduate and medical students. Students assist in the planning, preparation and teaching of laboratory sessions. The course allows students to place the experience of teaching histology on their transcripts as a graded course indicating to future employers that they have gained teaching experience.

ICB 501 Special Topics in Anatomy (1-2 Credit Hours)

Occasionally specific faculty members may offer a specialized seminar course. The purpose of such courses is to further graduate student's knowledge in a specialized current scientific research area. The graduate students explore in detail one or more areas of special interest through seminars, conferences, library and laboratory work.

ICB 595 Thesis Supervision (0 Credit Hours)

Supervised research and writing leading to the completion of the masters of science thesis and degree.

ICB 600 Dissertation Supervision (0 Credit Hours)

Supervised research and writing leading to the completion of the Ph.D. dissertation and degree.

Interdisciplinary Studies (INDS)

Discover, search, courses!

INDS 380 Newberry Seminar (6 Credit Hours)

This course is for students selected for the Newberry Library Undergraduate Seminar, an interdisciplinary, humanities research course offered every Spring. The theme of research changes annually. The competition for the five spots for Loyola students is held every Fall. This course satisfies the Engaged Learning requirement.

INDS 400X TBA-Foreign Study (15 Credit Hours)

Temporary indicator course for the duration of the study abroad program.

International Affairs (INTA)

Discover, search, courses!

INTA 420 Comparative Political Systems (3 Credit Hours)

This course examines political institutions and political behavior in various political systems. Restricted to Graduate School students.

Course equivalencies: X-INTA 420/PLSC 420

Outcomes:

Students will master the literature on comparative politics, including the methodology of comparative analysis

INTA 430 Theories of International Politics (3 Credit Hours)

This course analyzes theories and major issues of international politics. Restricted to Graduate School students.

Course equivalencies: X-INTA 430/PLSC 430

Outcomes:

Students will master the literature in major research areas and theoretical frameworks in international relations

INTA 470 Fieldwork in PLSC-Internship (1-3 Credit Hours)

This is a graduate level course that allows students to get experience through internships. Restricted to Graduate School students.

Course equivalencies: X-PLSC 470/INTA 470

Outcomes:

Students will be able to demonstrate an understanding of models of leadership and public service by working with supervisors who are normally leaders in their fields

INTA 475 Political Analysis I (3 Credit Hours)

This course provides an introduction to the use of inferential statistics in political science. Restricted to Graduate School students.

Course equivalencies: X-INTA 475/PLSC 475

Outcomes:

Students will master the basic statistical techniques used in political science

International Business (IBUS)

Discover, search, courses!

IBUS 201 Introduction to International Business (3 Credit Hours)

This course will introduce students to the theory and practice of international business with a focus on international environments and activities of multinational enterprises (MNEs). Topics to be included: cultural, social, legal, trade, and financial characteristics in the world markets. The course will also discuss diverse functional areas of MNEs across national borders such as international: production, logistics, finance, human resource management, and marketing.

Interdisciplinary Option: Global Studies

Course equivalencies: IBUS 201/BSAD 202/BHNR 338

Outcomes:

Develop students' theoretical and practical insights for understanding the real world of international business in terms of both external environmental forces and internal strategic management issues surrounding multinational enterprises (MNEs) in the world markets

IBUS 370 INTL Business Internship - Engaged Learning (3-6 Credit Hours)

IBUS 370 is a seminar course that challenges students to analyze the theory and practices from the world of work that impact the ethics of leading, interpersonal and organizational dynamics, and competent work place contributions required for success in the modern business world. Concepts associated with internship/engaged learning as related to career development will be addressed. Students are required to work a minimum of 120 hours over the course of one semester. All internships must be supervised by professionals and may be paid or unpaid.

Prerequisites : Sophomore standing, Permission of Instructor Developing a foundation on which a student may build a career b. Understanding the role of the Jesuit tradition as it relates to leadership and service This course satisfies the Engaged Learning requirement.

Outcomes:

a

IBUS 399 Special Topics in International Business (3 Credit Hours)

Special Topics are classes offered on an ad hoc basis. Specific titles, prerequisites and content will vary.

International Cinema, Video, New Media (ICVM)

Discover, search, courses!

ICVM 201 Media Theory and Criticism (3 Credit Hours)

This course is an introduction to the study of traditional mass media and new media from a critical and interpretive perspective. Outcome:

This course reviews semiotics and other methods of textual analysis of media. Students taking the course should be able to understand and apply textual analysis methods to specific media texts, such as films, TV shows or videogames.

Course equivalencies: X-IFMS201/COMM201

ICVM 297 Special Topics (3 Credit Hours)

Advanced courses that offer in-depth reading. Research, and discussion in a specialized area, Course titles and content vary, and prerequisites are established by the instructor. May be repeated (with different topics) for a total of 9 hours.

Course equivalencies: ICVM297/IFMS297

ICVM 323 Film Genre (3 Credit Hours)

Pre-requisites: ICVM 201 or 222 This course offers an in-depth analysis of film genres, their conventions, and /or cultural functions (e.g. documentary film noir, science fiction)

Selected film viewing is a catalyst for analyzing the relations between ideology, authorship, and storytelling. May be repeated with different topic for a total of 9 hours but only 6 may count towards the major.

Outcome: Students will be able to demonstrate knowledge what constitutes a genre and the varied approaches used to analyze films within the context of genre studies.

Course equivalencies: X-COMM323/ICVM323/IFMS323

ICVM 365 History of Photography (3 Credit Hours)

A chronological and thematic survey of the history of photography, especially in Europe and America. Fine art and utilitarian applications of the medium are considered by examining photographers who represent the origin and development of major pictorial forms; the interaction between technology and imagery; and the relationships between photography and historical, social and cultural events. Outcome: Students will be able to demonstrate understanding of the most important pictorial forms, themes, practitioners, processes and context of photography as a fine and applied art from the beginning of the nineteenth century to the present.

Course equivalencies: X-FNAR365/ICVM365/IFMS365

ICVM 395 Special Topics (3 Credit Hours)

Advanced courses that offer in-depth reading, research, media production training, and discussion in a specialized area. May be repeated (with different topics) for a total of 9 hours. Outcome: Would vary from topic to topic. Students will be able to demonstrate an understanding of the specific topic area selected.

ICVM 398 Practicum (1-3 Credit Hours)

This course allows advanced students to work independently and gain advance practical experience in the production of significant film, video, and digital media projects. Outcome: The student will gain experience in developing and producing a significant film, video or digital media project.

Course equivalencies: ICVM398/IFMS398

Interreligious and Interfaith Studies (IRIF)

Discover, search, courses!

IRIF 300 Religious Diversity in Theory & Practice (3 Credit Hours)

This course provides an integrative overview of the field of interreligious and interfaith studies by way of its main components: Interreligious literacy, religious pluralism, and interreligious conflict resolution. It is intended to equip students to work in a multireligious setting.

Interdisciplinary Option: Interreligious and Interfaith Studies

Outcomes:

To be prepared to work in religiously diverse environments, understand religious diversity in America and its practical implications, and understand basic methodologies and concepts in the study of interreligious relations

IRIF 380 Interreligious and Interfaith Internship (3 Credit Hours)

An internship in an interreligious or multireligious setting. Upon completion students will write an analysis of the ways diverse religious traditions interact in practical settings. Restricted to Interreligious and Interfaith Minors.

Interdisciplinary Option: Interreligious and Interfaith Studies

Course equivalencies: X-IRIF 380/SOCL 380I

Islamic World Studies (IWS)

Discover, search, courses!

IWS IWS Survey of Islamic History (3 Credit Hours)

The course will introduce the historical development of Islamic civilization and the formation of Muslim social and political institutions from the 7th century to the present. Outcome: Students will be able to demonstrate knowledge of the historical development and diversity of Islamic beliefs, practices, and institutions in varied regional contexts and historical periods.

Italian (ITAL)

Discover, search, courses!

ITAL 101 Italian I (3 Credit Hours)

This course provides an introduction to the basic grammatical elements of Italian, promoting the development of listening comprehension, speaking, reading and writing skills while examining the geography and culture of Italy. Outcome: Students will be able to understand and write basic Italian sentences and to produce orally and in writing short sentences providing basic personal information about themselves, their activities and plans in Italian.

ITAL 102 Italian II (3 Credit Hours)

Pre-requisites: ITAL 101 This course continues the introduction to the basic grammatical elements of Italian, promoting the further development of listening comprehension, speaking, reading and writing skills while examining the geography and culture of Italy. Outcome: Students will be able to understand and write basic Italian sentences and to produce orally and in writing short sentences providing basic personal information about themselves, their activities and plans in Italian.

ITAL 103 Italian III (3 Credit Hours)

Pre-requisites: ITAL 102 This course examines more complex grammatical elements of Italian, and promotes the development of intermediate listening comprehension, speaking, reading and writing skills. Outcome: Students will be able to understand and write more complex Italian sentences and paragraphs, and to produce orally and in writing paragraphs and longer pieces providing accounts of their present past and future activities, and oral and written reactions to Italian cultural products.

ITAL 104 Italian IV (3 Credit Hours)

Pre-requisites: ITAL 103 This course is a comprehensive review of the basic grammatical elements of Italian, while continuing to promote all language skills with particular emphasis on reading and writing proficiency in areas of cultural and societal investigation. Outcome: Students will be able to understand and write increasingly complex Italian sentences and paragraphs and to produce orally and in writing utterances and texts about Italy, its cultural distinctness and its differences from the United States.

ITAL 250 Composition & Conversation I (3 Credit Hours)

Pre-requisites: ITAL 104 This advanced conversation and composition course emphasizes the development of advanced Italian speaking and writing skills and examines advanced grammar and vocabulary in relation to advanced skill development. Outcome: Students will further develop their Italian language skill acquired in previous courses and through experience and will strive for functional conversational fluency and the ability to write with clarity, precision and control of grammatical elements.

ITAL 251 Composition & Conversation II (3 Credit Hours)

Pre-requisites: ITAL 104 This advanced conversation and composition course can either be taken as a continuation of Italian 250 or independently

It also emphasizes the development of advanced Italian speaking and writing skills and examines advanced grammar and vocabulary in relation to advanced skill development. Outcome: Students will further develop their Italian language skill acquired in previous courses and through experience and will strive for functional conversational fluency and the ability to write with clarity, precision and control of grammatical elements.

Interdisciplinary Option: Italian Studies

ITAL 270 Main Currents of Ital Lit I (3 Credit Hours)

This course, taught in Italian, is an introduction to Italian literary texts of the Middle Ages and early Renaissance in relation to the cultural and social and political history of Italy during its most noteworthy period of development. Outcome: Students will demonstrate knowledge of how medieval and Renaissance Italian literary text reflect in a profound way Italy's cultural, artistic and political history in a systematic manner.

Interdisciplinary Option: European Studies, Italian Studies

ITAL 271 Main Currents of Ital Lit II (3 Credit Hours)

This course, taught in Italian, is an introduction to Italian literary texts and films in relation to the cultural and political history of Italy from 1700 to the present. Outcome: Students will demonstrate knowledge of how Italian literary texts and film reflect in a profound way Italy's social, cultural, economic and political history in a systematic manner.

Interdisciplinary Option: European Studies, Global Studies, Italian Studies

ITAL 280 Masterpieces of Italian Lit (3 Credit Hours)

Pre-requisites: ITAL 250 and ITAL 251, with C or better

This course is dedicated to the study of selected literary masterpieces written in Italian. Canonical and non-canonical works may be included, alongside essays that reflect on the definition and the history of Italian literature and its canon. If either 250 or 251 have been completed, the other may be taken simultaneously with this course. Students will demonstrate adequate reading and writing skills at level through oral presentations and term papers. Achievement level desired: ACTFL* Intermediate High to Advanced Low.

Interdisciplinary Option: Rome Studies

Outcomes:

By the end of the course, students will be able to describe, discuss, and present works of literature in expository writing

ITAL 282 Studies in a Theme (3 Credit Hours)

Pre-requisites: ITAL 250 and ITAL 251, with C or better

This course explores a theme chosen by the instructor on any social, artistic, and intellectual currents in the cultural history of Italy. The course may include cultural expressions such as the visual arts, music, theatre, performance, and film. It may consider different communication platforms such as - but not limited to - social media and pop culture. It may examine different genres and periods. If either 250 or 251 have been completed, the other may be taken simultaneously with this course. Students will demonstrate adequate reading and writing skills at level through oral presentations and term papers. Achievement level desired: ACTFL* Intermediate High to Advanced Low.

Interdisciplinary Option: Rome Studies

Outcomes:

By the end of the course, students will be able to identify the historical and social roots of Italian cultural phenomena and differentiate traditions and cultural perspectives in expository writing

ITAL 283 Studies in Italian Authors (3 Credit Hours)

Pre-requisites: ITAL 250 and ITAL 251, with C or better

This course is dedicated to the study of selected Italian authors. Canonical and non-canonical writers may be included, alongside authors of the Italian diaspora. If either 250 or 251 have been completed, the other may be taken simultaneously with this course. Students will demonstrate adequate reading and writing skills at level through oral presentations and term papers. Achievement level desired: ACTFL* Intermediate High to Advanced Low.

Interdisciplinary Option: Rome Studies

Course equivalencies: X-ITAL283/MSTU376

Outcomes:

By the end of the course, students will be able to describe, discuss, and present the works of Italian authors in expository writing

ITAL 284 Studies in Italian Film (3 Credit Hours)

Pre-requisites: ITAL 250 and ITAL 251, with C or better

This course will focus on one or more aspects of Italian films and may concentrate on narrative structure, genre, authorship, cinematography, casting, setting, and so on. The course may include a diverse selection of Italian high-brow and popular films, alongside readings that highlight their societal and cultural roots. If either 250 or 251 have been completed, the other may be taken simultaneously with this course. Students will demonstrate adequate reading and writing skills at level through oral presentations and term papers. Achievement level desired: ACTFL* Intermediate High to Advanced Low.

Interdisciplinary Option: Global Studies, Rome Studies

Outcomes:

By the end of the course, students will be able to describe, discuss, and present on various aspects of Italian cinema and the work of Italian filmmakers

ITAL 290 The Italians (3 Credit Hours)

Pre-requisites: ITAL 250 and ITAL 251, with C or better

This course aims at the acquisition of the Italian language for professional purposes in conducting business in Italy or with Italian companies. It will provide students with professional opportunities in an international and global environment. If either 250 or 251 have been completed, the other may be taken simultaneously with this course. Students will demonstrate use of appropriate written professional language in business letters and CV writing, and in oral communication. Achievement level desired: ACTFL* Intermediate High to Advanced Low.

Interdisciplinary Option: Italian American Studies, Rome Studies

Outcomes:

By the end of the course, students will be familiar with business etiquette and the organization of Italian companies and corporations

ITAL 300 Tutorial for Credit (1-6 Credit Hours)

Students will cover a specially-designed program of study through regular meeting with Italian faculty Outcome: Students will demonstrate knowledge of literature and culture and will improve their language skills.

Interdisciplinary Option: Italian Studies

ITAL 301 Stylistics (3 Credit Hours)

Pre-requisites: ITAL 270 and ITAL 271, with C or better

This course helps students develop writing skills in expository prose. Based on intensive study of advanced grammar and syntax, the course enhances students' vocabulary through prose, poetry, and essay readings. If either 270 or 271 have been completed, the other may be taken simultaneously with this course. Achievement level desired: ACTFL* Advanced Low.

Interdisciplinary Option: Rome Studies

Outcomes:

By the end of the course, students will demonstrate a firm and comprehensive command of the complexities of written and spoken Italian in expository writing and oral presentations

ITAL 305 Advanced Grammar (3 Credit Hours)

This course, taught in Italian, is a study of advanced Italian composition and rhetoric, with advanced study of Italian grammar.

Interdisciplinary Option: Italian Studies

Outcomes:

Students will further develop their Italian language skills acquired in previous courses and through experience and will strive to achieve as high a proficiency level as personally possible in their advanced Italian reading and writing ability

ITAL 308 Literary Criticism (3 Credit Hours)

Pre-requisites: ITAL 270 and ITAL 271, with C or better

Students will study major schools and themes in literary theory, both historical and contemporary. Rhetorical, philosophical, and cultural approaches to literature will be studied in conjunction with specific literary texts drawn from several linguistic and cultural traditions. If either 270 or 271 have been completed, the other may be taken simultaneously with this course. ACTFL* achievement level desired: Advanced Low to Mid.

Interdisciplinary Option: Rome Studies

Course equivalencies: X-FREN/GERM/ITAL/SPAN308

Outcomes:

By the end of the course, students will be able to debate, contextualize, and interpret major critical issues in the study and theory of literature in expository writing and oral presentations

ITAL 312 Dante-The Divine Comedy (3 Credit Hours)

This course, taught in Italian, will examine the Vita Nuova and Divine Comedy of Dante Alighieri and study Dante's poetic world in the context of Medieval culture. Outcome: Students will demonstrate knowledge of Dante's Italian and understanding of the historical, cultural, critical and technical vocabulary needed to analyze the Divine Comedy.

Interdisciplinary Option: Catholic Studies, European Studies, Italian Studies, Medieval Studies

Course equivalencies: X-ITAL312/CATH312/MSTU364

ITAL 314 Survey 13th & 14th Cent Lit (3 Credit Hours)

This course, taught in Italian, will examine the influential literary works of Francis Petrarch and Giovanni Boccaccio with emphasis on their respective masterpieces: the Canzoniere and the Decameron.

Interdisciplinary Option: Catholic Studies, Medieval Studies, Rome Studies

Course equivalencies: X-ITAL314/MSTU368

Outcomes:

Students will demonstrate knowledge of Petrarch's poetry and Boccaccio's difficult prose and their techniques of composition

ITAL 315 Ital Renaissance Lit (3 Credit Hours)

This course, taught in Italian, will examine the influential literary works of Poliziano, Lorenzo dei Medici, Machiavelli and Castiglione Outcome: Students will demonstrate knowledge of Renaissance literature in a variety of genres.

Interdisciplinary Option: Italian Studies

ITAL 316 Renaissance Chivalric Poems (3 Credit Hours)

This course, taught in Italian, will examine the Chivalric Romance Epics of Boiardo, Ariosto and Tasso. Outcome: Students will demonstrate knowledge of Renaissance literature 's greatest works.

Interdisciplinary Option: Rome Studies

ITAL 317 Survey Early 19th Cent Lit (3 Credit Hours)

This course will examine the influential literary works of Ugo Foscolo, Giacomo Leopardi, Alessandro Manzoni and other authors in a crucial period in the formation of modern Italian cultural identity. Outcome: Students will demonstrate knowledge of Foscolo and Leopardi poetry and Manzoni's prose and their literary style.

Interdisciplinary Option: European Studies, Rome Studies

ITAL 318 Survey Late 19th Cent Lit (3 Credit Hours)

This course will examine the influential literary works of Giovanni Verga and the school of Verismo and the "romanzi di formazione" of Edmondo De' Amicis, Carlo Collodi, and other significant Italian authors. Outcome: Students will demonstrate knowledge of Verga and verismo and of the works of other major late-19th century authors.

Interdisciplinary Option: European Studies, Italian Studies

ITAL 319 Survey of 20th Century Prose (3 Credit Hours)

This course, taught in Italian, will examine representative Italian novels of the 20th century by authors such as Svevo, Silone, Calvino, Bassani, P. Levi, and Ginzburg. Outcome: Students will demonstrate knowledge of Italian novelists and their prose and their literary style. Students will improve their Italian reading and writing skills.

Interdisciplinary Option: European Studies, Global Studies, Italian Studies

ITAL 320 Survey of 20th Century Poetry (3 Credit Hours)

This course will examine the major Italian poets of the twentieth century with emphasis on Ungaretti, Quasimodo, Montale, Pasolini, Zanzotto and Luzi. Outcome: Students will demonstrate knowledge of Italian poetry and major 20th century poets. Students will demonstrate the ability to interpret Italian poetry and will write their own Italian poetry.

Interdisciplinary Option: Global Studies, Rome Studies

ITAL 331 Survey of Italian Theater (3 Credit Hours)

This course will examine representative works of Italian theater from the Renaissance to the present. Featured authors will include Machiavelli, Goldoni, Pirandello and Dario Fo. Outcome: Students will demonstrate knowledge of Italian theater in its historical development.. Students will demonstrate the ability to analyze Italian plays and act out famous scenes.

Interdisciplinary Option: Italian Studies

ITAL 340 Italian Short Story (3 Credit Hours)

This survey course will examine representative works of the Italian short story tradition from the 13th century Novellino to the present. Outcome : Students will demonstrate knowledge of Italian short story in its historical development.. Students will demonstrate the ability to analyze Italian short stories and will create their own.

Interdisciplinary Option: European Studies, Italian Studies

ITAL 390 Culture & Civilization (3 Credit Hours)

This course taught in Italian studies the Italy that has emerged since the World War II. examines contemporary Italian culture and society and the problems Italy faces through study of a variety written texts (literary, historical, journalistic) and media. Outcome: Students will demonstrate knowledge of Italian society as it has been transformed over the past 60 years and will be able to under the role of representative political and cultural figures and forces in promoting change.

Interdisciplinary Option: European Studies, Global Studies, Italian American Studies, Italian Studies

Course equivalencies: X-ITAL390/INTS394

ITAL 395 Internship (3 Credit Hours)

The internship will enable students to gain practical experience in working in Italian government institutions in Chicago (such as the Italian Cultural Institute) or working in businesses or education. Outcome: Students will work 4-8 per week and reflect on their experience in conversations with supervising professor and other interns.

Interdisciplinary Option: Italian Studies

This course satisfies the Engaged Learning requirement.

ITAL 397 Topics in Italian Literature (3 Credit Hours)

Pre-requisites: ITAL 270 and ITAL 271, with C or better

This course explores a topic chosen by the instructor on any genre, tradition, and form in the literary history of Italy. The course may include literary expressions such as poetry, the short story, the novel, theatre, travel literature, etc., and may also consider different genres and periods. If either 270 or 271 have been completed, the other may be taken simultaneously with this course. Achievement level desired: ACTFL* Advanced Low to Advanced Medium.

Interdisciplinary Option: Rome Studies

Outcomes:

By the end of the course, students will be able to debate, contextualize, and interpret major critical issues in the study of Italian literature in expository writing and oral presentations

ITAL 399 Italian Honors Tutorial (3 Credit Hours)

Pre-requisites: Instructor's consent, restricted to students in Italian BA. Eligible students majoring in Italian and with departmental honors may elect tutorial for credit; topic chosen in consultation with faculty member. Achievement level desired: ACTFL* Advanced Low to Advanced-Mid.

Interdisciplinary Option: Italian Studies

Course equivalencies: ITAL399H / ITAL399

Outcomes:

Students will explore a topic of their choice guided by a faculty member, and will conduct a research project that will result in a final paper

ITAL 401 Italian Language and Culture (3 Credit Hours)

This course offers advanced students the opportunity to undertake an in-depth study of cultural debates that have emerged in Italy over the centuries. It examines transformations in Italian culture, and the challenges Italy has confronted in the face of societal changes through the study of a variety of written and visual texts. The course may examine other sources and media. Outcome: By the end of the course, students will formulate their own hypotheses on the transformative periods and the role played by cultural figures and forces in promoting change. Students will explore a topic of their choice guided by the faculty member and will conduct a research project that will result in a final paper. ACTFL* achievement level desired: Advanced Mid to High.

Italian American Studies (ITAS)

Discover, search, courses!

ITAS 101 Introduction to Italian American Studies (3 Credit Hours)

The course provides a framework for understanding the processes by which Italian immigrants and their descendants became/become members of American society, developing complex ethnic identities while often retaining some affiliation and/or transnational relations with Italy. It addresses questions of class, race, gender, and multiculturalism in relation to the Italian-American experience.

Interdisciplinary Option: Italian Studies

Outcomes:

Interpret and contextualize the experience of Italian-Americans and their expressive culture through historical, sociological, and political perspectives, extrapolating from the particular (Italian-American experience) to the general (immigration, assimilation, American identity)

ITAS 299 Explorations of the Italian Immigrant Experience (3 Credit Hours)

This course will analyze the "close encounter" between emigrants of Italian origin and the American society at the turn of the 20th century. Students will be exposed to Historical, Sociological, Literary, Cinematic, Cultural studies, and will develop a final on-field research taking advantage of their stay in Italy; to appreciate the contributions of Italian migrants to U.S. culture, to use the time in Italy to explore Italian cultural roots.

Outcomes:

To learn how Italian migrants participated in building the U.S

Japanese (JAPN)

Discover, search, courses!

JAPN 101 Japanese I (3 Credit Hours)

This course introduces the four basic communicative skills in Japanese: listening, speaking, reading, and writing. Students gain knowledge of Japanese culture and ways of thinking which provide the context for communicating in Japanese. No previous knowledge of Japanese is required. Outcome: Students will be able to understand and respond to greetings, introductions, and basic question about time, location, and directions and will be able to read and write hiragana and katakana, the two phonetic Japanese scripts as well as about 25 ideographic characters.

Interdisciplinary Option: Asian Studies, Japanese Language and Culture

Course equivalencies: X-JAPN101/ASIAJ01

JAPN 102 Japanese II (3 Credit Hours)

Pre-requisites: JAPN 101 Students will build on the skills in listening comprehension, speaking, reading and writing gained in JAPN 101 Outcome: Students will be able to introduce themselves and others, discuss daily life, and read and write simple paragraph length compositions with the aid of vocabulary lists.

Interdisciplinary Option: Asian Studies, Japanese Language and Culture

Course equivalencies: X-JAPN102/ASIAJ02

JAPN 103 Japanese III (3 Credit Hours)

Pre-requisites: JAPN 102 Students will expand their knowledge of Japanese vocabulary, grammar, usage, and speech levels, using Japanese as a medium for learning Japanese Outcome: Students will use written and spoken Japanese to ask for and express opinions, to ask for assistance, and to participate in a variety of written and verbal social routines

No course description is available

Interdisciplinary Option: Asian Studies, Japanese Language and Culture

Course equivalencies: X-JAPN103/ASIAJ03

JAPN 104 Japanese IV (3 Credit Hours)

Pre-requisites: JAPN 103 This course extends students' knowledge of Japanese grammar, vocabulary, verbal routines, and cultural patterns Students will read and respond in Japanese to short works of fiction and non-fiction. Outcome: Students will converse in Japanese for extended periods, and be able to decode and create many written items from daily life such as application forms, catalogs, and recipes.

Interdisciplinary Option: Asian Studies, Japanese Language and Culture

Course equivalencies: X-JAPN104/ASIAJ04

JAPN 250 Composition & Conversation I (3 Credit Hours)

Students gain mastery of intermediate Japanese grammar and increase their ability to use honorific and humble speech, with increasing use of Japanese as the medium of instruction.

Interdisciplinary Option: Asian Studies, Japanese Language and Culture

JAPN 251 Comp & Conversation II (3 Credit Hours)

This class is conducted mostly in Japanese with students developing the ability to read and discuss longer texts, including primary sources, to gain greater knowledge and understanding of Japan.

Interdisciplinary Option: Asian Studies, Japanese Language and Culture

Language and Culture (CELC)

Discover, search, courses!

CELC 74 Spanish Language Healthcare (0 Credit Hours)

Language class geared toward healthcare professionals that will communicate with Spanish-speaking individuals.

CELC 75 Pastoral Polish Language (0 Credit Hours)

Geared toward interested lay individuals in Chicago parishes, this course is designed to help English speakers communicate with large Polish constituency.

Latin (LATN)

Discover, search, courses!

LATN 101 Latin I (3 Credit Hours)

This course introduces students to elementary grammatical forms, basic syntax, and vocabulary of Latin, and simple readings in the language. Outcome: students should be able to demonstrate basic knowledge of Latin vocabulary, syntax and grammar and deploy it to be able to translate accurately simple Latin sentences and passages into English.

Course equivalencies: LATN131/LATN101

LATN 102 Latin II (3 Credit Hours)

Pre-requisites: LATN 101

This course continues the study of the fundamentals of the Latin language, including more vocabulary, grammar, syntax and more advanced readings. (Latin I or its equivalent is a prerequisite for this course.) Outcome: students should be able to demonstrate advanced knowledge of basic Latin vocabulary, syntax and grammar and deploy it to be able to translate accurately more advanced Latin sentences and passages into English.

Course equivalencies: LATN132/LATN102

LATN 271 Introduction to Reading Latin (3 Credit Hours)

This intermediate-level course centers on translation of prose and poetry of Roman authors, with special emphasis on review of Latin grammar as it is encountered in the selected texts. *Pre-requisites:* Latin 101, 102 (grade of 'B' or higher) or their equivalents (AP Latin credit; CAS Latin competency exam)

Interdisciplinary Option: Rome Studies

Outcomes:

Students will be able to translate selected passages of Latin prose and poetry with accuracy, analyze and appreciate Roman literature, and demonstrate understanding of the content of the passages

LATN 281 Intro to Roman Historians (3 Credit Hours)

Pre-requisites: LATN 101 and 102 or their equivalents This course centers on translation of representative selections from the historical works of Republican, Augustan and other Latin authors

Outcome: students should be able to translate accurately Latin historical prose passages, analyze and appreciate their style and contents, and demonstrate knowledge and understanding of their various contexts and meanings.

Interdisciplinary Option: Rome Studies

LATN 283 The Age of Caesar (3 Credit Hours)

Pre-requisites: LATN 101 and 102 or their equivalents

This course focuses on the literature and society of Rome at the time of Julius Caesar, in particular translation of selected readings from such authors as Lucretius, Catullus, Sallust, Caesar and Cicero. Outcome: students should be able to translate accurately the selected readings, analyze and appreciate their style and content, and demonstrate knowledge and understanding of their contexts and meanings.

Interdisciplinary Option: Rome Studies, Shakespeare Studies

LATN 284 The Age of Augustus (3 Credit Hours)

Pre-requisites: LATN 101 and 102 or their equivalents

This course focuses on the literature and society of Rome at the time of Augustus. Selected readings are from such authors as Vergil, Horace, Livy, Ovid, Tibullus and Propertius. Outcome: students should be able to translate accurately the selected readings, analyze and appreciate their style and content, and demonstrate knowledge and understanding of their contexts and meanings.

Interdisciplinary Option: Rome Studies

LATN 286 The Age of Nero (3 Credit Hours)

Pre-requisites: LATN 101 and 102 or their equivalents

This course focuses on the literature and society of Rome at the time of Nero. Selected readings are from such authors as Tacitus, Petronius, Seneca, and Lucan. Outcome: students should be able to translate accurately the selected readings, analyze and appreciate their style and content, and demonstrate knowledge and understanding of their contexts and meanings.

Interdisciplinary Option: Rome Studies

LATN 287 Age of Flavians (3 Credit Hours)

Pre-requisites: LATN 101 and 102 or their equivalents

This course focuses on the literature and society of Rome at the time of the emperors Vespasian, Titus and Domitian. Selected readings are from such authors as Tacitus, Suetonius, Martial and Juvenal. Outcome: students should be able to translate accurately the selected readings, analyze and appreciate their style and content, and demonstrate knowledge and understanding of their contexts and meanings.

Interdisciplinary Option: Rome Studies

LATN 289 Readings in Latin Literature (3 Credit Hours)

Pre-requisites: LATN 101 and 102 or their equivalents

Students study a selected range of masterworks in Latin literature. (This is a special topics course in Latin.) Outcome: students should be able to demonstrate deeper knowledge and understanding of selected Latin literature, its style and its possible interpretations.

Interdisciplinary Option: Rome Studies

LATN 303 Latin Composition (3 Credit Hours)

Pre-requisites: LATN 101 and 102 or their equivalents

This course involves practical exercises to develop correct and fluent expression in written Latin prose. Outcome: students should be able to write Latin in various styles, demonstrating facility in deploying fluent knowledge of vocabulary, syntax and grammar in the writing of Latin prose.

Interdisciplinary Option: Rome Studies

LATN 314 Cicero's Letters (3 Credit Hours)

Pre-requisites: LATN 101 and 102 or their equivalents

This course examines the correspondence of Cicero, as well as the political, social, and intellectual context of Classical Rome. Outcome: students should be able to translate these works with proficiency, to demonstrate knowledge in detail of the genre of formal Latin correspondence, the author and his times, and to understand and appreciate the ideas, issues and concerns expressed in the letters.

Interdisciplinary Option: Rome Studies

LATN 315 The Latin Fathers (3 Credit Hours)

Pre-requisites: LATN 101 and 102 or their equivalents

This course examines the writings of the early church fathers, including such as Ambrose, Jerome and Augustine; it also comprises an introduction to the historical background of Western patristic thought. Outcome: students should be able to translate these works with proficiency, demonstrate knowledge in detail of the writings, their authors and their times, and appreciate more deeply the issues and concerns located in these writings.

Interdisciplinary Option: Catholic Studies, Rome Studies

LATN 317 Pliny The Younger (3 Credit Hours)

Pre-requisites: LATN 101 and 102 or their equivalents

This course examines the correspondence of the younger Pliny, as well as the political, social, and intellectual context of later Classical Rome and Roman customs in public and private life. Outcome: students should be able to translate these works with proficiency, demonstrate knowledge in detail of the genre, the author and his times, and understand and appreciate the ideas, issues and concerns expressed in the letters.

Interdisciplinary Option: Rome Studies

LATN 325 The Orations of Cicero (3 Credit Hours)

Pre-requisites: LATN 101 and 102 or their equivalents

This course centers on the public orations of Cicero, his methods of oratorical persuasion, and the judicial processes of late Republican Rome that form the context for these orations.

Interdisciplinary Option: Rome Studies

Outcomes:

students should be able to translate these works with proficiency, demonstrate knowledge in detail of the genre, the author and his times, understand and appreciate the ideas, issues and concerns expressed in the orations, and comprehend the historical and judicial background of the orations

LATN 328 Quintilian (3 Credit Hours)

Pre-requisites: LATN 101 and LATN 102 or their equivalents

This course centers on Quintilian and his *Institutio Oratoria*, a comprehensive textbook of the technical aspects of ancient rhetoric.

Interdisciplinary Option: Rome Studies

Outcomes:

students should be able to translate these works with proficiency, demonstrate knowledge in detail of Latin rhetoric and oratory, and understand and appreciate Latin rhetorical styles, literary figures, and the structure and contents of Latin speeches

LATN 332 Historical Masterworks I (3 Credit Hours)

Pre-requisites: LATN 101 and 102 or their equivalents

This course examines the works of Livy or Sallust and their contexts in the later Republic and early Empire. Outcome: students should be able to translate these works with proficiency, and demonstrate knowledge in detail of the author/s studied and the contents of the writings, as well as appreciation for the genre of historical writing and for its significance within its political and intellectual context.

Interdisciplinary Option: Rome Studies

LATN 335 Historical Masterworks II (3 Credit Hours)

Pre-requisites: LATN 101 and 102 or their equivalents

This course examines the works of Tacitus, Suetonius or Latin historical writers of the later Roman Empire. Outcome: students should be able to translate these works with proficiency, and demonstrate knowledge in detail of the author/s studied and the contents of the writings, as well as appreciation for the genre of historical writing and for its significance within its political and intellectual contexts.

Interdisciplinary Option: Rome Studies

LATN 341 Vergil (3 Credit Hours)

Pre-requisites: LATN 101 and 102 or their equivalents

This course focuses on Vergil's Aeneid and the genre of Latin epic poetry, in particular, on the character of Aeneas and his place within the context of Augustan Roman politics and society. Outcome: students should be able to translate the Aeneid with proficiency, and demonstrate detailed knowledge of the author, the poem, and its contents and meanings, as well as deeper understanding and appreciation of various contexts of the poem and Vergil's accomplishments in composing it.

Interdisciplinary Option: Rome Studies

LATN 343 Latin Verse (3 Credit Hours)

Pre-requisites: LATN 101 and 102 or their equivalents

The subject of this course is Latin poetic verse, including selections from Catullus, Horace, Martial, Statius and other Latin poets. Outcome: students should be able to translate the works with proficiency, and demonstrate knowledge in detail about the authors, their poetry, and the various poetic styles they employed, as well as deeper understanding and appreciation of the historical, social and intellectual contexts and influences pertaining to them.

Interdisciplinary Option: Rome Studies

LATN 344 Roman Elegy (3 Credit Hours)

Pre-requisites: LATN 101 and 102 or their equivalents

The subject of this course is Latin elegiac poetry, including selections from Catullus, Tibullus, Propertius, and Ovid. Outcome: students should be able to translate Roman elegy with proficiency, and demonstrate knowledge in detail about the authors, their poetry, and Latin elegy, as well as deeper understanding and appreciation of the historical, social and intellectual contexts and influences pertaining to them.

Interdisciplinary Option: Rome Studies

LATN 345 Horace (3 Credit Hours)

Pre-requisites: LATN 101 and 102 or their equivalents

This course focuses on selections of the odes, satires and epistles of Horace, set against the backdrop of late Republican and Augustan Rome. Outcome: students should be able to translate the selections of Horace with proficiency, and demonstrate knowledge in detail about the author, his poetry, the various styles he used, as well as deeper understanding and appreciation of the historical, social and intellectual contexts and influences pertaining to them.

Interdisciplinary Option: Rome Studies

LATN 346 Juvenal (3 Credit Hours)

Pre-requisites: LATN 101 and 102 or their equivalents

This course focuses on the satires of Juvenal, set against the backdrop of Flavian Age Rome and the Roman Empire. Outcome: students should be able to translate the satires with proficiency, and demonstrate knowledge in detail about the author and his satires, as well as deeper understanding and appreciation of the historical, social and intellectual contexts and influences pertaining to them

Interdisciplinary Option: Rome Studies

LATN 347 Early Christian Poetry (3 Credit Hours)

Pre-requisites: LATN 101 and LATN 102 or their equivalents

This course centers on early Christian poets such as Ausonius, Prudentius and Fortunatus, and their works.

Interdisciplinary Option: Rome Studies

Outcomes:

students should be able to translate the selected works with proficiency, and demonstrate knowledge in detail about the authors and their poems, as well as deeper understanding and appreciation of the historical, social, spiritual, and intellectual contexts of their works

LATN 351 Roman Comedy (3 Credit Hours)

Pre-requisites: LATN 101 and 102 or their equivalents

This course focuses on the genre of Roman comedy, including selected plays of Plautus and/or Terence. Outcome: students should be able to translate selected texts in Roman comedy with proficiency, and demonstrate knowledge in detail about the authors and their comedies, as well as deeper understanding and appreciation of the historical, social and intellectual contexts and influences pertaining to them.

Interdisciplinary Option: Rome Studies, Shakespeare Studies

LATN 360 Lucretius (3 Credit Hours)

Pre-requisites: LATN 101 and 102 or their equivalents

This course centers on translation and understanding of the *De Rerum Natura* of Lucretius. Outcome: students should be able to translate the poetry of Lucretius with proficiency, and demonstrate knowledge in detail about the author and his work, as well as deeper understanding and appreciation of the historical, social and intellectual contexts and influences pertaining to it.

Interdisciplinary Option: Rome Studies

LATN 361 St Augustine's Works (3 Credit Hours)

Pre-requisites: LATN 101 and 102 or their equivalents

This course focuses on translation and understanding of the works of Saint Augustine. Outcome: students should be able to translate these works with proficiency, and be able to demonstrate knowledge in detail about the author and his works, as well as deeper understanding and appreciation of the historical, social and intellectual contexts and influences pertaining to them.

Interdisciplinary Option: Catholic Studies, Rome Studies

Course equivalencies: LATN361/CATH361

LATN 362 Cicero's Philosophical Works (3 Credit Hours)

Pre-requisites: LATN 101 and 102 or their equivalents

This course focuses on translation and understanding of the philosophical works of the orator Cicero, including, for example, *De Amicitia*. Outcome: students should be able to translate the philosophical works of Cicero with proficiency, and be able to demonstrate knowledge in detail about the author and his works, as well as deeper understanding and appreciation of the historical, social and intellectual contexts and influences pertaining to them.

Interdisciplinary Option: Rome Studies

LATN 364 Seneca (3 Credit Hours)

Pre-requisites: LATN 101 and 102 or their equivalents

This course focuses on translation and understanding of the works of the philosopher and playwright, Seneca. Outcome: students should be able to translate the selected works of Seneca with proficiency, and demonstrate knowledge in detail about the author and his works, as well as deeper understanding and appreciation of the historical, social and intellectual contexts and influences pertaining to them.

Interdisciplinary Option: Rome Studies, Shakespeare Studies

LATN 373 Workshop-Secondary School Latin (3 Credit Hours)

Pre-requisites: LATN 101 and 102 or their equivalents

This course examines the objectives, standards, methods of presentation, testing, audiovisual aids, and desirable backgrounds for the teaching of Latin in secondary schools. This course is for prospective teachers of Latin and is taught in cooperation with Loyola's School of Education. Outcome: students should be able to demonstrate knowledge of these objective and standards, etc., as well as be able to employ them effectively in classroom contexts.

Interdisciplinary Option: Rome Studies

Course equivalencies: X-CIEP373/LATN373

LATN 387 Medieval Latin (3 Credit Hours)

Pre-requisites: LATN 101 and 102 or their equivalents

This course focuses on readings in medieval Latin prose and poetry, as well as on comparison with classical Latin style and content. Outcome: students should be able to translate the selected works of the course with proficiency, and demonstrate knowledge in detail about their authors, as well as deeper understanding and appreciation of the historical, social and intellectual contexts and influences pertaining to them.

Interdisciplinary Option: Medieval Studies, Rome Studies

Course equivalencies: X-LATN387/MSTU384

LATN 388 Readings in Latin Literature (3 Credit Hours)

Pre-requisites: LATN 101 and 102 or their equivalents

Students study a selected range of masterworks in Latin literature. (This is a special topics course in Latin.) Outcome: students should be able to translate the selected works with proficiency and demonstrate deeper knowledge and understanding of selected Latin literature, its style and its possible interpretations.

Interdisciplinary Option: Rome Studies

LATN 389 Readings in Latin Literature (3 Credit Hours)

Pre-requisites: LATN 101 and 102 or their equivalents

Students study a selected range of masterworks in Latin literature. (This is a special topics course in Latin.) Outcome: students should be able to translate the selected works with proficiency and demonstrate deeper knowledge and understanding of selected Latin literature, its style and its possible interpretations.

Interdisciplinary Option: Rome Studies

LATN 415 The Latin Fathers (3 Credit Hours)

This course examines the writings of the early church fathers such as Ambrose, Jerome, and Augustine, looking through them to the historical and intellectual background of Western patristic thought. They should engage critically with current scholarship of the field.

Outcomes:

students should demonstrate knowledge in detail of the texts, their authors, and their times

LATN 418 St Augustine (3 Credit Hours)

This course focuses on selected works of Augustine, set against the backdrop of Roman society and Mediterranean Christianity in the later Roman period. They should engage with current scholarship addressing Augustine's religious, intellectual, literary, social, and historical contexts and influences.

Outcomes:

students should demonstrate knowledge in detail about Augustine, his world, and his works

LATN 431 Caesar (3 Credit Hours)

This course focuses on Julius Caesar's Commentaries on his Gallic War and the Civil War against Pompey the Great. It examines the texts within multiple frameworks in order to understand the political, military, intellectual, and historical contexts of Caesar's writing. Additionally, students should engage critically with scholarship relating to Caesar and his place in the world.

Outcomes:

students should demonstrate detailed understanding of Caesar, his texts, and contexts

LATN 432 Livy (3 Credit Hours)

This course focuses on Livy's *Ab Urbe Condita* and the historical, intellectual, literary, and cultural contexts of this work. It considers Livy's place in Rome's historiographical tradition and the relationship of his work to the emerging imperial government. Additionally, students should engage critically with scholarship on Livy and his work.

Outcomes:

students should demonstrate detailed understanding of Livy and his historical and cultural context

LATN 435 The Annals of Tacitus (3 Credit Hours)

This course focuses on the historical writings of Tacitus and the historical, intellectual, literary, and cultural contexts of their production. It considers Tacitus's place in the Roman historiographical tradition and the relationship of his work to the Roman imperial administration and socio-political systems of power. They should engage critically with scholarship relating to Tacitus, his project, and his world.

Outcomes:

students should demonstrate detailed understanding of Tacitus, his texts, and contexts

LATN 436 The Histories of Tacitus (3 Credit Hours)

This course focuses on the historical writings of Tacitus and the historical, intellectual, literary, and cultural contexts of their production. It considers Tacitus's place in the Roman historiographical tradition and the relationship of his work to the Roman imperial administration and socio-political systems of power. They should engage critically with scholarship relating to Tacitus, his project, and his world.

Outcomes:

students should demonstrate detailed understanding of Tacitus, his texts, and contexts

LATN 438 Suetonius (3 Credit Hours)

This course focuses on Suetonius's *Lives* and the historical, intellectual, literary, and cultural contexts of his writing. It examines the genre of biography in the ancient historiographical tradition and explores Suetonius's depiction of the Roman Emperors as both biographical and literary creations. They should engage critically with current scholarship on Suetonius, his project, and his milieu.

Outcomes:

students should demonstrate detailed understanding of Suetonius and his historical and cultural context

LATN 441 The Aeneid of Virgil (3 Credit Hours)

This course centers on Vergil's *Aeneid*. It examines the poem's place in the tradition of Latin epic poetry with attention to Vergil's literary technique. It explores the poem's participation in and resistance to the Augustan imperial political program. It will touch on the enduring influence of the poem. They should engage critically with scholarship concerned with Vergil's social, cultural, and literary contexts and influences.

Outcomes:

students should demonstrate detailed understanding of Vergil and the *Aeneid*

LATN 442 Earlier Works of Virgil (3 Credit Hours)

This course centers on Vergil's *Eclogues* and/or *Georgics*. It examines the genre(s) of bucolic and/or didactic poetry, focusing on Vergil's developing technique, especially his commitment to Alexandrian and Neoteric principles. It will explore how these poems respond to the uncertainty of the political moment and emergence of Imperial rule. They should engage critically with scholarship concerned with Vergil's social, cultural, and literary contexts and influences.

Outcomes:

students should demonstrate detailed understanding of Vergil and his early poems

LATN 443 Catullus (3 Credit Hours)

This course centers on Catullus, the literary genres and traditions in which he worked, and the particular moment of late-Republican neoteric poetry. It considers Catullus' importance as an innovator in Latin poetry, his place in the social fabric of aristocratic Roman culture and how his poetry reflects that culture. They should engage critically with scholarship relating to Catullus' historical, social, literary, and intellectual contexts.

Outcomes:

students should demonstrate detailed understanding of Catullus' works, literary technique, and world

LATN 444 Roman Elegy (3 Credit Hours)

This course focuses on Latin elegiac poetry through selections from Catullus, Tibullus, Propertius, and/or Ovid. The course explores elegy as a peculiarly Roman literary tradition linked closely to the Late Republic and Early Empire. It examines the recurrent themes and techniques of Latin Elegy. They should engage critically with scholarship concerned with the historical, social, intellectual, and literary contexts of this genre.

Outcomes:

students should demonstrate detailed understanding of Latin elegy

LATN 445 Ovid (3 Credit Hours)

This course centers on the poetry of Ovid, the genres in which he wrote, and the cultural, social, and historical contexts in which he worked. It explores Ovid's role as both a continuator and innovator within the Roman literary tradition and how his poetry responds to his socio-political moment. They should engage critically with scholarship concerned with Ovid's social, cultural, and literary contexts and influences.

Outcomes:

students should demonstrate detailed understanding of Ovid and his work

LATN 446 The Odes of Horace (3 Credit Hours)

This course centers on the *Odes* of Horace, their relationship with traditions of lyric poetry and Roman Alexandrianism, and the cultural, social, and historical contexts to which Horace responded. The course examines Horace's poetic technique and his engagement with the emerging Augustan imperial regime. They should engage critically with scholarship addressing Horace's work and various contexts.

Outcomes:

students should demonstrate detailed understanding of Horace's *Odes* and their place in Roman poetry

LATN 451 Roman Comedy (3 Credit Hours)

This course focuses on Roman comedy, including selected plays of Plautus and/or Terence. It examines the place of these works in the traditions of New Comedy more generally, exploring how they are produced in Latin as theater in the context of Roman Republican society. They should engage critically with scholarship addressing the plays' multiple contexts and influences.

Outcomes:

students should demonstrate detailed understanding of the authors, the comedies, and their traditions

LATN 455 Tragedies of Seneca (3 Credit Hours)

This course focuses on selected tragedies of Seneca. It examines these works in light of the traditions of ancient tragic drama and Latin literature more generally. It also explores the connection of these plays to Seneca's Stoic philosophy and the imperial regimes of Claudius and Nero. They should engage critically with scholarship addressing Seneca's literary, philosophical, cultural, and historical contexts and influences.

Outcomes:

students should demonstrate detailed understanding of Seneca's tragedies

LATN 461 Lucretius (3 Credit Hours)

This course centers on the *De Rerum Natura* of Lucretius. It examines Lucretius' literary technique and his place in the Roman tradition of hexametric poetry. It also explores Lucretius as a major exponent of Epicurean philosophy and the scientific world view of that philosophical tradition. They should engage critically with scholarship addressing Lucretius' literary, philosophical, cultural, and historical contexts and influences.

Outcomes:

students should demonstrate detailed understanding of Lucretius' work and its significance

LATN 462 Philosophy of Cicero (3 Credit Hours)

This course focuses on the philosophical works of Cicero and the Roman reception of Greek philosophical thought. It explores Cicero's role as a conduit into the Roman world for Greek ideas, including his contribution to the establishment of a philosophical vocabulary, and the enduring influence of his work. They should engage critically with scholarship addressing the various contexts and influences of Cicero's treatises.

Outcomes:

students should demonstrate detailed understanding of individual works and Cicero's greater project

LATN 488 Readings in Latin Literature I (3 Credit Hours)

This course offers extensive and in-depth study of selected works of ancient Roman literature. The course includes consideration of these works in their social, historical, and literary contexts—that is, both as part of a tradition and as responses to particular moments in Roman social history. They should engage critically with scholarship concerning each author/work and their various contexts.

Outcomes:

students should demonstrate detailed understanding of the authors studied and their work

LATN 489 Readings in Latin Literature II (3 Credit Hours)

This course offers extensive and in-depth study of selected works of ancient Roman literature. The course includes consideration of these works in their social, historical, and literary contexts—that is, both as part of a tradition and as responses to particular moments in Roman social history. They should engage critically with scholarship concerning each author/work and their various contexts.

Outcomes:

students should demonstrate detailed understanding of the authors studied and their work

LATN 499 Directed Study (3 Credit Hours)

This course frames extensive and in-depth study of a selected author or topic involving Latin language or literature written in Latin, for graduate students to pursue under the direction of a faculty member of the department. Outcome: students will engage with current scholarship in the field of the investigation, and will demonstrate significant learning.

LATN 546 Seminar in Roman Satire (3 Credit Hours)

This course investigates Roman verse satire and its traditions through selections from Horace, Persius, and/or Juvenal, considered in their social, historical, and literary contexts. The Romans claimed satire as the one truly Roman genre: this course will explore the key themes and techniques animating the genre and its tradition. They should engage critically with scholarship concerned with the historical, social, intellectual, and literary contexts of this genre.

Outcomes:

students should demonstrate detailed understanding about Roman Satire

Latin Amer Studies (LASP)

Discover, search, courses!

LASP 196 Topics in Latin American Studies: Introductory (3 Credit Hours)

This is the 100-level special topics course. It is interdisciplinary in nature, and it may cover a wide variety of issues and topics related to Latin America and to Latinos in the U.S.

Outcomes:

Students who successfully finish this class will be able to demonstrate understanding of the topics covered in class, as shown in exams, papers, and other assignments designed to evaluate students

LASP 297 Special Topics (3 Credit Hours)

This is the 200-level special topics course. It is interdisciplinary in nature, and it may cover a wide variety of issues and topics related to Latin America. Topics will vary from semester to semester.

LASP 395 Capstone in Latin American Studies (3 Credit Hours)

Topics in Latin American Studies. Completes the minor in Latin American studies. This tutorial course serves an integrative purpose, requiring the student to focus on a specific issue or theme in Latin American studies research. Each student completes a research project integrating Latin American studies and his/her major field.

Interdisciplinary Option: Global Studies, Latin American Studies

Course equivalencies: LASP395/INTS395A

LASP 396 Topics in Latin American Studies-Advanced (3 Credit Hours)

This is the advanced special topics course. It is interdisciplinary in nature, and it may cover a wide variety of issues and topics related to Latin America and to Latinos in the U.S. Outcome: Students who successfully finish this class will be able to demonstrate a more complex and nuanced understanding of the topics covered in class, as shown in exams, papers, and other assignments designed to test students at an advanced level.

Law (LAW)

Discover, search, courses!

LAW 100 Well-Law for Students (2 Credit Hours)

The purpose of Law School is to equip students for the practice of law. We now know, however, that for many, the law school experience comes at a high cost to their personal wellness. The goal of this course is to provide students with the introductory knowledge and tools necessary to begin to manage the stresses of school, work, and life in healthy ways. The blended learning design includes content accessed asynchronously along with live online interaction. The on-demand content consists of course readings, group discussions, wellness and meditation videos, and other self-care resources.

LAW 101 Intellectual Property and Technology Licensing (2 Credit Hours)

Depending on the section, this course emphasizes either the management of intellectual property or the business and contractual aspects of intellectual property. Both sections are geared toward the future corporate practitioner.

LAW 102 Statutory Interpretation (2 Credit Hours)

This course is designed to assist students to develop a coherent method of statutory (and regulatory) interpretation. Basic issues considered are: plain meaning; textualism; context; intent; purpose; and coherence with other statutes and applicable law. Several brief writing assignments are required. The final paper is a judicial opinion in which students are asked to interpret a statutory provision in the context of the facts of a case to which the statute has been applied.

LAW 105 Argument and Persuasion (3 Credit Hours)

Argument and persuasion are essential human activities. Both have been practiced, in one form or another, for as long as human beings have interacted with each other; both have also been the subject of study since earliest times. Much of what guides us today comes to us from the ancient Greeks, but modern cognitive psychology also contributes to our understanding as how audiences of various types are persuaded in various circumstances. This course is particularly interested in what constitutes effective legal argument, particularly in the resolution of constitutional questions by appellate courts. The first part of the course will consider the general problem of persuasion by focusing on classical theories of argument and, to some extent, on the understanding of effective persuasion derived from contemporary cognitive psychology. Since the aim of appellate advocacy is to persuade a particular and specialized audience, namely, appellate judges, the second part of the course will consider the particular demands and requirements of persuasion that arise in that context by considering scholarly works relevant to that subject. We will consider what judges and theorists of judging say that judges do, or think they are doing, when they interpret the U.S. Constitution or resolve other questions of law through interpretation. We will also consider how an understanding of these matters impacts upon what lawyers can or should do in framing their arguments. In the final part of the course, students will apply the knowledge they have gained in the first two parts of the course by studying the opinions, briefs, and oral argument transcripts in selected Supreme Court cases. The selected cases will present distinct problems in advocacy. Students will be asked to evaluate the effectiveness of the arguments actually made in the cases and consider whether other arguments might more profitably have been made. Papers will be required.

LAW 107 Illinois Litigation Racism, Injustice & Poverty (2 Credit Hours)

This course will explore why well over fifty percent of the cases pending in Illinois courts involve taking liberty, money, or homes from poor people and how race factors into this reality. While the course will explore the interrelationship of racism, injustice, and poverty, the course will be focused on training students to try cases in these courts and win cases for poor people. The objectives of this course are to (1) to prepare Loyola students to represent poor people in Illinois courts and (2) excite their imagination about social and legal change, while empowering them to see the law as a vehicle for change.

LAW 108 American Indian Law: Indigenous Justice (3 Credit Hours)

This course examines the legal, regulatory, ethical, policy and pragmatic aspects of indigenous cultural heritage and the role of anthropology and archaeology in the United States and globally. Topics include cultural resource management in public and private contexts, participation of stakeholders, and expert anthropological knowledge in legal contexts and public participation. Topics include: the Native American Graves Protection and Repatriation Act (NAGPRA); cultural patrimony; museums; the role of government; the role of the courts; the role of the United Nations; postcolonialism; decolonizing methodologies; social justice issues; tourism, environmental and cultural relationships; oral sources; case studies and other ways of knowing the past that are embedded in law and policy.

LAW 110 Labor and Employment Law in the Education Workplace (2 Credit Hours)

This course, which meets once a week for two hours, will explore in depth labor and employment issues in the 21st century education workplace. Students will form teams – representing individual employees, the union, and management- and advocate their respective positions in a variety of contexts, including collective bargaining, unfair labor practice proceedings, teacher discipline and dismissal proceedings, and contract grievance arbitration. Current events and contemporaneous developments will provide the backdrop for the course materials and class activities. Topics will include: tenure, reduction-in-force and seniority rights, and teacher accountability and evaluation of professional personnel under new education reform legislation; public sector bargaining trends in Illinois and nationally; the 2012 Chicago Public Schools teachers strike; LGBT issues, free speech, and workplace right of privacy.

LAW 111 Practical Skills Boot Camp (1 Credit Hour)

Loyola has prepared you to think like a lawyer. In this intensive Boot Camp legal practice seminar, learn to be a lawyer. This seminar will help bridge the gap as you transition from law school into private practice. You will gain the personal skills, practical skills, and business sense to succeed in your legal practice from day one. Among other things, you will learn to think and behave like a practicing attorney. You will learn how to create professional correspondence, organize your practice, interact with colleagues and staff, and build a consistent book of work. You will also learn substantive litigation and transactional skills that will enhance the quality of your legal practice from day one. And you will hear from prominent attorneys in the community as to what they look for in new lawyers and what makes a successful new lawyer.

LAW 112 Operationalizing Treaties (2 Credit Hours)

Operationalizing Treaties probes the relationship between multilateral treaty implementation and economic, social, and institutional development at the domestic level. Particular attention will be devoted to treaties involving arms control, the environment, human rights, labor, and transnational crime for which economic considerations offer limited motivation for state compliance. A central theme of the course is the relation of treaty operationalization to national development.

LAW 113 Civil Procedure (4 Credit Hours)

An introduction to and analysis of the concepts and doctrines that govern the procedure followed in civil litigation, with a focus primarily on litigation pre-trial, reflecting reality. For example, various aspects of jurisdiction to bring suit, choice of law (Erie), as well as pre-trial process, including joinder of claims, parties, and discovery and motion practice are covered. Emphasis is placed on practice in the federal trial courts.

LAW 114 Advanced Legal Analysis (1 Credit Hour)

The class will strengthen students' analytical and reasoning skills. By the end of the course students will have a better understanding of how to read and extract information from cases, and synthesize multiple cases into law, as well as apply that law to new fact patterns.

LAW 117 Philosophy of Law (3 Credit Hours)

Philosophy of Law: Legal and Moral Issues of Economic Sanctions This course will start with a brief overview of economic sanctions in the contexts of international relations and global governance, and will then look closely at the issues of effectiveness and humanitarian impact. Throughout the course we will draw on materials from a number of sanctions regimes, including South Africa, Cuba, Iraq, and Iran. We will examine a number of ethical topics, looking at the issues of intent, consent, and moral agency in the context of economic sanctions. We will also look at a number of legal issues: whether sanctions come into conflict with international human rights law, such as the International Covenant on Economic, Social, and Cultural Rights; the problem of extraterritoriality; and the recent cases coming out of the European Courts on asset freezes, such as the Kadi case.

LAW 118 International Art Law (1 Credit Hour)

This one credit course will explore the international legal aspects involved in the art industry. For this one credit course, the materials will focus on the acquisition and ownership of art that crosses borders. Specific questions will include commissioning works of art, acquiring works of art privately through foreign dealers or galleries, or by way of auction, and the questions of competing title that arise over works of art or cultural property proceeding from war or peace time looting.

LAW 120 The Constitutional Challenge to the Affordable Care Act (1 Credit Hour)

This course gives students an opportunity for an in-depth consideration of the constitutional challenge to the Affordable Care Act (ACA) of 2010, which the Supreme Court is scheduled to decide in June. Topics include: the history of the passage of the ACA, political and popular mobilization against the ACA, the litigation history of the constitutional challenge, media coverage of the challenge, the Supreme Court's ruling on the issue, and possible implications of the challenge. Students will be responsible for periodic short writing assignments, at least one in-class presentation, and active participation in class discussion. Those who have not completed Constitution Law will be required to attend one additional session on Commerce Clause doctrine. The course will be offered on a pass-fail basis. The class will meet every other week. This course will be taught at Chicago Kent College of Law.

LAW 121 Advanced Constitutional Law (3 Credit Hours)

This course will focus on the history and substance of equal protection under the Constitution. First, we will explore the relationship of the original Constitution to slavery, and slavery's role in shaping law and constitutional doctrine. Next, we will study the Reconstruction amendments and the unusual circumstances of their adoption. Lastly, we will focus on the development of equal protection doctrine from its beginnings after Reconstruction to the present.

LAW 122 Constitutional Law (4 Credit Hours)

An introduction to the United States Constitution. Subjects include the role of the United States Supreme Court, federalism, separation of powers, and individual rights under the Constitution. Particular attention is paid to judicial power and judicial review, national legislative power including commerce power, commerce clause limitations upon state power to regulate, and presidential power and authority in both international and domestic affairs. In addition, the course covers individual rights under the equal protection and due process clauses of the 14th Amendment to the Constitution.

LAW 123 Advanced Partnership Tax (1-2 Credit Hours)

Partnerships continue to be a favored form for conducting business because of their flexibility and flow through status for tax purposes. This course examines a variety of advanced partnership taxation topics including entity classification, drafting income allocations under § 704(b) and (c), allocation of partnership liabilities, disguised sales and other gain deferral provisions, sale and acquisition of partnership interests, and the treatment of distressed partnerships, if time permits.

LAW 125 Sexuality and the Law (2 Credit Hours)

No course description is available

LAW 126 Corporate Compliance Programs (2 Credit Hours)

This is a Skills course. The course will cover the elements necessary to implement a basic compliance and ethics program in a company. Students will become familiar with the basic principles of the Federal Sentencing Guidelines that define an "effective" compliance program. Students will learn the fundamentals of the job of Chief Compliance Officer by working with compliance issues in the media, commercially available compliance training programs and compliance techniques used in major corporations.

LAW 127 Law and Psychology (2 Credit Hours)

For many years, the field of psychology focused primarily on mental illness. But more recently, many psychologists have begun to analyze happiness and to study the ways in which all people, healthy or ill, can increase their enjoyment of life. This course will explore the new field of hedonic psychology, evaluating its methods and examining its findings. We will consider whether legal policy can or should be shaped by these findings in an effort to help people become happier.

LAW 128 Interprofessional Writing and Communication for Hlth Literacy & Hlth Equity (1 Credit Hour)

Students from various disciplines including communications, law, medicine, nursing, public health, and/or social work will learn the fundamental components for good writing and communication with patients. With a focus on low health literacy populations, students will review various documents that patients need to understand for making decisions about their health and wellness, for realizing their health care rights, as well as for ensuring their safety while using health care products. Students will have an opportunity to identify poor communications illustrated within medical appointment details and medication instructions, informed consent documents, medical power of attorney forms, arbitration agreements, and healthcare marketing material. Students will write collaboratively, and problem solve through simulated exercises and hypotheticals to determine how their respective professions can work together for addressing issues of low health literacy and in doing so enhance health equity. Relevant learning outcomes and skill development include: interprofessional teamwork, analysis, as well as written and oral communications.

LAW 130 Transactional Skills Seminar (2 Credit Hours)

The course will examine the lawyer's role in business transactions by looking at examples of two decidedly different transactions - the negotiation of commercial real estate leases and the structure of the purchase, ownership, and operation of a corporate aircraft. The practical skills and knowledge acquired by examining these examples can be applied to virtually all commercial transactions. The class will consider the art of negotiating those transactions - and will focus on the role of the lawyer in those negotiations. We will consider a variety of negotiating strategies and how to deal effectively with opposing counsel who may, or may not, share your particular strategy. In addition, the class will examine a corporate aircraft transaction - with a myriad of parties and opposing interests and regulations - with the goal of appreciating the juggling and balancing necessary to achieve the best result possible. Along the way, we will look at how there is not ONE way to do things, rather there are many ways and many strategies. The rules and processes taught in law school are there to provide guidance; they are not hard and fast rules about the way that a transaction must be done. That's one of the benefits of being a transactional lawyer - the rules are set by the parties as they negotiate. Students will be evaluated on the basis of classroom participation and attendance, a paper, and , in lieu of final exam, a one-on-one negotiation session with the instructor. Regular attendance is expected; if a student cannot attend class, please notify the instructor.

LAW 131 Illinois Criminal Law and Policy (2 Credit Hours)

The course will focus on a substantive review of Illinois criminal law, its origins and evolution. It will also focus on policy decisions and trends that drive changes in criminal laws. While the focus of the course is Illinois centric, the statutes and policies reflect national criminal law and policy trends.

LAW 132 Contracts (4 Credit Hours)

An analysis of the formation, transfer and termination of contract rights and duties, and the legal and equitable remedies available upon breach of contract. This is a Juris Doctor Required course.

LAW 133 Judicial Practicum (2-3 Credit Hours)

The objectives of the course are to hone research skills, learn judicial writing skills, observe the rules of civil procedure in action, follow judicial ethics, and learn the appropriate etiquette in working with a judge and judicial law chambers staff. Students will work in a judicial chambers for 2 or 3 credits (110 hours or 165 hours of work respectively) and also complete the weekly course. The course will focus on building the skills to make this a successful experience by providing research, writing, and ethical scenarios and to translate the experience for future career planning. Students will present on a topic approved by the course instructor related to the judiciary.

LAW 134 Complex Federal Criminal Practice Seminar (2 Credit Hours)

From the convening of a grand jury to the disposition of charges, federal criminal prosecutions involve a series of complex investigative and prosecutorial topics. This class will explore complex issues involved in federal criminal law including corporate criminal liability, the prosecution of public corruption cases, involving foreign and domestic initiatives, and organizational prosecutions utilizing RICO. Taught by an experienced trial attorney, Ms. McClellan (currently an Assistant United States Attorney) the class will analyze issues surrounding the prosecution and defense of complex criminal matters. In the context of corporate criminal matters, the issues analyzed will involve the expansion of the principles surrounding corporate liability, internal and external investigations and whistle blowers after the Dodd-Frank Act. With regard to prosecutions of public corruption, the course will focus on domestic political/public corruption and foreign anti-bribery initiatives pursuant to the Federal Corrupt Practices Act. Complex criminal prosecutions aimed at organizations utilizing RICO statutes and similar remedies will be reviewed and analyzed for their efficacy. The course will focus on issues that arise in the prosecutive stage of these complex matters, beginning with the charging decisions through the disposition of the case. Questions of trial strategy will be examined, as well as, alternatives to trial, comparing and contrasting the remedies available when the defendant is an institution as opposed to an individual.

LAW 136 Law & Catholic Social Thought (2-3 Credit Hours)

On its website Loyola University Chicago defines itself as "Chicago's Jesuit, Catholic university." It also makes clear that Loyola is fiercely dedicated to promoting "social justice." Likewise, in its Mission Statement, the Law School claims to be "inspired by the Jesuit tradition" and that it seeks "to prepare graduates who will be ethical advocates for justice and equity." Did you ever wonder what this means? What is the justice that Loyola claims to support? There are, of course, many ways of defining justice, and many critical perspectives through which law may be examined: Law & Economics, Legal Positivism, Classical Liberalism, Rawlsian Welfare State Liberalism, Legal Feminism, Legal Realism (and its successor Critical Legal Studies) and Critical Race Theory. For each of these schools of thought there is a whole body of literature that addresses the basic questions of jurisprudence: What is law? What is justice? And what is the relationship between the two? What are rights? And where do they come from? How are law and morality alike, and how are they different? Is law simply the exercise of coercive power or is it something more? There is, in fact, an older school of thought from which these others are derived: a tradition that matches them in depth and rigor. The Judeo-Christian tradition has been thinking about questions of law and justice for well over two millennia. Moreover, since the late 19th century, with the advent of industrialization and urbanization and the new social problems brought on by these phenomena, the Catholic Church has been offering its reflections on questions of law and justice in a body of thought known as Catholic Social Teaching. This literature is composed of papal letters (called encyclicals), documents from the Second Vatican Council, and other magisterial texts. In the course we will read samples of this literature as we think about contemporary problems and possible legal solutions: poverty, racism, capital and labor, globalization, war and peace, environmental deterioration, the family, marriage and sexuality, cultural and religious pluralism. The course will not, however, simply be an historical review of abstract concepts and ideas within the tradition. Law is a practical art, and legal concepts and theories have meaning in application. They are best understood when their consequences are laid bare. Thus, in conjunction with the various documents from Catholic Social Teaching described above, students will also read a number of cases that will help them examine the meaning of these ideas in concrete terms. The aim of this two credit course is philosophical analysis and critical reflection. To this end, students will be required to submit a 2-4 page reflection paper every other week. The goal is for students to emerge from the course not only with a better understanding of law and justice, but with an appreciation for what their own beliefs might mean in the practice of law. The option of a third course credit is available for students who are willing to write an additional paper of at least 20-pages.

LAW 137 International Arbitration: Public and Private (2-3 Credit Hours)

This course will familiarize you with what has emerged as the primary means of resolving cross-border and multi-jurisdictional commercial disputes in today's global economy, international arbitration. You will first learn about international commercial arbitration, which is carried out between private companies having disputes over international commercial contracts. You will then focus on international investment arbitration, which is a dispute mechanism provided for by treaty that permits an investor to have recourse to international arbitration when a dispute arises, rather than to the courts of the host country. Throughout the course, you will explore the similarities and differences between international arbitration and the procedures used in common law (i.e. the U.S. and U.K.) and civil law (i.e. most of Europe, Asia and Latin America) systems. You will develop an appreciation for the cross-cultural nature of international transactions and disputes and attain a certain facility with key international arbitration rules, multi-lateral treaties, and arbitration provisions. Through review of relevant court decisions, you will develop an appreciation for the interplay between the arbitral authority and the national courts. You will learn when and why to enter into arbitration agreements as well as how to initiate proceedings and select arbitrators, present evidence and contest and enforce awards. This seminar will be interactive with some mock exercises, including negotiating, drafting, and oral advocacy in addition to class discussion.

LAW 138 Cannabis Law (2 Credit Hours)

This course surveys state and federal approaches to regulation of cannabis. Focus includes medicinal benefits of cannabis, costs of recreational cannabis as well as costs of prohibition, jurisprudential analyses of cannabis law and regulation, the War on Drugs, and the racist history of cannabis prohibition. Course goal: prepare lawyers to respond productively to ongoing challenges to regulation and decriminalization of cannabis. Paper class.

LAW 139 The Art of In-House Counseling (3 Credit Hours)

This course will introduce students to the evolving history, roles and responsibilities of in-house legal counsel. Students will investigate the skills and characteristics that contribute to successful and effective practice as an in-house counsel and explore the similarities and differences between in-house legal practice and outside legal practice. Topics covered during the course will include: the relationship between in-house counsel and his/her client; in-house counsel's role in adding value to his/her organization; advising and counseling clients; fact gathering and investigation; managing an in-house counsel to address a variety of situations in which an in-house counsel would be expected to act. Students also will observe experienced, practicing in-house counsel address similar situations and analyze the factors and considerations that contribute to effectively addressing the situations. Students will be expected to regularly attend and participate in class. There will not be a final exam in this course. Students will be evaluated on the basis of a final project (which will involve a class presentation and a written assignment or assignments) and class participation.

LAW 140 Criminal Law (3 Credit Hours)

This course introduces the elements of crime by teaching principles that apply to many crimes. These principles include the nature of criminal acts and of criminal fault, as well as defenses such as self-protection. Homicide and other specific crimes may also be discussed, as may theories of punishment. The primary materials are statutes – in particular, the Model Penal Code and/or the Illinois Criminal Code. This is a Juris Doctor Required course.

LAW 143 Environmental Justice: Race, Class and the Environment (3 Credit Hours)

This course explores the disproportionate environmental burdens borne by communities of color and low-income people in the United States and the role of law in contributing to these inequities and in addressing them.

LAW 144 Criminal Law Seminar (2 Credit Hours)

Criminal Law Seminar: Sentencing This course examines the modern sentencing system in the states, the federal criminal justice system and internationally. It includes such topics as: the origins and development of sentencing laws and policies; the purposes of punishment; the modern sentencing reform movement; the role of discretion in sentencing and its regulation; mandatory minimum sentencing; sentencing guidelines; race and sentencing; capital punishment; and alternative to incarceration.

LAW 146 Mass Incarceration (2 Credit Hours)

The class covers the rise of the carceral state from the 1970s onward, with a particular focus on the disproportionate impact on Black and Brown people. We trace the roots of the carceral state to slavery and its end, and then move into the war on drugs and war on crime. We will spend the semester exploring the causes of the carceral state (or mass incarceration), its consequences, particularly with respect to families and children and public health, and then we focus on how to address changes to it. Readings vary from poems and law review articles by people who have been formerly incarcerated to scholarship by historians and activists, and political scientists, and a few cases from the Supreme Court. We will have a few guest speakers throughout, as well. There are two short reflection papers assigned (6 pages each) and students are expected to participate in class discussion.

LAW 147 Economics, Empirical Studies & the Law (2 Credit Hours)

This course teaches students to apply economic reasoning and empirical analysis to understanding legal issues. This course highlights the relevance of an economic approach to the foundations of the American legal system, including property, torts, contracts, criminal law, constitutional law and civil procedure. The use of law and economics is not confined to any particular world view or policy position, this course emphasizes the broad range of analytical tools that law and economics and empirical legal studies gives lawyers and legal scholars.

LAW 149 International Intellectual Property Law (3 Credit Hours)

Examines the growing importance of intellectual property in the international context. Covers the scope of protection granted trademarks, copyrights and patents in foreign jurisdictions so that effective comparisons can be made between foreign and domestic law. Explores the scope and substance of international treaties. Strategies for obtaining cost effective intellectual property protection in the global economy will be examined.

LAW 150 Applied Civil Procedure (3 Credit Hours)

This course will give students practical experience with common pre-trial civil litigation tasks they will encounter in private practice. The instructor's principal goals is to expose students to the "nut and bolts" of pleading, discovery and fact gathering - with particular emphasis on writing - so that they will be more effective junior lawyers on their first day or practice. Throughout the semester, each student will represent a client in simulated litigation of a fictional civil case in which one of their classmates is opposing counsel. Class time is devoted to discussing how to prepare and complete the tasks that arise in litigation generally and in the mock litigation in particular. As a result, students become familiar with the Federal Rules of Civil Procedure and obtain actual, albeit simulated, experience drafting pleadings, discovery and other writings. Specifically, this course will address: (i) conducting faculty investigations preceding and during litigation; (ii) drafting initial pleadings, such as complaints, answers, affirmative defenses and counterclaims; (iii) drafting and responding to written discovery requests; (iv) locating and producing documents/electronically-stored information, as well as the practical considerations pertaining thereto; (v) preparing for depositions of corporate representatives under Federal Rule of Civil Procedure 30(b) (6); (vi) handling discovery disputes; and (vii) negotiating and drafting settlement agreements. The instructor stresses both the requirements of the applicable procedural rules as well as more subjective topics such as civility when dealing with opposing counsel, courtroom demeanor and interaction with clients and more senior attorneys.

LAW 151 Housing Law and Policy in United States (2 Credit Hours)

The course includes the study of public and private housing, with reference to federal and state constitutional and statutory law. In 1949, Congress declared the goal of a "decent home in a suitable living environment for every American family." However, more than 60 years later, over 95 million Americans confront serious housing problems or have no housing at all. Students will gain an understanding of the history of housing law, the lack of adequate housing in the United States, the consequences of inadequate housing, as well as the programs and legal tools designed to meet housing needs. Students will examine various programs designed to facilitate access to decent and affordable housing and develop strategies for addressing the housing crisis. Each student will prepare a seminar paper (or series of papers) on an aspect of housing as well as present in class on that topic.

LAW 152 Property (4 Credit Hours)

The study of the legal principles governing intellectual property, personal property and real property, including the study of conveyancing, co-ownership, donative transfers, eminent domain, estates and future interests, landlord-tenant, land use controls and title assurance.

LAW 153 Wills and Trust Drafting (2 Credit Hours)

Pre-requisites: Estates

This is a Skills course. This is a hands-on, participative skills course in which students will learn how to properly structure and draft basic wills and trust documents, both testamentary and living. Practical tools, such as, engagement letters and client questionnaires, will be discussed and developed to give insight into the active practice of estate planning which the student can utilize in the work world. Estates is a prerequisite. Estate and Gift Tax is not a prerequisite. Students who take this class may NOT take estate planning. You may take Wills and Trust Drafting OR Estate Planning, but not both. Final grade will be based on class participation and drafting assignments over the course of the semester. Class size is limited to 16.

LAW 154 Natural Law and Natural Rights (3 Credit Hours)

The purpose of this course is to introduce students to the role of natural law in the development of the law, with an emphasis on the position of natural rights in American Law and International Law. The specific context of our examination will be the natural rights of the human person. Three interrelated objectives of this course are (1) to develop an understanding of what the natural law is and what it is not; (2) to dispel the skepticism (myths) about the role of natural law; and (3) to demonstrate the critical role in the evolution of natural human rights in American Law and International Law. Several particular rights will be examined to sharpen the focus of our investigation and discussion. Our readings will consist of primary and secondary sources compiled into a reader that will be made available in electronic form. There is one required book that will have to be purchased, viz. Heinrich Rommen's "The Natural Law."

LAW 155 Law and the Subprime Debacle (2 Credit Hours)

Beginning in late 2007, a rash of defaults in subprime mortgages triggered a historic credit crisis. This crisis has now resulted in a historic global economic contraction. This class will examine the role of law in precipitating and propagating the crisis. Financial regulation, corporate governance, globalization, and housing law will be examined to determine the role of each in creating the crisis and amplifying the crisis. Specific solutions will be offered. Finally, an institutional assessment of law and regulation will be undertaken to consider broader reforms.

LAW 156 Abolition and Movement Lawyering (2 Credit Hours)

This class is designed to be a space for reimagining our world, and how we, as lawyers and future lawyers, can work to dismantle the systems of White supremacy and oppression that incarcerate, punish, and harm Black and brown people in the U.S. while failing to prevent, address, or repair harm or facilitate accountability. Abolition is not just about the dismantling or absence of systems, but as Ruth Wilson Gilmore states, abolition is about presence. Movement lawyering/community lawyering is about taking direction from directly impacted communities and from organizers, as opposed to imposing our leadership or expertise as legal advocates. What can we work to build that is life-affirming instead of life-destroying, that is in solidarity and not another manifestation of the underlying problems? This class will discuss the difference between reform and abolition, the history of abolitionist organizing in Chicago, and the historical and current role of lawyers in social movement.

LAW 157 Persuasion (3 Credit Hours)

Starting with basics from the Greeks, this course develops oral persuasion skills, including effective performance, writing for speaking, and handling difficult speaking situations. Assignments will include presenting persuasive speeches, persuading tough audiences (such as clients), and analyzing famous speeches for what made them effective. Students will give a short speech at almost every class and critique one another, so attendance is mandatory.

LAW 159 Tax Policy and Inequity (2 Credit Hours)

The objective of this course is to explore the history, evolution, and racial impact of tax policy in the United States. Students will explore the various theories of taxation's role in modern day society; examine the purpose and intent of tax on incomes, consumption, "sins" and assets; highlight the role interest groups play in tax policy and discuss the disparate impact such policy has on communities of color (namely black and brown). Students will be tasked with learning and discussing the intricacies of federal and state and local tax law. They will also write a tax policy that seeks to encourage and/or discourage a societal behavior, which will be discussed and analyzed from various stakeholders' perspectives.

LAW 160 Education Policy and Practice: Counseling the School District (3 Credit Hours)

This course will allow those interested in the practice of education law to become familiar with typical and unique issues that require contact between school districts and their attorneys. Students will work individually and in teams to identify resolutions to school district issues. The relationship between attorneys, boards and administration will be investigated. In class sessions are three hours per week to cover practical situations and to develop skills tailored to the practice of education law. The course will focus on typical scenarios, as well as the increasing number of, and breadth of, issues requiring legal assistance.

LAW 162 Torts (4 Credit Hours)

A basic course in the substantive law governing compensation for injuries to property and to the person. Considered are intentional wrongs, negligence, malpractice, products liability and strict liability; invasions of personal integrity and emotional well-being; injury to tangible and intangible rights in property; liability insurance and alternatives; and damages. Other risk-bearing alternatives are considered and contrasted with the traditional common law theories. This is a Juris Doctor Required Course.

LAW 164 Mergers and Acquisitions (3 Credit Hours)

This course will introduce students to the issues that arise in merger and acquisition transactions. Students will study the legal framework within which merger and acquisition transactions and the negotiation and documentation of such transactions take place. Students will analyze the considerations involved in selecting various structural alternatives for merger and acquisition transactions, examine the dynamics of the merger and acquisition transactions negotiation process, investigate the various stages of merger and acquisition transactions and focus on the lawyer's role in adding value to such transactions. Students will also have the opportunity to study, evaluate, draft and/or negotiate various types of documents that are commonly encountered in merger and acquisition transactions (such as, confidentiality agreements, employee retention agreements, investment banker engagement letters, letters of intent and purchase and sale agreements.) There will be a take-home final examination. Students taking this class would benefit by having previously taken Business Organizations and Securities Regulation; these classes are not, however, required to take the course.

LAW 165 Comparative Products Liability (2 Credit Hours)

Comparative Products Liability will use products liability as the vehicle to learn comparative law in general, and, in particular, to learn about how product-related harms are dealt with in the U.S., EU, the UK, and Italy. The course will include an Introduction to Products Liability & Safety Law but will also analyze Products Liability Law in the U.S. prior to section 402A of the Restatement and in the EU, UK, and Italy prior to the EU Products Liability Directive; the Adoption of Strict Liability in the U.S. and Europe; Strict Liability in Europe after the Directive; some Basic Rules under the 402a, the EU Directive, the CPA & Italian Law; and finally, a discussion of The Future of Products Liability and Safety.

LAW 166 Education Law Practicum (1-4 Credit Hours)

This seminar addresses substantive education law issues and skill development tailored to the practice of education law. Topics to be explored may include systemic reform litigation in education law, special education litigation, school discipline reform, the role of implicit bias in school decision-making, litigation related to trauma-informed practices, bullying litigation, and receiving feedback. This seminar may optionally be paired with a field placement in the area of education law. Placement options include local organizations, school districts, law firms and government agencies. Students must separately register for the field placement component for 1-3 credits (Law 166-002). No permission is required for the seminar portion of this class. Students may enroll in this seminar without registering for the field placement component. Students registering for the field placement component (166-002) must enroll in the seminar component (166-001).

LAW 170 Race and Real Estate (2 Credit Hours)

The objective of this course is to understand the laws and policies, politics and financial systems in our country that established and sustained segregation, creating our cities, black slums, ghettos and urban neighborhoods. The course would address federal, state and local legal systems, with particular emphasis on Illinois and Chicago. It would cover the Fair Housing Act as well as the Kerner Report; FHA policies, including the Underwriting Manuals that led to redlining; zoning laws and urban planning; public housing and HUD's HOPE VI program; the legality of restrictive covenants; as well as case law related to each of these areas. And finally, this course would address where this has led us to today: the policies, laws and regulations that have attempted to reverse segregation, and those that continue to allow discrimination to continue by exploiting and financially devastating minority neighborhoods.

LAW 171 Comparative Criminal Procedure (1-2 Credit Hours)

Comparative Criminal Procedure focuses on the salient points of comparison between the American adversarial system of criminal justice and the European civil law tradition, historically called an inquisitorial system. These points of comparison include the role of the judge/magistrate; the prosecutors role and plea bargaining, the role of defense counsel, the role of evidentiary and constitutional rules of exclusion of evidence, and, as an example of the substantive criminal law, the law of rape. Course materials include a short, thoughtful critique of the American system, "Trials without Truth", by Professor William Pizzi of the University of Colorado; and a course pack of law review articles. The format is a mixture of lecture and classroom discussion, including role play exercises in witness examination and argument, at trial and at motions to suppress. Three Italian guest lectures are expected to participate as in the past: a prominent magistrate; a defense lawyer/law professor, and a prominent literature/film scholar whose focus will be on the current status of women in Italian society (relevant to our consideration of the law of rape).

LAW 173 Advanced Education Law Practicum (1-4 Credit Hours)

This course is for students who have already completed the Education Law Practicum seminar course and field placement. Students will build on the knowledge and skills gained through the Education Law Practicum by engaging in a second field placement, either with an organization or firm where they have been placed previously or with a new education law-related placement. More information about available placements is available on Pearson. The application form is available here. The seminar component of this class will be conducted in-person for 6-8 sessions; the days and times will be selected based on instructor and student availability. This course includes an instructional component that includes seminar discussions and individual meetings with a faculty member to develop skills, enhance understanding of ethical and other practice issues, and discuss cases and legal issues in students field placements. The class aims to deepen students knowledge of current legal and policy issues related to educational inequity, with a focus on race, ethnicity, disability, gender, and their intersection and the role of lawyers in addressing educational inequities. Students have the option to work in one of a variety of local placements where they will work under the supervision of practicing attorneys. Students may choose to provide either: (1) direct representation and legal assistance to children and families in need of special education services; or (2) representation of school districts in education law matters. Students may also work on educational policy matters. Placement options include local organizations, school districts, law firms and government agencies. Students may participate in Loyola's Educational Advocacy Project as an alternative to an external field placement. Students may register for 1 to 3 credits, depending on their level of time commitment to the field work and agreement of the placement supervisor.

LAW 175 Natural Resource Law (3 Credit Hours)

This is the broad survey course on Natural Resources Law. We will explore the protection and multiple uses of natural resource systems; regulation of federal public lands; forests; the National Park System; the Wilderness Preservation System; tribal lands; fish and wildlife management (including the Endangered Species Act and other sources of protection for fisheries and marine mammals); and rangelands. There will be a take-home final exam and in-class presentations.

LAW 176 International Trade Law (1-3 Credit Hours)

The primary goal of this course is to learn the fundamental or basic principles of the international trading system contained in the General Agreement on Tariffs and Trade (GATT) and the treaties of the World Trade Organization (WTO). Students will learn how rules of the GATT/WTO legal system are made and how they are used in domestic legal systems such as the United States. There are five additional learning goals in this course. First, students will gain factual knowledge about how the WTO is run and how disputes are resolved among WTO member countries. Second, students will learn to analyze and critically evaluate how GATT/WTO legal rules are applied in specific cases with a view to gaining and improving their problem solving skills in international trade law. Third, students will gain a broader understanding of how law works in an increasingly global and heterogeneous world and how the proliferation of mega-regional trade agreements and trade wars and COVID-19 have affected the global trading regime. Fourth, the course will promote student interest in learning more about international law on their own including where to find the resources they need for further study. Finally, the paper requirement in the course will develop writing and argument skills.

LAW 177 Introduction to Chinese Law (1-3 Credit Hours)

This variable-credit course provides students with an overview of the modern Chinese legal and political systems and lawyering in China. With an economy and society undergoing rapid change, China is facing many challenges as it makes the transition from a socialist to market economy with Chinese characteristics. The course is divided into two components (with a little Chinese culture, language, and survival tips sprinkled in as appropriate). Spring semester component (1 credit): Adopting a "law-in-action" approach, this course will introduce students to the philosophical and historical foundations of Chinese law and China's present legal system, sources of law, and legal/political institutions; it also will explore specific substantive areas of law in modern China, including constitutional law, civil and criminal law and human rights. Beijing campus summer component (1 credit, compulsory for 1Ls): introduction to Chinese commercial law, focusing on laws applicable to US companies doing business in China, and the pitfalls of which international legal practitioners should be aware when representing clients doing business in China or with China companies. Specific substantive areas of law include FDI, operational issues, due diligence, IP and dispute resolution. Note: students enrolled in the two-credit option may interview for one of two summer internships at Sheppard Mullin Richter & Hampton's Beijing campus. Other Beijing internships may be available. [Study Abroad China]

LAW 178 Antiracism Under Law (2 Credit Hours)

This course will examine the role of the law in replicating our nation's racial hierarchy as manifest across indicia of socio-economic well-being. The class will also analyze various legal means for disrupting this hierarchy. In particular the court will assess the underlying legal dynamics of all material racial disparities along with legal solutions for the diminution of such disparities. The course will take a social justice approach to the continued influence of race on social well-being. As such, the course will focus on the legal system's ability to secure broad-based and sustainable human development, and to actualize the full potential of the entire US population. The course will consider theories suggesting that law should promote the common welfare and secure liberty for all.

LAW 179 The Law of Jury Selection (2 Credit Hours)

This course will focus on the various legal and practical considerations that attorneys must face both during and following the jury selection process. The course will cover: constitutional issues; what must be proven to establish bias; the role of trial consultants (particularly in high profile cases); challenges to the array, challenges for cause and peremptory challenges; timing and procedural limitations; the significance of group dynamics; questioning techniques and the use of questionnaires; problems at trial and during deliberations; and the extent to which the parties may be entitled to examine prospective jurors in various areas of inquiry (such as occupation, education, knowledge of the case, legal and government experience, religious and educational beliefs). Students will participate in mock voir dire, prepare a draft questionnaire, and complete a final paper (7-10 pages).

LAW 180 Comparative Consumer Law (1 Credit Hour)

This course will be taught by Illinois Attorney General Lisa Madigan, assisted by Dean Jean Gaspardo. The Attorney General is the state's chief legal officer and is responsible for protecting the public interest of the state and its people through advocacy, legislating, and litigating. Protecting consumers and businesses that have been victimized by fraud, deception or unfair competition is one of the primary functions of the Attorney General. Her office receives 25,000 consumer complaints each year. In her many years of service since 2003, Attorney General Madigan has gained a solid, national reputation for prosecuting offenders perpetrating fraud against Illinois consumers. Most recently, she paired with a couple of other mid-west states Attorney Generals to prosecute the many big banks [¿too big to fail¿] for their predatory lending tactics, recovering billions of dollars. The course will focus on Consumer Law, including the role of the state in enforcing legislation protecting consumers. The course will also address the role of private remedies in compensating victims of consumer fraud and abuse. The statutory and common law protections for consumers, under Illinois law will be compared with the consumer protection regimes in Italy and in other countries. This is a Perspective Elective course.

LAW 181 Supreme Court Seminar (4 Credit Hours)

The aim of this seminar is to provide students with a deeper understanding of the Supreme Court of the United States, its personnel and work, and the important role it plays in American government and society. Students will consider the processes by which Justices are appointed to the Court; the standards and processes the Court uses to choose cases for review and decision on the merits from among the multitude decided each year by the lower courts, leading to the creation of precedents of national applicability; the ways in which advocates endeavor to persuade the Court that it should (or should not) grant review in a particular case; and the ways in which the so-called "merits cases" (those in which review has been granted) are briefed, argued, and decided. A substantial part of the semester will be devoted to the study of a small number of cases currently pending before the Court, either as candidates for review or for decision on the merits. Students will learn about the work of the Court by studying briefs that were actually filed and transcripts or recordings of oral arguments. The class will also discuss cases by simulating the Court's conference. Students will be required to write a series of short papers and a judicial opinion in one of the merits cases to be discussed.

LAW 184 Advanced Litigation Skills (2 Credit Hours)

Learning litigation skills task-by-task can leave the young practitioner with little guidance on how to form the overall strategy necessary to develop and present an effective civil case. While covering a wide range of specific skills, including opening statement and closing argument, the careful researching of local rules, techniques for examining witnesses, techniques for oral argument and applying a structured approach to settlement negotiations, this course will emphasize the aspects of these skills that support an overall civil litigation strategy. This course will require students to review a variety of materials in preparation for class, to participate in in-class exercises and to submit written work that displays the learning acquired through the in-class exercises. Evaluation of each student's performance will be based primarily on the student's written work.

LAW 185 Business and the Law (2 Credit Hours)

The majority of practicing lawyers represent businesses or individuals with business or investment interests. Unfortunately, the majority of law students have had limited exposure to business law and the first year curriculum offers few opportunities to explore this area. This course is intended to expose first year law students to the fundamental issues and perspectives that pervade business law. The goal is to make these topics accessible to all students, particularly those who have not taken many, if any, undergraduate courses in business, economics or accounting. The course will be divided into three segments. The first segment, entitled "The Law of Business," will introduce students to fundamental business and tax law concepts as well as transactional issues that business lawyers confront. These issues include the alternative ways of organizing a business (corporation, partnership or limited liability company) and the alternative ways of structuring a business acquisition or merger. The second segment, entitled "The Ethical Practice of Business Law" will explore the pressures on new lawyers to conform to an existing culture, how lawyers get into trouble, and how business law can be practiced in an ethical manner. The third segment, entitled "Developing a Financial Mindset" will introduce planning tools (e.g., the time value of money, compound interest) and the planning process in the context of both personal financial planning and business planning. Certain classes may be taught with other professors and practicing lawyers. There will be no final exam in this course. Students will be required to take a mid-term exam and to submit a short final paper. Class participation may also be taken into account. Students will also be expected to read the Wall Street Journal on a daily basis. This course is available to first-year students only.

LAW 186 Advanced Issues in Family Law (2 Credit Hours)

Learn everything you need to know to be a successful associate in a domestic relations firm. Most family law firms have little or no training programs. Theoretical knowledge of the law is not enough to step into a firm and start practicing. This course is designed to teach you all of the practical basics Partners want you to know as an Associate family law attorney. This course addresses the practical application of the Illinois Marriage and Dissolution of Marriage Act and related statutes. Topics will focus on developing the skills necessary to excel in domestic relations practice such as strategic planning for a dissolution of marriage case, complex financial analysis, developing and maintaining the attorney client relationship, and practical drafting skills. This is a Skills course.

LAW 190 Legal Writing I (2 Credit Hours)

Students read and analyze legal authority and learn how to apply the legal authorities to particular fact situations. Through a series of legal memoranda writing assignments, students develop their analytical and writing skills. Students are taught legal research methods through written exercises, research memos, and lectures. Second semester, the course builds on the basic writing, analysis, and research skills students have learned first semester and introduces persuasive writing skills. Students also learn how to present an oral argument to the court. Computerized research techniques are included in the course. In order to provide significant opportunities for instructor feedback, the first-year writing classes are organized into sections of approximately twelve students. Each section is staffed by both a legal writing instructor and a student tutor. This is a JD Required Course.

LAW 190R Basic Legal Research (0 Credit Hours)

This course is an introduction to the tools and sources of legal information you will need during your first year of law school and beyond. This course is a pass/fail component of Legal Writing I.

LAW 192 Legal Writing II (2 Credit Hours)

Students read and analyze legal authority and learn how to apply the legal authorities to particular fact situations. Through a series of legal memoranda writing assignments, students develop their analytical and writing skills. Students are taught legal research methods through written exercises, research memos, and lectures. Second semester, the course builds on the basic writing, analysis, and research skills students have learned first semester and introduces persuasive writing skills. Students also learn how to present an oral argument to the court. Computerized research techniques are included in the course. In order to provide significant opportunities for instructor feedback, the first-year writing classes are organized into sections of approximately twelve students. Each section is staffed by both a legal writing instructor and a student tutor. This is a JD Required Course.

Course equivalencies: LAW 192 / LAW 591

LAW 193 Diversity and Inclusion: A Professional and Social Responsibility (2 Credit Hours)

This 2 hour course will examine the legal profession which remains one of the least diverse of American professions. Lawyers have unique and varying roles as counselors, advocates, confidants, government officials, adjudicators, and civic leaders. In this course, students will have an opportunity to learn about the legal profession's diversity and inclusion history and challenges, organizational and individual roles and strategies, and current research. This course will engage students with lectures, guest speakers, group discussion, and readings—all materials will be provided by instructors. There will be no cost to the students for materials utilized in this course. There will be a final presentation where students can discuss and elaborate on important topics in the legal profession. Students will gain a deeper understanding of how diversity and inclusion efforts intersect with professional responsibility and its impact on social justice.

LAW 194 Bar Exam Writing Skills (1-2 Credit Hours)

The Bar Exam Writing Skills courses focus on refining your memorization, analytical and writing skills and all skills that are necessary for the bar exam. Whether you need practice writing essays or synthesizing the facts and law and producing a legal work product, these courses will help you master your test-taking skills. This is a Bar course.

LAW 195 International and Comparative Antitrust (2 Credit Hours)

This module explores the internationalization of competition law in the context of globalization and international trade. It examines the regulatory framework governing competition among firms internationally, identifying and analyzing the existing limitations and challenges in this regard. In particular, it looks into rules governing extraterritorial jurisdiction, discovery, recognition and enforcement of judgements in the international context. It also explores issues pertaining to merger review, trade and competition interface and the existing cooperation between antitrust agencies. The course is comparative in nature and focuses predominantly on US Antitrust and EU Competition Law. No prior knowledge of competition law (antitrust) or international economic law is assumed. Assessment: Class participation (10%), two small class presentations (10% each, in total 20%), 6500 words essay (70%). Note: For the purposes of this module students may be required to watch Hollywood movies and YouTube clips!

LAW 196 Alternative Dispute Resolution Workshop (1 Credit Hour)

One credit workshop focusing on dispute resolution in an employment setting. Workshop takes place over two days. Both the first and second day of the workshop involve resolution of an EEO complaint in full length simulations – the first day using mediation, and the second day resolving the dispute using arbitration. Students are expected to read and research in preparation for both days of the workshop. Participation in the one credit workshop requires attendance in an evening Human Resources and Employment Relations (HRER) course. Students will be assigned to teams and will begin working with HRER team members at this evening session. Each workshop day is followed by a debriefing session. All participants will be observed and evaluated by employment attorneys skilled in ADR. Enrollment is limited to students simultaneously enrolled in Professor Sacha Coupet's other ADR course and students who are seeking an intensive mediation and arbitration experience in addition to that provided by the foundational ADR course.

LAW 197 Advanced Business Organizations including a Comparative Perspective (2 Credit Hours)

This course focuses on U.S. corporate law and governance. It begins with an introduction to the different legal issues encountered in business entities across jurisdictions: agency problems between (1) directors and shareholders, (2) majority and minority shareholders, and (3) shareholders and other stakeholders (employees, creditors, the State, etc). It then turns to the three agency problems as they arise in private or publicly held corporations. This covers the questions of allocation of powers between shareholders and the board, directors' elections, executive compensation (say-on-pay), self-dealing transactions, going private transactions, insider trading, mergers and acquisitions, fiduciary duties and participation of other stakeholders in the corporate governance. For each topic, we will define the legal issues involved and examine how U.S. statutory and case law respond to them. We will also take a comparative perspective to analyze how other jurisdictions respond to the same legal issues. The comparison will thus provide students with a better understanding of American law of corporations. The course covers the most recent legislative and regulatory initiatives as well as the most recent case law pertaining to Corporate Governance.

LAW 198 The Fundamentals of School Law (2 Credit Hours)

This course provides an overview of statutory, administrative and case law affecting Illinois school districts. Legal issues addressed include: powers and duties of the school board; compliance with open records and open meetings laws; teacher tenure, evaluation, reduction-in-force, and for cause dismissal; collective bargaining and labor dispute resolution; legal aspects of supervision, teacher/school liability, common law and statutory immunities; mandated child abuse reporting. Student issues include state law requirements pertinent to residency; discipline, drugs/weapons offenses, suspension and expulsion; federal and state student confidentiality laws.

LAW 199 Business Valuation (2 Credit Hours)

Attorneys play an active role in business transactions every day in connection with mergers and acquisitions, estates and gifts, divorce, filings with the SEC, etc. This includes attorneys who are in private practice or in with a company. Understanding business valuations and financial statements form a cornerstone of most of these transactions. In fact, the business world today and the financial work involved demands that today's lawyer understand the value and financial reporting of a business. This course will help attorneys to better understand the methodology and techniques involved in business valuations. This will also include basic financial statement analysis. Topics will include the proper standards for valuation, valuation methodology, cash flow analysis, financial analysis techniques, financial reporting issues, international standards, and specific uses of valuations.

LAW 200 Emerging Issues in Public International Law (1 Credit Hour)

Over the past several decades, largely within the context of international organizations, the global legal community has faced complications posed by the threat of terrorism and the reemergence of genocide. As a result of these developments, there has been a reexamination of the traditional role of the sovereign state as the constitutive element of public international law. Consequently, there is an emerging trend to regard, at least by some, the need to augment the role of the sovereign state with that of the international organization to respond to these new global challenges. A principle illustration of this is the concept of the "responsibility to protect". Readings will be taken from primary sources (especially documents of international organizations) as well as contemporary secondary sources, principally scholarly articles. Students will be required to purchase a short book that introduces the major topics of public international law. NOTE: This course is available as a 5th credit (ungraded) and only to Loyola University Chicago students because it continues as a research practicum in Chicago after the program. Non-Loyola students are welcome to sit in on the lectures.

LAW 201 Academic Tutor (2 Credit Hours)

Academic tutors assist first-year students with their doctrinal courses. This assistance includes holding office hours, reviewing outlines, and conducting skills workshops. Tutors are selected through an interview process. Academic Tutors receive up to two hours of ungraded credit for each semester in which they tutor.

LAW 202 Human Trafficking Seminar (2 Credit Hours)

The sexual exploitation and trafficking of minors has reached a crisis point, both in the United States and abroad. The United States Congress has responded to this ever-increasing threat by passing extensive legislative enactments aimed at deterring this pernicious activity, providing severe - and often controversial - punishment for those who engage in it. While federal and state prosecutions in this area are at an all-time high, law enforcement and prosecutors continue to miss critical opportunities because they fail to fully understand the nature of the threat, and lack a solid grasp on the integrated arsenal of statutory tools at their disposal. Similarly, members of the judiciary, as well as victim advocates and pretrial service officers, may appreciate the laws on the proverbial books, but often lack familiarity with the sophisticated means employed by organized criminal group and the role of public corruption involved in the large-scale exploitation of children. They also misunderstand the rationalization through which individuals engaged in the exploitation of children tend to self justify their conduct, and have never confronted the statistical realities challenging the belief in meaningful rehabilitation of sex offenders. Put simply, although the complex and inter-related legislative anti-exploitation and anti-trafficking framework is now the firmly established law of the land, its theoretical and practical nuances are widely misunderstood, and indeed are all too frequently not understood at all, by the very professionals entrusted with the difficult task of protecting humanity's most vulnerable. This seminar will start with the statutory analysis rendered more comprehensible through the vehicle of real-world examples from the experience of Judge Kendall who will explain the history and present-day reality of the federal response to child exploitation. The seminar will analyze the various laws that govern the roles of the stakeholders: prosecutors, defense attorneys, judges, immigration officials, pretrial services officers, and victim advocates. The seminar will further explore all of the victim issues that make these cases complex and challenging. Students will explore victims' needs, rights, and opportunities for redress including restitution and expungement of criminal records. Students will hear first hand from federal agents who have prosecuted human trafficking cases; will see and hear the evidence presented to federal juries, will hear from a victim of the crime, and will learn from those victim advocates who seek to redress the harms inflicted upon victims. The seminar will span two days and have multiple speakers and employ an interactive question and answer format. Students will be required to submit a 15 page paper on a topic of interest from the seminar for a final grade. This is a Skills course.

LAW 203 Bar Examination Workshop (0 Credit Hours)

This class is designed to help students develop writing skills that are essential for success on the essay portion of Bar Examination. It is structured as an intensive, interactive writing workshop.

LAW 204 Adoption Law Seminar (2 Credit Hours)

This is a seminar course that will give the student an overview and basic understanding of the fundamental legal principles of adoption, as well as the different types of adoption, such as domestic agency, private, international, foster care and relative. Related issues in reproductive technology will also be explored including surrogacy, donor gametes (egg and sperm donation) and embryo donation. The class will feature role-playing as well as guest speakers to give the student different perspectives on adoption and reproductive technology. Students will draft the pleadings for a simple adoption, attend adoption court, and argue the merits of a contested case.

LAW 205 Video Game Law (2 Credit Hours)

This seminar will examine the varied legal issues that have spawned (and continue to spawn) in the video game space. Still a relatively new industry that continues to evolve at a breakneck pace, video games require lawyers to address substantive areas of law in new ways, particularly copyright and trade. This course will be taught at IITChicago-Kent Law School.

LAW 206 Sex Trafficking: International Comparative Law (1 Credit Hour)

This class will examine the ways countries attempt to regulate sex trafficking. This class will compare and contrast the Nordic and Dutch models of sex trafficking legislation. This class will engage a comparative analysis of each of the aforementioned nation's attempts to regulate sex trafficking, as well as relevant statistics.

LAW 207 Internet Speech Seminar (2-3 Credit Hours)

The course will explore First Amendment jurisprudence as applied to Internet communications as well as the regulation of Internet content in such contexts as incitement, speech that promotes or facilitates criminal acts, true threats, matters relating to national security, obscenity, indecency, and child pornography. Other topics covered include on-line defamation, including immunities under Section 230 of the Communications Decency Act and claims involving anonymous communications, privacy interests, data mining, on-line profiling, as well as regulatory and statutory approaches to privacy protections. Some attention will be paid to copyright and trademark claims, disputes relating to domain names, and the Digital Millennium Copyright Act. This course will be a 2 hour course with an examination. Students interested in writing a paper may do so for an additional hour of credit. This is a Perspective Elective course.

LAW 208 Advanced Criminal Law (2 Credit Hours)

In this course, you make the choices that lawyers make in real-world cases. We break down how to apply statutes to fact patterns in a repeatable, step-by-step method, using excerpts from the Model Penal Code. We also hone skills such as eliminating errors in writing. Finally, we question some of the core values underlying our laws. There is no exam, and the grade is based primarily on class participation and on a final presentation in which you discuss a topic of your choice.

LAW 209 Law, Life and Jesuit Spirituality (2 Credit Hours)

Drawing from their legal and personal experiences the students will actively participate in this seminar styled course which examines complementary articles, films, Jesuit documents and Sacred Scripture as objective criteria for their personal reflection and class discussion. The goal of the course is to formulate and hone the skills of reflection, meditation and contemplation as means of developing a spirituality garnered from a Jesuit perspective. Students will be expected to present and lead classroom discussion, submit a brief weekly reflection paper, and present a summary at the end of the course. (Costello)

LAW 210 Evidence (4 Credit Hours)

An evaluation of the rules used to present information to a fact finder in a trial. The three primary units are the rules of relevancy, the rules governing witnesses, and the rule against hearsay. In addition, time is spent on privileges, writings, and demonstrative evidence. The Federal Rules of Evidence provide the focus. This is a Bar course.

LAW 212 Civil Rights (2 Credit Hours)

Pre-requisites: Constitutional Law

The course will focus on the post Civil War constitutional amendments (13th, 14th and 15th Amendments) and the various federal civil rights statutes that have been enacted thereafter in both the 19th and 20th centuries. These laws as a whole are designed to guarantee that all Americans receive equal treatment under law.

LAW 213 Canon Law and Catholic Health Care (2 Credit Hours)

According to the Catholic Health Association of the United States, there are Catholic health care systems and facilities in all 50 states, providing acute care, skilled nursing and other services including hospice, home health, assisted living and senior housing. Over 15% of all hospital beds are operated by Catholic health care systems. Catholic health care supports over 20% of the hospitals in 24 States, and more than 30% of all hospitals in eight States. Catholic health care must comply with both civil law and ecclesiastical law. Knowledge of the Church's own legal system, known as canon law, and how it interacts with civil law is essential for lawyers and administrators responsible for the management of ecclesiastical entities such as Catholic hospitals and health care systems. Examples of specific issues would be in the areas relating to Catholic identity, sponsorship, mergers and joint ventures involving Catholic health care institutions; incorporation and tax-exempt status of religious organizations; the acquisition and sale (alienation) of ecclesiastical property; wills, estates, bequests and gifts involving ecclesiastical goods; liability for clergy and employee misconduct; immigration law aspects of foreign religious workers; and the interface between government regulations and the Church's ethical and religious directives. Moreover, the Ethical and Religious Directives for Catholic Health Care Services issued by the United States Conference of Catholic Bishops present the theological principles that guide the Church's vision of health care. This course will examine in detail the two-fold purpose of the Ethical and Religious Directives: first, to affirm the ethical standards of behavior in health care that flow from the Church's teaching about the dignity of the human person, and second, to provide authoritative guidance on certain moral issues that face Catholic health care today. Canon Law and Catholic Health Care should be of particular interest for law students and business students interested in the management of Catholic health care institutions. This course will be conducted as a seminar in which students will be invited to write a research paper and make a classroom presentation on some issue of canon law and Catholic health care.

LAW 214 Race and the Law (2-3 Credit Hours)

This course covers interdisciplinary, critical perspectives on race and racism and the roles of law and history in shaping the meanings of race in the United States. We will study the histories of the major racialized groups in the United States: African Americans, Indians, Latinos/Latinas, Asian Americans, and Whites. We will also study the differing implications of enslavement, conquest, colonization, and immigration. We will explore how race and racism play out in selected areas such as equality, education and crime and explore significant current events and findings such as: important studies of implicit bias; the Voting Rights Act and allegedly race-neutral restrictions on voting; disparate treatment of minorities in the criminal justice system; and demographic changes and their implications. I expect each student to complete a 25-page research paper on a subject of her choice related to the course. I will work with you to develop a topic and to organize your research in productive ways. Your final grades will be based primarily on your papers, together with your preparation for and participation in class. I.E., you must also do the reading for the course to get anything out of it. There is no final exam in this course. This is a Skills course.

LAW 215 Domestic Violence Practicum (1-3 Credit Hours)

The Domestic Violence Law Practicum provides students with a live-client experience (LCE) through the provision of legal advice and brief services to families served by supervised visitation-exchange centers as part of the Justice for Families program. Student LCE work will be supervised by an experienced domestic relations attorney. Students who participate will be required to attend a seminar designed to complement the LCE work. Students will gain experience with a range of lawyering skills including client counseling, case planning, and written and oral advocacy. The practicum will provide students with training on the substantive law of domestic violence, family law and other areas of law that are likely to impact clients served by the supervised visitation centers. Supervised visitation center clients will sign up for advice and counseling sessions with law students on weekends and possible weeknight appointments. Parents who are utilizing any of the supervised visitation centers will need advice and brief service regarding modification or adjustments to the visitation related remedies in their Order of Protection. Any motions which follow this limited pro se support are filed on a self-represented basis and will not include student court appearances. Referrals for legal representation will be offered in instances in which this is appropriate.

LAW 216 Women and Leadership (2 Credit Hours)

Women & Leadership is a one credit, seven week seminar course for law students that examines the obstacles (internal and external) that prevent women from reaching leadership positions in proportional numbers. Over the course of seven weeks, students engage in dialogue in response to assigned readings and self-assessment tools. Students also hear from female leaders working in different areas of legal practice who will discuss their experiences and the decisions that helped shape their careers. Grading is based on participation and a final paper.

LAW 217 International Climate Change Policy (1 Credit Hour)

Anthropogenic climate change has become one of the most significant environmental, economic, and societal challenges confronting the global community. This seminar will explore the legal, political, and scientific challenges involved in addressing and responding to climate change. The class will consider international strategies and laws, including the Kyoto Protocol, the Paris Agreement, emissions trading schemes, and approaches to involving the developing world in climate change mitigation.

LAW 219 The Challenge of Green Energy (2 Credit Hours)

This seminar will take an interdisciplinary approach to the intersection of environmental and energy issues. It will introduce students to a variety of solutions to the problem of pollution from the energy sector. The course will start with a legal and technical introduction to the electricity grid, including discussion of federal/state jurisdictional issues, basic engineering concepts (taught with lawyers in mind) of the grid, and the basics of regulated and deregulated electric markets. The class will then address issues involving emissions and emission prevention, including the Clean Air Act (Title V and recent coal emission rules), renewable energy (including state incentives, Commerce Clause issues, and basic market design issues), and carbon capture/sequestration (including liability issues and state incentives). For their research papers, students will propose emission-reducing programs for a hypothetical state with a hypothetical electric market and evaluate the arguments for and against those proposals, including any unintended consequences.

LAW 220 First Amendment Rights (3 Credit Hours)

This course examines the history, theory, and jurisprudence of the First Amendment, with particular emphasis on the speech, press and religion clauses.

LAW 221 Administrative Law (3 Credit Hours)

This course examines the rules by which federal administrative agencies operate, including the source of administrative authority and procedures governing the exercise of that authority, and considers problems of delegation, agency rulemaking, adjudication and enforcement powers, judicial review of administrative action, and due process requirements.

LAW 222 Housing Discrimination (2 Credit Hours)

This class will introduce you to U.S. housing laws and policies with a focus on fair housing and fair lending. The class will provide an overview of civil rights litigation strategies and compliance with federal regulations from the perspective of a variety of participants in the housing market, including lawyers, developers, tenants, banks, government officials, and fair housing organizations. In addition to addressing housing policies and the intersection between segregation, housing discrimination and gentrification, the class will also examine leading cases in fair housing litigation. It will also focus on alternative dispute resolution of housing discrimination cases, and students will participate in a mock fair housing mediation. The class will be conducted in an open discussion format. There will be opportunities during the semester to focus on housing issues that the class finds most interesting and explore those more in depth.

LAW 223 Climate Change Law & Policy (2 Credit Hours)

Anthropogenic climate change has become one of the most significant environmental, economic, and societal challenges confronting the global community. This seminar will explore the legal, political, and scientific challenges involved in addressing and responding to climate change. The class will consider international strategies and laws, including the Kyoto Protocol, the Paris Agreement, emissions trading schemes, and efforts to involve the developing world in climate change mitigation. The class will also focus on U.S. law and policy, including regulation of greenhouse gases under the Clean Air Act and other statutes, federal litigation, and state and regional efforts to mitigate climate change. Finally, we will cover adaptation efforts at various levels of government, as well as geoengineering. Assessment will be based on in-class exercises, regular class participation, seminar papers, and presentations.

LAW 224 Student Initiated Capstone Project II (1-4 Credit Hours)

This variable credit course may be repeated for a maximum of four (graded) credits.

LAW 226 Negotiating and Drafting a Retail Lease (2 Credit Hours)

This course will examine the basics of retail leasing by studying a sample lease. Students will learn both the Landlord's and Tenant's perspective of a lease by negotiating and drafting lease provisions for both parties. Each week the students will participate in a mock negotiation of the provisions studied the previous week. The only text for this course will be a sample lease which will be provided by the instructor.

LAW 227 Transportation Law (2 Credit Hours)

Transportation and logistics is a multi-trillion dollar industry. Every item you purchase or use in your everyday life was delivered by a truck or other mode of transportation (rail, ocean, air). America could not function without the transportation industry. There have been a series of deregulations affecting the transportation industry over the years. After September 11, 2001, cargo security became an important issue for the United States, which lead to many new laws and regulations. This constant roller coaster of deregulation and regulation makes being a transportation attorney very exciting. This course will briefly describe the different modes of transportation and the regulating bodies for each. We will focus on the surface modes of transportation, namely trucking and rail. The main topics discussed will be contracts, tariffs, liability for loss and damage to cargo, tort liability of shippers, carriers, customers, and brokers during and after the transportation of freight and a comprehensive understanding of insurance and the various policy forms that exist. This course will be taught at Chicago Kent College of Law.

LAW 228 Sexual Harassment Law (2 Credit Hours)

This course focuses on the development of legal theory, precedent, and governmental regulation of sexual harassment in the workplace, educational institutions, and public accommodations. Students will learn about the continuing evolution of sexual harassment law regarding male-on-male harassment, unionized workplaces, intersectionality of race and gender, and vicarious liability. Skills used by attorneys who practice in this area will be discussed, including litigation, alternative dispute resolution, policy development, investigation, and training. Additionally, the class will take a critical look at conceptions and misconceptions regarding this legal issue in other arenas such as culture and politics.

LAW 230 Negotiable Instruments (3 Credit Hours)

The course examines the law of commercial paper (negotiable instruments payable in money) as codified in Articles 3 and 4 of the Uniform Commercial Code. The formal requisites of the various types of instruments are considered, as are the rights and liabilities of the several parties to such negotiable contracts. The concept and legal significance of holding in due course is treated in depth. Approximately one-third of the course concentrates on the mechanics of bank collection of checks and the related law as incorporated in Article 4 of the Code. This is a Bar course.

LAW 231 Secured Transactions (3 Credit Hours)

This course examines the law of consensual liens on personal property under Article 9 of the Uniform Commercial Code. (I know; it sounds boring, but it's actually pretty cool.) The course deals with the use of personal property (both tangible and intangible) as collateral to secure payment or performance obligations. Course materials cover creation of the security interest, effectiveness of the security interest as against the claims of third parties, priorities of claims between competing secured parties and other lien holders and rights upon foreclosure. Having spent my career as a partner-level transactional lawyer (corporate matters, secured debt work, securitization, bankruptcy) at two large firms (Mayer Brown and Kirkland & Ellis) as well as several years as general counsel at a NASDAQ-listed company, I want students to get a deep sense of the practical considerations that should inform their work with the UCC. Article 9 is also tested for the bar exam, so this course will have some immediate pay-offs for law students, irrespective of their intended career path. I will use anonymous polling software to facilitate class discussions. Class time will be split between lectures that give the essential principles of each topic we study and interactive question periods as we work through hypothetical problems contained in the text book.

LAW 232 Bar Exam Fundamentals (2 Credit Hours)

Bar Exam Fundamentals is a two-credit course that will teach you the analytical and organizational skills necessary to enhance your bar exam preparation. In this pass/fail course, we will focus on a combination of substance and skill through the presentation of specific techniques for maximizing performance on all parts of the bar exam. The course will focus on the most heavily tested doctrine in three bar exam topics, exhibiting how those topics have been tested on the Multistate Bar Exam (MBE) and on the Multistate Essay Exam (MEE). In this class, you will learn and review heavily tested subtopics, learn essay and MBE test-taking strategies, increase proficiency in taking MBE questions, and learn how to write a passing bar exam essay answer. You will receive individualized feedback on written assignments that will help you hone your writing skills and give you the tools you need to successfully self-grade during bar prep.

LAW 233 Bankruptcy (3 Credit Hours)

This course will provide a comprehensive survey of basic bankruptcy law. We will devote roughly equal time to consumer bankruptcy and business bankruptcy. Throughout the course, we will touch on the economic, political, and ethical issues underlying bankruptcy's competing goals: providing overextended consumer and business debtors with a fresh start and satisfying creditors' claims in an orderly, fair way. There are no prerequisites. Students' grades will be based on classroom participation and a take-home final exam. (Krivinkas-Shepard) This course will provide a comprehensive survey of basic bankruptcy law. There are no prerequisites. Students' grades will be based on a take-home final exam. (Rosenberg)

LAW 234 Comparative Domestic Violence (1 Credit Hour)

This course will examine the dynamics of domestic violence and compare and critique how different countries' laws recognize and respond to the problem. The course also will explore the theoretical frameworks for understanding domestic violence as a violation of international human rights and the role and responsibility of governments to respond to the problem.

LAW 235 Employment Discrimination (3 Credit Hours)

An in-depth study of the national policy opposing discrimination in employment and the ways in which this policy is addressed by federal and state law. While the focus is Title VII of the 1964 Civil Rights Act, numerous other sources of worker protection are examined, both substantively and procedurally.

LAW 236 Entertainment and Sports Law (2 Credit Hours)

This seminar will introduce students to the real world(s) of sports and entertainment law, examining the separate and distinct bodies of law and practices of both, while giving due to the many commonalities between the two fields, from intellectual property to professional contracts. As legal issues in both sports and entertainment law frequently appear in the headlines, this course will address up-to-the minute issues, while covering the seminal topics and cases within each, both in litigation and transaction. Guest lecturers may participate, as their schedules permit. As there will be efforts made to accommodate guests relevant to this course, the syllabus will be in flux. Further, attendance and class participation are required, making up a significant portion of the grade along with a take-home final examination. Reading assignments can be significant on a weekly basis relevant to the upcoming week's topic.

LAW 237 International & Comparative Law (1-2 Credit Hours)

This one credit course explores issues in family law from an international and comparative perspective. The course examines the legal relationship among families and the state, with special emphasis on how human rights doctrine has shaped the role of government in family life. The course compares and contrasts primarily American and European family law on a number of issues, including regulation of marriage, divorce and human rights within the family. Within the short time that we will be meeting, we will address through reading, film and extensive discussion how concepts of ¿family¿ emerge within public policy and law, how cultural norms shape rules for entry to and exit from marriage, and how human rights law impacts families and the individuals within the family.

LAW 238 Comparative Law Seminar (2-3 Credit Hours)

Comparative Law Seminar: Chile. This seminar will introduce students to comparative legal research in the context of Chile. Each student selects a topic on which to do comparative research. Classroom sessions will introduce students to the civil law tradition, the basis of law in Chile. Through our sister law school in Chile, Universidad Alberto Hurtado, students spend the week of spring break in Santiago experiencing the Chilean legal system and conducting interviews with individuals who are expert in the area in which they are researching. Students make a classroom presentation and write a paper on their topic.

LAW 240 Criminal Procedure: Investigation (3 Credit Hours)

This course provides a general overview of the criminal justice process, and focuses on the constitutional and other legal requirements that affect law enforcement practices and procedures. Specific topics may include confessions and interrogations, identification procedures, arrest, search and seizure, surveillance, police entrapment, and the right to counsel. This is a Bar course.

LAW 241 Criminal Procedure: Adjudication (3 Credit Hours)

This course is designed to provide a detailed examination of the criminal judicial process, pre-trial to post-trial, and includes an examination of: prosecutorial discretion, right to bail, pre-trial motions, double jeopardy, plea bargaining, discovery, jury selection, various trial issues, appeals, and post-trial remedies. This is a Bar course.

LAW 242 International Criminal Law (1-3 Credit Hours)

This course will explore the main differences in European and American Criminal Law and Procedure. It will feature a discussion of the Amanda Knox case, and discuss the different aspects of trial procedure in both systems.

LAW 244 Cyberlaw (2-3 Credit Hours)

The emergence of the Internet and digital technologies that enhance human abilities to access, store, manipulate, and transmit information has brought with it a host of new legal issues that lawyers preparing to practice in the 21st century will need to understand and address. This survey course will introduce and explore specific problems in applying law to issues arising on the Internet. Topics expected to be covered include the bounds of jurisdiction, privacy, governance and regulation, online commercial transactions, content protection (through intellectual property, contract, and technological means), and cybercrime. There are no prerequisites. Grades for the course will be based on a take home exam and class participation.

LAW 245 Family Law (3 Credit Hours)

This course is a study of cases, statutes, and legal principles relevant to the formation, regulation and dissolution of the family unit, and to legal obligations which arise incident to the family relationship. The course considers: ante nuptial agreements, marriage, annulment, divorce, division of property incident to divorce, maintenance, custody, visitation, child support, adoption, termination of parental rights, and ethical issues. (R. Anderson) This course is a study of cases, statutes, and legal principles relevant to the formation, regulation and dissolution of the family unit, and to legal obligations which arise incident to the family relationship. The course considers: ante nuptial agreements, marriage, annulment, and divorce, division of property incident to divorce, maintenance, custody, visitation, child support, tax law, and ethical issues. (S. Coupet) This course is a study of cases, statutes, and legal principles relevant to the formation, regulation and dissolution of the family unit, and to legal obligations which arise incident to the family relationship. The course considers: ante nuptial agreements, marriage, and divorce, division of property incident to divorce, maintenance, custody, visitation, child support, reproductive technologies, adoption, and termination of parental rights. (K. Baker)

LAW 246 Advanced Mediation Advocacy Practicum (1-4 Credit Hours)

Students will represent pro se clients pursuing employment discrimination claims at mediations taking place at the Equal Employment Opportunity Commission (EEOC) or the Illinois Department of Human Rights (IDHR). Under the supervision of an experienced attorney, students will work in pairs and conduct an interview and counseling session, develop a negotiation strategy and represent the client at the mediation conference. Representation is limited to the mediation. Class time will be devoted to discussions of pending cases and assigned readings in client counseling, mediation advocacy, and basic employment law. This course, which has won high praise from both students and clients, is open to students who have some prior experience with interest-based dispute resolution through a negotiation, mediation, client counseling or ADR course or through participation on a team. LLM students are also eligible for this class. Eligibility for a Supreme Court Rule 711 student license (43 credit hours completed) is preferred but not required. This course counts as a Skills and Live Client Experience course.

LAW 247 Constitutional Torts & Section 1983 (3 Credit Hours)

This course provides an in depth study of 42 USC sec. 1983, the most widely used statute for protecting civil rights and redressing violations of the constitution. Among the topics covered are the elements and defenses to a cause of action, municipal liability, absolute and qualified immunity for public officials, state action, monetary relief, injunctive remedies, causation, choice of forum, and attorney's fee shifting.

LAW 249 Human Trafficking: Advancing Protections for Children Practicum (1-2 Credit Hours)

Section 001 (2 credits) Human trafficking is one of the most egregious crimes that occurs both globally and domestically. While there have been improvements to both global and domestic responses to human trafficking, children who are compelled into forced labor and sexual exploitation continue to be the least identified cohort of survivors. This interactive and interdisciplinary seminar will explore the legal, social, and practical issues confronting children who are survivors of human trafficking, as well as an examination of efforts to prevent and intervene in this social problem. While the seminar will focus on unique issues affecting (international and US citizen) survivors of child trafficking, students will gain knowledge and skills that are applicable to other marginalized populations of children and youth, as well as adult trafficking survivors. The seminar will begin with an overview of a history of anti-slavery statutes and case law to provide a foundation for contemporary international human rights and domestic laws addressing human trafficking. Students will be introduced to various frameworks, including criminal justice, public health, gender-based, human rights, and abolitionist, to combat human trafficking. Students will analyze current research in the field, and explore interventions utilized by both legal, social and public health providers. Assignment and exercises will include mock interviews, critical analysis of legislation, and a final project addressing ways to advance the movement to combat child trafficking in the United States. Scholars and practitioners in the field will provide occasional guest lectures. Section 002 (1-2 credits) The live client experience (LCE) component of this course is available for a select number of students who are interested in augmenting the seminar with experiential work (legal research, advocacy, direct services) that intersects with child trafficking. This can include working on projects at the Center for the Human Rights of Children (CHRC), or placement at an off-site organization providing legal services to human trafficking survivors. Applications for Section 002 are required, and student selection will depend on the number of positions available at selected external sites and CHRC (minimum 6). Participants will be selected by Katherine Kaufka Walts, Director, Center for the Human Rights of Children. While students with a demonstrated interest in this topic will be prioritized, no prior training or experience is required. Note: 1L students are not eligible for LCE credits.

LAW 250 Estates (3 Credit Hours)

This course is a study of the basic legal devices available for transmission of wealth at death: intestate succession, the will, "non-probate" transfers, and trusts. Recurring themes include the special role of lawyers representing clients in these matters, the advantages and disadvantages of different wealth transmission techniques, and the social ramifications of our wealth transmission policies and laws. This is a Bar course.

LAW 251 Commercial Real Estate Transactions (2 Credit Hours)

Commercial Real Estate Transactions focuses on the basic principles of commercial real estate acquisition, financing, and development (including leasing). The course follows a mixed use commercial development project through acquisition (letter of intent through purchase contract and closing) and development (leasing/sale of condominium units). The course highlights the purchase and sale contract, easements, zoning and environmental regulations and closing; the loan process and financing issues; as well as leasing. The course emphasizes the role of the lawyer in real estate transactions and the broad issues involved in modern real estate practice.

LAW 252 Personal Injury Law and Advocacy (2 Credit Hours)

This course will include an overview of Personal Injury Law and include the intake of a new case to its final resolution. The course will include not only the law and rules, but the implementation of them. Students will participate, in a meaningful way, in various court exercises and will be challenged to understand and persuasively present their client's case. Advocacy will be discussed in detail and students should be expected to be pushed beyond their previous level of skill and comfort and learn to become "trial lawyers" rather than simply personal injury lawyers. Students will learn what it is like to "mix it up a bit" in the adversarial forum of trial work.

LAW 253 Real Estate Conveyance (2-3 Credit Hours)

A study of problems and documents encountered in residential real estate transactions, including listing agreements, preparation of contracts, closing documents and real estate tax pro-rations. There will be some coverage of the subjects related to financing and title clearances including surveys and title insurance. The course may also include some basic coverage of condominiums, co-operatives and Illinois land trusts. The text is George Lefcoe, Real Estate Transactions, Finance and Development (LexisNexis, 6th ed. 2009). There are used good condition copies available from various sources. In addition, there are also loose leaf and electronic versions. The grade will be based on a final two-hour open book exam given during the regular exam period. This is a Bar course.

LAW 254 Consumer Law (2-3 Credit Hours)

The course surveys consumer law from a transactional perspective, beginning with issues of deception, including false advertising, related to consumer purchases. There is coverage of the law of consumer credit, including issues of discrimination, overpriced credit and deceptive credit practices, and standard form contracts of adhesion and recent Supreme Court rulings covering binding arbitration and class actions. Consumer remedies and special issues of consumer fraud on the Internet complete course coverage. The course is especially recommended for students interested in public interest law.

LAW 255 Business Skills for Name, Image, and Likeness and the Law (1 Credit Hour)

While Name Image Likeness (NIL) is primarily associated with sports, it touches a broad spectrum of individuals; businesses, retailers, fashion designers, magazines and museums; and agencies and organizations that represent musicians, athletes, artists and businesses. This course will examine the intersection of multiple disciplines through exercises in the NIL landscape.

LAW 256 Comparative Issues in Law and Religion (2 Credit Hours)

This course will examine the way the three Abrahamic Faiths (Islam, Judaism and Christianity) consider legal and policy issues. For instance we will look at the three faiths regarding various issues surrounding human rights and life and death issues such as: justified uses of war and violence; conscientious objection; end of life issues; capital punishment; criminal responsibility for causing death; positive duties to the poor and needy; and how the common good is described by the three religions. How do the three faiths envision translating their perspectives on the issues into civil law, and what are the proper limits on enacting religious perspectives into positive law?

LAW 257 Freedom of Information (1 Credit Hour)

This is a Perspective Elective course.

LAW 258 International Cross-Cultural Negotiation and Communication Skills (1 Credit Hour)

This course will introduce students to practical cross-cultural negotiation and communication skills useful in international settings. The course will address the work of Geert Hofstede and the 6D cultural dimensions model as well as the writings of Edward T. Hall regarding high and low context communicators. Learning objectives include: understand basic interest-based negotiation theory; apply negotiation techniques to engage in a problem-solving conversation; identify culture clusters based on the Hofstede 6D model; understand personal cultural preferences in comparison to a country of interest; and use appropriate questions, listening skills and other communication strategies to increase understanding and obtain results that meet client needs and interests. Students will learn through assigned readings, simulated negotiations, feedback, and guest speaker(s).

LAW 259 Workways of the U.S. Supreme Court (1 Credit Hour)

This course will address the role of the U.S. Supreme Court in our tri-partite framework of representative government and interacts with the other branches of the federal government (and the states) as it exercises the power of judicial review, consistent with the authority provided by Article III of the Constitution and the statutes which Congress has passed with respect to the jurisdiction of the federal courts, including the Supreme Court. The preliminary lectures by Professor Sullivan will provide the course foundation, exploring the constitutional and statutory provisions relating to the Court and its work and the ways in which the Court has chosen to structure its work within those constraints. The course will pay particular attention to the Court's case selection process and the ways in which lawyers succeed in getting their clients' cases to the Court. Justice Ginsburg will discuss the landmark cases of the current 2017-2018 court term; the workways of the Court; and the road to her appointment to the U.S. Supreme Court. Judge Ann Williams, Senior U.S. Circuit Judge of the United States Court of Appeals for the 7th Circuit, will participate in the Conversation with Justice Ruth Bader Ginsburg discussing her ascent to the Supreme Court.

LAW 260 Comparative Criminal Procedure (1 Credit Hour)

The criminal justice process in the United States is shaped by the Constitution and Bill of Rights, statutes, rules and case law. This course will examine the role of these guiding principles in the various stages of the criminal justice process, such as the means by which information is gathered during an investigation, the circumstances under which an individual can be detained, and the type of evidence that can be used at trial. The course will focus on the salient points of comparison between the American adversarial system of criminal justice and the European civil law tradition, historically called an inquisitorial system. These points of comparison include the role of the judge/magistrate; the prosecutor's role and plea bargaining; the role of defense counsel; and the role of evidentiary and constitutional rules of exclusion of evidence. We will compare our criminal justice process to that of Italy and other countries, and Italian officials will participate as guest lecturers to talk about their own experiences with the Italian system. The course will also cover a comparison of procedure for civil law issues. The Amanda Knox trials in Italy will be used as a case study in addressing these procedural comparisons. This is a Perspective Elective course.

LAW 262 Genetics Law and Policy (2 Credit Hours)

This course will examine a variety of legal, policy, scientific, social, and ethical issues relating to genetics and genomics. This course will take an interdisciplinary approach to examination of these issues, drawing upon a diverse set of reading materials within the casebook. Topics to be covered include the intersection of law and science generally; genetics research and bioethical issues in human subject research; commercialization, ownership, and patenting; genetic testing and reproduction; gene therapy research and gene editing; access and liability issues; clinical applications of genetics research; and genetic privacy.

LAW 264 Contract Negotiation and Drafting (2 Credit Hours)

The purpose of this course is to provide exposure to contract drafting and negotiation to students with an interest in transactional law. During the course of the semester we will examine the purpose and process of drafting documents. We will also spend time discussing the business side of transactional law and how best to work with and counsel clients. In some instances, we will start with form documents borrowed from prior transactions (precedent) and we will revise these documents to reflect the particular facts and circumstances surrounding our transaction. In other instances we will work through drafting a document from scratch. Finally, we will spend time reviewing and revising existing documents and discussing the logistics of working through a variety of business transactions. The course will include numerous drafting exercises and some negotiation. By the end of the semester, students should have a basic understanding of how and why contracts are drafted and negotiated. In addition, each student should be able to draft a precise and practical document for a basic business transaction. (Dunck)

Information Technology The purpose of this course is to provide contract negotiation and drafting experience to students in a "real life" setting. The students will be placed in teams and will all receive the same background facts and precedent "form" documents in order to negotiate and draft an executable agreement relating to software development, license, implementation and support and maintenance that reflects each team's negotiations. Prior experience in information technology or business is NOT required. During the course of the semester, we will work through the purpose and drafting of various provisions in the agreement. By the end of the semester, students should have a basic understanding of the structure of a business transaction in general and an IT agreement in particular. Students will be comfortable with the purpose of recitals, representations and warranties, covenants, including limitation of liability and indemnification issues. (Ross)

LAW 265 Black Traditions in International Law (1-2 Credit Hours)

International Law has neglected the experiences and perspectives of African Americans, in particular, and of black peoples more generally. Yet, international law was central to justifying black subjugation through slavery, colonialism, and their aftermaths today. The purpose of this course is to uncover those hidden histories. In doing so, Black Traditions in International Law will express and foreground the goals, histories and thoughts of black struggle that are not represented in journals, books and other materials of international law that we use to teach international law today. The premise of the proposed course is that Black traditions have long offered visions of global order that challenge the color blindness embedded in accounts of international law. Black traditions counter visions of international law that order the world in accordance with predominantly European and white conceptions of hierarchy and order. They challenge distortions black and non-white peoples as inferior and therefore fair game for subjugation and dehumanization through practices such as slavery and colonialism and the continuing legacies of these practices to date. Learning (c) To unearth the various ways is obscured or how it becomes invisible in international law and what international lawyers are doing about it.

Outcomes:

- (a) To demonstrate the centrality of international law both as a site that legally justified black disempowerment but also as a resource for black empowerment including through efforts by African Americans today through United Nations processes such as those established under the United Nations Convention on the Elimination of Racial Discrimination;
- (b) To demonstrate how racial differences have been mobilized to create and sustain inequality in a wide variety of places through rules of international law and why this is very important for understanding how domestic law intersects with race

LAW 266 Intl Law Review Executive Editors (1-3 Credit Hours)

Students enroll in this course to receive credit for their work as Executive Editors on the International Law Review.

LAW 267 International Law Review Senior Editors (1-2 Credit Hours)

Students enroll in this course to receive credit for their work as Senior Editors on the International Law Review.

LAW 268 International Law Review Members (1 Credit Hour)

Students enroll in this course to receive credit for their work as Members on the International Law Review.

LAW 270 Business Organizations (4 Credit Hours)

This course gives brief treatment to agency and covers partnership as an alternative to the corporate form. Principal emphasis is on the law as it applies to the organization and functioning of corporations. The course focuses on structure and mechanics, capitalization, distributions, organic changes, and duties and liabilities of directors, officers, and controlling shareholders. The federal securities acts are introduced with particular attention to Rule 10b-5. Substantial attention is given to the special problems of the close corporation. This course counts as a Bar course.

LAW 273 Refugee Law and Policy: Welcoming the Stranger (2 Credit Hours)

Refugee law is one of the most dynamic and rewarding areas of law. Nonetheless, in observing the administration of refugee law, we bear witness to some of the United States' most egregious human rights abuses and the abandonment, in some cases, of the rule of law. The goal of this course is to teach students the history of the norm of non-refoulement, in doing so to understand how political, religious, racial and other minority groups are intended to be protected (from persecution, from torture, and from death). Students will learn the history of the Refugee Convention-for whom the document was written, and, consequently, who is left out of protection (considering for example the treatment of victims of private-sphere persecution or climate refugees). Students will learn the role of xenophobia, racism, and subjugation of the "other" in this case the "alien"-other in administering the rule of asylum law. The class will contain a comparative analysis of refugee law under various international and domestic systems. Finally, students will learn about the treatment of child asylum seekers in the United States-namely, the treatment of children as adults in miniature and the "othering" that facilitates this deviant practice.

LAW 274 International Arbitration (1 Credit Hour)

This is a one credit course taught sometimes in one of the summer programs. In this course, students will learn how international commercial arbitration works. In most international contracts, the parties agree that all disputes will be resolved by arbitration. This private dispute mechanism provides a number of advantages over litigation. One of the most important advantages is that by agreeing to arbitrate, a party avoids ending up in the other party's court system. An arbitration award is also more easily enforced in a foreign jurisdiction than a court judgment, because of an international treaty known as the New York Convention. Students will learn about the various laws and rules governing international arbitration, as well as specific, practical knowledge about arbitrating, such as how to draft an arbitration clause, how to choose an arbitral institution, how to select arbitrators, the ethical rules that apply to arbitrators, the bases for challenging arbitrators, the conduct of the arbitral hearing, rules governing admission of evidence, availability of interim measures, the grounds for vacating an award, and the means of enforcing an award.

LAW 275 Spanish for Lawyers (2 Credit Hours)

The course is designed for law students who are looking to supplement their existing knowledge of the language with Spanish that focuses on the legal field. Its main objective is to develop adequate communication skills that will allow you to advise Spanish-speaking clients on issues related to criminal, property, civil, labor, administrative, tax, commercial, and litigation law. We will work with real documents and texts, analyzing cases, as well as reinforcing knowledge of both Spanish in the legal field as well as of different branches of law in the judiciary system. Coursework will be carried out in groups, and a system of continuous evaluation will be implemented using assignments and projects. The course will also include a cultural component, the aim of which will be to understand, contextualize, and handle effective exchanges with Spanish-speaking clients. Passage of basic Spanish language competency exam is a prerequisite. This is a Skills course.

LAW 276 Criminal Law Practicum (1-3 Credit Hours)

This 2 to 4 credit course will help students develop a broader understanding of the criminal justice landscape. Students will be exposed to practical and substantive issues, garner a better understanding for what it means to practice criminal law, and be exposed to current and historical policies that have helped to shape our criminal justice systems. This course includes a mandatory weekly classroom seminar as well as either a field placement or research component. Students who pursue the field placement option will work in an approved agency under the supervision of practicing attorneys. Students must secure unpaid externships on their own using each agency's own hiring procedures for law students. Past field placements have included the Cook County State's Attorneys Office, The Law Office of the Public Defender - Cook County, and Office of the State Appellate Defender, as well as various legal aid agencies and law firms that have criminal law as a practice area. Approved field placements are available on the Pearson system (<https://law-luc.12twenty.com/Login>). You may also contact the course instructor at acornel@luc.edu for additional options or if you have questions about the placement component. Field placement students should register for section 1 seminar (one credit hour) & as well as section 2 (live client experience). Students seeking live client experiential (LCE) credit must enroll in the field placement section 2. Students must complete 55 hours at their placement for each hour of live client credit sought. Accordingly, students may register for up to 3 credit hours of section 2 if they anticipate completing 165 hours at the placement over the course of the semester. Students do not need to have a field placement to participate in this course. Students who do not work at an approved field placement site will conduct in-depth research on an approved criminal law or policy matter during the semester. Students who pursue the research component will present their findings to the class at the end of the semester. Research students only need to register for section 1 (for 2 credit hours). Whether the student elects to do a field placement or research, each student will have the opportunity to observe courtroom proceedings during the semester. This is a graded course. There is no final exam.

LAW 277 Intellectual Property Litigation (2 Credit Hours)

This advanced intellectual property seminar course uses a simulated litigation format to implement the fundamental concepts introduced in the survey IP class. The goal is to provide students with "real-world" intellectual property litigation experience. Students will be divided into plaintiffs and defendants and will participate in various aspects of a theoretical dispute including pre-filing investigations, discovery, claim construction for patents, and summary judgment. Through this process the course will cover both practical and substantive aspects of pre-trial intellectual property litigation practice.

LAW 278 International Law (2 Credit Hours)

This course will examine the origins and sources of public international law, its relationship to U.S. Law and its relationship to global governance. Substantive focus will include the law of treaties, diplomatic & consular immunities, the U.N. Charter system, international criminal law, human rights law, and the use of force. This course is only offered in the Rome Program.

LAW 279 International Data Protection and Artificial Intelligence Law (1 Credit Hour)

This course will explore data protection, informational privacy, and cybersecurity laws around the world, and their intersection with civil rights. We will focus on laws that regulate technologies that can be used unfairly and discriminatorily, as in artificial intelligence, as well as policy strategies to promote fair and safe AI.

LAW 280 Federal Income Tax (3 Credit Hours)

This course introduces and analyzes the basic concepts underlying the law of federal income taxation. Topics include gross income, identification of the taxpayer, deductions, and timing of income, characterization and recognition. These concepts are developed through the study of the Internal Revenue Code, Treasury Regulations and case law. Students who might be interested in pursuing the Tax Certificate MUST take this course in the Fall of their 2nd year. Prof. Kwall's section of this course is only open to first year full-time students who are rising to second year full-time status.

LAW 281 Corp & Partnership Tax (3 Credit Hours)

Pre-requisites: Federal Income Tax (mandatory); Business Organizations is recommended

This course is intended to follow Federal Income Tax. It focuses on the income tax consequences associated with the three principal business forms: the corporation, the partnership, and the limited liability company. The tax issues confronted at the start-up, operating and winding-down phases are examined for each business form.

LAW 282 Law and Accounting (2 Credit Hours)

This course is intended to provide an understanding of basic accounting principles and their practical application in connection with the practice of law. There are no prerequisites and no requirement of a business background. Topics covered include fundamental principles of accounting for business enterprises; how to analyze and understand an income statement, balance sheet, and statement of cash flow; basic concepts of revenue recognition; conventions for capitalization versus expenses; and how to recognize possible manipulation of financial and accounting statements. Recent high profile accounting scandals such as Enron and WorldCom will also be explored.

LAW 283 Global Challenge of Human Trafficking (1 Credit Hour)

This course provides a comprehensive, introduction to the transnational federal laws and law enforcement efforts launched in response to human trafficking – this global human rights challenge. The course will use a text written by the professor and a colleague who have the distinctive perspective of two individuals who have spent their careers in the trenches investigating, prosecuting, and adjudicating these intricate and commonly emotional cases. The course will offer open debate about human trafficking by stripping it of its unhelpful, constricted definitions, and by candidly discussing the state of the law, the criminal justice process, and the treatment of offenders and victims. The course examines today's system of federal anti-trafficking laws in relation to the global efforts to eradicate this pervasive human rights violation. It will explore the unique challenges posed by transnational investigations; the current state of the U.S. government's transnational anti-trafficking efforts; the myriad domestic and international legal instruments designed to enhance transnational enforcement efforts; and finally will explore alternatives to the criminal justice efforts including the rise of supply chain laws seeking to hold global corporations responsible for failure to police the manufacture of their products and the use of their services. Taught by United States District Court Judge Virginia M. Kendall.

LAW 285 International Law Review Associate Editor (1 Credit Hour)

Students enroll in this course to receive credit for their work as Associate Editors on the International Law Review.

LAW 286 Constitutional Law Seminar II (3 Credit Hours)

This seminar examines further the constitutional heritage of the English-speaking peoples with a view to understanding the Constitution of the United States. A series of short papers is required. (No prerequisites)

LAW 287 Separation of Powers (3 Credit Hours)

This course will consider the dynamic nature of separation of powers in the American constitutional system, particularly with respect to the relationship between the executive and legislative branches of the national government, but consideration will also be given to the role of the judicial branch and its interactions with the executive and legislative branches (to which the courts typically refer as the "political branches"). The readings will include some of the founding era documents, constitutional cases, materials such as presidential messages and statements, executive branch legal opinions, and secondary materials. Students will gain a working knowledge of the field through the required readings and develop seminar paper topics during the first part of the semester; they will present the results of their research to the class in the latter part of the semester and will submit papers at the end of the semester. The goal of the course is to provide students with a fundamental understanding of the separation of powers doctrine in the American system of government. They will be expected to show that mastery through classroom participation, oral research presentations, and the submission of final written papers.

LAW 289 Advanced Legal Research: Spec Topics (1 Credit Hour)

Advanced Legal Research: Foreign & International This course is designed to meet the growing demand for research competency in the area of Foreign, Comparative, and International Law (FCIL). Students in the class will be introduced to resources specific to FCIL that will be useful in practice and academic settings. These resources include the European Union's EUR-LEX database, the United Nations iLibrary, the Foreign Law Guide, and Westlaw China. This course will also teach students to devise and implement efficient research strategies and introduce students to information centers outside of LUC that are particularly strong in the area of FCIL. In sum, upon completing this class, students should be able to identify a legal issue requiring FCIL research, craft an efficient investigative strategy, and select the most appropriate tools for their research. **Advanced Legal Research: Litigation** This section of Advanced Legal Research will focus on research resources used by litigators. We will spend part of our time reviewing and expanding upon the legal research skills and techniques that students learned in First Year Legal Research. We will spend the rest of our time exploring more-advanced research topics and tools such as dockets and briefs, jury instructions, jury verdict reporters and litigation analytics. There is no final exam; grading will be based on research exercises assigned throughout the semester and class preparation and participation. An advanced legal research class specifically intended for those going into transactional practice will be offered in the spring. These two classes will overlap, but students may take both. **Advanced Legal Research: Transactional Law** In this section of Advanced Legal Research we will focus on research sources most likely to be encountered in transactional practice. We will spend part of the semester reviewing and reinforcing the legal research skills and techniques that students were introduced to in First Year Legal Research, especially as they pertain to transactional practice. We will then delve more deeply into topics particular to transactional practice like SEC research, company research and locating precedent documents for contract drafting. Grading will be based on weekly quizzes and a series of short assignments. There is no final exam.

LAW 290 Advanced Legal Research (1 Credit Hour)

In this course, you will explore more sophisticated and advanced areas of legal research, including judicial, administrative, legislative, and subject-specialized research resources. You will also learn about non-legal research resources which can be of value to attorneys.

LAW 291 Communications Law (3 Credit Hours)

This course surveys the field of electronic communications, from the telephone to broadcast media to the Internet. Historically, the field of communications has been divided between the traditional mass media (broadcasting, cable, satellite broadcasting) and telecommunications media (wireline and wireless telephone carriers). Today, the two general divisions are converging. One of the vehicles of that convergence is the Internet, which is capable of providing both mass media and individual communications services. This course will examine legal issues affecting all of these media. Much of the course material necessarily covers the history and theory of communications regulation as practically applied through FCC rulemakings.

LAW 292 Law and Technology (3 Credit Hours)

This survey course presents students with the range of legal issues arising from the intersection of technology and the law. The course is highly interactive and will explore topics such as the implications of internet ubiquity and jurisdictional analysis, First Amendment/free speech, electronic discovery, digital copyrights, trademarks and domain names, cyber crime, electronic privacy, e-commerce, and Internet governance. There are no prerequisites for this course. Grades for the course will be based on a mock Rule 16 conference, and in-class exam and class participation.

LAW 293 Advanced Writing for Legal Practice (1-3 Credit Hours)

This skills-based course simulates a legal practice environment. Students complete a series of writing projects related to simulated case files or legal problems. Students are permitted to take multiple sections of this course, as different sections incorporate different practice areas and experiences. **Advanced Legal Writing: Business Practice** This course emphasizes and builds effective writing and communications skills in the transactional, business practice setting. The course will focus on a range of formal and informal documents and communication formats: drafting contract provisions and letters to clients and counterparties in transactional and pre-contentious settings; reviewing, interpreting, and editing the (often imperfect) contracts submitted by opposing counsel; preparing transaction task lists, due diligence memoranda or other internal communications for use by colleagues; and presentations to a board of directors or other client audience supported by written materials including PowerPoint visuals with substantive content and impact. Some attention will be given to ethics and professionalism in written content, including in the context of engagement letters with clients, declination letters with prospective clients, and conflict waivers among clients. Several sessions will also focus on special considerations when working and communicating with clients and counterparties in or from other countries where the laws, customs, practices, and language are different from our own. In-class sessions will typically be used for lecture and discussion to develop concepts and facts from selected readings and materials, which students will then incorporate in brief written assignments before the next class. There may be occasional in-class brief, flash quizzes based on the assigned readings to launch our discussions. Students will be graded based on written assignments, quizzes and exercises, and class participation. **Advanced Writing for Legal Practice: Illinois Civil and Criminal Litigation** The preparation of a case for trial calls upon a powerful kind of thinking that is useful in any field of law, as well as necessary to present the case at trial. This course provides specific training in advanced legal writing to build strength and maturity in the kind of analysis that a trial lawyer performs. The course focuses on the development of skills necessary for particular writing assignments that arise in the course of civil and criminal litigation. Students learn how to perform these skills through in-class discussion of the assignments and through the writing necessary to complete the assignments. Because practice in oral advocacy highlights ways in which a lawyer's writing can be improved, this course will call on you to participate in oral advocacy exercises as well as undertake the specific writing assignments. The course covers a wide range of skills, including the drafting of legal memoranda and pleadings, the preparation and presentation of motions, opening statements and closing arguments, the development of outlines to examine or interview witnesses, the use of discovery tools, and the application of a structured approach to settlement negotiations.

LAW 294 International Human Rights (1-3 Credit Hours)

This course offers an introduction to the theory and practice of international human rights law. Through course readings and rigorous discussion, students will learn about international and domestic laws and institutions responsible for the creation and operation of the human rights regime. The course will examine sources of international human rights laws including treaties, customary international law, and domestic law. The course will evaluate international mechanisms involved in human rights protection including the United Nations, regional mechanisms (such as the Inter-American, European and African systems) and various national courts and hybrid tribunals tasked with enforcing international human rights law. In addition to legal theory, the course will help students understand the practice of human rights law with an eye toward understanding the place of the United States in the support of and adherence to human rights norms.

LAW 296 Legal Writing Tutors (1-2 Credit Hours)

Legal Writing tutors work with students in the first-year writing program. They attend all classes of their Legal Writing section, hold regular office hours, and help students develop their research and writing skills.

LAW 297 Legal Technology (1 Credit Hour)

This course will introduce students to a wide variety of law office technologies, including law firm use of everyday software programs like Adobe Acrobat and Microsoft Word, Excel, and Outlook, plus law-firm-specific programs for document automation and assembly, time and billing, case management, e-discovery, and others as time permits.

LAW 298 Contracts in Complex Commercial Transactions (2 Credit Hours)

The objective of this course is to familiarize the student with contracts as used by sophisticated parties. Accordingly, this course will explore "real-world" contracts actually entered into by "real-world" companies – the Coca-Cola's, Microsoft's, and HP's of the world. Through this course, the student will attain a certain facility with agreements, their organization and structure, their language, and their provisions (and the interaction of these provisions). The course will pay considerable attention to how courts have treated various contractual provisions. The examination of actual contracts will begin with non-disclosure agreements and will proceed into employment agreements, services agreements, and agreements for the sale of goods. Topics will also include merger-and-acquisition agreements. In addition, readings will include comments from leading practicing attorneys (from law firms such as Sidley, Kirkland, and Cravath, and from legal departments at companies such as Microsoft, Accenture, and JP Morgan), and there is the possibility that, from time to time, some of these (or other) experienced practitioners may join us for class.

LAW 299 Critical Legal Studies Seminar (3 Credit Hours)

Critical Legal Studies posits that the influence of the social construct of race in America is ubiquitous, including in law. Moreover, it suggests that so-called color blind law-making is unlikely to address the most important means by which race continues to operate to oppress many persons in America. Finally, it teaches that racial reform occurs only in accordance with the interests of those with political and economic power. This course will survey the key scholarly works that form the basis for these precepts and seek to test these positions against the reality of race in America today.

LAW 301 Police Accountability (3 Credit Hours)

This course examines how the law regulates policing in the United States. We will spend part of the class exploring important court decisions related to police accountability. We will also study other legal mechanisms designed to combat police misconduct, like civil litigation, criminal prosecution, and federal oversight. Ultimately, this course will encourage students to consider whether existing regulatory tools effectively combat police misconduct, and whether these regulations impair the ability of law enforcement to fight crime.

LAW 302 Intellectual Origins of "Othering" in the Law of Nations (2 Credit Hours)

Today, many nations and peoples with formal legal equality are not, in practice, treated equally in international relations. One reason for this is that some nations and peoples were once unequal under prevailing law and legal theory. This course surveys key Western political and legal thought that led to "othering," or legal inequality, in the "Law of Nations," which was a general body of law that eventually became what we today call "international law." After setting out key concepts and themes, the course traces the evolution of thought regarding: the nature of human societies, the interrelationship of human societies, the rights and rules of war, and the acquisition and possession of land by peoples and nations. As necessary, students will be required to review relevant geopolitical history that both influenced and resulted from this evolution. A note of caution: this course will encounter detestable concepts, such as the persistent idea that some humans were "natural slaves," "infidels," "savages," or "barbarians" unworthy of equal legal or moral status or treatment. These concepts played a significant role in legal and moral justifications for colonization and other subjugation, including dispossessing indigenous peoples of their native lands. During the course, students will be required to independently research (at least 1 book or 3 significant scholarly articles) and consider the influences of this history on a contemporary issue in the U.S. or international legal system. The final grade will be determined by a student's effort in completing short reflection papers for each reading assignment, and the quality of a final seminar reflection paper that considers the course as a whole in relation to the student's independent research.

LAW 305 Global Law Seminar and Field Study (3 Credit Hours)

This seminar examines the laws and legal system of a different country each year and consists of a semester-long class and a required field study and service component over spring break. Past countries of study have included Tanzania, India, Thailand, South Africa, and Turkey. This unique team-based experience actively engages students in the learning process. Students, working in teams under faculty direction, conduct research, make class presentations, organize the field study and service components of a course, develop group research proposals, and produce scholarly papers, several of which have been published.

LAW 306 Intellectual Property Colloquium (1 Credit Hour)

This is a unique course offered once a year to a select group of students from Loyola and Chicago-Kent. Enrolled students read and discuss draft articles of nationally renowned professors in the field of intellectual property; the articles are typically draft law review articles. The discussions are focused on helping the professors to refine and improve their articles, such that a strong foundation of intellectual property is expected, even though there is no official pre-requisite. This course meets every week, but the students only meet in person roughly half the time, with the other half of the sessions done by videoconference. Three of the in-person classes will be at Chicago-Kent; for those days, the class will begin at 4:10 pm and end by 5:50pm to allow students adequate travel time. There is no final exam or research project required for this class. Instead, students are required to attend and actively participate in all classes. Students are selected based on an application that is available at: www.chicagoip.com.

LAW 307 Immigration Documentation Workshop (2 Credit Hours)

Co-requisites: - Immigration Law
Permission Required

LAW 308 The Death of the Death Penalty: The Ultimate Punishment in the Twilight Zone (2 Credit Hours)

This seminar will briefly review the use of the death penalty in our country's history and then take an in-depth look at the experience of Illinois with capital punishment.

LAW 309 Intro to Comparative Law (3 Credit Hours)

This course will provide an introduction to the "civil law" legal systems (which include almost all of Western and Eastern Europe and Latin America, as well as, portions of Africa and Asia). The course will begin with the roots of the Civil Law in Rome around 450 BC and subsequent developments, including its preservation by Byzantine Jurists in the Corpus Juris Civilis, and its revival by scholars in medieval Italy. The various events and influences that led to the modern Civil Law will be considered. Differences between the modern Civil Law and Common Law approaches and attitudes toward law will be covered. (Perspective Elective course) Note: Students who have taken Comparative Law (LAW 172) may not enroll in this course.

LAW 310 Courtcraft Excellence in Advocacy (1 Credit Hour)

Courtcraft is the foundation and the discipline which makes for excellence in advocacy. It is a holistic approach to advocacy which harnesses together at least four principles: purpose, preparation, presentation and persuasion. Courtcraft should never be an option for the would-be advocate. It is not a luxury, but an essential grounding without which no law student can begin to call himself/herself an advocate. Like any skill, advocacy can be taught. Few of us are born advocates. Most need training and guidance. Courtcraft develops and enhances all that the student of law has been taught and prepares him/her for excellence in advocacy. Our courtcraft programme is not founded simply on theory or academia. It is based on our own many years of experience as advocates appearing almost daily in court. Purpose Your role as a lawyer and advocate. Your duty to your client, the court, the profession. Preparation The examination of witnesses, preparing opening/closing speeches and submissions, written advocacy. Know your client, your case, your tribunal. Presentation Your communication skills, your style, your manner, your public speaking ability, your advocacy. Persuasion Your knowledge of people and culture, your approach, your game plan, your conclusions. In addition to these four overlapping principles above, our programme includes training in the important and developing techniques for the handling and examination of experts, and professional and vulnerable witnesses. It includes awareness of diversity, prejudice and mental and physical well-being in the profession. Our programme revolves around a scripted trial, tailored to the four principles. It is a two way initiative. Essential to the success of the programme is the input of attendees who will take part in the trial as advocates and witnesses. Our experience has always been that we take away from you as much as we hope you take away from the programme.

LAW 311 Advanced Evidence (2 Credit Hours)

This course offers an in-depth study of three important areas in the presentation of evidence at trial: character (e.g., habit, routine and prior bad acts, as well as traditional character traits), hearsay, and expert testimony. Although not a "techniques" course, students will be called upon to participate actively in the class discussions and simulation.

LAW 312 Street Law (3 Credit Hours)

Second- and third-year students teach about law and the legal system in Chicago area elementary and high schools. Students attend a weekly seminar and teach classes in their assigned school. In some schools, students have the option of preparing high school students for a mock trial competition. For that experience, prior or current enrollment in Trial Practice is advisable, but not required. This is a Skills and Comprehensive Simulation course.

LAW 313 Illinois Civil Litigation Practice (2 Credit Hours)

This course will empower you to practice in Illinois state courts (where 90% of all litigation is heard) with the efficacy of a seasoned litigator. Teaming star civil litigators with veteran judges, this redesigned two-session intensive course will focus sharply on the crucial knowledge and skills needed to survive the confusing and hectic civil court system. The course will enhance your written and oral argument skills in the context of the labyrinth of procedural rules and statutes that govern different phases of civil litigation in Illinois. Using hypothetical scenarios, students will learn how the rules apply to the facts and substantive law in a concrete way, as well as how to argue issues arising in the pre-trial setting. You will write briefs (up to 8 pages), argue motions, serve as a judge, and instruct your fellow students on the law, all over two sessions, each one lasting one and a half days. The first session will generally focus on pleadings and motions directed to pleadings, while the second session will generally focus on discovery and summary judgment motion practice. Because so many graduates are now thrown directly into the courtroom either as solo practitioners or litigation associates, the course has been designed to be immediately useful the first time you go to court. This is a Skills and Bar course.

LAW 314 Pharmacology Journal Club (1 Credit Hour)

Pre-requisites: B.S. degree in biology, chemistry, biochemistry or similar science field

In this multi-disciplinary pass/fail course you will be guided through the following objectives. Gain confidence in presenting scientific data to an audience. Learn to direct a time-limited discussion in a professional and collegial manner. Learn to work through an article independently to understand complex experimental design. Learn to work collectively to help clarify complex experimental design. Learn to critically evaluate an experimental design and voice a critique in a constructive manner that includes potential alternatives. Understand how new cutting edge techniques are employed to answer scientific questions. Stay current on new findings of broad interest to the scientific (Pharmacology) community. Learn to apply Socratic teaching methods. Learn to utilize electronic technology rather than printed material to conduct meetings. Applicants with an undergraduate degree in any other discipline must show strong performance in basic courses in biology and chemistry.

LAW 315 Cybersecurity (3 Credit Hours)

In a seminar format, this course will introduce tenets of cybersecurity as it unfolds in multiple contexts: from legal, business, economic, and technical perspectives. This course takes an interdisciplinary approach to explain how cybersecurity law has developed and the challenges all attorney face in this rapidly developing area. This class also provides theoretical and practical introductions to the distinctions between privacy and cybersecurity, technical foundations needed to understand the challenges of securing complex systems, and an introduction to the legal concepts that motivate cybersecurity law and policy. This class also introduces processes and frameworks used by private and public institutions to manage cybersecurity programs as industry standards and best practices, and will help students engage in discussion about cybersecurity from a risk management perspective, essential both to business decisions and court outcomes.

LAW 316 Hedge Funds (2 Credit Hours)

Pre-requisites: Business Organizations

There are over two trillion dollars invested in hedge funds-investment giants that move and shape today's international financial markets. Yet many do not understand their significance or their complex workings. This course is designed to give you a practical understanding of hedge funds and the documentation that supports the formation and operation of these funds. We will examine the regulatory, compliance and business issues surrounding hedge funds and provide tools for successful fund implementation. We will also explore practical concerns with the Investment Advisers Act of 1940 and the Investment Company Act of 1940 as well as current changes to the regulatory scheme, including Dodd-Frank. Securities Regulation is not a prerequisite but will be helpful.

LAW 317 Legislation and Political Thought (2 Credit Hours)

This class will provide an in-depth exploration of legislative process and procedure on the state level, the legislative institution and the impact of electoral politics on lawmaking. Through the use of case studies and guest speakers who are part of the process, students will learn the many components of lawmaking and how all come together in today's political culture. This is a Skills course.

LAW 319 Jurisprudence I (3 Credit Hours)

This course will consider a number of topics residing at the cutting edge where law and legal philosophy meet, including: What is law? Must law be related to morality? What is the interpretative function of courts? Should integrity constrain what courts decide? From whence does the duty to obey law come? Are there any human rights? Might some of these rights be manifested by our ideas of liberty, privacy and freedom of expression? Need we respond to terrorism by changing our values? What is distributive justice as compared with corrective or retributive justice? Are distributive justice questions implicated by court decisions involving affirmative action, gender, and sexual orientation? How is corrective justice manifested in tort and contract law? What is ownership? Is ownership of intellectual property morally justified? What is the relationship of causation to responsibility, and what is punishment and how is it justified. Students may take this three hour course either as a lecture course with a midterm and final exam or a seminar with a 20 page research paper due at the end.

LAW 320 Jurisprudence II (3 Credit Hours)

This seminar addresses the philosophical underpinnings, moral standards and political presuppositions of legal regimes that are distinct from those studied in Jurisprudence I. A series of short papers is required. (No prerequisites) This course counts as a Perspective Elective course.

LAW 322 Comparative Health Law and Bioethics (1 Credit Hour)

The field of health law offers a fascinating platform from which to compare foreign legal systems. By understanding the wide variation in how different nations approach controversial issues of health law and bioethics, students will develop the skills necessary to critically evaluate their own countries' policies from an international perspective. This is a Perspective Elective course.

LAW 323 Business Skills for New Lawyers (1 Credit Hour)

Currently, the legal marketplace requires new lawyers to have more skill sets than just the traditional one's law schools have provided in the past. To be competitive, 21st century lawyers will require a level of knowledge and proficiency in new areas including, but not limited to, fundamental financial matters, marketing and communication, and how to add value for clients. This course is an introduction to necessary business skills for new lawyers.

LAW 324 State Constitutional Law (2-3 Credit Hours)

This course examines state court decisions from around the country to illustrate the array of state constitutional issues occurring in modern American law. State constitutions are a source of rights independent of the Federal Constitution and frequently are applied by state courts to grant more expansive protection for individual rights than the Federal Constitution afford. Moreover, state constitutional law, like its federal counterpart, is not limited to issues involving individual rights. Course coverage may include equality, due process of law, criminal procedure, property rights, religion, freedom of speech, school funding, the right to a remedy, the structure of state government, judicial power, and amendment processes.

LAW 325 Conflict of Laws (3 Credit Hours)

This course deals with the legal ramifications of disputes involving contracts with two or more states or other jurisdictions. When such disputes reach the courts, what law should be applied and how should the determination be made? The course explores these questions and the various methods courts and scholars have proposed and adopted to answer them. The contrasting points of view regarding choice of law, jurisdiction and recognition of foreign judgments are analyzed in terms of which policies best promote harmony and efficiency in the federal system and accord with the federal constitutional requirements of due process of law and full faith and credit to the judgments of sister states. A special focus this year will be on the application of these areas of law to family law issues. This is a Bar course.

LAW 326 Reviewing and Righting Wrongful Convictions (2 Credit Hours)

The course explores and addresses the causes of wrongful convictions. We will also explore how the law has changed in response to what we've learned about wrongful convictions. Among other factors, the course will specifically consider interrogations and false confessions, forensics and their (mis)use in the criminal law, and eyewitness testimony and memory and factors that may make it fallible. The course will draw from case law, national academy of science reports and related research, and multidisciplinary research in the areas of psychology, social sciences, and the law. The course will also focus on solutions: how have system actors responded? What changes in law have emerged? What changes in practice, including practices in prosecution or police departments. We address the systemic causes of wrongful convictions and consider the impact of such convictions on men and women of color, particularly on Black men and teenagers, who have been disproportionately impacted. In addition to the seminar component, the course will provide students experience addressing and advising the Minnesota Conviction Review Unit (CRU.) The Minnesota CRU is one of a handful of state-wide conviction review units in the country. In the wake of the murder of George Floyd, community members, legislatures, and policy makers sought ways to address the harms created by the criminal legal system. The CRU formed in 2020, when its partnership with the Great North Innocence Project led to grant funding from the U.S. Department of Justice. That same year, Attorney General Keith Ellison created an advisory board composed of diverse legal and community experts with direct experience in the Minnesota criminal legal system. Students in the course will work directly with the Minnesota CRU to assist the CRU in designing protocol and a prioritization of the hundreds of cases it has been asked to review. Students will not be involved in direct representation of any individuals, nor in the investigation of any individual claims. Rather, students will assist in reviewing and identifying the claims presented for review, and devising a system for their review. Students will work on the issues in small groups during every class. Assessments will be conducted in the following manner: Students will ask to write two short (3 pages) response papers during the semester; students' participation will also be considered; finally, the preparation and development of the experiential work will also be considered and weigh heavily in the grading.

LAW 327 Law and Cultural Property (2 Credit Hours)

This seminar examines a range of topics that fall under the umbrella of "cultural property," including claims to tangible and intangible property by individuals, discrete cultural and national groups, and indigenous and native peoples. The seminar is interdisciplinary and draws upon a diverse set of reading materials, including legal sources such as cases, statutes, and treaties; stories from the popular press; and articles written by academics from a variety of fields.

LAW 329 Access to Justice Practicum (2-4 Credit Hours)

This course will examine important issues around access to civil justice, including the history of civil legal aid, current delivery systems and funding models, increased self-representation of litigants in the court system, and potential solutions to bridge the gap between the growing need for civil legal assistance and available resources. To most effectively explore these issues, the course is divided into three components: bi-weekly seminars, several experiential activities and a research project. Each is described briefly below. (1)The bi-weekly seminars will provide necessary framework and context for the experiential learning activities and the research projects. Our seminar will begin with an overview of the challenges of ensuring access to civil justice, with each subsequent seminar analyzing more specific and complex access-oriented issues related to everything from the various actors in the civil justice system to innovations in the delivery of legal services. (2)Each student will complete a research project with course faculty providing supervision. Completed research projects will assist the Illinois Supreme Court Commission on Access to Justice and other legal and judicial system stakeholders. To be successful in these projects, students will be expected to complete legal research, in-depth legal reasoning and policy analysis. Depending on class size, these projects may be assigned to students to work in pairs. In addition to the written work-product, students will present and answer questions about their research to a panel of access to justice experts at the last class of the semester. (3)Finally, at various intervals throughout the semester, and as identified in the syllabus below, students will be asked to complete a series of experiential activities that will be incorporated into class discussions. These experiential activities will increase students' understanding of access to justice issues. Students will be required to spend 120 hours completing the experiential activities and research project assigned during the semester. This is an Experiential Learning and Skills course.

LAW 330 Remedies (3 Credit Hours)

This course examines what courts, including juries, have the power to do in civil cases once a litigant shows he or she has been legally wronged or is threatened with legal wrong. The subject matter of Remedies, now a required subject of inquiry on most state bar examinations, is very broad, meaning, in part, that it draws on many topics of legal study. Constitutional Law, Torts, Contracts, and Federal Civil Procedure, in particular, bear directly on the subject matter of the course. Remedies is therefore sometimes called a "capstone course," because it provides students an opportunity to bring together what they have learned in other courses on substantive and procedural law. One important component of the course is review problem sets (problems similar to examination questions and often presaging them) that are discussed in class. Another is an emphasis on how the remedial issues that become the subject of appellate opinions arise in the first instance, and are presented and play out at the trial court level. Open to all second and third year students. This is a Bar course.

LAW 331 Telecommunications Law (3 Credit Hours)

This course surveys the field of electronic communications, from the telephone to broadcast media to the Internet. Historically, the field of communications has been divided between the traditional mass media (broadcasting, cable, satellite broadcasting) and telecommunications media (wireline and wireless telephone carriers). Today, the two general divisions are converging. One of the vehicles of that convergence is the Internet, which is capable of providing both mass media and individual communications services. This course will examine legal issues affecting all of these media. Much of the course material necessarily covers the history and theory of communications regulation as practically applied through FCC rulemakings.

LAW 332 Music Law (2 Credit Hours)

This course examines the legal aspects of the music business. We will cover the esoteric language, deal structures, and issues in the music business. Topics include copyright related to music and recordings, music publishing, recording agreements, artist representatives, intra-group agreements and business structure, live performance and touring, and the impact of new technologies on the music industry. Guest speakers will address the class from time to time, including talent agents, talent buyers and managers, recording artists, music publishers, an artist's web guru, record company executives, and performing rights organizations.

LAW 333 Law and Economics (2-3 Credit Hours)

This course will explore the application of economic principles to legal doctrines. The economic approach to law seeks (1) to explain, at least in part, why certain legal rules exist; (2) determine the consequences of legal rules by identifying the incentives created by a legal framework; and (3) provide guidance about how legal rules should be structured or ambiguities interpreted. The course is intended to enable the student to develop an understanding of the economic implications of legal rules, how economic concepts can be incorporated into legal rules, and how economic analysis fits into litigation. Topics covered will include the economics of property, torts, contracts, crime and punishment, and more.

LAW 335 Labor Law (3 Credit Hours)

Labor Law provides students with a comprehensive review and study of United States labor history and policy, with an emphasis on the National Labor Relations Act and its amendments (NLRA), as well as the rights and obligations of individuals, employers and unions under the NLRA, unfair labor practices under the NLRA, the National Labor Relations Board and its enforcement and policy-making powers, a thorough review of how employees select and de-select a bargaining representative (a union), the collective bargaining process, and the role of arbitration in effectuating national labor policy. The course also includes related constitutional, preemption and state law issues.

LAW 336 Expert Witness Theory and Practice (2 Credit Hours)

The expert witness is a powerful weapon in a trial attorney's arsenal. Expert Witness Theory & Practice gives students the opportunity to learn about expert witnesses and work with experts in a mock trial environment. During this two credit hour course, students will learn who can be an expert, what an expert can testify about, the pretrial disclosure requirements for experts, differences between Illinois and federal law regarding experts, and the fundamentals of direct and cross-examination of experts. Students will then participate in simulations including a discovery deposition and a mock trial where students will present and cross-examine psychology graduate students serving as expert witnesses. Students will be graded on their performance of these exercises as well as written exercises and classroom participation. The mock trial will serve as the final examination for the course. Completion of Trial Practice or Evidence is highly recommended. This course qualifies as an Experiential Learning and Skills course.

LAW 337 Employment Law (2-3 Credit Hours)

The law governing the employment relationship is not limited to the union management confrontation of traditional labor law and the proscriptions of employment discrimination statutes. Both common law claims and other statutes have become major sources in challenging, e.g., drug testing, plant closings, lie detectors, whistleblowers, wrongful discharge. This course explores those legal problems. This is not a duplication of either Labor Law or Employment Discrimination; neither is a pre-requisite. The course focuses on the total configuration of statutes regulating employment as well as the emerging common law principles affecting employment relationships.

LAW 338 U.S. Foreign Trade and Customs Law (2 Credit Hours)

The goal of this course is to provide students with an overview of International Trade and U.S. Customs law, in its domestic and international contexts. Students should be prepared to learn about the history and current role of international trade organizations; U.S. government agencies and their roles in international trade; U.S. Customs law and compliance issues. Students will receive an overview of antidumping law and the litigation of antidumping and U.S. Customs issues at the U.S. Court of International Trade and the U.S. Court of Appeals for the Federal Circuit. The role of NAFTA and other free trade agreements in international trade will be discussed, in both legal and political settings. The class will also cover compliance issues that arise under U.S. Customs law, and how a client's non-compliance can incur penalties from the U.S. government and affect overall client profitability.

LAW 339 Biodiversity and Ecosystem Management (2 Credit Hours)

This course will review the issues impacting biodiversity and ecosystems in the 21st century, as well as the policy choices that federal, state, and local governments have made to address these concerns. We will cover biodiversity law, ecosystem management methods, and the emerging relationships these areas have with climate change law and renewable energy development. The grade will be based on a 20-25 page paper, presentation of that paper, and class participation.

LAW 340 Patent Law (2-3 Credit Hours)

Pre-requisites: Intellectual Property is recommended, but not required. This course is designed to expose students to legal issues concerning patents. The substantive law governing patents, including how they are obtained and enforced, is addressed. The format of the class includes lecture/discussions, as well as problem-solving and practical/clinical exercises. No technical background is required (although students should be aware that some patent cases may involve technical subject matter).

LAW 341 Educational Advocacy Lab (2 Credit Hours)

This experiential course explores the intersections between racism, poverty, disability, mental health, gender, and juvenile justice through the lens of education law. As part of their work in this class, law students will participate in simulations and exercises as well as conducting intakes with parents and students who seeking assistance from a free legal helpline for K-12 families facing educational barriers in school. The goal of the intakes is to identify families' legal issues relating to education and support advocacy related to children's educational rights in discipline, special education, bullying, language access, and school enrollment. These intakes will help elucidate the topics covered in the seminar portion of the class which grapples with how school systems historically oppressed low-income students of color and students with disabilities, the laws that were put in place in an attempt to mitigate these harms, and the practices that continue to disproportionately disengage vulnerable populations from school. By the end of the course, you should be able to: 1) describe the laws that protect students in K-12 schools; 2) conduct a culturally competent intake; and 3) illustrate ways that one can effectively advocate for educational equity in schools. This Educational Advocacy Lab course is a prospective elective course and is open to 1Ls, 2Ls, 3Ls, and 4Ls.

LAW 342 IP Bytes (1 Credit Hour)

Students in this course will be writing blog posts and/or editing blog posts for Loyola's IP Bytes blog under supervision of Prof. Ho.

LAW 343 Aviation Law (2 Credit Hours)

This course will serve as both an introduction to the laws of aviation and space in their broadest sense, as well as a survey of legal issues associated with, and bearing on modern aviation and space issues against the backdrop of fundamental business principles. It will incorporate all areas of law covered in the first-year law school curriculum to cover the basic legal frameworks of aviation and space law, including: international treaties; federal and state statutes; federal and state regulations; government regulation of aircraft including drones, air carriers, pilots, airspace, and airports (including land use); choice of law issues relating to all aviation and space related litigation; and case law. Current international space law in U.N. resolutions, treaties, and customary law will be identified as will the legal theory and principles used in the advancement of civil, military, and commercial space activities. Recent developments and more specific topics in space law will be covered, including: property rights and claim of sovereignty over outer space and celestial bodies, Outer Space Treaty requirement applicable to new proposed activities in space, commercialization and privatization of low earth orbit, orbital debris—legal issues and governance, intellectual property, and export control laws as applicable to space activities. Materials will consist of a textbook, as well as cases, statutes, treaties, regulations, and policy statements. Based on availability, guest speakers, employed in key aviation and space related positions internationally, will share perspectives, wisdom, and experiences.

LAW 346 State & Local Taxation (2-3 Credit Hours)

Pre-requisites: Federal Income Tax (Law 280) Recommended: Corporate and Partnership Tax (Law 281)

State and local taxes in the United States are numerous, diverse and constantly evolving. These taxes are also the source of some of the most significant controversies in tax practice today. This course explores the federal and state constitutional and statutory frameworks that underlay state and local income tax (corporate and personal), sales and use taxes, and as time permits, the other significant types of state and local taxes (property taxes, capital based franchise taxes and gross receipts taxes, etc.). While there is a special focus on Illinois, the course is designed to equip a tax practitioner with the tools to approach and understand the tax regimes in most states and localities.

LAW 347 Title IX Compliance in Higher Education (2 Credit Hours)

Students will learn the historical foundations and regulatory evolution of Title IX of the Education Amendments Act of 1972, tracing Title IX and its related regulations from their civil rights origins through the contemporary application of Title IX to admissions, athletics, sexual harassment, and employment. The course invites students to examine and critique all aspects of this important and controversial law, while also introducing the practical knowledge and skills needed by lawyers and education administrators to ensure (or challenge) Title IX compliance in higher education.

LAW 348 Law & Poverty (3 Credit Hours)

This course concerns those areas of civil law which most affect low income persons: landlord/tenant, federal housing, welfare, social security, Medicaid, Medicare, unemployment compensation, and civil rights. Other systemic issues will be explored, such as wealth discrimination, use of legal remedies to promote social change, and the delivery of legal services to low income persons. This is a Perspective Elective course.

LAW 349 Environmental Law (3 Credit Hours)

An introductory course aimed at introducing the major federal environmental statutes and the types of analytical and practical problems encountered in the practice of environmental law and in environmental litigation. The course is devoted to reading and discussion of statutes, cases, articles, and problems in the various environmental media: air, water, and land disposal of waste. The course examines the environmental justice implications of these statutes. Some technical science and economics concepts are included.

LAW 350 Land Use (2-3 Credit Hours)

This course explores land use controls such as zoning and subdivision regulations as exercised by local and state governmental units. The course analyzes the history of land use controls and explores topics such as flexibility and discretion, improper influence and corruption, alternative land use control schemes, suburban zoning and racial/economic exclusion, environmental protection by land use schemes, and growth control. In the process of exploring land use controls, the course analyzes the local institutions and procedures, constitutional issues, and the question of when an improper taking of property occurs in our legal system.

LAW 352 Real Estate Seminar (2 Credit Hours)

The seminar will focus on recent Illinois zoning and land use cases. Land use and zoning is one of the most important substantive law areas applicable to real estate development. Each student will select a recent reported case concerning subject property in the Chicago area. The instructor will assign the cases leaving students free to propose suitable alternatives. Students may trade cases with other students. Once case assignments have been finalized, the student assigned the cases will visit the site(s), perhaps taking photographs or videos. To the extent possible, the parties and their counsel will be interviewed. No library research should be necessary. However, all students will read the court's opinion, and the student reporting on the case will also read the briefs of the parties. Each student will be given one full class period (50 minutes) to present an oral report to the seminar, beginning at the sixth week of classes. All members of the seminar will be required to attend these reports. After reporting and discussing the case with the seminar, each student will write a paper about the case not to exceed 15 double spaced pages (12 point type). After the case assignments have been finalized, I will conduct a number of classes about basic land use and zoning. Students will be required to read assignments in John Nolon and Patricia Salkin, *Land use in a Nutshell* (West, 2007). Lots of new and used paper versions of this book are available in addition to electronic copies. Enrollment is limited to 14 people, and the consent of the instructor to enroll is required. There will be no final exam. The grade will be based on the oral report and paper. This is a Skills course.

LAW 353 Bankruptcy Litigation Skills Seminar (3 Credit Hours)

This course will explore principles of Federal Bankruptcy Law, with particular emphasis on corporate reorganization under Chapter 11 of the Bankruptcy Code. The course will involve simulated law practice problems and other exercises to provide a hands-on approach to bankruptcy issues.

LAW 354 American Legal History (2 Credit Hours)

Deep controversies over political issues present now: immigration, health care, the power of states, even presidential power will be shaped and possibly resolved by law. This has been so from the Colonial era until this moment. The fundamental idea of this course is that, seen through the lens of history, law has molded and been molded by our social, political and economic relations. American law has been essential in determining the most fundamental questions affecting us: slavery, voting, property-holding, the status of women, the role of religion, what agreements we may make, who is responsible for accidents, whether wealth may be taxed, pollution, and countless other topics. The class critically surveys the legal concepts, forms and institutions that have shaped and been shaped by American society throughout its history.

LAW 355 Privacy Law (2 Credit Hours)

This course is designed to give students an in-depth introduction to the law of data and information privacy around the world as well as practical experience regarding how data privacy issues arise and are resolved. The course will follow a lecture and discussion format focusing on fundamental principles of data privacy and how they apply to various jurisdictions around the world with a particular focus on the United States and Europe. Along the way, students will be given a series of small assignments tied to the substance of the class material and structured around privacy-related problems with which a practicing privacy attorney might be faced.

LAW 356 Storytelling and Presentation Skills for Lawyers (2 Credit Hours)

This course is designed to train student lawyers in the art of storytelling and persuasive presentation for the courtroom. Training will focus on the goal of persuading juries by presenting complex material in narrative form with the ease of a conversation. Students will learn how to construct powerful stories that illustrate critical aspects of the case, using simple language, effective pacing, and vivid character development. Students will also learn how to use vocal inflection and body language to tell the story between the words, project confidence, and how to make a mental/emotional connection with the jury. Courtroom delivery is examined through principles that apply to all spoken interaction: use of space, use of visuals, and use of time. The course focuses concepts drawn from literature, theatre, and public speaking. Students learn the practical skills that apply to openings, closings, witness interrogation, and prospective client interviews. Each day includes both lecture and practical workshop components. Students will prepare and deliver an original opening statement at the beginning and end of the course.

LAW 357 Bar Exam Multistate Workshop (1-2 Credit Hours)

This unique workshop will help to prepare students for the Multistate Bar Examination (MBE). The MBE contains 200 multiple choice questions in the areas of constitutional law, contracts, criminal law and procedure, evidence, property and torts. In most states, including Illinois, the MBE constitutes one-half of the entire bar exam. Each workshop will focus on three of the substantive areas tested on the MBE. Students will receive test taking strategies, guidance in answering commonly tested questions, practice answering questions and analysis of their performance. This is a Bar course.

LAW 358 The Quest for Racial Justice in the Long 1960s (3 Credit Hours)

This course will consider the legal and social history of the quest for racial justice in the aftermath of Brown, primarily as it was experienced in the Fifth Circuit, which covered the entire of the Deep South and the Panama Canal Zone at that time.

LAW 360 Products Liability Seminar (2-3 Credit Hours)

This seminar will cover the fundamentals of products liability law and the complex evidentiary issues and strategy choices that lawyers face in products litigation. It will also address the effectiveness of the tort system to deal with injuries caused by products, the impact of tort reform on the evolution of products law, and the influence of political processes on product regulation. The course will meet for two hours each week. Students may submit a paper for an additional hour of credit. The grade for the course will be determined by a two hour examination. This is a Perspective Elective and Bar course.

LAW 361 Insurance Law (2 Credit Hours)

This course offers a basic study of the legal aspects of insurance. Problems common to all types of insurance are considered, including problems of policy interpretation, rights and liabilities of parties and companies, and the regulation of the insurance industry. In addition, special problems raised by particular types of insurance policies are considered. Course covers the comprehensive overview of laws, standards, concepts and remedies related to insurance, including: interests protected by insurance; selection and control of risks; insurable interest; the principle of indemnity; types and classifications of insurance; making, dealing with and termination of insurance contracts; agency, underwriting and claims handling; insurance regulation; subrogation; and extra-contractual liability.

LAW 362 Workers Compensation (2 Credit Hours)

This course will study the rights and responsibilities of injured employees and their employers under workers' compensation and occupational diseases statutes. Third-party actions also are examined.

LAW 363 Water Resources Law (2-3 Credit Hours)

This seminar examines the legal regime that governs the allocation and management of surface and ground water in the United States and on international rivers and aquifers. The class will cover the two basic allocation regimes in the United States – riparian rights and prior appropriation – and a variety of current topics. These include the capacity of the legal system to adapt to global climate change, the emergence of a human right to water, the impact of environmental laws on the right to divert water, the management of the Great Lakes, and the special rights of Indian Tribes. This course will be taught at Chicago Kent College of Law.

LAW 364 Women and Jewish Law (3 Credit Hours)

This course will examine the primary issues of Jewish Law affecting women, particularly as they pertain to family law. Among the topics that will be highlighted are marriage, divorce, sexual relations, and child rearing responsibilities. The course will involve an examination of both the classical Jewish law texts on these topics (in English) as well as a discussion of more current positions on the issues covered. Students need not have any background or religious affiliation to take this class.

LAW 365 Chinese Law Practicum (1 Credit Hour)

Sequel to Introduction to Chinese Law to include specific skill sets in Chinese Commercial Law for use in an internship for American Law Firm doing business in China to set up China Based Presence for a Multi-national corporation doing business in China. Must complete two credits in Introduction to Chinese Law (LAW 177) and receive instructor permission. This is an Experiential Learning course.

LAW 366 Immigration Law and Policy (2 Credit Hours)

This course is a survey of U.S. immigration law with an emphasis on immigration policy and current developments. This class is intended to provide a foundation on which to understand immigration law as it currently exists. Topics include the history and legal foundations of U.S. immigration law and will cover family and employment-based immigration benefits, criminal immigration provisions, grounds of inadmissibility, detention/removal, refugee and asylum law, and U.S. citizenship.

LAW 368 Higher Education Law (2 Credit Hours)

The administration of each college and university in the United States undeniably intersects with the American legal system in multiple ways. Indeed, in today's increasingly regulated and politically charged context, the enterprise of higher education may now be more impacted by the law than ever before. Students in this course will learn how foundational concepts across traditional legal areas (e.g., administrative law, civil rights, torts, intellectual property, etc.) apply to the unique domain of "higher education law" and will explore hot topics such as student discipline, free speech, diversity & inclusion, sexual misconduct/Title IX, and faculty and student unionization - to name a few. Course format will be entirely online, with most weeks taught synchronously and occasional class content delivered asynchronously.

LAW 370 Securities Regulation (3 Credit Hours)

This course will introduce students to the issues that arise in securities regulation and securities related transactions. The first half of the course will cover the 1933 Securities Act, which addresses the initial distribution of securities to the public. The analysis of what is a security will be undertaken in connection with the 1933 Act. The second half of the course covers the 1934 Securities Exchange Act, which is a multifaceted statute. Students will analyze this statute and topics, including the following: (i) the regulation of stock exchanges, over-the-counter market and broker dealers; (ii) extension of credit in securities transactions; (iii) proxy solicitation and tender offers; (iv) insider trading; and (v) anti-fraud, particularly Rule 10b-5. Students will also have the opportunity to study and evaluate various types of documents that are commonly encountered in securities transactions and study defensive tactics to tender offers in connection with the 1934 Act material. Students taking this class would benefit by having previously taken Business Organizations. There will be two exams: one in March covering the 1933 act and one in May covering the 1934 act. These exams will be weighted equally.

LAW 371 International Business Trans (1-3 Credit Hours)

An introduction to the legal aspects of international business. The course emphasizes what lawyers need to know to represent clients doing business in the 21st century. It covers international treaties like the Convention on International Sales of Goods (CISG), international letters of credit, international commercial terms, conflicts of laws, international trade policy, the Foreign Corrupt Practices Act, international corruption, international arbitration, and import and export issues and how to draft international agreements. Students will actually draft an international distribution agreement, and will also deal with drafting issues for international agency agreements, international licensing agreements and international franchise agreements. A focus will be on advising clients who are doing international business, in order to help them engage in best practices and avoid pitfalls. (Moses)

LAW 372 International Law and Practice (3 Credit Hours)

This course introduces the structure of the international legal system, examining the sources of international law; the roles of states, individuals and other actors; methods of dispute resolution; and the status of international law in the U.S. The course examines topics of substantive law, including the use of force. Finally, the course examines how international law affects, and can be used in, domestic practice.

LAW 374 Extraterritorial Law Enforcement (2 Credit Hours)

This seminar will focus on the legal and operational issues associated with investigating and prosecuting extraterritorial criminal activities. Topics will include the emergence of transnational crime, United States extraterritorial criminal jurisdiction, and the tools used to investigate and prosecute individuals located outside of the United States and offenses occurring outside the United States. The course will discuss extraditions, undercover operations, evidence, and renditions. Students will be evaluated on class participation, a short mid-semester paper, and final exam.

LAW 375 Antitrust (3 Credit Hours)

This course treats in depth many aspects of the Sherman and Clayton Acts. Emphasis is placed on an understanding of the policies and objectives underlying the antitrust laws and the extent to which enforcement of the antitrust laws has fulfilled those objectives. Areas examined include monopolies, price fixing, division of markets, exclusive dealing arrangements, boycotts, resale price maintenance, and mergers. Recent trends in sports and health care industry antitrust cases may be discussed. The impact of economic analysis in the antitrust area is also examined.

LAW 376 Student Initiated Capstone Project I (1-4 Credit Hours)

Student Initiated Capstone Project: Engaged Learning (comprehensive simulation and skills) This variable credit course may be repeated for a maximum of four (ungraded) credits. This course is limited to 3L students or rising 3Ls unless exceptional circumstances apply to allow 2L enrollment. The student-initiated capstone project provides students an opportunity to synthesize and apply substantive knowledge, legal analysis, skills and professionalism to a complex legal issue and receive feedback that facilitates their move to practice. Students may propose the provision of project-based legal assistance to a public, non-governmental or professional organization or another proposal that allows students an opportunity to exercise planning, project-management, problem-solving and other skills in a real-world setting, while at the same time developing the capacity for self-directed learning. Project requirements: Students must submit a written proposal for review and approval to the Associate Dean for Academic Affairs in the semester prior to enrollment in the course setting forth the following: - A description of the project, including its purpose and potential impact on the organization on whose behalf the project is being undertaken; - An implementation work plan, including time line and progress benchmarks; - The number of students participating in the project; - A plan for faculty supervision (student must seek out and secure the participation of a faculty adviser); - Memorandum of understanding from the relevant organization (if applicable); - The specific knowledge, skills and values that would be needed to bring the project to successful completion; - Proposed deliverables, which should include a mechanism for student reflection on the capstone experience; - Proposed criteria for evaluating student performance. Examples of approved Capstone projects: SUFEO (Stand Up For Each Other) suspension advocacy project, Dialogue De Novo a Loyola Law community and legal interview podcast, and Legislative Advocacy Supporting the LGBTQ+ Community project.

LAW 377 Intellectual Property Law (3 Credit Hours)

The course is an introduction to the law of intellectual property. This course is a pre-requisite for advanced courses in IP, but also a good survey of the area for students interested in pursuing other legal careers. The focus of the course is on understanding the distinctions and similarities between the various aspects of intellectual property law. The predominate focus on the course is on trademark, patent and copyright law (in about equal proportions), with some attention also devoted to the law of trade secrets. No technical background is expected or required.

LAW 379 Data Breach Notification Laws (2 Credit Hours)

This course introduces students to state and federal data breach notification laws and the policies and procedures surrounding those laws. Students will learn about the requirements placed on corporations and other institutions to notify customers in case of breach. They will become familiar with the process for providing notice. The course is especially useful for students interested in corporate law, health law, intellectual property, and in matters of technology, privacy and data security in the legal sphere.

LAW 380 Estate & Gift Tax (3 Credit Hours)

The course examines the basic components of the federal transfer tax system (estate tax, gift tax and generation skipping tax), and as their interrelationship. The course emphasizes the structure of the federal transfer tax system and includes suggestions for revision. Students who intend to take Estate Planning must complete this course. Federal Income Tax is highly recommended.

LAW 381 International Arbitration Workshop (1 Credit Hour)

This course is designed to introduce the law student to the basics of advising and representing clients in international arbitration. The course will consider the basics of negotiating and drafting arbitration clauses such as the use of standard arbitration clauses, choice of the arbitral institution, seat of arbitration, number of arbitrators, language and the applicable law. It will then turn to the fundamentals of party representation in international arbitration such as nomination and appointment of arbitrators, written advocacy, document production, witness testimony and oral argument. The course will pay particular attention to the cross-cultural challenges and ethical issues pertaining to in international arbitration advocacy.

LAW 382 International Tax Law (3 Credit Hours)

Pre-requisites: Federal Income Tax or Permission Required This course focuses on U.S. income tax issues with respect to the foreign activities of U.S. taxpayers and U.S. activities of foreign taxpayers. Particular emphasis is placed on the corporate taxpayer. Foreign tax systems are not addressed specifically except to highlight differences from the U.S. system. Specific topics include the foreign tax credit, sourcing rules, the "effectively connected" doctrine, the concept of trade or business in the U.S. Code section 482 allocations, subpart F income, and tax treaties.

LAW 384 Tax Controversy Practice and Procedure (2 Credit Hours)

Pre-requisites: Federal Income Tax

This course covers procedures and strategies for representing clients and resolving Federal civil tax controversies arising from Internal Revenue Service audits and appeals, including litigation. The course also includes a discussion of tax penalty provisions and the ethical issues faced by advisors in structuring tax motivated transactions and resolving tax controversies.

LAW 385 Nonprofits (3 Credit Hours)

Nonprofit organizations play a crucial part in the U.S. economy. Among other things, they account for almost 10 percent of the wages paid in the United States, and they account for more than 5 percent of the country's GDP. This class will go over the laws that govern this nonprofit activity, including the organization and operation of nonprofit organizations under state law, the rules governing federal tax exemption and charitable deductions for donors, and the laws that govern noncharitable nonprofit organizations. By the end of this class, you should have basic knowledge that you will need to advise nonprofit boards of directors of their legal obligations and ensure that nonprofit organizations comply with relevant federal and state laws.

LAW 386 Advanced Corporate Tax (3 Credit Hours)

This course follows Corporate and Partnership Tax. The principal focus is on taxable and nontaxable acquisitions of a corporate business. The first part of the course focuses on taxable asset sales and stock sales; the second part explores and analyzes the detailed statutory and common law requirements with respect to "non-taxable" acquisitive reorganizations (mergers, stock/asset acquisitions), "nontaxable" divisive reorganizations (spinoffs, split-offs, split-ups) and other nontaxable corporate adjustments (recapitalizations, reincorporations). Please note: Corporate and Partnership Tax is a pre-requisite for this course.

LAW 387 International Environmental Law (3 Credit Hours)

International Environmental Law introduces some of the legal and policy responses to global environmental degradation. The course begins with an introduction to the international legal framework within which international environmental law has developed and provides an overview of the major environmental problems confronting the international community. The course then examines a variety of global environmental problems and the legal regimes that have developed to address these problems. The emphasis throughout the course is on the relationship among environmental protection, economic development, and social development (the three pillars of sustainable development) and on the conflicting goals and priorities of affluent countries (the Global North) and middle- and low-income countries (the Global South). The North-South divide will serve as the key analytical framework through which the course will examine global environmental governance, with particular emphasis on environmental justice and on the perspectives and concerns of historically marginalized states and peoples.

LAW 388 Global Access to Medicine: A Patent Perspective (2 Credit Hours)

This course considers how patents impact access to medicine in today's global economy. While there are many issues that impact access to medicine, patents are the highlight here because patents are often poorly understood, yet have an enormous impact on access to medicine. After all, the existence of a life-saving or sustaining drug is essentially of no utility if it is priced beyond reach. This class aims to broaden students' consideration of different views of patents in the context of exploring a growing web of international agreements that require nations to adopt specific types of patent laws that have implications for the cost of drugs. No prior knowledge of patents or international law is required, although students will learn some aspects of each by the conclusion of the course. Student grades will be based on class participation, as well as a final project and presentation; there will be no final exam.

LAW 389 Public Interest Law Seminar (1-2 Credit Hours)

Students must enroll in the Public Interest Law Seminar during their second or third year of law school. The seminar is required to obtain a certificate in Public Interest. At the time of enrollment in the Seminar, students shall have completed or be in the process of completing the 30 required volunteer service hours. Also, at the time of enrollment in the Seminar, the student shall have completed or be in the process of completing a clinical program, practicum, or externship. During the Seminar, students will either write a publishable article on a public interest topic or complete a project related to the public interest.

LAW 390 Financing An Aging Population (2 Credit Hours)

This class will highlight planning opportunities for attorneys practicing in elder law and estate planning to offer to their clients. Foundational topics include basic income tax concepts, basic gift and estate tax concepts, basic estates, trusts and probate concepts, and basic retirement planning concepts. Then, the course highlights the statutory planning tools available for individuals as they age, including special needs trusts, reverse mortgages, long term care insurance, and other methods for funding a healthy quality of life during retirement, and for funding as large a legacy as possible upon death. The contract and fiduciary issues with surrogate decision-making, as well as the clinical assessment of diminished mental capacity, will also be discussed.

LAW 391 Professionalism (2 Credit Hours)

Exposure to attitudes and characteristics which act as the basis for success as a true professional in the practice of law. The class will present perspectives on how to succeed as a new lawyer, given expectations and competitive environment. The class will expose the traits identified by others that will equip law students to grow into lawyers who have true professional and personal success. The experience will aim to provide a framework of skills that are considered indispensable for professional success that are not otherwise the focus of attention in the traditional law school curriculum. Subjects such as civility, self-awareness, resilience, the setting of focused values, duties of confidentiality and competence, and other strategic goals will be explored. In sum, this course will be an experience in reflection, goal setting, and exposure to the realities awaiting the post-law school experience in the legal profession.

LAW 392 Consumer Law Review Associate Editors (1 Credit Hour)

This is the course to provide credit to student editors of the Consumer Law Review.

LAW 393 Estates and Trusts (4 Credit Hours)

This course is being offered in collaboration with Chicago Kent School of Law and will be taught at Chicago Kent.

LAW 394 Consumer Law Review Senior Editor (1-2 Credit Hours)

This is the course to provide credit to student editors of the Consumer Law Review.

LAW 395 Consumer Law Review Executive Editors (1-3 Credit Hours)

This is the course to provide credit to student editors of the Consumer Law Review.

LAW 396 Consumer Law Review Members (1 Credit Hour)

This is the course to provide credit to student editors of the Consumer Law Review.

LAW 397 Elder Law (2 Credit Hours)

This class provides the doctrinal foundation in elder law. The class is taught through the lens of bar-related areas of the law. Fiduciary and Agency law concepts are used to discuss ethics issues, discrimination issues, durable powers of attorney, and other methods for planning for an individual's incapacity. Public and Constitutional law concepts are used to discuss an individual's right to consent to or deny medical treatment, the court's jurisdiction in adjudicating adult guardianship, and the governmental benefits available to elderly individuals. Property laws are used to discuss various housing choices available in retirement, and Contract and Tort laws are used to discuss nursing homes, private insurance, and other financial contracts. Additionally, Consumer and Bankruptcy laws are used to discuss financial exploitation while Evidence and Criminal laws are used to discuss physical and emotional abuse of the elderly. Other important issues with aging populations will be discussed.

LAW 398 Negotiations (2 Credit Hours)

This course examines the negotiation process engaged in by lawyers. It is intended to increase a student's understanding of that process and to develop his/her skills as a negotiator. Experts in various fields discuss negotiations as they apply in those areas of the law. Students engage in mock negotiations in a variety of contexts, such as divorce, real estate, contracts, commercial law, labor law, and criminal law. Not all instructors cover each of these areas of substantive law, and different instructors emphasize different areas of substantive law. Must have completed 40 credit hours; if you take Mediation or Negotiations, you cannot take Alternative Dispute Resolution. If you have taken the Mediation & Other ADR Procedures Clinic, you cannot take this class. This course will be taught at Chicago Kent College of Law.

LAW 399 Financial Wellness for New Lawyers (1 Credit Hour)

The purpose of this course is to prepare students for the opportunities and personal financial challenges they will encounter during their legal careers. My goal is to show each student that strong financial habits are crucial and beneficial for all types of attorneys and all levels of income. Students will learn that it is possible for all of us to obtain financial freedom, which translates into the power of choice. When we have the power to choose, we have the power to live a life that conforms to our personal values, including the strong values instilled upon us at Loyola. When we are not encumbered by poor financial choices, we are free to choose our professional focus, to share our talents with the disadvantaged members of our community, and to work on passion projects. Importantly, we can choose to spend more time with loved ones.

LAW 400 Corboy Fellows I (3 Credit Hours)

Corboy I is a graded course available to students in their first year of the Corboy Fellowship program. Instructor permission is required for enrollment. In the Corboy I course students earn 3 graded units in the Fall and 3 graded units in the Spring which includes mandatory participation in the evidence/trial practice boot camp at the start of each semester in addition to successful completion of course work in trial practice as required by the syllabus provided by the instructor. In the Fall semester of the course students develop the skills necessary to conduct a trial, including case analysis, opening statements, direct and cross examinations of witnesses, evidentiary objections and foundations for admissibility of evidence, and closing arguments. In the Spring semester of the course students build upon the basic trial advocacy skills developed in the Fall through in-depth case analysis and strategy, advanced direct and cross examination including expert witnesses, and use of the motions in limine to support the basis for evidentiary objections and foundations for admissibility of evidence. Each Fellow is required to apply their learned skills in a local, regional, national or invitation mock trial competition. The Corboy I course satisfies the requirements for Trial Practice I (LAW 411 or LAW 416) and Trial Practice II (LAW 412). Credit: Graded 3 units Fall; Graded 3 units Spring Permission is Required.

LAW 401 Corboy Fellows II (2 Credit Hours)

Corboy II is a non-Graded course available to students after their first year in the fellowship program. Only students that have successfully completed the Corboy I course are eligible to enroll in the Corboy II course with instructor permission. In the Corboy II course students earn a maximum of 4 hours of ungraded credit for participation in mock trial competitions. Non-graded 2 units Fall; Non-graded 2 units Spring Permission Required

LAW 403 Business Entity Formation (3 Credit Hours)

Pre-requisites: Business Organizations

Business Entity Formation provides an opportunity for students to form various types of business entities including partnerships, limited liability companies and corporations. Students apply the legal doctrine learned in Business Organizations and other courses to a series of progressively more sophisticated simulation exercises and prepare the documents necessary to create and organize the entities. Students utilize information gathering, planning, counseling and negotiating skills in the development of the documents.

LAW 404 Client Counseling (1 Credit Hour)

This skills training course is conducted in an intensive workshop format over the course of one weekend. Students will learn the goals and tactics for the most effective client interviewing and counseling relationships. Students practice application of skills and tactics of interviewing and counseling through role-playing as client and attorney. The course will teach skills including effective questioning, dealing with emotions, developing the client case narrative, identifying and addressing implicit bias, meeting clients where they are, and rapport building. The course is ungraded; however, students will be evaluated by in class performance to determine a grade of pass or fail. Students may register for the Client Counseling Weekend Workshop to receive one credit. It is an option to also register for the Negotiation Weekend Workshops to receive a total of two credits for participating in both weekends. Registration in both courses is not a requirement and each course does stand-alone.

LAW 405 Business Practice Transactional Skills (3 Credit Hours)

This course counts as a Comprehensive Simulation and Skills Course. This course will promote skills essential to successful lawyers in business transactional practice: evaluating facts; understanding the central business objectives of clients as well as the goals of other parties to the proposed transaction or relationship; issue spotting and problem solving; and developing, advocating for, and implementing responsive strategies. Three parallel case studies will run through the course, illustrating the application of each topic to different types of client organizations: a Fortune 500 industrial company, an entrepreneurial family-owned business, and a medium-sized not-for-profit organization. The class will be presented with a series of problem simulations built around diverse, realistic business situations for these mock clients. Topics may include structuring; due diligence; letters of intent and similar preliminary documentation; suggesting changes to sample transactional documents that protect and advance clients' objectives; and deal implementation. The course will use traditional learning techniques as well as simulations throughout the semester to explore the role of the transactional lawyer in both a familiar, domestic U.S. context and an increasingly global marketplace. More than ever, business lawyers are afforded the opportunity - and the challenge - of coordinating and planning projects abroad in markets unfamiliar to them, as well as advising international clients with in-bound investments in the lawyer's home market. There are frequent occasions to interact with people whose experience, way of doing business, and goals are different from our own. They may be clients, partners, or counterparties. The professional opportunity in law practice is to become progressively adept at discarding jargon and misconceptions and bridging expectations among transactional participants and their advisors. The course will use primarily real estate project fact situations, since most students can easily imagine and relate to client objectives involved in buying, selling, leasing, or otherwise occupying real property, and since in the international aspects of the course the approaches to property rights and occupancy are so fascinatingly different country to country. But the course's learning points will also have general application in other types of commercial transactions. The course's emphasis on case studies and commercial transaction scenarios is also designed to act as a capstone course which complements and draws upon the students' prior coursework in contracts, real estate and commercial transactions, ethics, and government regulation. Students will be graded based on written assignments and exercises and class participation. There is no final examination for this course. (Hagy)

LAW 406 Mediation Advocacy (2-3 Credit Hours)

This course is designed to give you an important skill set: preparing for and negotiating on behalf of a client in a mediation setting. Unlike a trial, arbitration or appellate setting, where the people listening to you are neutral, in a mediation you are dealing with the decision makers on the other side, people who often behave in a hostile manner towards you and your client. Through practice you can acquire skills that will make you an effective advocate in a mediation setting, including learning to communicate information to the other side in a way they can hear it, identifying the various needs and interests of the parties (as opposed to just the positions), and approaching a dispute as an opportunity to solve a problem creatively. We will touch on the decision science (neuroscience, psychology, and behavioral economics) and cultural competency tools that can make you more effective, and also explore Online Dispute Resolution (ODR), which is quickly emerging as a way to resolve disputes using AI in combination with human mediators. The problem solving skills you will learn in this class can be tremendously helpful whether you are representing a client in a mediation, negotiating a deal in a business or government setting, or settling a case in a pre-trial conference with a judge. Clients appreciate lawyers with these skills because they are able to preserve business and family relationships while still obtaining results that protect client interests at a reasonable cost. Conflict management skills are also highly valued in non-traditional legal careers. The course will also prepare you to represent a client in positional negotiations where the mediator provides an evaluation of the case. Mediation skills are best learned from hands-on experience. Therefore, a substantial portion of this class will involve role-playing simulations. Over the course of this class, you will have the opportunity to serve as mediators, represent clients, be clients, and give feedback as observers.

LAW 407 Immigration Detention Project (2 Credit Hours)

The objectives of the course is to provide students live client experience in the form of a week-long experiential immersion program where students will provide direct representation, advocacy, and support to detained immigrants in geographic locations in the US where the need is greatest. The program will include an online course on a Saturday or Sunday in February, providing students a basic understanding of US immigration law and policy related to the needs of detained immigrants at the designated site (e.g. how to conduct a bond hearing, credibly fear interviews for asylum applicants), followed by a hands-on live workshop (3 hours). The workshop will provide students an introduction to live-client skills including trauma-informed interviewing, vicarious trauma, and also include travel logistics. Reading materials will also be assigned in advance as part of the online course. Participants will travel over spring break in March to provide on-site representation in collaboration with national partners, and spend the last afternoon together to reflect on their week. Faculty and practitioners will supervise students, with one practitioner per four students. Some cases may require ongoing representation, which will be coordinated through the Immigration Law Practicum (Law 470). During the fall term, participants will organize a public forum to share their experience and reflections, and to identify opportunities for other students and practitioners to engage in social justice advocacy on behalf of immigrants both in Chicago and nationwide.

LAW 408 Restorative Justice Workshop (1 Credit Hour)

In recent decades, courts, communities and schools are returning to restorative methods to address family issues such as child guardianship; escalating violence in our schools and streets; reintegrating prisoners into their communities; making decisions about appropriate sentencing; and the role of victims in the process. In each context, the same issues must be addressed: who is involved, what are the needs of the parties, and what can be done to resolve the issues at hand. This one credit course will be conducted in workshop format over the course of one weekend. Students will be able to identify the core principles underlying the restorative justice paradigm, compare and contrast restorative and retributive justice models, and learn the basic elements of conflict resolution techniques through a restorative lens. We will address the history of restorative justice and students will be trained on a restorative dialogue process.

LAW 409 Negotiation Weekend Workshop (1 Credit Hour)

This skills training course is conducted in an intensive workshop format over the course of one weekend. Students will learn basic negotiation principles and skills and apply them during a series of simulated negotiations where they will play the roles of counsel and clients. The course will explore the negotiation process from negotiation planning to the execution of a final agreement. The course will cover concepts including, but not limited to, needs and interests, BATNA, information-gathering, dealing with emotions and option development. The course is ungraded; however, students will be evaluated by in class performance to determine a grade of pass or fail. Students may register for the Negotiation Weekend Workshop to receive one credit. It is an option to also register for the Client Counseling Weekend Workshops to receive a total of two credits for participating in both weekends. Registration in both courses is not a requirement and each course does stand-alone.

LAW 410 Legal Writing III (2 Credit Hours)

This course focuses on persuasive written and oral communication skills which are necessary for critical analysis and the competent representation of all clients. Students will explore all sides of an argument, provide evaluations of the merits of particular cases, and persuade the reader/listener of the student's position. Pre-requisites: successful completion of Legal Writing I and II. This is a Juris Doctor Required course.

LAW 411 Trial Practice I (3 Credit Hours)

Pre-requisites: Evidence

This graded 3 unit course offers the opportunity to develop the skills necessary to conduct a trial, including case analysis, opening statements, direct and cross examinations of witnesses, evidentiary objections and foundations for admissibility of evidence, and closing arguments. The student/faculty ratio is 8 to 1. The faculty rotate among the student groups and each student is given the opportunity to perform the exercises necessary to learn the skill. Each student is paired with a partner and required to conduct a bench trial and a jury trial during the course of the semester.

LAW 412 Trial Practice II (3 Credit Hours)

Pre-requisites: Evidence and Trial Practice I

Law 412 Trial Practice II, Section One This graded 3 unit course offers the opportunity to build upon the basic trial advocacy skills developed in the Trial Practice I course through in-depth case analysis and strategy, advanced direct and cross examination including expert witnesses, and use of the written and oral motions in limine to support the basis for evidentiary objections and foundations for admissibility of evidence. The student/faculty ratio is 8 to 1. The faculty rotate among the student groups and each student is given the opportunity to perform the exercises necessary to learn the skill. Each student is paired with a partner and required to conduct a two bench trials and a jury trial during the course of the semester. Law 412 Trial Practice II, Section Two TRIAL PRACTICE II: A SECURITIES FRAUD TRIAL This semester-long course provides a unique opportunity to try a securities fraud case to verdict culminating in a full-day mock jury trial as the final. Students in this class, limited to 8 students, will try one complex civil case: a private claim of securities fraud alleging that the Defendants operated a Ponzi scheme in violation of Rule 10b-5 under the Securities Exchange Act of 1934. Students will work with a complex case file, including deposition transcripts, sworn statements, an expert report, investment offering materials, correspondence, bank records, and accounting records. Students will create their own summary and demonstrative exhibits to better inform and persuade the jury, and learn how to persuasively use courtroom technology to use exhibits at trial. Leading up to trial, the students will submit brief written motions in limine and responses; these and other pretrial matters will be addressed at a pretrial conference the week before trial. This course satisfies the Trial Practice II requirement.

LAW 413 Current Issues in Criminal Justice (2 Credit Hours)

During this seminar we will analyze and discuss how the criminal justice system is attempting to deal with today's challenges. Topics that might be covered include measures to deal with the gang problem in Chicago; life sentences for juveniles; methods for addressing claims of actual innocence; and the pros and cons of the plea bargaining process. The course materials will include assigned articles and lectures by guest speakers involved in the issues being reviewed. Grades will be based on a paper relating to one of the topics and participation in the seminar.

LAW 414 Professional Responsibility (3 Credit Hours)

This course, required of all students focuses on ethical questions in the practice of law, and examines the basic premises underlying the lawyer-client relationship and the duties assumed by the members of the legal profession, including duties to clients, the public, the courts, and other professionals. Materials consist of the ABA Model Rules of Professional Conduct, and other pertinent standards regarding lawyers' ethics. This is a Juris Doctor Required course.

LAW 415 Trial of a Business Dispute (2 Credit Hours)

This course will focus on trials and arbitrations of complex commercial disputes, including breach of contract and fraud claims. Students will develop skills examining witnesses, deliver opening/closing, discussing specific pre-trial and trial issues relevant to business disputes, and conduct a full trial of a breach of contract or fraud action.

LAW 416 Trial Practice I (Intensive) (3 Credit Hours)

Pre-requisites: Evidence Co-requisite: Evidence, Summer term only

This intensive eight day course is a 3 unit graded course that offers the opportunity to develop the skills necessary to conduct a trial, including case analysis, opening statements, direct and cross examinations of witnesses, evidentiary objections and foundations for admissibility of evidence, and closing arguments. The student/faculty ratio is 8 to 1. The faculty rotate among the student groups and each student is given the opportunity to perform the exercises necessary to learn the skill. Each student is paired with a partner and required to conduct a bench trial and a jury trial during the course.

LAW 417 Advanced Business Law (3 Credit Hours)

This course teaches corporate business law and negotiation skills through a simulated class in which Northwestern and Loyola law students represent either a US pharmaceutical company or an African agricultural production company. The two companies are interested in working together to exploit a new technology and the form of their collaboration will consist of drafting and negotiating a non-disclosure agreement, letter of intent, a joint venture agreement, a licensing agreement, and a long-term supply contract. The negotiations will take place through written exchanges and live negotiations that will be conducted via zoom.

LAW 418 Pre-Trial Litigation (2 Credit Hours)

This course integrates a theoretical and practical approach to the pretrial components of litigation. Students gain an understanding of the purpose of pleadings, pretrial motions, depositions, and settlement conferences, and extend their knowledge through practical experience. The second portion of the course complements the courses in trial practices by investigating the psychology of courtroom communication and its related effects. Overall, students should develop a more well-rounded perspective of the pretrial aspects of litigation.

LAW 419 Business Skills in Sports and Entertainment Law: The Introductory Skill Set (2 Credit Hours)

This course will use current trends, current business practices and the experience of current practitioners in the Sports & Entertainment Industry to introduce, examine and understand Business Skills which are necessary for success in these fields. The use of past deals, structures and documentation from current practitioners will give insight, strategy and the thought process of the facets and nuances to complete a transaction. Engagement via technology or classroom presentation from practitioners in Sports & Entertainment will provide context to course material and provide students a *real world perspective* of the Business Skills necessary for success. Students will be required to draft legal documents and create oral presentations to demonstrate their ability to apply concepts presented during the course.

LAW 421 Political Feasibility Analysis (3 Credit Hours)

Students will analyze strategies for assessing the political feasibility of enacting and implementing public policies. Crafting a message, use of media to communicate that message, identification of allies and opponents, and how to navigate legislative and bureaucratic processes will be covered. Includes: creating messages, use of media, development of grassroots campaign, work within legislatures and government agencies.

Outcomes:

Ability to craft and implement a comprehensive political strategy to change public policy outcomes

LAW 422 Federal Litigation Practice (2 Credit Hours)

A significant portion of federal litigation occurs prior to the filing of a dispositive motion or a trial. This course will explore complex areas of federal litigation that are likely to result in a hearing before a federal judge. Each week, during the first part of the class, the students will explore a different area of substantive law involving frequently litigated topics in federal court such as attorney/client privilege, review of electronic evidence, use and scope of protective orders, and motions to compel. The second half of each class will involve the "litigants" presenting their arguments to the Court based on fact scenarios given to the litigants the prior week. The course is taught by federal judge, Hon. Virginia M. Kendall, and will take place in her courtroom in the Dirksen Federal Building.

LAW 424 Professional Identity Formation (1 Credit Hour)

Loyola's mission is to educate diverse, talented students to be responsible leaders in a rapidly changing, interdependent world, to prepare graduates who will be ethical advocates for justice and the rule of law, and to contribute to a deeper understanding of law and legal institutions through a commitment to research, scholarship and public service. The Professional Identity Formation course seeks to advance the mission of the law school by fulfilling two of the main education goals as Loyola Law: advancing the Jesuit tradition of social justice and ethics and law; and to prepare students to be accomplished and ethical leaders in the legal profession and the larger community. The individual development of a professional identity is critical to meeting these goals. This required 1 credit, 5 week first year course seeks to assist students in the recognition and elimination of personal bias and building awareness of how diversity and inclusion of others whose world view is different from one's own is critical to professional development and success in the practice of law. The course objectives include the education and development of professionals prepared to enter the workplace with the tools needed to successfully engage and manage diverse environments with the ability to think critically about various legal issues, problems and solutions and how they impact different groups of people and communities differently based on identity, privilege and oppression. This course is only open to incoming first year Juris Doctor students.

LAW 425 Feminist Jurisprudence (2 Credit Hours)

This is a cross-disciplinary course open to law students and students in related graduate disciplines including gender studies and social work. The course will involve a critical exploration of the law from a feminist perspective. The class will examine the role of law and lawyers historically and currently in challenging gender discrimination in the United States and globally. Students will be encouraged to creatively analyze how legal training can contribute to the pursuit of social justice and civil rights.

LAW 426 Special Education Law and Advocacy (2-3 Credit Hours)

This course will be offered as a 2-credit course, online only, in Spring 2019. This online course will deal in depth with current and timely issues in the education of children with disabilities. Students will learn federal and State statutory and regulatory procedures in determining eligibility for services, evaluation, development of the individualized education program, and provision of services in the least restrictive environment. The education of special needs children from early childhood through post-secondary transition will be addressed. The course will focus on advocacy, statutory and regulatory compliance, and dispute resolution. Students will assume the roles of parent/student advocate, school administrator, third-party mediator, and school service provider in a variety of online activities, including: participation in eligibility and IEP conferences; disciplinary manifestation determination reviews; resolution sessions, mediation, and pre-hearing due process procedures; and determining Section 504 eligibility and developing and implementing a Section 504 service plan.

LAW 427 Public Interest Law Reporter Executive Editor (1-3 Credit Hours)

Students enrolled in this course receive credit for their work as the executive editors of the law school's Public Interest Law Reporter.

LAW 428 Pub Int Law Reporter Associate Editors (1 Credit Hour)

Students enrolled in this course receive credit for their work as the associate editors of the law school's Public Interest Law Reporter.

LAW 429 Pub Int Law Reporter Members (1 Credit Hour)

Students enrolled in this course receive credit for their work as the members of the law school's Public Interest Law Reporter.

LAW 430 Legislation (2 Credit Hours)

This course considers the dominant role state and federal legislation plays in today's legal system. Topics covered include legislative theory; key concepts of legislative drafting; sources of legislative uncertainty; the changing theories, tools (including the oft-maligned canons of statutory interpretation), and practices of statutory interpretation; and the role of courts in interpreting statutes. The greatest part of the course will focus on matters of statutory interpretation including the tools courts rely upon when interpreting statutes.

LAW 431 Documenting and Negotiating Finance Transactions (2 Credit Hours)

Pre-requisites: Students taking this class will be expected to have taken Business Organizations

This course offers students an opportunity to focus on the legal issues that arise between borrowers and their financial advisor/banker. Topics covered include a focus on commercial loan agreements, other capital raising vehicles and mergers and acquisitions. The course also focuses on the perspective of the CFO and the banker in deciding when and how to raise additional capital, expansion through acquisition and partnership/joint-ventures with other entities. Students also study examples of actual loan agreements and other related documents as well as analyzing case law involving financial institutions and loan agreements. This course uses practical examples of actual transactions including details of their negotiation and execution with the student actively involved on a case study basis. Knowledge of Secured Transactions and Federal Income Tax would greatly assist the student; these classes are not, however, required to take the course. This is a Skills course.

LAW 433 Critical Legal Studies (2 Credit Hours)

Critical theory attempts to answer the age old question, "what is law?" by asserting that law is the reflection of the political values of the dominant group within society. After a brief introduction to the more traditional theories of justice; such as natural law, legal positivism, and legal realism, students will take up the challenge of Critical Legal Studies. Subjects covered include an economic analysis of law; gender and sexual orientation; and critical race theory. Other possible topics include an evaluation of law and economics; the emergence of Sharia law; and the role of feminism in the 21st century. This course will be taught at Chicago Kent College of Law. (It may be taken as either a regular course with an exam at the end, or as a seminar with a paper in lieu of the exam.)

LAW 434 Federal Criminal Law (2 Credit Hours)

Most criminal law is state law. When should the federal government get involved? This course answers the question by looking at both the legal arguments and the underlying policy goals of Supreme Court Justices. Along the way, it explores several major federal crimes: blackmail, government corruption, organized crime, drug dealing, fraud, and money laundering.

LAW 435 Deposition Advocacy Workshop (2 Credit Hours)

This Skills and Comprehensive Simulation Program is designed to teach students about Illinois and Federal deposition practice. Topics covered will include: effective deposition questioning strategies and techniques; thorough deponent preparation; efficient and technical use of exhibits; proper objections; methods of rehabilitating your witness; ethical considerations; and how to deal with the most difficult opposing counsel. This class will have lectures, but primarily focus on in class participation and interaction. The grade for this course will be based on individual mock deposition performances, in class participation, and overall contribution to self-critique and classmate critique.

LAW 436 Comparative Constitutional Law (1 Credit Hour)

The course will explore comparative constitutional law topics that are pertinent to issues in the United States. Topics considered will include the protection of fundamental rights, such as freedom of speech and religion, as well as matters such as the structure of constitutional review; the composition, attributes, and functioning of the tribunals that conduct that review; the proper role of foreign, transnational and international law in constitutional decision making; and the division of authority between central and regional or local authorities.

LAW 437 Public Interest Law Reporter Senior Editors (1-2 Credit Hours)

Students enrolled in this course receive credit for their work as the senior editors of the law school's Public Interest Law Reporter.

LAW 438 Dispute Resolution Skills Teams (1-3 Credit Hours)

This is a non-graded course that requires instructor permission to enroll. The course is limited to students that are currently or previously enrolled in the LAW 400, 401, 438, or 499. Students are required to prepare and compete in one or more advocacy competitions. Variable non-graded credit is available from one to three units depending on circumstances as determined by the instructor. Credit: Non-Graded 1-3 units

LAW 441 Trial Practice - Modern Trials (3 Credit Hours)

Pre-requisites: Trial Practice I or Trial Practice Intensive

Trial Practice - Modern Trials is a three-hour, graded credit advanced trial practice class designed to teach students the skills necessary to effectively try cases using computers to present evidence and visuals for jury addresses. Modern juries receive the majority of their information from television and computer screens - a courtroom should be no different. The course builds on the basic trial skills acquired in other Trial Practice classes with a real world approach to simulate modern trials as closely as possible. In the first few weeks of the semester, students learn how to use PowerPoint and a dedicated courtroom presentation program called "Sanction" as tools to better engage juries by presenting materials electronically. The remainder of the semester is spent trying cases-first in a workshop setting where students receive hands-on advocacy instruction, followed by trying two full mock-trials in the federal courthouse courtrooms with built-in computer monitors and projectors. The skills acquired in this class are now a necessary for any aspiring trial lawyer as many federal courts function exclusively through the electronic presentation of evidence. The course will be taught by Assistant United States Attorneys Michael Ferrara and Abbie Peluso (both Loyola alums).

LAW 443 Immigration Law and the Workplace (2 Credit Hours)

An estimated 12 million people live and work in the United States illegally, according to many news accounts. As the immigration debate rages, the focus is on both the immigrant workers and the employers who supply the jobs. It has been illegal to employ unauthorized immigrants in the U.S. since 1986. The Immigration Form & Control Act (IRCA) requires all employers to verify employment eligibility through the I-9 form, but the government has not been consistent enforcing immigration laws in the workplace. Moreover, many states and municipalities have taken on the issue and have passed their own immigration laws. The Immigration and Customs Enforcement (ICE) agency is responsible for ensuring that employers comply with the law and has issued new priorities in workplace enforcement. Other laws protecting workers, such as labor and comprehensive immigration reform. This course will focus on the obligations of US employers, both under IRCA and beyond and the implications of illegal immigrant employment. It will examine pitfalls that await an employer who tries to comply with the law and analyze the penalties that can be assessed against an employer who discriminates against workers because they appear foreign. It will also review the civil and criminal penalties against employers who knowingly employ unauthorized workers, sometimes exploiting them with substandard working conditions, reviewing cases that have been brought against employers. This is a seminar class limited to 20 students. Attendance is mandatory. Students will be assigned to a team and each week, the team will be expected to report on various aspects of this issue, with assigned readings. The last five weeks of class will be devoted to student presentations on relevant issues. Students will choose topics of interest and, with approval, will give a presentation, write a paper and submit a research file. No exam.

LAW 444 Land Use Seminar (2 Credit Hours)

Pre-requisites: Land Use (LAW 350) or comparable land use survey course is a prerequisite

Advanced seminar that provides students with the opportunity to concentrate on issues of their choice related to historic or contemporary development patterns in urban America. Flexible scheduling available.

LAW 445 Humanitarian Law and Conflict (2 Credit Hours)

This seminar examines the international rules regulating armed conflicts and other armed violence. Topics include the rights and responsibilities of states and individuals under international law, armed conflict identification and classification, the law of the sea, and rules regulating the conduct of fighters and other aspects of armed hostilities, and international human rights law. The course is designed to prepare students for competitions and/or future practice in these areas of law, such as in a government/military or non-governmental organization setting. The final grade is determined by group projects that include answering scenario-based humanitarian law questions and a research project to be selected and completed by assigned student groups. LLM students may enroll in this course with permission.

LAW 446 Mini MBA for Law Students (1 Credit Hour)

Since the onset of the global financial crisis, the role of the lawyer has expanded. Law firms and their clients alike expect new lawyers to not only understand the law but the basics of accounting and finance as well. This intensive pass/no pass course in accounting and finance is designed to help prepare law students for the demands of a career within a law firm. Topics covered include: How to read and analyze financial statements How to calculate returns on investments How to value companies How to structure securities Goal: To prepare law students for careers in a changing economy in which lawyers will be expected, and even obligated, to understand the intricacies of the business world. Description: This Unique program was designed to bring the world of finance and accounting to aspiring lawyers. It seeks to offer law students an overview of business concepts most relevant to legal professionals and relates these concepts to a broad array of practice areas. The course progresses in order of difficulty beginning with basic elements of accounting and concluding with more advance concepts related to securities pricing. Agenda Financial Statements: Analyzing financial statements has been a task traditionally performed by investment bankers and accountants. However, with accounting scandals threatening to erode confidence in corporate America, attorneys are taking on a prominent role in preparing and analyzing financial statements. Including the Balance Sheet, Income Statement, and Cash Flow Statement, this course is designed to give students an overview of accounting techniques and their relevance. Financial Analysis: The process of analyzing financial statements is involved in virtually every business decision. As corporate managers and bankers rely more on the advice of their inside and outside counsel, it is now imperative that an attorney better understand basic business decision making tools. This course will allow students to understand different methods of analyzing financial statements, what they are used for, and who uses them. Issues in Financial Reporting: In the wake of the massive corporate accounting scandals such as Enron, WorldCom, and Parmalat, the importance of detecting such fraud has taken on new proportions. No longer a matter reserved exclusively for accounts and financial analysts, accounting fraud is a concern of most attorneys who must be able to detect and report any suspicious of questionable reporting practices. This course is designed to equip students with the basic skills to determine signs of corporate accounting fraud along with guidance on what to do when confronted with such matters. Corporate Finance: With Issues related to corporate finance becoming more relevant today than ever, the role a lawyer plays in structuring transactions, negotiating deal terms, and coordinating the underwriting process is becoming increasingly important. This course provides the basic tools to understand, apply and challenge most aspects of financial management. Valuation: Valuation forms the cornerstone of nearly every business transaction. Whether it involves mergers and acquisitions, leveraged buyouts, venture capital, or real estate, a solid understanding of valuation will ensure an equitable transaction. Attorneys play an active role in these transactions but all too often become entrenched in the purely legal aspects of them. This course will help students to better understand the methodology and techniques behind various forms of valuation and in turn, better serve the needs of their clients. Securities: Attorneys play a vital role in capital formation and deal structuring for companies of all sizes. This course is designed to offer students a better understanding of the financial instruments they help structure. Topics covered will include stocks bonds, and derivatives. Additionally, the course will explore these concepts in the context of real cases drawn from recent transactions. Students will be responsible for class participation and a review project.

LAW 448 Comparative Education Research (1 Credit Hour)

This unique course will immerse students in a comparative analysis of early education law and policy in Italy and the United States. The specific focus of the class will be the world-renowned approach to preschool education developed in Reggio Emilia in northern Italy. The preschools in Reggio Emilia are widely regarded as the best in the world. The "Reggio" approach to early education is built on a particular understanding of the biological and social nature of children, and the role of the state in developing its young. Accordingly, the class will begin with an exploration of the neuroscience undergirding the Reggio approach and how this science informs: educational objectives and methods; the architecture of the educational environment, the connections between school and community and the legal and political structures surrounding children. Throughout the class, the "Reggio" approach will serve as a benchmark for understanding and assessing the law and policy of early childhood education in the United States. The class is one-credit. Students will be required to participate actively in class exercises and projects, and to write a 10-15 page analytical or research paper that addresses any issue raised by the class.

LAW 449 Negotiations Seminar (3 Credit Hours)

Negotiating effectively is one of the most important qualities of a successful lawyer. This course seeks to help you move from negotiating by instinct, as most people do, to negotiating more thoughtfully, more comfortably and with a clearer sense of purpose. This course merges theory with practice to: (1) develop your understanding of negotiation, and your awareness as a negotiator; (2) give you tools and concepts for analyzing and preparing for negotiations; (3) enhance your negotiating skills through frequent role plays, analysis, and feedback; and (4) teach you how to keep learning from your own negotiation experience. In addition to negotiation skills and theory, you will be introduced to issues of representation, ethics, and the place of negotiation in our legal system. The Negotiation Seminar is a highly rewarding and interactive course. The course syllabus consists of assigned readings, simulations, and written assignments almost every class, and attendance at one video debrief where we will analyze your skill set.

LAW 450 Independent Study: Mock Trial Witness (1 Credit Hour)

In this course students participate as witnesses and bailiff/timekeepers during a mock trial, moot court or dispute resolution competition. Students must complete their assigned role as determined by the instructor. Students are required to read, review and learn material in order to perform role. Students are required to adhere to competition rules for the particular role assignment.

LAW 451 Estate Planning (3 Credit Hours)

This seminar attempts to simulate the day-to-day practice of an estate planner. The topics range from the initial client interview to the formulation of sophisticated estate plans for those with substantial property, such as a successful business. The goal is to provide exposure to a broad range of client situations with supervised formulation and implementation of estate plans. Students generally work in teams of two or three and submit several drafting assignments throughout the semester. Pre-requisite: Estate and Gift Tax; Estates is highly recommended. You may not also take Wills and Trust Drafting.

LAW 453 Legal Writing Tutors - Senior Tutors (1-2 Credit Hours)

Pre-requisites: Legal Writing Tutor (LAW 296)

No course description is available

LAW 454 Religious Liberty Seminar (2 Credit Hours)*Pre-requisites:* Constitutional Law

One of our first Freedoms: the freedom to worship in the way of one's conscience is arguably the foundation of liberty in the United States. This course will concern itself with the First Amendment's protections and limitations on our religious liberty by an examination of both historic and current issues in religious freedom whether involving personal behavior, medical issues or political activity tinged with religious issues. In addition to constitutional protections federal and state legislation concerning religious liberty will also be examined. A presentation and paper on topic in the area from each student will be required.

LAW 456 Mediation Seminar (1-2 Credit Hours)

Mediation is a dispute resolution process that enables parties to negotiate their own settlement with the assistance of an impartial third party neutral (the mediator), instead of having a judge decide the outcome for them. As it has become increasingly institutionalized within the legal system, it is important that lawyers be familiar with its benefits, as well as with how it works. This course will offer an overview of mediation theory, techniques, applications, and history. Through simulations and other in-class exercises, students will consider how mediation differs from other types of dispute resolution processes, how mediation styles differ from one another, in what different contexts mediation is used (including commercial, divorce, community, and employment conflicts), and what the role of the attorney-advocate is during mediation. Mediation techniques and skills are extremely beneficial to attorneys. It makes them more effective problem solvers when dealing with a case; it helps them communicate more effectively with opposing counsel; and it helps them in their interviewing skills so that they can better understand the needs and interests of their clients.

LAW 457 Business Legislation Practicum (1 Credit Hour)*Pre-requisites:* Business Organizations completed or taken concurrently; and permission of instructor

Each student enrolled will choose a current project of the Institute of Illinois Business Law and work with the members of that project sub-committee. The Institute has been located at Chicago-Kent for the past four years, under the Directorship of Prof. Philip Hablutzel. Over the past 30 years, the Institute and its predecessor has written all the major business statutes in Illinois. Each year, the Institute has six to eight law reform projects in various states of drafting or submission to the Illinois General Assembly. One or more students will work with a project sub-committee and do legal research and other assistance. The time commitment is four hours per week. Supervision will be by Prof. Hablutzel and the project chair. Students will be required to perform four hours of fieldwork each week. This course will be taught at Chicago Kent College of Law.

LAW 458 Canon Law Seminar (2 Credit Hours)

Canon law plays a central role in determining how the Catholic Church handles the broad spectrum of issues involved in the daily management of a worldwide multinational organization that includes dioceses, parishes, colleges, universities, grade schools, high schools, hospitals, nursing homes and other charitable entities. Examples of these issues involve personnel and real estate matters, rights and duties of the Christian faithful, professional misconduct, foreign religious workers, the administration of ecclesiastical goods, mergers and joint ventures, and, of course, marriage and family law, especially divorces and annulments. This Canon Law Seminar should be of particular interest for students interested in the management of Catholic institutions. This course will be conducted as a seminar in which students will be invited to write a research paper and make a classroom presentation on some issue of canon law.

LAW 459 Intro to English Legal Profession (1 Credit Hour)

This lecture series is a mandatory preparatory course for students who have been selected to participate in the annual London Comparative Advocacy Program. It explores a variety of issues pertaining to the English history and its legal professions. Topics include the history of the common law, the development of the English legal profession, English civil and criminal procedure, the modern legal professions and the history of London. (Permission is required) This is a Perspective Elective course.

LAW 460 Humanitarian Law in Practice (2 Credit Hours)*Pre-requisites:* Humanitarian Law and Conflict

This seminar meets for four hours each week during the first half of the spring semester. It is a scenario-driven course that further deepens a student's knowledge, understanding and practical application of international humanitarian and human rights law. Students are required to prepare group presentations on assigned legal topics (Thursdays) and then participate in scenario-based, role-playing exercises that require practical application of the law (Saturdays). The final grade is determined by contributions to and performance during student group presentations on assigned international humanitarian and human rights law topics and role-playing practical exercises.

LAW 461 Education Law and Policy (2-3 Credit Hours)

This seminar will explore the difficult legal, political and practical issues currently confronting American education. The course will begin with an analysis of the fundamental political and legal principles underlying the American public education system. Students will then be challenged to apply these principles to difficult areas of education law, such as: (1) the adequacy and equity of school funding; (2) the nature of a constitutional right to education; (3) the relationship between public education and religious institutions and practices; (4) legal issues relating to curriculum; (5) equal educational rights, including issues of desegregation and affirmative action; (6) the constitutional rights of students; (7) special education; and (8) the rights and responsibilities of educators. Students will be required to participate actively in class, to facilitate class discussion of a selected topic, and to submit a paper which analyzes critically an important issue raised in the class. There will be no final examination. This course counts as a Perspective Elective course.

Course equivalencies: MPP 461/LAW 461**LAW 462 Transnational Law (2 Credit Hours)**

This course is designed to introduce 1L students to the many specialized areas that a practitioner of "international law" must consider in an era of globalization. No prior knowledge of international law is required. The course will discuss situations of current interest in the world, illustrating the inter-relationship of public international law (relations among states, individuals, NGOs and others), the law of international business and finance, comparative law (the common law and civil law traditions), institutions and procedures for the settlement of cross-border disputes, and U.S. law that bears on issues that involve one or more other countries. Specific topics to be covered will probably include modern piracy, WikiLeaks, money laundering, human trafficking, and the like. This is a Perspective Elective course.

LAW 463 Mindfulness and Well-Being (1 Credit Hour)

Are you stressed? Would you like improve your focus and memory? Prioritizing a healthy brain is important not only because learning the law is intellectually challenging, but also because lawyers suffer from anxiety, stress and substance abuse at an alarming rate. The objectives of this course include learning how mindfulness meditation, food choices, exercise, and various stress reduction techniques can improve brain health and well-being. You will practice meditating regularly both in class and on your own and will be introduced to science that demonstrates how mindfulness meditation can physically change your brain in a short period of time. This course will also cover using mindfulness to heal from technology and other addictions. You will also learn how mindfulness practice builds a variety of human capacities and skills that can be consciously applied with clients, colleagues, staff, opposing counsel, judges, juries and others. We will make these connections throughout the course using readings, meditation (together and apart), videos, class discussion, in-class exercises, personal journaling and guest speakers. You will also learn about recent advances in scientific research on the human microbiome, the mind-gut connection, and how to improve your well-being and brain performance through eating an anti-inflammatory diet. We will also explore the impact of exercise, gratitude practices, and quick stress reduction techniques. Students will also examine the stress response, brain biases (including implicit racial bias), and techniques to improve emotional intelligence in stressful conflict situations. Developing these skills will help you gain resilience to flourish in a demanding profession and bring your best self to serve your clients and communities. (Disclaimer: I am not a therapist, or a certified nutritionist, and I encourage students with mental health concerns to seek/continue treatment as needed with their therapists and/or physicians. The university Wellness Center also provides services and guidance for students with mental health concerns.)

LAW 464 Information Technology and Human Rights Practicum (1-3 Credit Hours)

In light of the ongoing digital transformation, societies are more reliant than ever on innovative technological solutions and ICT to address modern-day challenges. At the same time, this can raise fundamental rights issues in the digital space that confront companies and require highly skilled legal counsel to guide companies in their risk and impact assessments, due diligence and compliance processes, and government relations. The course examines timely human rights issues pertaining to digital technologies (especially ICT) in the areas of data privacy, content regulation, and other on- and offline fundamental rights issues in a US, transatlantic and international context. The goal is to provide students with the knowledge and tools to advise corporate clients on how to navigate these cutting-edge legal challenges. There are many highly topical and timely human rights issues pertaining to digital technologies and ICT confronting companies and their legal counsel, that this course will cover. Challenges around these emerging issues dominate the headlines almost on a daily basis and include biases in artificial intelligence, privacy issues in cross-border data transfers and innovative technologies (i.e. IoT, digital identity), disinformation and election integrity, government access to personal data (on public policy grounds, including public health, national security, etc.), hate speech and other harmful online content, cyberattacks (including during armed conflicts), and internet shutdowns. The course also features an optional practicum component (for one additional credit hour) providing interested students with the opportunity to become engaged in a real-life project on the topic with a relevant entity involving ICT companies and intersecting in a systemic and impactful way with human rights issues in IT, domestically or internationally. The class will be held synchronously via Zoom every Saturday from 9.30am to 11.30am CST. This will enable live class discussions with students and the instructor. Guest speakers from the industry, international organizations, law firms, and/or civil society may occasionally join the class discussion. For any questions about the course, please email Dr. Caroline Kaeb at ckaeb@luc.edu; Dr. Kaeb is a policy officer on digital issues at the European Commission in Brussels and you can find more information about Dr. Kaeb's profile at <https://www.luc.edu/law/faculty/facultyandadministrationprofiles/kaeb-caroline.shtml>

LAW 465 Strategic Counseling for International Corporate Clients (2 Credit Hours)

The course is designed to introduce students to legal issues faced by international organizations planning to invest in the U.S.A. The course is based on a practical approach and will familiarize students with the legal framework attorneys consider when counseling clients on various options of foreign commercial activity in the U.S.A. Students will identify legal issues based on a client's actual business plan, and develop the best strategy to meet the client's investment goals. The simulation of the challenges of today's international corporate practice develops the students' strategic counseling skills. The course will analyze the traditional vehicles of investments in the U.S., including supply/agency/distribution agreements and establishments of U.S. operations. Students will examine the legal implications of various forms of business enterprise (sales or distribution company; manufacturing operations) in terms of liability tax, labor and employment, and immigration issues. The class will explore other methods of foreign investment, including acquisitions and joint-ventures, and their legal consequences, and will conclude with a look at U.S. regulation of foreign investment and issues in dispute resolution. This is a Skills course.

LAW 466 Tax Controversy Intensive (2 Credit Hours)

Pre-requisites: Federal Income Tax

This course offers students the opportunity for a hands-on approach to developing their skills and knowledge of the procedures and dispute resolution strategies involved in federal tax controversies. This intensive course will offer experience with pre-controversy planning techniques such as: pre-filing motions, conflict resolution with the IRS through both examination and appeals, and preparing for tax court litigation. Students will be engaged in a series of real-time scenarios for identifying issues, drafting responses and preparing memos related to both corporate and individual tax disputes. Experienced tax attorneys will guide students through a series of mock procedures and interactions with the IRS, and assist the students in developing and improving their analytical and writing skills. Through a mix of panel presentations and guests lectures, students will gain an understanding of the types of challenges that can arise in the day-to-day world of tax controversy from the perspectives of the tax attorneys and IRS compliance and enforcement specialists.

LAW 467 Advocacy Competition Supplement (1-3 Credit Hours)

This is a non-graded course that requires instructor permission to enroll. The course is limited to students that are currently or previously enrolled in the LAW 400, 401, 438, or 499. Students are required to prepare and compete in one or more advocacy competitions. Variable non-graded credit is available from one to three units depending on circumstances as determined by the instructor. Credit: Non-Graded 1-3 units

LAW 468 Comparative Education Law (1 Credit Hour)

This course begins with an exploration of the legal and political structure of American education, including issues such as: (1) the role of government in mandating education; (2) the relationship between state and religion in the educational process; (3) the governance of educational institutions and the shaping of curriculum; and (4) the rights and responsibilities of teachers and students. The American legal system's resolution of these difficult issues are then compared to the resolution of these same issues by legal systems in other countries. Finally, students are asked to question the fundamental assumptions underlying the American educational system based on their understanding of different assumptions underlying the educational systems in other nations. Students are required to help to facilitate class discussions and to prepare a paper that analyzes critically an issue raised in the class. This is a Perspective Elective course.

LAW 469 Advanced Torts: Perspectives on Tort Law (3 Credit Hours)

This course has several objectives. It offers the student an opportunity to study several important torts topics not usually covered in the first year, such as products liability, misrepresentation, and business torts. It also offers an opportunity to consider whether tort law is a just and efficient way to resolve disputes and provide remedies for personal injuries and other types of harm. Perspective readings on tort reform evaluation will be included. Students also will conduct research on a topic of the student's choice and present findings to the class. The grade will be based on the quality of the presentation and a two-hour take home exam.. This is a Perspective Elective and Bar course.

LAW 470 Immigration Practicum Advancing (1-4 Credit Hours)

Immigration law is one of the most complex, dynamic, and rewarding areas of practice. Yet, it is often viewed as a specialized field that rarely is connected to other public interest areas of law, including child and family law, poverty law, housing, education, health, and criminal justice. The goal of this course is to teach the current realities of immigration law as experienced in practice, and to show how it intersects other field of public interest law in the pursuit of social justice. This unique course has a classroom component and a field-work component. The class meets formally two hours per week in the evening to cover substantive immigration law issues, current topics/changes in immigration practice, and to develop practical skills tailored to the practice of immigration law practice and advocacy, with an emphasis on issues affecting families and children. Topics include family-based petitions, persons fleeing persecution, unaccompanied children, forced family separation, providing trauma informed services, intersection of family law and immigration law, and deportation defense. The course includes in-class simulations and role-plays. One course is NOT required to take the other. Students are expected to work at their extern field placement site a minimum of 55 hours in order to earn 1 academic credit hour, or 110 hours in order to earn 2 academic credit hours. Instructors may vary across terms, and are experienced professionals with diverse areas of practice in immigration law. You are required to complete assigned readings before class. Readings will also be posted to TWEN. If you are interested in pursuing externship credits, please contact the Director of the Immigration Law Practicum, Katherine Kaufka Walts.

LAW 471 Teaching Assistants (1-3 Credit Hours)

Course enrollment requires permission of the instructor or Academic Dean. Teaching assistants receive academic credit for serving in a tutor capacity for identified courses not otherwise within the jurisdiction of the academic tutor program.

LAW 472 Structured Finance (2 Credit Hours)

Securitization is a form of highly sophisticated business transaction in which a company seeking financing gathers together pools of its financial assets, such as auto loans, deposits them in a bankruptcy remote subsidiary and causes the subsidiary to issue securities or borrow loans that are backed by the pool of financial assets. Well-known types of securitizations include mortgage-backed securities and collateralized debt obligations. Although these types of transactions received a great deal of scrutiny during and after the financial crisis, securitization also includes other forms of asset-backed securities that are an essential component of modern financial markets. As this course will demonstrate, a successful securitization integrates a bunch of different bodies of commercial law, including securities law, bankruptcy law, secured transactions, corporation law, tax, and regulatory acts such as Dodd-Frank and ERISA. This course uses an actual securitization transaction to illustrate the interplay of these bodies of law. The course also looks at the greater legal implications of these transactions on the financial markets in the wake of the financial crisis. 2L and 3L students that have an interest in corporate or transactional law, general business law or finance should consider this course I shall assign homework problems for most classes, which we shall discuss in the next class. The course grade will be based on participation in this class discussion and on the results of a take-home examination. This course also counts as an elective course for the Certificate in Transactional Law.

LAW 473 Class Actions (2 Credit Hours)

Some of the most cutting-edge and challenging litigation in the courts today are class actions or complex cases involving numerous parties and/or very complicated claims. These cases can take up enormous resources of our courts and the litigants and yet result in resolutions that are fair and efficient if litigated and adjudicated properly. This course focuses on the emerging issues in such cases, the innovative uses to which scientific evidence is being put in class actions, and the methods used to resolve such disputes. Students will be expected to participate as part of litigation teams in strategic discussions and exercises highlighting the material covered in the course and will be evaluated on those exercises as well as a final examination. The class would meet, at a mutually convenient time, once a week for two credits and feature at least two guest speakers (e.g., class action lawyer, jurist, expert). Students will be given a hypothetical class action highlighting key issues and tensions within class, and brief and argue their positions on (1) class certification and (2) class settlement approval.

LAW 474 Diversity in the Law (1 Credit Hour)

Diversity in the Law is an interdisciplinary, weekend course for students who are interested in law, diversity and how to work across different cultures and other kinds of diversity to provide exceptional legal services to any corporation, governmental entity, community, or international client. Through short readings, role play, and team building activities, students will acquire the basic skills necessary for professionals to work effectively in cross-cultural situations. This course also emphasizes a critical examination of how issues such as race, class, gender, sexual orientation and disability intersect with the legal system and barriers to diversity in the legal profession. This course welcomes students who desire to effect change and who have the potential to act as leaders and role models in their communities, law firms, and companies. Students will be required to complete a group project and a short, reflection writing on diversity in the law during the course. This course will be pass/fail and final grades will be based on performance in class and completion of the group project and reflection piece.

LAW 475 Multistate Bar Exam Fundamentals (2 Credit Hours)

This is a Bar course.

LAW 476 Art Law (3 Credit Hours)

Art Law and Transactions is a study of the main legal issues involved in the acquisition, ownership and disposition of works of art. The primary perspective is that of an attorney in the representation of an art collector, and how the transactional arc involves regular concerns, such as contract law, as well as art specific concerns, such as Nazi-era looted art. Part I Acquisition begins with a focus on the legal issues raised by the various venues for art purchases (art commissions, through a dealer, at auction) and follows with the two core issues of authenticity and good title. Part II Ownership concerns three topics that could arise during the ownership phase: crossing borders, moral rights and art loans. Part III Disposition completes the transactional loop with a discussion of how one transfers works of art during life or at death, whether by sale or gratuitous transfers, including valuation concerns. The course will include several drafting exercises (some of which will be done in teams) and a one-hour in-class final.

LAW 478 Real Estate Transactions (2-3 Credit Hours)

Real Estate Transactions focuses on the basic principles of commercial real estate transfer, development, finance and leasing. The course follows a multi-party commercial development project through acquisition, financing and leasing. The course highlights the purchase and sale contract, easements, zoning and environmental regulations and closing; the loan process and financing issues; as well as leasing. The course also addresses the role of the lawyer in real estate transactions and the broad issues involved in modern real estate practice.

LAW 479 International Litigation (2-3 Credit Hours)

This course examines the litigation of international disputes in U.S. This is a perspective elective designed for 1Ls but available to all students. It covers the familiar civil procedures in the international context including choice of forum, choice of law, personal jurisdiction, subject matter jurisdiction, discovery, enforcement of judgments. It also covers topics unique to international litigation such as sovereign immunity, the act of state doctrine and foreign compulsion. The course also includes select topics in international litigation in foreign courts and an introduction to international commercial arbitration.

LAW 480 Business Planning (3 Credit Hours)

Business Organizations is a prerequisite for Business Planning, but is recommended for Business Planning: Transactions. Business Planning: Transactions A business lawyer needs to know, or at least be generally familiar with, many areas of law. Therefore, the purpose of this course is to teach many legal issues, including: (1) the organization of a business (e.g., the types of legal entities including "C" corporation, "S" corporation, partnership, and limited liability company), organizational documents for a corporation and a limited liability company, control issues including the problems of a minority shareholder in a privately owned business, and understanding balance sheets and income statements; (ii) the financing of that business (including compliance with the federal securities laws in connection with private offerings and public offerings, bank borrowing and granting collateral pursuant to Article 9 of the UCC); (iii) certain key day-to-day transactions (including intellectual property, environmental law, labor law, real estate law, and sales of personal property as regulated by Article 2 of the UCC); (iv) buying and selling a business (including certain tax and non tax issues, documentation, hostile tender offers, going private and leveraged buyouts); and (v) the financially trouble business (including workouts and the rudiments of securitization). There is a large handout, but the substance of the course is contained primarily in the lectures. Therefore, regular attendance is expected. There is no prerequisite for this course but some prior exposure to business law (e.g., Business Organizations) is desirable.

LAW 481 Employee Benefits and Executive Compensation Law (2 Credit Hours)

This course examines how our society tries to influence behavior with the tax code through the lens of employee benefits and executive compensation. The course examines executive compensation, pension and profit sharing plans, and health and medical plans. It also analyzes the tax, ERISA, corporate, labor, bankruptcy, securities, and M&A consequences both to the employee and the employer. The course focuses upon the various issues a practicing attorney should consider when designing plans and advising clients.

LAW 482 Advising Not-For-Profit Organizations (3 Credit Hours)

This course counts as a Comprehensive Simulation and Skills Course. There are more than 1.5 million not-for-profit organizations in the United States alone, and more throughout the world. Not-for-profit organizations contribute to society in many ways, through diverse missions from education and research, to social services, relief, and advocacy, to religion, to arts and culture. In addition to the impact made through their missions, not-for-profits as a group are significant as employers and for their contribution to the general economy as well. Not-for-profit organizations exist to further their charitable purposes, do not distribute dividends or net revenues (having no private shareholders or owners), and often are formed and operated to qualify for Federal income tax exemption under Section 501(c)(3) or other provisions of the Internal Revenue Code. Nonetheless, they have many of the same operational needs and characteristics of any other business. They occupy space (whether owned, leased, or hosted by others). They purchase and consume goods and services from vendors and suppliers. They manage and cope with attendant risks. Interestingly, commentators suggest that not-for-profits can be more complex to manage, and to advise, than a for-profit business. The organization may have funding constraints, staff constraints, and knowledge constraints, particularly when coping with transactions or situations that arise only occasionally or where the organization is governed or operated in whole or in part by volunteers. Not-for-profit facilities and operations can be uniquely complex (think for example about a museum, a zoo, a hospital, or a cathedral), and their diverse sources of governmental and private funding can come with extensive conditions, restrictions, and reporting requirements. They may even be offered (or accept) donated goods or services in kind, gifts that come with their own implications. This course will explore the opportunities and challenges for lawyers involved with not-for-profit organizations, whether as paid or pro bono legal advisors, or as board members or volunteers. The course will use a combination of traditional lecture and discussion, case study simulations, and guest speakers, as well as individual meetings with students on directed work. The course will be centered around a recurrent series of fictional clients, each a not-for-profit organization, engaged in a variety of operational and transactional situations. Each client organization will have a different mission, size, and resources, as well as mock client representatives who will have different business and style preferences, which the class will need to accommodate and will come to anticipate in fashioning and recommending solutions for each client. Each student will be invited to select and imagine a mock client organization with a not-for-profit mission suited to the student's interest and will have the opportunity to identify and explore individual topics relevant to not-for-profit transactions, operations, and governance. The course will also consider issues of legal ethics and professional conduct, as well as governance and fiduciary duty of board members, in the not-for-profit context. The course's emphasis on case studies and commercial transaction scenarios is also designed to act as a capstone course which complements and draws upon the students' prior coursework in contracts, real estate and commercial transactions, ethics, and government regulation. In these ways, the course emphasizes skills relevant in any transactional project, for-profit or otherwise. Students will be graded based on class participation, written assignments and exercises, and a paper and presentation resulting from research and study on their chosen mock client and individual study topics. There is no final examination for this course. (Hagy)

LAW 483 Federal Tax Clinic I (2-4 Credit Hours)

The purpose of the Federal Tax Clinic is to educate the student in the practice and procedures of federal tax law and dispute resolution before the Internal Revenue Service (IRS) and the United States Tax Court. The tax clinic is neither exclusively a "skills center" nor a "theory center." Instead, all the numerous components of tax law practice are integrated in the curriculum of both classroom study and legal practice with actual clients. Some of the subjects include client interviewing and counseling, negotiations, and tax litigation. Students handle cases at the IRS and Tax Court level on a clinical basis and, with the clinic attorneys, prepare all appropriate written responses to the IRS, prepare Tax Court petitions, and litigate tax cases. Federal Income Tax is a prerequisite. This is a Skills and Live Client Experience course.

LAW 485 Journal of Regulatory Compliance Executive Editor (1-3 Credit Hours)

"The Journal of Regulatory Compliance (the JRC) is a semiannual legal journal published by second- and third-year law students at Loyola University Law School in Chicago. Members of the Journal of Regulatory Compliance staff review, analyze and edit articles prepared and submitted by authors who are not members of the JRC. Members of the JRC Staff also complete and submit or review and edit three blogs for the Inside Compliance blog per semester. The JRC also hosts an symposium on critical Compliance issues with a host of leading experts in the field. Students are invited for membership on the JRC Staff based upon academic achievement and entry in a writing competition. The course is presented on a pass / fail basis."

LAW 486 Federal Tax Clinic II (1-2 Credit Hours)

The purpose of the Federal Tax Clinic is to educate the student in the practice and procedures of federal tax law and dispute resolution before the Internal Revenue Service (IRS) and the United States Tax Court. Federal Tax Clinic II affords students from the tax clinic the opportunity to carry their cases through to completion. It is more independent and sophisticated than tax clinic I. Students continue to develop the skills that they learned in tax clinic I, including client interviewing, negotiations, tax litigation, correspondence with the IRS, and preparation of petitions to Tax Court. Federal Income Tax and Tax Clinic I are prerequisites. This is a Skills and Live Client Experience course.

LAW 487 Law Journal Members (1 Credit Hour)

Law Journal Members are responsible for editing, cite checking, page-proofing and proofreading articles selected for publication in the Loyola University Chicago Law Journal under the supervision of Executive Editors and Senior Editors. Each Law Journal Member must also prepare and submit an original note or comment of publishable quality.

LAW 488 Journal of Regulatory Compliance Senior Editor (1-2 Credit Hours)

"The Journal of Regulatory Compliance (the JRC) is a semiannual legal journal published by second- and third-year law students at Loyola University Law School in Chicago. Members of the Journal of Regulatory Compliance staff review, analyze and edit articles prepared and submitted by authors who are not members of the JRC. Members of the JRC Staff also complete and submit or review and edit three blogs for the Inside Compliance blog per semester. The JRC also hosts an symposium on critical Compliance issues with a host of leading experts in the field. Students are invited for membership on the JRC Staff based upon academic achievement and entry in a writing competition. The course is presented on a pass / fail basis."

LAW 489 Journal of Regulatory Compliance Associate Editor (1 Credit Hour)

"The Journal of Regulatory Compliance (the JRC) is a semiannual legal journal published by second- and third-year law students at Loyola University Law School in Chicago. Members of the Journal of Regulatory Compliance staff review, analyze and edit articles prepared and submitted by authors who are not members of the JRC. Members of the JRC Staff also complete and submit or review and edit three blogs for the Inside Compliance blog per semester. The JRC also hosts an symposium on critical Compliance issues with a host of leading experts in the field. Students are invited for membership on the JRC Staff based upon academic achievement and entry in a writing competition. The course is presented on a pass / fail basis. "

LAW 490 Law Journal Executive Editors (1-3 Credit Hours)

Law Journal Executive Editors are ultimately responsible for the publication of the Loyola University Chicago Law Journal. They oversee the selection, editing, cite checking, page-proofing and proofreading of articles chosen for publication in the Journal. They also oversee Law Journal Members and Senior Editors in the performance of their responsibilities. Law Journal Executive Editors are also responsible for planning and hosting the Law Journal's annual symposium conference.

LAW 491 Law Journal Senior Editors (1-2 Credit Hours)

Law Journal Members are responsible for editing, cite checking, page-proofing and proofreading articles selected for publication in the Loyola University Chicago Law Journal under the supervision of Executive Editors. Law Journal Senior Editors are also responsible for other tasks assigned to them by Executive Editors that contribute to the operation of the Journal.

LAW 494 Law Journal Associate Editors (1 Credit Hour)

This is the course to provide credit to student editors of the Loyola University Chicago Law Journal.

LAW 496 Client Counseling & Negotiation (2 Credit Hours)

This course is designed to develop skills used by lawyers in their roles as client interviewer, counselor and negotiator. Emphasis is on class participation. The first hour of each class is devoted to lecture/discussion of the covered topics. During the second hour, students participate in practice problems which emphasize the skills taught in the first hour. Students are graded on the following: written paper, one videotaped out of class problem, and class participation. Because of the heavy emphasis on class participation, the class is limited to 18 students.

LAW 498 Corporate Governance Law and Practice (2 Credit Hours)

Pre-requisites: Business Organizations

In this course students will study and analyze the law and practice of corporate governance law for publicly-held corporations. Introductory sessions will detail corporate governance law and regulation, with a specific focus on the impact of the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010. Thereafter, a number of alternative proposed reforms will be assessed. Finally, the course will address practical element of corporate governance practice including professional responsibility issues, the director selection process, board diversity, and empirical learning regarding the best corporate governance practices.

LAW 499 Trial Practice I Applied (1-3 Credit Hours)

This graded 3 unit course requires instructor permission to enroll. Students develop the skills necessary to conduct a trial, including case analysis, opening statements, direct and cross examinations of witnesses, evidentiary objections and foundations for admissibility of evidence, and closing arguments. Students are required to participate in the mandatory evidence boot camp at the start of the semester. Each student is required to apply their learned skills in one or more local, regional, national or invitation mock trial competition. This course satisfies the requirements of Trial Practice I (LAW 411 or LAW 416).

LAW 500 Introduction to the Case Study Method and the Basics of Legal Writing (1 Credit Hour)

This course teaches incoming Loyola students the skills essential for success in law school. Students will learn how to read cases, prepare for class discussions, and take notes, as well as how to prepare for and answer final examination questions. Students will also learn fundamental legal writing skills and will draft a legal memorandum. Oral argument will also be introduced. NOTE: This course is only for INCOMING FIRST YEAR STUDENTS.

LAW 501 Collaborative Law Workshop (2-3 Credit Hours)

This course will provide students insight and practical knowledge of alternative dispute resolutions. This course focuses on the attorney's ability to understand the differences in the practice of mediation and the more recent development of the Collaborative law process and understand the application of each. Students will learn through didactic as well as skill-centered methods, giving each the opportunity to practice skills through role play and "fishbowl" exercises. We will cover the basics of mediation and Collaborative practice while emphasizing useful derivative skills that will serve students well in their future law careers. A client-centered approach, the primary goal of this class is to expose students to effective communication methods and skills that lead to settlement without litigation. Guest lecturers will bring their specific areas of expertise to the class so that students will be able to see firsthand the application of the processes we will be studying and be able better to emulate them. The final grade will awarded based partly on a 10 page critical paper and more significantly from class participation. This is an Experiential Learning course.

LAW 502 Patent & Trademark Searching (1 Credit Hour)

This course will be a one-semester, six session course that will cover the technical aspects of in-depth searching on open Web sources for sufficient background information in anticipation of filing for patent and trademark protection.

LAW 506 Patent Prosecution Seminar (2 Credit Hours)

During the Patent Prosecution Seminar, students will learn the requirements needed to procure a patent and navigate through the different stages of the patent examination process with the U.S. Patent and Trademark Office. Skills that are developed during the Seminar include conducting an Inventor Interview, drafting claims of a patent, responding to an Office Action, conducting an Examiner Interview, and drafting a petition or preliminary response for an Inter Partes Review proceeding. After taking the seminar, students are confident in their skills to procure a patent on behalf of clients.

LAW 507 The Art of the Presentation (1 Credit Hour)

Lawyers are always giving presentations, both formally and informally. From interviewing to meeting with senior attorneys to engaging with clients to advocating for one's client in court, it's essential for a new lawyer to know how to speak confidently and persuasively. Students will learn how to become positive, clear, and articulate speakers and presenters. Topics include: how to create excellent formal presentation's summarizing one's work, how to engage others in the networking and interviewing processes, how to handle difficult conversations in the workplace, how to understand one's role and add value during formal and informal meetings, and how to be eloquent and efficient while conveying information to attorneys, clients, and the court.

LAW 508 Predatory Lending (3 Credit Hours)

This course will examine the origins and dimensions of predatory lending, defined as mortgage loan origination fraud and foreclosure rescue fraud. Emphasis will be given to the development of the sub-prime mortgage market, facets of predatory lending and various methods to curb it. This course will include background lectures and discussion, case study and analysis, and written and oral advocacy exercises related to actual cases. This course will be taught at DePaul University College of Law.

LAW 509 Federal Courts (2-3 Credit Hours)

This course builds on the knowledge gained in constitutional law and civil procedure. One of the most important features of our constitutional system is the general division of governmental authority between state and national governments, and nowhere is that division of authority more important to practicing lawyers than in the allocation of judicial power between the state and federal courts. The former are, of course, courts of general jurisdiction, while the latter are courts of limited jurisdiction. The overall design of the course seeks to assist students in thinking about this allocation of power, not as a merely theoretical matter, but as one of real practical consequence in connection with a client's substantive goals and how best to serve them. Litigants typically want access to the federal courts for very specific (and often very important) reasons: to obtain remedies for violations of federal constitutional and statutory law, or, in some cases, to secure a forum that they believe will be more hospitable to their claims. Seen in this way, the law of the federal courts consists of doctrines that either facilitate or frustrate litigants in achieving their substantive goals in the federal (and state) courts. The aim of the course is to provide students with a basic framework for thinking effectively about these problems. This course may be offered only every other year.

LAW 510 Graduate Fellowship Independent Research (1-4 Credit Hours)

With the consent of a faculty member supervising the research, a student may earn credit. The scope and subject is arranged between the student and the faculty member.

LAW 511 London Comparative Advocacy Prgrm (1 Credit Hour)

Each year, students are selected to travel to London for about two weeks between semesters. In London, students engage in a number of activities focusing on the British legal professions, the system of advocacy in the U.K., and legal history. For students who hope to be selected for the program, completion of Evidence is recommended. Applications for the program are due each April and the program faculty selects the participants for the following year. There are always far more applicants to the program than available space. This course is the second credit of a two-credit ungraded program. To prepare for the visit to London, students are required to take *Introduction to the English Legal Profession* (1 credit) during the fall semester prior to the trip. Participants are then required to register for this course in the spring semester after the conclusion of the trip to London. Students are required to submit a 20 page research paper by a deadline in May on a topic approved by the instructor.

LAW 513 Construction Law (2 Credit Hours)

Construction law draws upon many areas of law from contracts to torts to insurance and land use. This course allows students to understand how they interact and work together. It will focus on the legal issues common to the construction industry from transaction considerations to litigation. We will examine the parties involved in a construction project, project delivery systems, negotiation of contracts, scheduling and delays, insurance and bonding considerations, mechanics liens, defects, claims procedures, remedies, warranties, and termination. Students will gain practical experience in drafting construction contracts as well as writing complaints for a construction dispute. Readings will include state and federal cases and statutes, with a focus on Illinois law. In addition, this course will look at current construction projects and disputes going on in Chicago.

LAW 514 Media Law (2 Credit Hours)

This course will teach students the fundamentals of traditional media law with a particular focus on the intersection between injury law and constitutional speech and press protections. This area of study poses intriguing questions about the American balance between the rights of individuals to protect their reputation and privacy and the rights of those who speak via media - whether traditional mainstream news reporters or citizens using social media platforms such as Facebook or Google Glass. In the words of former New Republic counsel Scott Gant, "we're all journalists now." As a result, it is almost inevitable that even lawyers whose practice does not focus on media will confront questions about rights and liabilities arising from client speech. In addition to discussing defamation and privacy doctrine, we will cover statutory regimes that apply to public speech, such as the privilege to protect sources and rights of access to government institutions and documents, and consider whether and how those statutes apply to both old and new media speakers. We will conclude with a comparative survey of media law. The United States takes a dramatically different approach to speech questions than other countries, and as speech increasingly crosses geographic boundaries, choice of law questions in speech cases are multiplying.

LAW 517 Advanced Legal Writing: Responsible Email and Letter Drafting (2 Credit Hours)

This course will address advanced legal writing issues that extend beyond drafting legal briefs and memoranda to prepare the student for common legal writing assignments involving correspondence and e-mail. Specifically, this course will address professional e-mail etiquette, the analytical e-mail in comparison to the formal legal memorandum, productive communications with opposing counsel (including maintaining civility and professional decorum), and preserving client interests in dealing with non-parties.

LAW 518 Advanced Mediation and Courthouse Practicum (1-3 Credit Hours)

This course is for students who have already taken and passed the Mediation Certification & Courthouse Practicum. Students in this course will further develop and build upon their mediation skills by mediating actual long model cases at the Center for Conflict Resolution, as well as short model cases at the Cook County courts. Students will turn in written case summaries and assessments after the mediations and use the classroom time to discuss and learn from each other's mediation experiences. This is a 1-3-credit course. Grading is based on participation in mediations, class discussions and written work. Professor permission is required. This is a Skills and Experiential Learning course.

LAW 519 National Security Law (2 Credit Hours)

This course examines the current constitutional and statutory framework guiding government institutions tasked with national security responsibilities, as well as their historical roots. It covers such themes as the allocation and interplay of power between the Congress and the President on matters of war making, emergency powers, intelligence gathering, targeted killing, indefinite detention, Military Commissions, and the looming prospect of a statutory schema for addressing the rising threat of domestic terrorism. Conventional wisdom overweighs 9/11 and its aftermath as the anchor point for examination of this field of law. In fact, and as the course explores, its roots must be traced from 19th century conflicts with native peoples to slavery and the Civil War, and then coursing through industrial and social strife in the early 20th century, Cold War anti-Communism and the 1947 National Security Act, to the ongoing War on Terror - foreign in the wake of 9/11 to which paralleling concerns of domestic forms now proliferate, with each draw on organizing tenets involving the othering of minorities. To the extent that "national security law" can be said to cogently exist as a discreet field, it operates from the underpinnings of a complex mix of legal and political theory under the penumbra of Emergency Powers or, more classically, The State of Exception made famous by Weimar jurist and political theorist Carl Schmitt, with antecedents in the work of John Locke and Thomas Hobbes. The mix is inextricably intertwined with U.S. foreign policy concerns and their historical fluctuations. These theoretical considerations therefore frame and inform the course's interrogation of the legal structures and doctrines. It also engages with the topic of how ideas of membership and belonging have shaped our judgments as a world power nation-state about who and what counts as an external threat.

LAW 520 Advanced Legal Writing for the Practice of Law (2 Credit Hours)

Disability Law Using disability law as a backdrop, this course will help students refine their research, writing and advocacy skills. In the first half of the course, students will gain an understanding of substantive disability law by analyzing caselaw involving the Americans with Disabilities Act and its 2008 amendments. In the second half of the course, students will apply this knowledge in the context of a hypothetical disability law case by writing an objective memorandum and brief on a topic chosen by the instructor. In addition to writing multiple drafts and working one-on-one with the instructor, students will also have an opportunity to talk with judges about their perspectives on effective advocacy.

LAW 521 International Sales Law (1 Credit Hour)

The primary subject of this one credit International Sales course will be the United Nations Convention on Contracts for the International Sale of Goods (the CISG), a treaty which has been adopted by both the United States and Italy. In addition to exploring key sections of the CISG, the course will focus on important similarities and differences between the CISG and United States domestic sales law under the Uniform Commercial Code.

LAW 522 Election Law (2-3 Credit Hours)

In an era of computer-aided gerrymandering, foreign interference in our elections, increasingly unchecked campaign finance, systematic voter suppression, and (as yet unsupported) assertions of voter fraud, the study of election law seems more relevant than ever. This is a 2 credit course on election law co-taught by an experienced election law litigator, Ruth Greenwood, and Prof. Matthew Sag. Prof. Ruth Greenwood is the Senior Legal Counsel for Voting Rights & Redistricting for the Campaign Legal Center. Election Law will give students an understanding of the themes in the legal regulation of elections and politics. It will cover all the major Supreme Court cases with respect to the right to vote, regulation of political parties and candidates, redistricting, race and representation, and campaign finance. The course will also cover voter fraud and vote suppression. Election law is a product of federal and state law, both constitutional and statutory. Consequently, this course provides a good foundation for students interested in constitutional or statutory litigation. This course is available to 1L students as a perspectives elective.

LAW 524 Sales (3 Credit Hours)

Sales is an advanced contracts course and offers an opportunity to develop drafting, contractual and statutory interpretation, and client counseling skills. Students will gain an in-depth understanding of the law governing sales of goods and Article 2 of the UCC.

LAW 525 Law, Politics, and Society (2 Credit Hours)

This seminar focuses on the relationship between law, politics, and society in one particular area - the criminal justice system. Drawing on a variety of sources, including court decisions and empirical studies, we will examine how the criminal law works, on the ground. The seminar is organized in the following manner: after a brief introduction to some socially created bases for popular notions of criminality and lawbreaking, we will focus on socio-legal studies in six areas: criminal courts and criminal justice personnel, criminal trials, prosecutors, defense attorneys, the police and punishment. Issues we will consider include the disparity between what the law says and what happens in reality; the role of race, class, and gender in the decisions made by those whose job it is to enforce the criminal law; the role the criminal justice system is intended to play in society, and finally whether the criminal justice system lives up to the goal of balancing the interests of justice, order, and liberty.

LAW 527 International Arbitration Oral Advocacy (1 Credit Hour)

This course is designed to introduce participants to the oral advocacy skills useful for witness examination in international arbitration evidentiary hearings. Through PowerPoint presentations, the instructor will introduce fundamental concepts in eliciting witness testimony especially in cross-examination. Students will play the roles of counsel and witnesses in simulation exercises practicing cross-examination and redirect examination skills. The current Vis International Commercial Arbitration competition case materials will be used as the fact pattern for the exercises and will be supplied in advance so students can carefully review and prepare before the class sessions. Readings will be recommended from the book *International Arbitration Advocacy* co-authored by the instructor, Susan L. Walker. A copy will be on reserve in the law school library and copies are available online at Amazon.com. This is a Skills and Experiential Learning course.

LAW 528 Contract Drafting (2 Credit Hours)

This course will teach the fundamentals of drafting precise and clear contracts. Drafting concepts will be taught through assigned readings, lectures, in-class exercises, hands-on drafting in pairs and alone, and review of, and comments to, an individual's work and the work of others. The majority of the semester will be devoted to drafting without the use of forms or precedent documents. For the first several weeks of class, students will draft the components of a contract, each component being either peer-reviewed or reviewed by the instructor. The components will be revised according to the comments received and integrated into a complete contract. The individual drafting will be supported by independent in-class exercises and review of the assigned reading and relevant cases. The final project will simulate a real-world drafting experience in which students will receive precedent documents, term sheets, emails, relevant statutes, and due diligence and will be required to prepare the first draft of the operative document for a transaction.

LAW 529 Bankruptcy Practicum (2 Credit Hours)

This course will prepare students to practice in bankruptcy law upon graduation. A brief introductory segment will provide a broad overview of bankruptcy law. The class will then focus upon active case files in an effort to illustrate and animate the basic doctrine of bankruptcy law through actual case files, pleadings motions and appeals. Cases selected for review will focus on current hot practice areas in both consumer and business bankruptcy proceedings. Students will need to draft pleadings and motions in order to pass and grades will be determined based upon a take-home final. There is no prerequisite.

LAW 530 International Law Colloquium (2 Credit Hours)

This seminar will examine select topics in contemporary international law practice and scholarship. Approximately every other week, the course will feature presentations of papers or works in progress by a leading international law scholar or practitioner. Students will submit short written comments of each paper in advance of its presentation. These comments will be sent to the speaker and the two hour session will be devoted to discussion of the paper and these comments.

LAW 532 Leadership in the Practice of Law (1 Credit Hour)

Pre-requisites: Must have completed one year of law school

This course will, over 7 two-hour sessions, explore how in many of the possible aspects of a lawyer's career one can move beyond counseling and competency in professional practice to setting and achieving visionary goals that inspire progress in private, public or non-profit sectors.

LAW 534 Privacy Security and Data Protection Workshop (2 Credit Hours)

Privacy is a relatively new and rapidly growing area of law that now affects nearly all industries. The privacy field poses a variety of legal challenges as government regulators attempt to keep up with privacy issues. Class will focus on real world legal problems that start-ups and technology companies face as they consumer and utilize data in order to innovate. Students will gain practical experience in identifying key legal issues related to privacy, security and data protection while developing an understanding of best practices utilized for compliance. Students should take this course if they have any interest in working with or in the tech, health or any other data driven discipline.

LAW 535 Advanced Writing Workshop (1 Credit Hour)

This course focuses on the development of skills necessary for particular writing assignments that arise in the course of a civil lawsuit or a criminal prosecution. While writing well in litigation is important in itself, it also contributes to a litigator's skill as an oral advocate. Moreover, practice in oral advocacy contributes to a litigator's effectiveness as a writer. For this reason, this course will require the student to participate in oral advocacy exercises as well as undertake specific writing assignments. The course is designed the student with a strong sense of the overall strategy necessary to be effective in the development and presentation of a case. It will cover a wide range of skills, including the drafting of complaints, the preparation and presentation of motions, opening statements and closing arguments, the careful researching of local rules, the drafting of memoranda, the development of techniques for examining witnesses, the use of discovery tools and the application of a structured approach to settlement negotiations. In addition to the writing associated with these skills, the course will focus on the aspects of these skills that support an overall litigation strategy. This is a Skills course.

LAW 536 Legislative Drafting (1-2 Credit Hours)

The Legislative Drafting Workshop will provide law students with an introduction to legislative drafting with a specific focus on the unintended consequences that can result from well-meaning legislation. Students will learn the basics of how to draft a law for enactment in the state of Illinois. We will analyze several statutes to identify common problems, and other well-known unforeseen issues. There are several types of unintended consequences, and students will learn how to identify and prevent them. The course will consist of several in-class assignments where students will be given proposed legislation and they will identify many possible unintended consequences of the law and they will then correct them either by rewriting the law or drafting an amendment. The course will be taught by legal professionals with extensive experience in legislative drafting and litigation. The students will gain practical skills by learning from two practicing litigators who experience the effects of unintended consequences every day.

LAW 537 Human Rights in the Global Economy (2 Credit Hours)

Human rights issues have come to the fore front around the world, in courts and legislatures, in corporate board rooms, in the corridors of the United Nations and the international trade and financial institutions. This emergence and universalization of human rights has arisen as the promotion and globalization of free markets through trade liberalization, flows of foreign direct investment and finance across national boundaries has intensified. This course will examine how the growing influence of the international human rights framework is implicated in settings such as the overseas manufacturing operations of companies like Apple, in extractive industry mining activities such as those involving "blood" diamonds, and in China's huge infrastructural projects particularly in Africa. These case studies and more will be examined in light of the history and theoretical origins of human rights such as rights to food, housing, health, education, cultural expression, political participation, and prohibitions of discrimination and violence. The course will examine a variety of responses to these case studies as they relate to the legal framework under major international and regional human rights treaties and how international, regional, and domestic courts, (including federal courts under the Alien Tort Statute), and other actors have interpreted them. No prerequisite is required.

LAW 540 Community Law Center Clinic III (2 Credit Hours)

Pre-requisites: Must have previously taken Community Law Center Clinic I

This course is open to returning Community Law Center Clinic I students seeking 2 credit hours. .

LAW 541 Energy Law (2 Credit Hours)

This course offers a basic overview of the legal framework within which the production, distribution and sale of energy takes place. It is offered as part of the Program in Environmental and Energy Law but is open to all students. After a brief introduction to scientific concepts of energy and the history of energy technology, the course will survey the major sources of energy. The traditional sources have been oil, natural gas and coal converted to consumer products such as electricity and gasoline. Newer sources include nuclear and solar energy. Each source and delivery system has its own network of property rules and contract relationships. National energy policy will be reviewed and the impact of interregional competition on the regulation of energy will be studied, as will constitutional and economic concepts affecting the pricing of energy. Particular emphasis will be placed on energy issues in environmental law.

LAW 542 Trademark Law Seminar (2 Credit Hours)

Pre-requisites: Intellectual Property or Instructor Permission
No course description is available

LAW 543 Advanced Tax (2 Credit Hours)

Pre-requisites: Personal Income Tax

This seminar examines the tax and business planning aspects of mergers and acquisitions, including taxable and nontaxable transfers of businesses and real estate. Transactions covered include installment sales, earn-outs, options, technology transfers, reverse mergers and like-kind exchanges. Particular attention will be given to planning whether to use asset sales or stock sales, structuring financing for acquisitions and techniques for compensating investors. The seminar will also explore the taxation of partnerships, S corporations and limited liability companies and their special application to corporate and real estate acquisitions.

LAW 545 Advising Not For Profit Organizations in Real Estate and Business Trans Settings (2 Credit Hours)

This course will explore the opportunities and challenges for lawyers involved with not-for-profit organizations, whether as paid or pro bono legal advisors, or as board members or volunteers. The course will be centered around a recurrent series of fictional clients, each a not-for-profit organization, engaged in a variety of operational and transactional situations. Each client organization will have a different mission, size, and resources, as well as mock client representatives who will have different business and style preferences, which the class will need to accommodate and will come to anticipate in fashioning and recommending solutions for each client. There will be a particular emphasis on transactions and involving ownership, leasing, use, and operation of real estate, which (just as with many for-profit businesses) is typically the largest single category of capital investment and the second largest category of repeat expense (after total personnel costs) for many not-for-profit organizations. The course will also consider issues of legal ethics and professional conduct, as well as governance and fiduciary duty of board members, in the not-for-profit context.

LAW 546 Anatomy of a Deal (1 Credit Hour)

This weekend course will provide an introduction to the essential skill set you will need as an entry-level M&A deal lawyer. This is increasingly important, in light of growing client unwillingness to pay junior associate rates for attorneys to learn on the job. Facing an ever more competitive recruiting environment, it will be crucial for you to come out of the gate armed with the appropriate skill set for your chosen practice area. This course is designed to prepare you to speak intelligently in interviews and hit the ground running on the job. To this end, the focus of the class will be the basics of a typical M&A transaction, including how to perform due diligence and how to review and draft resolutions, share purchase agreements, third-party opinion letters, and other closing documents commonly assigned to junior associates. You will also study sample form agreements that appear in many different types of deals, including share purchase agreements, debt documents, confidentiality agreements and escrow agreements. When appropriate, we may invite guest lecturers to join us to provide real life insights into the transactional law practice.

LAW 547 International Patent Law (2 Credit Hours)

The management of large international patent portfolios (comprising patent applications filed in several jurisdictions), and an understanding of law and treaties affecting those portfolios, is fundamental to international patent practice. We will discuss the basics of filing and prosecuting patents under the Patent Cooperation Treaty (PCT), including issues that may arise when prosecuting a US application under the PCT. We will also consider other multinational patent treaties commonly used in foreign patent application filings that affect the management of international patent portfolios and US patents. We will take a comparative look at several aspects of U.S. and foreign patent laws, and will consider current controversies surrounding patents in the international arena, e.g., regarding access to medicines and the patentability of business methods and other controversial subject matter. Patent Law is a prerequisite. This requirement can be waived only with the permission of the instructor. This course will be taught at Chicago Kent College of Law.

LAW 548 Public Interest Boot Camp (1 Credit Hour)

Loyola is offering a full-day Boot Camp for students who are or will be working at public interest organizations. The one-credit Boot Camp will focus on a wide range of issues intended to make your public interest work experience more productive and successful. Discussions will focus on topics such as what organizations expect from law students, how to more effectively handle assignments, what resources are available to help with research and drafting, and how to better deal with, and possibly avoid, some of the pitfalls associated with public interest practice. Emphasis will be placed on professionalism, identifying certain basic institutional do's and don'ts. Law student attendees will receive instruction in how to navigate and use Illinois Legal Aid Online, an extraordinary research tool for the legal aid community. They will also have the opportunity to participate in interactive exercises and review form documents, which will better equip them to take on assignments such as interviewing clients, drafting complaints or answers, and preparing discovery documents. The Boot Camp will also feature a panel discussion, with participants from various public interest organizations, who will address such topics as training, supervision, types of assignments, feedback, and handling those situations in which law students seem to run into trouble. There will be ample opportunity during the Boot Camp to ask questions. The Boot Camp will be led by Jack Block. Professor Block, currently an Adjunct Professor at Loyola, has extensive public interest experience which includes serving as Deputy Director of the Legal Assistance Foundation, heading the Pro Bono Committee at the law firm of Sachnoff & Weaver (now Reed Smith), and chairing the Legal Aid Committee of the Chicago Bar Association. He has received a number of awards, including Loyola's Public Interest Convocation Award. Students enrolled in the extern course/intensive field placement during the spring semester or summer semester may count their attendance at this important event against the number of hours required for course credit OR they may earn one hour of course credit. Students who want one hour of credit must register for the course. Students who want hours credited toward their externship hourly requirement must confirm their attendance with Professor Jack Block. Questions about the program should be emailed to jacklblock@gmail.com.

LAW 549 Antitrust & Intellectual Property Seminar (2 Credit Hours)

Pre-requisites: Intellectual Property, Copyright or Antitrust Law or instructor permission

This seminar focuses on the interface between Intellectual Property (IP) and antitrust law. Patents, copyrights and trademarks and other IP regimes confer exclusionary rights. Exclusive rights provide incentives and serve other ends, but their exercise can also impede competition distort otherwise competitive markets. This seminar will address the intersection of IP and Antitrust with respect to issues such as standard setting, licensing, corporate strategy, product design, efforts to increase market share and mergers and acquisitions.

LAW 550 Search and Seizure: 4th Amendment Law and Practice in Illinois (2 Credit Hours)

A practical skills course on 4th Amendment/Search & Seizure law as it applies in Illinois, and how the most common issues are litigated in criminal cases. The class explores applicable Illinois statutes, Illinois Supreme Court rules, and federal and state case law that sets forth the prevailing legal basis for individuals' rights against unreasonable search and seizure. Taught by a Cook County Assistant State's Attorney and with question and answer sessions with a defense attorney and law enforcement; the course takes a balanced look at both the prosecution and defense approaches to Motions to Quash and Suppress, the bread and butter of pretrial litigation and the chief avenue for deciding 4th Amendment issues. After learning the legal basics, students will be tested on their ability to identify and analyze Search & Seizure issues in various scenarios and argue for or against 4th Amendment violations, as well as, practice some basic motion writing and oral arguments.

LAW 551 Electronic Discovery and Problem Solving (2 Credit Hours)

Pre-requisites: Civil Procedure, Criminal Law, Constitutional Law
Electronic discovery ("e-discovery") is the practice of working with digital evidence during legal proceedings. It is at the intersection of law and such information technology disciplines as computer forensics, information governance, data analytics, machine and rule based learning, and artificial intelligence (and so that we do not scare anyone away, we expect that most students will have little experience with these concepts). Proficiency in e-discovery has become a must-have skill set for litigators. The Federal Rules of Civil Procedure and Evidence have already been modified multiple times in the last few years to try to address e-discovery concerns, and additional changes are under review by the drafters. The states have followed suit with their own rules. A burgeoning body of case law comes down each year, attempting to define the legal and ethical obligations of parties and counsel when preserving, collecting, reviewing, and producing electronically stored information. The result is a fundamental change in litigation practice. For example: the enormous costs of e-discovery drive settlement strategy in commercial litigation; divorce and trade-secret cases hinge on the contents of a party's cloud email account; product liability and personal injury cases focus on output from the Internet of Things; prosecutors and criminal defense attorneys fight to balance the wealth of evidence available from mobile phones with privacy rights; legal privilege protections are diminished because it is difficult to find attorney/client communications among large volumes of email; technology-savvy attorneys use their expertise to contest the authenticity and probative value of key pieces of evidence based on arcane metadata; parties seek arbitration or trial venues based on the protections and burden of local discovery rules; international reaction to US cyber-snooping hindered the ability of US litigants to obtain information from foreign parties; and, attorneys and litigants are sanctioned with alarming frequency for failure to properly manage e-discovery. Mastery of e-discovery is a differentiator for clients choosing counsel and for law firms in the hiring of new attorneys. Law 551 is a survey course, to familiarize students with foundational concepts, and to delve into some of the more challenging questions that e-discovery poses. It will also look at creative and strategic ways that lawyers use digital evidence to advance their cases. The course will include a combination of lecture, discussion, and practical application, allowing students an opportunity to explore issues and practice their advocacy and problem solving skills. Readings will consist of case law, statutory and regulatory guidelines, ethical guidelines, research, and white papers. Grading will be based on class participation, a mid-term exam and a theme paper.

LAW 552 Political Civil Rights (1 Credit Hour)

The purpose of this course is to provide students with a survey of current and emerging issues in American civil rights litigation. It defines civil rights broadly and incorporates issues related to food justice as well as traditional doctrines addressing discrimination based on race, gender and other identities. As a start, the materials on racial discrimination serve as an anchor. The foundational framework for our civil rights laws is directly related to our racially discriminatory laws. For that reason, the course starts with landmark cases and historical developments impacting the social and legal treatment of blacks and other communities of color. Additionally, it asks students to think about what law is, what law is doing, and what it should be. The coverage, then, expands to the diverse areas of civil rights laws. Throughout, students will learn the contours of each doctrine, the principles that form it and their practical relevance. This begins with a discussion of racial discrimination as the catalyst for civil rights jurisprudence in America. The Civil Rights Act and relevant doctrines of the 14th Amendment are important to understanding the development of civil rights litigation. Ongoing and emerging issues affecting gay, transgender, women, nonconforming individuals, and poor classes are also covered as vibrant parts of civil rights jurisprudence. To this end, the course's materials are divided into three parts: the first part deals with foundational and historical issues that impact today's jurisprudence. Chapters in this first section examine the road to Brown and the struggle for desegregation in school systems nationally. It also discusses pre and post Reconstruction cases and statutes still relevant today. The second part examines in detail the cases and laws that make up the modern civil rights landscape. As such, it starts with the Civil Rights Act and a close examination of Title VII, Title IX and Title VI. This section also includes cases that make up the voting rights canon as well as chapters on disability law, language minorities, and gender discrimination. The third section delves into a study of emerging issues in the twenty-first century. In these materials, relevant issues include the struggle for sustainability as civil rights issues, food justice, gender identity, sexual orientation, and same sex marriage.

LAW 553 Sex Trafficking (3 Credit Hours)

This seminar will explore sex trafficking as a structural problem of intersectional inequality and sexualized violence. This class will combine theory with a comprehensive overview of legal doctrine in areas of substantive criminal law and procedure. Students will also read several articles addressing intersectional feminism and critical race theory approaches to law, hierarchy, and vulnerability.

LAW 554 Family Law Practicum (1 Credit Hour)

Students in this practicum will administer a skills component of the traditional Family Law foundational course, focusing specifically on the drafting of an antenuptial agreement in a complex case hypothetical. Practicum students will serve as clients in the drafting exercise. In this capacity, students will meet face-to-face with the collective group of student attorneys representing each client and engage in ongoing, timely and detailed electronic communication with student attorney teams throughout the course of the skills exercise. Practicum students will also assist in evaluating the client counseling facet of the exercise, and in reviewing each prenup for its substantive terms. Each practicum student will spend approximately 40 hours engaged in work related to the exercise. Students may enroll in this practicum only with permission from the instructor.

LAW 556 Alternative Dispute Resolution (2-3 Credit Hours)

This course aims to help law students become effective problem solvers through development of their knowledge and skills in negotiation, mediation, and arbitration as applied to a range of legal disputes. Students will learn to assist clients in identifying their goals and searching for creative solutions that produce efficient, expansive and effective outcomes. Students will learn about negotiation, mediation, and arbitration through lectures, but primarily through case simulations followed by critical feedback. Class attendance is critical. Class focus will be on the mediation and collaborative legal forums of Alternative Dispute Resolution, with an emphasis on learning procedural aspects of mediation and arbitration, and the collaborative skills of negotiation. This course will provide students with the opportunity to gain practical knowledge and familiarity with the different methods of alternatives to litigation. Classes will include lectures, simulations, role-playing, and outcome-based actual case studies. This is a Skills course.

LAW 558 Comparative Freedom of Speech (1-2 Credit Hours)

This course will explore the first amendment provisions dealing with free speech, freedom of association and religion with particular emphasis on free speech and association in a time of terror. We will also study the European counterpart protections with significant stress on civil and criminal defamation.

LAW 559 Education Litigation: Dilemmas in Education Equity (2 Credit Hours)

This course examines the results of civil rights education cases brought on behalf of African American, Latino, and other minority students. Students will examine applicable legal precedents and statutory frameworks, classroom level implementation, and experts' analyses of data and outcomes for five subject areas - student assignment, English Language Learner Programs, tracking (gifted and remedial), special education, and discipline. Students will work in teams and individually to present research and response papers related to the five subject matters.

LAW 560 International Research (1-2 Credit Hours)

With the consent of a faculty member supervising the research, a student may earn credit for a project related to an international law subject. The scope and subject is arranged between the student and the faculty member.

LAW 561 Design Thinking and Early Childhood Education (2-3 Credit Hours)

This unique law school class will immerse students in the principles of design thinking and apply them to issues involving the law, policy, and pedagogy of early childhood education. Design thinking is a human centered approach to solving complex problems that includes empathy, ideation, prototyping, testing, and iteration. In presenting the material, we hope to model best educational practices used in a variety of educational environments, particularly the social construction of knowledge through meaningful relationships. Accordingly, students are required to participate actively in collaborative design thinking activities such as empathy mapping and building prototypes, as well as role-playing, multiple means of expression, and documentation of learning. Students also are required to complete an impactful paper of publishable quality on a topic or issue relevant to the class. We hope to accomplish the following primary learning objectives in the class:

- ¿ First, we hope that each student will acquire a deep and comprehensive understanding of the fundamental legal and political concepts and doctrines that inform early childhood education in America.
- ¿ Second, we hope that each student will develop the ability to conduct a comparative analysis of the legal and political structures surrounding early childhood education in America, Italy, Finland and throughout the world.
- ¿ Third, we hope that students will develop a profound appreciation for the various pedagogical approaches to early childhood education, including the approach founded in Reggio Emilia, Italy.
- ¿ Fourth, we hope that students will obtain an awareness of the role of brain research and developmental psychology in the different legal, political and pedagogical approaches to early childhood education.
- ¿ Fifth, we hope that the students will challenge the fundamental assumptions underlying early childhood education in America.
- ¿ Sixth, we hope that the students will achieve great insight into a particular area of early childhood education, which they will disseminate through a published paper.
- ¿ Seventh, we hope that the students will enhance their abilities to collaborate in productive group work, to practice design thinking, and to construct knowledge through meaningful professional relationships.
- ¿ Eighth, we hope that the students will appreciate the role of documentation in making visible the process of their own learning and the learning of the group.
- ¿ Ninth, we hope that students will reflect on their own educational development and learning strategies.
- ¿ Finally, we hope that the students will be inspired to pursue policy initiatives in the area of early childhood education.

LAW 562 Leadership (2 Credit Hours)

The purpose of this course is to develop and understanding of human behavior in changing organizations, and the managerial awareness, tools and methods that are available to increase effectiveness. The course surveys principles and theories about individuals and groups at work, motivation and interactive drives and processes for satisfying needs, organization strategies for effectively utilizing people and creating the environment to achieve goals of people and companies. New models of leadership, teams, organization structure are studied as the product of today's transforming organizations. Some elements of organization development methods are incorporated to show how OC practitioners work.

LAW 563 Tax and Budget Policy (2 Credit Hours)

This seminar will cover the following topics: the legislative process in enacting budgets and tax legislation at the State and Federal level; how tax legislation affects the budget process; the political and legal issues in the legislative process of tax and budget laws; the intended and unintended consequences of legislation (e.g., the alternative minimum tax and the estate tax); the relationship of tax and budget policy to social and economic issues (Social Security, Medicare, health care, pollution issues, poverty, housing); comparison of tax and budget policy in the U.S. to other countries; and issues of fairness and compliance in tax and budget policy. This course will be taught at Chicago Kent College of Law.

LAW 564 Animal Law and Policy (2-3 Credit Hours)

Animals (meaning comprehensively for this purpose non-human mammals, birds, reptiles, fish, and insects) are central to our world in a myriad of ways. Historically, and still today (not without controversy and for better or worse depending both on degree and on your perspective), animals were and are a major source of food, as well as a tool of production as farm labor, transportation, policing and security, military activities, and entertainment and education, an object of scientific and medical research, and work as service and support animals. Animals are also key components - and participants - in our ecology and environment; after all, they have been on the planet in one form or another 500 million years before the first humans are believed to have emerged (and, even then, Darwin might point out that we have them to thank). Moreover, companion animals have been sources of friendship, companionship, and love throughout centuries and especially in modern society where they are often viewed as family members and not as possessions. These attachments, and public concern for the welfare of animals, also result in a determination to protect animals (although arguably in some contexts but not others) from neglect and abuse. For all of these reasons, animals intersect with virtually every aspect of legal concept and practice: property law, contracts, tort, criminal law, environmental law, wills and trusts, constitutional law, international law and trade, and more. And, like every area of law, animal law continues to evolve through legislative and regulatory action, judicial decision, and societal sentiment. That change can be complex, involving considerations of both human and non-human safety and wellbeing, ethical and moral beliefs, and economic interests. In this course, together we will explore themes across the spectrum of how the law touches and treats animals in our society, in our economy, in our homes, and in the wild. We will use a textbook as a starting resource, supplemented by materials from primary and real-world sources and contexts, as points of discussion and discernment. Each class member will also select an individual topic in an area of personal interest to develop in further depth and to share with the class to expand our knowledge. Coursework on which the performance assessment is based will be composed of a series of objective or short-answer written assignments throughout the course, a concise paper and class presentation on the student's chosen individual in-depth topic, a brief take home final examination that also serves as a summative reflection on the course, and class participation.

LAW 565 Commercial Real Estate Transactions (3 Credit Hours)

This course addresses foundational topics in commercial real estate transactions, including sales and purchase, leasing, financing, and distressed properties. The course also provides an introduction to skills in negotiation and drafting and incorporates a substantial simulation component, including one Saturday all-day deal simulation workshop (the date of the workshop will be announced in the first class meeting). This course will be taught at Chicago Kent College of Law.

LAW 567 History of the Federal Judiciary (3 Credit Hours)

People use the expression "trial and error" in reference to a continual experiment yielding both positive and negative results. Yet, it is all but forgotten that the federal courts developed in precisely this manner at the hands of many successive (and sometimes shortsighted) Congresses. Since 1789, Congress has tinkered with every conceivable detail pertaining to the Third Branch, from the important (such as defining federal jurisdiction) to the trivial (such as micromanaging times for holding court). Some of these efforts were short-lived, while others have persisted since the first Judiciary Act of 1789 and today constitute cornerstones of the modern federal judiciary. With that pedigree in mind, this course will examine certain aspects of the evolution of the federal courts from 1789 to the present, with particular emphasis on the structure and function of current, abolished and reconstituted Article III (i.e., constitutional) courts, federal judicial legislation, the federal judiciary, specialized Article III courts, the advent of Article I (i.e., legislative) courts and court officials. The instructor will evaluate students by a final examination as well as classroom participation.

LAW 568 European Union Law (1-3 Credit Hours)

This seminar will provide a survey of the key Treaty provisions and legislation of the European Union (EU) and the key institutions of the EU that enforce these provisions. The course will focus on the so-called four freedoms of EU law: the free movement of goods, services, people, and investments. The course will also discuss the progress of the EU towards its long term goal of the completion of a single European market and discuss selected areas of the substantive law of the EU including competition law (antitrust). Students will prepare a paper on a mutually agreeable topic and submit an outline, first draft, and final version as well as present their topic in class toward the end of the seminar.

LAW 569 Securities Enforcement (2 Credit Hours)

This course will examine the enforcement of the federal securities laws from the perspectives of both the Securities and Exchange Commission and defense counsel. We will examine the SEC's investigative process, including the taking and defending of testimony; and will examine selective types of securities fraud investigations, including accounting fraud, insider trading, and offering frauds. We will also evaluate the role of auditors and in-house counsel in detecting and preventing securities fraud; remedies available to the SEC; the settlement process; and collateral actions by other civil and criminal authorities. The required weekly reading will consist of recent enforcement cases, rulemaking, related statutes, law review articles and other commentary. Most classes will begin with a student presentation on a securities law-related topic of their choosing. Guest instructors may be used to address specific topics throughout the semester. This is a Bar course.

LAW 570 Civil RICO and Pragmatism (2 Credit Hours)

This seminar will explore the Racketeer Influenced and Corrupt Organizations Act (RICO), which was enacted to combat organized crime but with the allure of triple damages and attorney's fees has been used in all manner of business and contract disputes. This expansive trend has met resistance from many federal judges, most notably Richard Posner of the Seventh Circuit Court of Appeals, sometimes referred to as the "tenth Supreme Court justice." We will examine Judge Posner's economics and "pragmatic"-based methods of deciding RICO cases. Is this what Congress intended in enacting RICO? Or has he usurped the legislative role? This course will be taught at Chicago Kent College of Law.

LAW 571 Topics in International Law (2 Credit Hours)

This seminar will explore in depth several current topics in public international law, for example, human rights, the use of force, humanitarian law in a world confronted by terrorism and torture, international criminal law, protecting the environment including outer space and the polar regions, and the right to consular access by aliens in death penalty cases. The seminar is designed to provide students with a foundation upon which to think about and research these issues, and the way that domestic law is often implicated in the formation and reformation of foreign policy. Students will be expected to sign up to present their own assessments of the developing law in several areas, one of which will likely become the basis of their seminar paper. During the first three weeks of the course, the instructor will present a brief overview of the international legal structure - its sources and limitations, and how it operates - as well as a philosophical foundation for a system of human rights. The overall goal of the course is to get future international lawyers to think beyond doctrine as they seek to gain a better understanding of the relationships among law, policy, and politics in the ever-evolving field of international law. This course will be taught at Chicago Kent College of Law.

LAW 572 Special Education Dispute Resolution (1 Credit Hour)

This one credit hour weekend course will provide students with an intensive simulated experience in the various processes of resolution of special education disputes. Areas addressed will include some or all of the following: contested IEP meetings, manifestation determination reviews, resolution meetings, mediation, and due process hearings. Assuming the roles of parent legal advocate and school district counsel, students will develop a practical working knowledge of federal and Illinois statutes and regulations governing special education dispute resolution; develop a legal understanding of, and working familiarity with, student special education records and documents; and learn how to interview and prepare clients, witnesses, school personnel, experts, and others for their respective roles in the dispute resolution process. This course counts as a Skills and Comprehensive Simulation course.

LAW 573 Terrorism Prosecutions: Civil Rights & Executive Power in Theory and Practice (2 Credit Hours)

This class will examine how terrorism cases are investigated, prosecuted, defended and punished. It will address how suspected terrorists are targeted and captured, including surveillance methods and interrogation techniques, as well as the questions of whether these measures are effective and potentially undermine well-established and deeply ingrained constitutional liberties and culture. It will cover classified evidence in the adversarial process - including how it is gathered, how it impacts charging decisions and trial strategies, and how courts manage it in adversarial proceedings. In addition to drawing out these issues as they operate in civilian courts, the course will also examine judicial alternatives, including the use of military tribunals or national security adjudicative systems in other constitutional democracies, as well as extra-judicial and judicially pre-emptive measures such as preventative detention, designations and the freezing of assets. Overarching issues that will animate our exploration will be the need for emergency rules and powers, the role(s) of the courts and counsel, and how well the U.S. legal system faces the challenge of balancing rule of law and civil liberty principles with the national security concerns in countering terrorism, both internationally and domestically. This is a non-exam course. Grades will be based (i) short written impression statements on assigned weekly readings which will be used as prompts for class discussion; (ii) classroom participation, and; (iii) a 15-20 page paper on a topic of choice in the field. The class will include participation by guest speakers, including scholars and practitioners in the field. This is a Skills course.

LAW 574 Canon Law on Ecclesiastical Administration (2 Credit Hours)

While the Catholic Church ultimately exists for spiritual purposes, religious institutions must operate in the real world of human resources, leadership development, strategic thinking, communication, marketing, property and finance. Canon law is the Church's own legal system that regulates ecclesiastical administration. In order to function effectively in this environment, knowledge of the Church's legal system and how it interacts with civil law is essential for lawyers and administrators responsible for the management of ecclesiastical entities such as Catholic hospitals, universities, social service agencies, dioceses and parishes. Examples of specific issues would be in the areas relating to Catholic identity, sponsorship, mergers and joint ventures involving Catholic schools and health care institutions; incorporation and tax-exempt status of religious organizations; the acquisition and sale (alienation) of ecclesiastical property; wills, estates and bequests involving ecclesiastical goods and offerings for Masses; liability for clergy and employee misconduct; immigration law aspects of foreign religious workers; and the interface between government regulations and the Church's ethical and religious directives. Canon Law and Ecclesiastical Administration should be of particular interest for law students and business students interested in the management of health care and educational institutions, as well as for those interested in comparative law. This course will be conducted as a seminar in which students will be invited to write a research paper and make a classroom presentation on some issue of canon law and ecclesiastical administration.

LAW 576 The Corporation and the Constitution (2 Credit Hours)

This class will investigate the origin in law of the corporate form and explore the challenges presented by the modern corporation, both from the standpoint of its legal structure as a business organization formed by law, and the rights and privileges afforded corporations under case law that interprets the corporation as a jural "person." Readings will be considered from colonial charters to the recent U.S. Supreme Court decision in *Citizens United v. FEC* (2010). There will be special emphasis on the contracts and commerce clauses of the Constitution, as well as the 14th Amendment. This course is not so much concerned with corporate responsibility as it is with corporate governance and accountability. We will explore the concept of limited liability, trace the evolution of legal personhood, examine the original public purpose requirement of the corporate entity as contemplated in law, and consider the role of public law in the world of the self-regulating market. (Class will meet at Chicago Kent Law School.)

LAW 578 Student Disciplinary Hearing Workshop (1 Credit Hour)

This one credit weekend course will provide students with an intensive simulated experience in conducting a student disciplinary administrative hearing. Assuming the roles of counsel for the student and counsel for the school district, workshop participants will prepare for and represent their respective clients in a school expulsion hearing. Participants will develop an understanding of the constitutional principles of due process, freedom of speech, and search and seizure as they pertain to students in the public school setting; as well as Illinois School Code statutory provisions regarding student discipline, suspension and expulsion. In the course of preparing for the culminating disciplinary hearing, participants will gain a working familiarity with student codes of conduct and student school records and documents, and they will hone their skills in interviewing and preparing clients, witnesses, and school personnel for their respective roles in the discipline process and administrative hearing. Students will also deliver opening and/or closing statements and conduct direct and cross-examinations of witnesses and, through this process, will enhance skills applicable to a variety of court and administrative hearing settings. This is a Skills and Experiential Learning course.

LAW 579 Practice Fundamentals: Interviewing Skills (1 Credit Hour)

Some of the most common complaints about lawyers stem from a single fundamental truth: we are trained to talk, but we are not trained to listen. Clients tell us frankly that we "have poor listening skills," and further that we "don't genuinely care about them or their case," that we "think we know everything" and "nitpick every word they say." [1] Other client frustrations, such as "not communicating clearly," "not keeping [them] informed," and "kill[ing deals]" [2] are superficially unrelated to our listening skills, but at bottom reflect a failure to appreciate the client's point of view. In short, all lawyers need to know how to elicit and contextualize information from those they represent in order to represent them well. While interviewing is crucial to client relationships, its value does not end there. Young attorneys juggle many audiences in a day. These include assigning partners or department supervisors and those encountered in the course of doing the legwork that is a beginner's bread and butter: opposing counsel and their staff, or low-level representatives of government institutions, including court and agency clerks. Happily, the listening and interviewing skills a young attorney acquires during these experiences will pay off when she tackles witness interviews and her first on-the-record interview, the deposition. This course will introduce students to theories of interviewing and listening in a variety of legal contexts. More important, students will try their hands at different types of interviews to hone this experiential skill. We will meet for an hour each week, and our time will be spent roughly as follows: a 10-minute introductory discussion about the week's reading, followed by a 30-minute "workshop" during which groups or pairs of students will conduct interviews using case study materials distributed in class. We will conclude by reflecting on the interview experience. Because each student will serve as both interviewer and interviewee each week, we will be able to consider the conversation from both the lawyer and the client points of view. The course is a survey of different types of interviews young lawyers are most likely to conduct: beginning with a general overview and moving to practice-specific interviews about potential litigation or corporate work. We will then move to a conversation that directly results from the initial interview: review of an action plan with the client. From client interviewing, we will consider adapting these skills in three other contexts relevant to the beginning lawyer: witness interviews, adversary conversations (pre-negotiation or logistical negotiation) and finally, an introduction to depositions. Throughout, we will develop an awareness of the ethics and social considerations likely to arise in various communications contexts.

LAW 581 Electronic Payment Systems and Commercial Paper (3 Credit Hours)

In this digital, global age, how does modern banking and finance work so that payments can be made, funds transferred, and money borrowed? What is the law governing your credit or debit card, phone "apps" for point-of-sale payments, ATM machines, direct deposits into your bank account, promissory notes and checks, wire transfers, letters of credit, and more methods for moving funds? Modern payment systems exist within an evolving scheme of banking and finance. They depend on networks of laws, regulations, customs, and agreements that balance the speed of transferring funds domestically and internationally against the risks of error and fraud. As such, they pose provocative questions of consumer protection and national security. They have adapted older methods of banking and payment to the computer revolution. But, they have gone beyond traditional practices to create new ways for funds to be moved locally, nationally, and around the world. This class allows you to master the law governing these and older systems to effectively advise clients. It delves into provisions of the Uniform Commercial Code affecting negotiable instruments, electronic funds transfer, and (if time allows) letters of credit (Articles 3, 4, 4A, and 5); the role of institutions such as the Federal Reserve; federal legislation typified by the Electronic Fund Transfer Act, the "Check 21" Act, and the Truth in Lending Act; federal regulations affecting banking and funds transfers, such as Regulations CC, E, and J; and, critical international banking practices and principles.

LAW 584 Mediation Certification & Courthouse Practicum (4 Credit Hours)

Students in this course will be trained to become certified mediators and then develop their mediation skills through hands-on experience mediating in court. The course starts with a mandatory intensive mediation skills training conducted by the Center for Conflict Resolution (CCR) at the beginning of the semester. The course will thereafter meet once a week as part of CCR's certification process to discuss, practice and improve upon student mediation skills. Students who meet all of CCR's certification requirements will be certified as CCR volunteer mediators and mediate actual cases in Cook County courts, while continuing to meet in class to discuss and build on what they learn in the mediations. Upon completion of this course and the CCR certification process, students will be able to continue volunteering as mediators for CCR, as long as they continue to meet CCR's volunteer requirements. Instructor Permission Required. Spots are limited so students are encouraged not to delay seeking permission to register for the course. To apply, email Professors Block and Eatherton. Preference will be given to students who have already completed a mediation or negotiation course, whose fall schedules are compatible with the court mediation schedule, and who are in their final year of school. Those who do not get a spot may request to be put on the waitlist. Enrollment Requirements: Restricted to J.D. and LL.M. students

LAW 585 Lawyering the Purchase and Sale of Commercial Property (3 Credit Hours)

This is an advanced seminar intended to give students a working familiarity with the anatomy of a commercial real estate sale, using a case study and typical documents, and provide a real world introduction, from a practitioner's perspective, to: (1) the substantive law that applies to commercial real estate (and mortgage financing); (2) the business objectives of buyers and sellers as they analyze and negotiate purchase documents, conduct due diligence (survey, title and environmental, etc.) and negotiate mortgage loans; and (3) the mechanics of closing the deal. The course will focus on Illinois law, but the instructor will point out points on which state law may differ, and how that might affect the deal terms. The "text" for the course consists of a portfolio of legal documents (letter of intent, purchase agreement, brokers agreement, title report, survey, mortgage documents and all closing documents - deeds, assignments, affidavits, escrow instructions, etc.). In addition to the actual documents, course reading materials will include excerpts from statutes, treatises, practitioners' guides, and, occasionally (but rarely), court cases. The goal of the proposed course is to provide as nearly as possible, given the constraints of a classroom setting, the quality and substance of the experience a first-year associate would ideally have in a law firm in reviewing, negotiating and drafting a purchase agreement and closing documents, conducting due diligence (emphasis on title and survey) and quarterbacking the closing, all under a supportive, mentoring partner (i.e., the instructor). Students will volunteer to be seller's counsel or buyer's counsel. For the duration of the course, students will review, analyze and participate in discussions from their chosen perspectives. The culmination will be a mock closing, with a couple of last-minute surprise glitches to keep things interesting. Prerequisites for the course are Contracts and Property. Students who have taken courses in Real Estate Law, and/or Secured Transactions would be at an advantage.

LAW 586 Community Law Center Clinic Veterans Practicum (2-4 Credit Hours)

Pre-requisites: 44 credit hours completed

The Veterans Practicum is a cross-disciplinary effort in partnership with the School of Social Work designed to better address veterans' social and legal needs. Senior law students will use 711 license to represent veterans and their families in a myriad of civil legal matters under the supervision of the director, Emily Vaughan. Students who enroll in this course must be available to be for office hours one morning or one afternoon each week (Monday-Friday). The Practicum also has a classroom component that meets each Wednesday from noon to 2 p.m. The purpose of the classroom component is to provide students with a theoretical overview of the lawyering skills that will be required of them in their casework.

LAW 587 Arbitration Workshop (1 Credit Hour)

This is an Experiential Learning and Skills course.

LAW 588 Legal Issues in Student Discipline (2-3 Credit Hours)

The legal issues surrounding student discipline in public elementary and secondary schools involve the intersection of Constitutional and statutory law with the administrative hearing process. By developing a working knowledge of the school disciplinary process, course participants will build analytical and substantive skills applicable to a wide variety of practice areas. The course will address the Constitutional implications of student discipline and the statutory provisions governing student discipline and the administrative hearing process. Students will learn about "zero tolerance" policies, the role that school discipline plays in the "school-to-prison pipeline," and the discriminatory impact of school discipline policies. Issues relating to discipline in charter schools and discipline of students with disabilities will also be addressed. Other topics to be discussed include disciplinary-related challenges that arise in the context of protecting vulnerable children, including issues of harassment and bullying of LGBT and special needs children; and the legal tenets governing school districts' responses to cyberbullying and the rise of social networks and digital media. Emerging trends in alternatives to punitive school discipline practices, such as human rights approaches, positive behavior interventions and supports, and restorative justice, will be examined. Throughout the term, students will engage in hands-on learning activities, interactive exercises, and practical applications of the concepts and principles of the course. The culminating experience of the course will involve participation in a simulated student disciplinary hearing. *Experiential Learning Opportunity:* With instructor approval, a limited number of students taking the course will have the opportunity to serve as advocates for students facing expulsion from public schools. Students will work under the supervision of the course's faculty to conduct client intakes, develop a defense strategy, conduct discovery, prepare witnesses, and advocate for students at a school expulsion hearing. Students may serve in this capacity as part of the course or for an additional credit, and they may earn Experiential Learning credit. Instructor permission is required to enroll in this portion of the course, and preference will be given to 2L students (no 711 license required). This course counts as a Skills course. This course may count as an Experiential Learning course with instructor approval. *Experiential Learning Opportunity:* With instructor approval, a limited number of students taking the course will have the opportunity to serve as advocates for students facing expulsion from public schools. Students will work under the supervision of the course's faculty to conduct client intakes, develop a defense strategy, conduct discovery, prepare witnesses, and advocate for students at a school expulsion hearing. Students may serve in this capacity as part of the course or for an additional credit, and they may earn Experiential Learning credit. Instructor permission is required to enroll in this portion of the course, and preference will be given to 2L students (no 711 license required).

LAW 589 Externship Long Distance (2-3 Credit Hours)

Students who have completed their first year of law school may receive two or three hours of credit per semester for supervised work done in chambers under the supervision of a member of the judiciary and his or her clerks. The externship course includes a classroom component which has been designed to compliment and support the field placement. The course is taught on Tuesday, Wednesday and Thursday evenings from 5:00pm - 6:00pm. Students may elect the day of the week they wish to attend the class at the time they apply for the externship. Applications are available on the law school website and in the offices of the Director of Experiential Learning.

LAW 590 Wrongful Conviction Seminar (1-2 Credit Hours)

This weekend course is designed to provide students with an overview of the issues and case law related to wrongful convictions. Students will gain an understanding of the dynamics of wrongful convictions and this burgeoning area of law. The course will also provide the opportunity for each student to research one recent case of wrongful conviction. 40% of the grade in this course is based on class participation. 60% is based on a research paper.

LAW 591 Housing and Development Law (2 Credit Hours)

This seminar class will address current issues and relevant case law in various housing and real estate development issues including such topics as fair housing, HUD organization and FHA mortgage programs, public housing, low-income tax credits, community and economic development and affordable housing. This class will be a true seminar with a different topic discussed each week. Class participation is critical and the final grade will be based on participation as well as final paper. *Course equivalencies:* LAW 609 / LAW 709

LAW 592 Independent Research (1-2 Credit Hours)

With the consent of a faculty member supervising the research, a student may earn one or two units of ungraded credit. The scope and subject is arranged between the student and the faculty member. It is expected that for each hour of academic credit the student will produce a scholarly work of publishable quality of approximately 30 pages in length. The project that is the subject of the Independent Research must be completed during the semester in which the registration occurs. This variable credit course may be repeated for a maximum of six (ungraded) credits. (For additional requirements see the associate dean.) This is a Non-Graded Course.

LAW 593 Graduate Fellowship Extern (1-4 Credit Hours)

Students may earn externship credit for working at an approved externship site. This program is designed to offer students practical experience.

LAW 594 Directed Study (1-2 Credit Hours)

A student may earn up to two units of ungraded credit for undertaking a research project for a faculty member. The scope and subject is chosen by the faculty member, who exercises control over the project. It is expected that for each hour of academic credit the student will engage in substantial legal work for at least fifty-five (55) hours during the semester. The project that is the subject of the Directed Study must be completed during the semester in which the registration occurs. This variable credit course may be repeated for a maximum of six (ungraded) credits. (For additional requirements see the Associate Dean.)

LAW 595 Community LawCtr Clinic I (4 Credit Hours)

The Community Law Center Clinic (LUCLC) course is designed to teach students the essential skills involved in the practice of law, including client interviewing and counseling, hearing advocacy, negotiation and practice management. These skills are taught in conjunction with the representation by students of clients in civil cases under the supervision of Professor Theresa Ceko and the law school's clinical faculty. The Law Center is located in Room 1005 of the law school. Students who enroll in the clinic course must be available to be in the clinic either one morning or one afternoon each week (Monday-Friday). The course also has a classroom component that meets each Wednesday from noon to 2 p.m. The purpose of the classroom component is to provide students with a theoretical overview of the lawyering skills that they perform at the clinic. In addition to regular clinic hours and classroom work, clinic students work on their cases during an additional 6 hours a week, most of this work done on the student's own time. Any student who has completed the first year of law school can enroll in the clinic course. Students in the LUCLC represent children in contested guardianship cases and clients in civil cases involving landlord/tenant, family and elder law problems. Many of LUCLC's clients are low income persons. Serving persons who cannot afford legal services sensitizes students to the special ways that the law affects the lives of the indigent. Another important aspect of the LUCLC course is the opportunity for students to develop their own sense of the lawyer's professional role. Students experience the complexity of the attorney-client relationship and the myriad ethical dimensions of lawyering. Students are exposed for the first time to the conflicts, frustrations and rewards inherent in legal practice. Enrollment in the Community Law Center Clinic course also helps students prepare for the performance tests that have been added to many state bar examinations, including Illinois. The skills that these performance tests measure are the same skills that students learn through their client representation. The Community Law Center Clinic course is an excellent bridge from the law school classroom to the law office. It allows students to begin to learn how to practice law in a reflective environment.

LAW 596 Community Law Center Clinic II (3 Credit Hours)

Students in the LUCLC represent children in contested guardianship cases and clients in civil cases involving landlord/tenant, family and elder law problems. Many of LUCLC's clients are low income persons. Serving persons who cannot afford legal services sensitizes students to the special ways that the law affects the lives of the indigent. Another important aspect of the LUCLC course is the opportunity for students to develop their own sense of the lawyer's professional role. Students experience the complexity of the attorney-client relationship and the myriad ethical dimensions of lawyering. Students are exposed for the first time to the conflicts, frustrations and rewards inherent in legal practice. Enrollment in the Community Law Center Clinic course also helps students prepare for the performance tests that have been added to many state bar examinations, including Illinois. The skills that these performance tests measure are the same skills that students learn through their client representation. The Community Law Center Clinic course is an excellent bridge from the law school classroom to the law office. It allows students to begin to learn how to practice law in a reflective environment.

LAW 597 The Use of Force in International and Domestic Law (2 Credit Hours)

This course introduces students to constraints on the use of force in international and U.S. domestic law. International law topics include: (1) a brief introduction to international law and legal theory; (2) the United Nations Charter and limits on the use of force between states; (3) the difference between armed conflict and law enforcement matters; (4) rules regulating the conduct of fighters during an armed conflict; (5) human rights law, and; (6) the law of the sea. Domestic law topics include: (1) the general relationship between international law and the U.S. legal system; (2) the allocation of authority to use and limit the use of force under the U.S. Constitution; (3) domestic law regulating the conduct of armed hostilities, and; (4) domestic statutes regulating the use of the armed forces for domestic law enforcement and other emergencies. The final grade is determined by a take-home final exam, class preparation and participation, and contributions to in-class group work.

LAW 598 Appellate Advocacy Honors Program (2 Credit Hours)

The Appellate Advocacy Honors Program is the classroom component of Loyola's Moot Court Program. Students will learn effective appellate advocacy through lectures and workshops. Work completed in the classroom will not only prepare students for their competitions, but also strengthen written and oral advocacy skills for legal practice. This is a Skills and Comprehensive Simulation course.

LAW 599 Externship Intensive Field Placement (1-3 Credit Hours)

Externship - Intensive Field Placement - Chicago (1-3) Skills, Live Client Experience Students enrolled in the JD program who have completed all required first year courses may apply for an externship at an approved field placement site. Certain field placements may limit eligibility to students who have completed certain course work or who have obtained their Illinois Supreme Court Rule 711 license. Students in the externship program may earn 2 or 3 hours of non-graded credit for supervised work performed at an approved field placement site. Students participating in the externship program are also enrolled in a contemporaneous and competency based seminar course. The classroom component of the course has been designed to complement the legal work performed by the student in the field. The focus of the seminar course is on professional identity formation, professional skills, ethics, and cultural competence. The goal of the course is to assist students as they transition to the practice of law. There is no final examination in this course. This course is offered each semester. Externship: Intensive Field Placement - Washington, DC (2-3) Skills, Live Client Experience Students enrolled in the JD program who have completed all required first year courses may apply for an externship at an approved field placement site. Certain field placements may limit eligibility to students who have completed certain course work. Students in the externship program may earn 2 or 3 hours of non-graded credit for supervised work performed at an approved field placement site. Students participating in the externship program are also enrolled in a contemporaneous and competency based seminar course. The classroom component of the course has been designed to complement the legal work performed by the student in the field. The focus of the seminar course is on professional identity formation, professional skills, ethics, and cultural competence. The goal of the course is to prepare students who expect to practice law in the DC area with their transition to the practice. There is no final examination in this course. There is no final examination in this course. This course is offered only during the summer semester.

LAW 601 Child, Family, and the State (2 Credit Hours)

This course examines the legal relationships among children, families, and the state. Areas of law to be examined include child welfare, education, and juvenile justice. The course will explore Supreme Court jurisprudence on the issue of parental rights and family privacy as well as the doctrine of children's rights. Attention will be paid to the role of race, gender, and class and their intersection in shaping the ways in which children and families interface with governmental systems. Students in the course will be asked to grapple with critiques of governmental systems impacting children and families, explore calls to reconstruct and reconstitute these systems, and examine the role of lawyers working from within and outside these systems.

LAW 602 ChildLaw Trial Practice (Intensive) (3 Credit Hours)

This is Trial Practice I with an emphasis on those issues important to advocacy in cases involving children. The course is taught by a team of lawyers and judges experienced in child advocacy, with a student/faculty ratio of no more than 8 to 1. The principal objective is to introduce students to litigation principles, and to teach them advocacy skills in an intensive learn-by-doing environment. The case files from which exercises are drawn also enable students to prepare for the special challenges involved in the representation of children (child witnesses, unique problems in expert testimony, special evidentiary issues, etc.). At the end of the course each student conducts a complete trial before a mock jury at the Daley Center. Evidence is a prerequisite and the course requires instructor permission. This is a Skills and Experiential Learning course.

LAW 603 Interdisciplinary Seminar on Domestic Violence (3 Credit Hours)

This seminar explores issues of family violence, with an emphasis on domestic violence, through an interdisciplinary lens. An overview of the laws, public policy, and psychosocial approaches and trends addressing family violence issues. The course seeks to provide an opportunity for students in different disciplines to learn about the theories, philosophies, ethics, and practices of the range of professions that must confront family violence issues, and the impact of decision making in one forum on the practices and decisions made in another forum. Student are challenged to consider the strengths and weakness of the responses of various disciplines, and their interaction. Students that are interested in a live-client experience working at the Domestic Violence Legal Clinic should enroll in the Domestic Violence Practicum (LAW 215) class instead of this seminar.

LAW 606 Legislation and Policy Clinic (2-4 Credit Hours)

The ChildLaw Legislation and Policy Clinic is part of the Civitas ChildLaw Center. Students in this Clinic have an opportunity to work, under the supervision of a faculty member, on a legislative or policy project that may involve any or all of the following: critiquing pending bills or existing legislation, drafting bills, developing summaries and fact sheets about pending bills, and building and working with coalitions to develop legislative ideas and consensus. Topics cover a range of child and family issues. Spring semester students primarily work on projects begun during the Fall Clinic, including researching and drafting legislation concerning child protection and juvenile justice reform issues. Students work in teams and must have sufficient time or flexibility during the work day to participate in some internal team meetings as well as attend meetings outside the Law School, as needed. (Instructor permission required.)

LAW 608 Juvenile Justice (2 Credit Hours)

In this course, we will explore legal and policy questions centered on how society should respond to children, adolescents and youth adults who commit crimes. To what degree should developmental differences between youth and adults be reflected in law and policy? Are legislators or individual judges in the best position to decide how to meet the needs of youthful offenders while at the same time protecting the interests of victims and the larger community? What responsibility do parents and communities bear in providing children and opportunity to change their behavior? How should the justice system interact with other systems, including education, mental health and child welfare? Summative assessment in the course will be measured by student performance on a midterm exam and a final paper, together with exemplary preparation, attendance and participation.

LAW 610 Intl Children's Human Rights (1-2 Credit Hours)

In the last decade, children have become "the newest kids on the human rights block." This seminar examines new laws and treaties developed to respond to age-old problems faced by children around the world. The course begins with a study of the U.N. Convention on the Rights of the Child, the most rapidly and widely accepted human rights document in the history of international law. It then examines ways in which these laws are being implemented, including a review of child and family law cases decided by the European Court of Human Rights in Strasbourg. The course explores such substantive areas as the comparative treatment of child abuse and delinquency, and the issues of child labor, international abduction, the plight of child soldiers, and the sexual exploitation of children.

LAW 613 ChildLaw Fellows Seminar (1 Credit Hour)

This seminar serves as a capstone opportunity for ChildLaw Fellows to contextualize their interdisciplinary legal education and to explore their roles as advocates in working in and reforming the complex and evolving systems that affect children and their families.

LAW 615 Child and Family Law Mediation (2 Credit Hours)

This course will explore the use of mediation in disputes involving children and families. Students will survey various models and uses of mediation and related dispute resolution processes in the following contexts: divorce, custody and visitation issues; child protection; juvenile delinquency; balanced and restorative justice; adult guardianships; youth violence prevention and peer mediation; and special education. Further, students will consider the impact of domestic violence and other impairments on the child and family mediation process. In addition to reviewing basic mediation skills, students will participate in classroom exercises designed to develop their ability to think critically about issues, as well as apply mediation strategies to dispute resolution scenarios. This is an Experiential Learning course.

LAW 617 Policy Practicum: Issues in Childlaw (1-3 Credit Hours)

Instructor Permission Required

LAW 620 Childlaw Clinic (1-4 Credit Hours)

The Civitas ChildLaw Clinic represents children in a variety of settings including child protection (abuse and neglect), family separation (custody and visitation), education, and other kinds of cases involving children and youth. Students typically work on at least two cases during the course of a semester, under the supervision of at least one member of the Clinic faculty. The Clinic also includes a weekly seminar that addresses relevant substantive law, advocacy skills, and ethical issues in the representation of children. Students will learn about the law governing their areas of practice and gain experience with a range of lawyering skills, including client interviewing and counseling, case planning, and written and oral advocacy. While the subject matter of the Clinic's cases focuses on children's issues, students should expect to develop skills transferrable to any practice setting. The course is open to all students eligible for a student practice license under Illinois Supreme Court Rule 711, and no prior experience in working with children is required. Instructor permission is required for enrollment, and the application for the course can be found here: https://www.luc.edu/media/lucedu/law/experiential/pdfs/childlaw-clinicapplication_fillable.pdf. Professor Bruce Boyer (bboyer@luc.edu) serves as the Clinic Director, and Professor Stacey Platt (splatt@luc.edu) serves as Associate Director. Students receive four credits for their first semester enrolled in the course; students repeating the Clinic for a second semester receive three credits, with other credit options available with permission of the instructor. This is a Skills and Live Client Experience course.

LAW 623 Advanced Domestic Relations Law Practicum (4 Credit Hours)

This is a selective enrollment year long course that is made up of three primary components: (1) teach students the practical application of the Illinois Marriage and Dissolution of Marriage Act and related statutes, (2) provide students with the opportunity to assist pro se litigants in Cook County Courtrooms, and (3) allow students the opportunity to prepare a proposal to make the process more efficient for litigants by building on the success of an existing process. In the Fall portion of the course, students will have three credit hours of classroom instruction focusing on the practice of family law. In the Fall students will also have the equivalent of one hour per week of Courtroom observations. In the Spring portion of the course, the hours will flip. Students will have one hour per week of classroom instruction which will focus on addressing any difficult issues the students are facing in the Courtroom portion of the class as well as guiding the improvement project. Students will also have three hours per week of Courtroom time assisting Pro Se litigants and applying the knowledge from the Fall Semester. General course topics will focus on developing the skills necessary to excel in domestic relations courtrooms such as strategic planning for a dissolution of marriage case, complex financial analysis, developing and maintaining the attorney client relationship, practical drafting skills, and negotiation skills. THIS COUNTS FOR 1 CREDIT OF EXPERIENTIAL OR SKILLS.

LAW 624 Advanced Domestic Relations Law Practicum II (1-3 Credit Hours)

Pre-requisites: Advanced Domestic Relations Law Practicum I This is an Experiential Learning and Skills course

This course is a continuation of Practicum I. In this semester students will work directly with domestic relations judges and with pro se litigants to resolve contested divorce matters.

LAW 625 Mediation Workshop (1 Credit Hour)

Mediation is an alternative to litigation which enables disputing parties to negotiate their own agreed settlement. It involves an impartial third party neutral, the mediator, who assists disputing parties in this alternative dispute resolution (ADR) process. This course will offer an overview of mediation techniques, applications, and history. Through simulations and other in-class exercises, students will consider how mediation differs from other types of ADR processes, how mediation styles and models differ from one another, and how the role of the attorney-advocate changes during mediation. This course will be conducted in an intensive workshop format over the course of one weekend where students will role play as client and attorney. No textbook is required, nor is there a first assignment. This is a Skills and Experiential Learning course.

LAW 626 Mediation Practicum (1-2 Credit Hours)

This mediation course allows students to mediate family cases through several community projects. Students are required to have participated in some type of 40-hour mediation training in order to register for this course. These students receive additional training in family mediation, co-mediation and related issues. Students mediate in family group conferences and other multiple party mediations. Students participate in multiple simulation and mediations and receive feedback on their skills. The course meets once a week for the two hours for most of the semester, however students are also required to mediate at other times during the semester. There is no examination. Grading is based on participation in mediations, simulations and discussions and self-evaluations. Students may take the course for 1 or 2 credits. For 2 credits, a paper on mediation theory or practice is required. Where the student is taking the course for 2 credits, the research paper is included in the grade. Enrollment is limited to eight students.

LAW 631 ChildLaw Graduate Extern (1-3 Credit Hours)

Students seeking credit for successful completion of an experiential learning opportunity (externship) may register for up to 3 credits. Students are responsible for securing an externship placement that focuses on issues impacting children and families. Prior to accepting the placement, a student must receive prior approval from the Academic Director of Child and Family Law Programs. Students must commit to work 60 hours per credit at the approved internship site. At the end of the externship, students must submit a short paper describing the nature of the work performed and how the externship experience advanced their understanding of child and family law.

LAW 641 Childlaw Directed Study (1-3 Credit Hours)

Students have the option of working individually on a research project with a faculty member on a credit/no credit basis. An interested student must first identify a faculty member willing to supervise the project and submit an abstract of proposed work to the faculty member. The project must relate to issues of child and/or family law. If the faculty member agrees to supervise the project for the requested credit hours, he or she will work with the student to develop a supervision schedule to ensure successful completion of the project.

LAW 643 Children's Legal Rights Executive Journal Editor (1-3 Credit Hours)

The Children's Legal Rights Journal ("CLRJ") is a legal journal published by law students at Loyola University Chicago School of Law in cooperation with the National Association of Counsel for Children. Members of the CLRJ staff review, select, and edit articles prepared and submitted by authors from multiple disciplines - including law, social work, and psychology - focused on legal and adjacent issues related to children's care and empowerment. All new staff must also write a short feature article that is published in either the fall or spring issue as well as a long-form student article which may be selected for publication in the spring. The CLRJ staff hosts a yearly symposium on child law issues, with presentations by nationally recognized experts. Students are invited for membership on the CLRJ Staff after their first year of law school based upon an application and entry in a writing competition. The course is graded on a pass/fail basis.

LAW 644 Chldrn Leg Rights Jnl Assoc Editors (1-3 Credit Hours)

The Children's Legal Rights Journal ("CLRJ") is a legal journal published by law students at Loyola University Chicago School of Law in cooperation with the National Association of Counsel for Children. Members of the CLRJ staff review, select, and edit articles prepared and submitted by authors from multiple disciplines - including law, social work, and psychology - focused on legal and adjacent issues related to children's care and empowerment. All new staff must also write a short feature article that is published in either the fall or spring issue as well as a long-form student article which may be selected for publication in the spring. The CLRJ staff hosts a yearly symposium on child law issues, with presentations by nationally recognized experts. Students are invited for membership on the CLRJ Staff after their first year of law school based upon an application and entry in a writing competition. The course is graded on a pass/fail basis.

LAW 645 Children's Legal Rights Journal Senior Editors (1-2 Credit Hours)

The Children's Legal Rights Journal ("CLRJ") is a legal journal published by law students at Loyola University Chicago School of Law in cooperation with the National Association of Counsel for Children. Members of the CLRJ staff review, select, and edit articles prepared and submitted by authors from multiple disciplines - including law, social work, and psychology - focused on legal and adjacent issues related to children's care and empowerment. All new staff must also write a short feature article that is published in either the fall or spring issue as well as a long-form student article which may be selected for publication in the spring. The CLRJ staff hosts a yearly symposium on child law issues, with presentations by nationally recognized experts. Students are invited for membership on the CLRJ Staff after their first year of law school based upon an application and entry in a writing competition. The course is graded on a pass/fail basis.

LAW 651 LL.M. Childlaw Paper (3 Credit Hours)

Students enrolled in the Child and Family Law LLM degree program must enroll in this course in order to graduate. Working with a thesis supervisor, students have the option of completing a research paper of publishable quality. Students and their supervisor work together to agree on a topic and supervision schedule.

LAW 652 LL.M. Paper Completion-Childlaw (1 Credit Hour)

Students who are unable to complete their thesis in the LLM ChildLaw Paper course in a timely manner must enroll in this course. Depending on the status of research and writing completed during the LLM ChildLaw Paper course, the faculty supervisor will, in consultation with the student, agree on the required number of credits needed for successful completion of the course requirement.

LAW 654 Current Issues in Children's Law Seminar (2 Credit Hours)

This interdisciplinary seminar is designed to give students an opportunity to engage in an in-depth exploration of current and emerging issues in children's law. The seminar will focus on the legal implications of current child welfare policy and practice, ongoing efforts at child welfare and juvenile justice reform through state and federal initiatives, the use of empirical research in guiding child welfare and juvenile justice initiatives, and long term implications for families and children. Specific topics include, among others, an introduction to the concept of therapeutic jurisprudence, advocacy for children in the child welfare and juvenile justice systems, the role of race and class in permanency planning for children, the legal and ethical implications of privatized child welfare services, and ancillary domestic relations issues that often arise within child welfare.

LAW 663 Children's Summer Institute (3 Credit Hours)

The focus of this year's class is on the safety nets in place - and needed - to support children and families and prevent entry into our child welfare and juvenile justice systems. Over the course of the week, students from different graduate programs will engage in an interdisciplinary exploration of a series of complex questions involving children's best interests, and the policy and practice considerations and challenges impacting government decision making when it comes to reimagining our current structures. Instructor Permission Required

LAW 664 Special Education Law (2 Credit Hours)

This course primarily covers the law of special education provided in the Individuals with Disabilities Education Act. ("IDEA"). Additionally, the course will also cover specific laws that are relevant to special education such as the Americans with Disability Act, Federal and State educational records statutes and mental health and privacy laws. A primary emphasis of the class will be to teach students about the process under which students are identified as eligible for special education services and provided with educational services under Individualized Education Plans ("IEPs"). The class will focus on the following topics: special education case law, legislation, and regulations; utilizing evaluations, tests and measurements in determining eligibility in special education, and in the preparation of Individualized Educational Programs and Section 504 Plans; issues of juvenile justice; behavior and discipline for students with disabilities; negation and dispute resolution strategies and options; due process hearings; and current challenges in this evolving area of law. Students are required to attend class. Participation is a critical element of the class experience and will be a portion of the student's grade. Additionally students will be required to write one ten page paper on a topic approved by the instructor and participate in teams to develop IEP's.

LAW 665 Introduction to the Study of Law and Legal Systems (2 Credit Hours)

This required foundational course introduces students to the sources and functions of law in our society. The course begins with an explanation of the structure and traditions of the American court system. Students then learn to read and analyze cases and statutes and develop basic legal written and oral presentation skills. The course uses child and family law cases and problems and provides students with the background they will need for future children's law and policy studies.

LAW 667 Introduction to Children's Law , Policy and Practice (2 Credit Hours)

Pre-requisites: Introduction to the Study of Law and Legal Systems This required course is designed to give students an introductory overview of the law as it affects children

It begins with a discussion of the constitutional relationship among children, parents and the state, as well as the respective roles of the federal and state governments in the regulation of children and families. The course then introduces students to the principal areas of civil and criminal law that affect children and families. With this baseline of understanding, students can choose elective courses that provide a more in-depth study of a particular topic (e.g. education law, child welfare, etc.)

LAW 668 Leadership Development (4 Credit Hours)

One of the distinguishing features of the Online MJ in Children's Law and Policy is its focus on the development of leadership skills for child advocates across a range of disciplines and organizations. This required cornerstone course begins with an introduction to different types and styles of leadership before turning to a more practice-based preparation for leadership in such areas as operations, human resources, finance, and communications.

LAW 669 Education Law and Policy (3 Credit Hours)

Pre-requisites: LAW 665, 667 & 668

This course explores some of the challenging legal and practical issues confronting education in America, including the uncertain boundaries between public and private education, the constitutional and statutory rights of students, including equal access and treatment, the increasingly fluid constitutional and statutory rights of teachers, and the structure of educational governance, including the role of the federal government, local control, school board powers and even strategic planning.

LAW 670 Child Welfare Law and Policy (2 Credit Hours)

Pre-requisites: Law 665, 667 and 668

This course focuses on federal and state legal and policy efforts to protect children from abuse, neglect and other forms of maltreatment. Topics include mandatory reporting laws, liability issues, the general structure and content of child protection laws, including permanency planning termination of parental rights. Students will explore the concept of the best interest of the child in a legal context and review laws and research aimed at promoting children's welfare.

LAW 671 Juvenile Justice Law and Policy (3 Credit Hours)

This course explores the law, policies and practices of the American juvenile justice system, past, present and future. The focus is on children who are in conflict with the law and those who, by virtue of their status as children, are subject to the jurisdiction of the juvenile court for engaging in conduct such as curfew violations, running away, and other forms of potentially harmful adolescent behavior. Among other issues, the course will examine how juvenile justice law and policy has been shaped by new research on adolescent development, including brain research.

LAW 672 Family Law and Policy (3 Credit Hours)

The focus of the course is on the rapidly changing legal, social, and scientific landscape of family law. The course covers traditional areas such as marriage formation and dissolution, support, child custody and the role of the child's attorney, as well as emerging areas such as same-sex marriage, collaborative law, and defacto and equitable parenthood.

LAW 673 Mental Health Law and Children (2 Credit Hours)

Mental health and substance abuse impacts everyone. According to the National Institute of Mental Health, in a given year approximately one quarter of adults in the United States are diagnosable for one or more mental illnesses. Additionally, one out of five children, either currently or at some point during their life, are diagnosed with a mental illness. Mental illness has a profound impact on children and families, including the legal response to these issues. Students will study the cases, statutes, and legal doctrines relating to the rights and inpatient/outpatient treatment of persons with mental illness or a developmental disability, with a special emphasis on children, youth, and parents and/or legal guardians. Topics covered include: informed consent to outpatient and inpatient treatment, admission/transfer/discharge, confidentiality of mental health records, litigation issues addressed by practitioners, and risk management strategies for mental health practitioners. This course will use cases and examples to compare and contrast application of the law and policies. *Pre-requisites:* LAW 665, LAW 667 and LAW 668

LAW 674 Law, Poverty and Public Benefits (2 Credit Hours)

According to the National Center for Children in Poverty, children are disproportionately impacted by poverty, especially children of color and immigrant children. These risks are greatest for children who experience poverty when they are young and/or experience deep and persistent poverty. This course concerns those areas of civil law which most affect low income children and families, including public benefits such as welfare, housing, education, and health care. Other systemic issues will be explored, such as wealth discrimination, use of legal remedies to promote social change, and the delivery of legal and other services to children.

LAW 675 Legislation and Law Reform (2 Credit Hours)

This course introduces students generally to the legislative process and more specifically to federal and state laws and policies that affect children and families. Students will have an opportunity to draft model legislation, critique existing or proposed legislation, and learn techniques for educating lawmakers and policies makers about children's needs and the importance of research and data in formulating child-centered and effective laws and policies.

LAW 676 Conflict Resolution in Child and Family Law (2 Credit Hours)

One of the newest trends in children's law is the effort to find ways to resolve disputes without resort to the adversary system. Examples include restorative justice initiatives in schools and the juvenile justice systems, collaborative decision-making in family law, and mediation in the health care and child protection contexts. In this course students learn about the various types of alternative dispute resolution (ADR) (e.g., mediation, negotiation, collaborative dissolution) through a series of case examples and practical exercises.

LAW 677 ChildLaw Thesis/Capstone (4 Credit Hours)

Students are expected to complete either a thesis or capstone project of substantial depth that explores a specific area of children's law and policy and that integrates subject matter and/or leadership skills learned in the M.J. curriculum. The project is completed in close cooperation with a faculty advisor. Students are required to present their thesis or capstone project to faculty and fellow students during their graduation (Educational Immersion) weekend.

LAW 678 International Children's Rights (2 Credit Hours)

Pre-requisites: Introduction to the Study of Law and Legal Systems; Introduction to Children's Law and Policy; and Leadership Development
No course description is available

LAW 679 Children's Health Law and Policy (2 Credit Hours)

Pre-requisites: LAW 665, LAW 667 & LAW 668

The purpose of this course is to teach interested students the application of law to critical public health issues that affect children and youth. Students will first learn basic principles of public health including the distinction between health promotion, disease prevention, and health protection. Next, the course will address the constitutional and statutory foundation of public health law, how legislative and regulatory decisions must negotiate the balance between individual rights and public good, and how the principles of parents patriae and state police powers affect child health. Cases studies in the areas of obesity, reproductive health rights of minors, mandatory school immunizations, student drug testing, and violence prevention will illustrate the application of public health jurisprudence from the national to the state levels.

LAW 680 ChildLaw MJ Independent Study (1-4 Credit Hours)

The student will be engaged in research and in initiating the development of a curriculum targeted to a teen audience that educates teens about local and federal laws that have an impact on their lives as adolescents, including juvenile justice issues, mental health laws, custody issues, drinking and driving. The student has been working with adolescents on psychological issues as part of her field placement for the Masters of Social Work degree. This course will allow her to broaden that focus to include legal considerations that play an important role in helping teens who will soon be emancipated and facing lives as adults. The first part of the course will require the student to identify the specific issues and laws that will be included in the curriculum and to explore resources, both in law journals and in interviews with teaching faculty, that will inform her presentation of the issues. The second part of the course will be devoted to developing the format for the curriculum that will be most effective in reaching this media savvy audience. The format will be informed by the student's knowledge from the field of social work of the psychological development of adolescents and their needs, supported by current research. The goal of the course is to begin a project which will be fully completed at the end of the thesis capstone course in the Master's in Jurisprudence Degree. *Pre-requisites:* LAW 665, LAW 667, LAW 668 Research paper/project to be approved by a ChildLaw faculty member and Director before enrolling.

LAW 681 Child Law Seminar Series (1 Credit Hour)

The course will run 14 weeks, with seven live lectures and seven weeks of assigned readings to introduce you to each live lecture topic. There is one Module for each topic. Each lecture will be presented by different legal experts and scholars on emerging topics in child and family law. Students will be expected to participate either in every live class or to listen to the archive if synchronous attendance is not possible. Students will be asked to write a 3-5 page (double spaced) reflective paper at the end of the term choosing from ONE of the lecture topics. The paper should describe how the lecture enlarged or changed the student's understanding of the topic, or in the alternative, how it influenced or changed your professional practice in child advocacy or in related fields.

LAW 682 Education Immersion Weekend Seminar (ChildLaw) (2 Credit Hours)

In addition to the required curriculum, students are required to travel to Loyola's Chicago campus at least once during their tenure in the program for an Education Immersion Weekend (EIW). During the weekend, students gather in person to workshop or present their thesis/capstone project, attend experiential learning workshops, and meet with faculty, students and alumni.

LAW 683 Legal Issues in School Discipline (2 Credit Hours)

The course will address the Constitutional implications of student discipline and the statutory provisions governing student discipline and the administrative hearing process. Students will learn about 'zero tolerance' policies, the role that school discipline plays in the 'school-to-prison pipeline' and the discriminatory impact of school discipline policies. Issues relating to discipline in charter schools and discipline of students with disabilities will also be addressed. Other topics to be discussed include disciplinary-related challenges that arise in the context of protecting vulnerable children, including issues of harassment and bullying of LGBT students and students with disabilities, and the legal tenets governing school districts; responses to cyberbullying and the rise of social networks and digital media. Emerging trends in alternatives to punitive school discipline practices, such as human rights approaches, positive behavior interventions and supports, and restorative justice, will be examined.

Course equivalencies: X-CIEP 620/LAW 683

LAW 684 System Consultation in School Discipline Reform (2 Credit Hours)

The purpose of this course is to integrate and apply two interrelated broad literature bases within the field of education: (1) system change and data analysis literature informing best practices in analyzing system school data and needs assessment findings and using the findings to plan for system level discipline change; and (2) best practices in the school leadership and teaming to effect system level reform in school discipline. The focus of the course will be on the systems change process as it relates to the issue of school discipline. Through the course, students will gain skills and experience reviewing and analyzing school and district-level data, and they will develop and administer a needs assessment tool relating to school discipline and multi-tiered systems of support in their respective settings. They will also analyze system level variables, which have historically prevented true discipline reform (e.g., unreliable data collection systems, poorly structured teaming, access to systematic and ongoing professional development and technical assistance and rooted beliefs and biases).

Course equivalencies: LAW 684 / CIEP 535

LAW 685 Restorative Justice (2 Credit Hours)

This course begins with an intensive in-person weekend retreat where students will build relationships with each other and, through experiential exercises and lively discussion, internalize core principles. Throughout the retreat and course, students compare and contrast restorative and retributive justice models, practice proactive and responsive restorative techniques, and identify personal and professional shifts to exemplify a restorative mindset. Specific restorative techniques which students will learn include restorative language, facilitation of a variety of types of circles, restorative dialogue processes, and systems and structures to accommodate restorative practice within school life. Through additional seminars, students will strengthen their knowledge of the history, theory, research, and practice of restorative justice. The culminating focus of the course invites students to apply restorative principles and practices in their own school or district setting.

LAW 686 School Discipline Reform: Linking Law, Policy and Practice (2 Credit Hours)

Pre-requisites: LAW 683 (Legal Issues in School Discipline) and LAW 684 (System Consultation in School Discipline Reform)

This course will serve as the capstone for the certificate. It will examine in-depth three to four major themes in the field of school discipline from the perspectives of law, policy and practice. The focus will be on analyzing "best practice" examples as a means to address the challenges relating to fundamental reform of school discipline practices. Potential themes to be addressed include: (1) racial inequities in school discipline; (2) the interlinkages between special education and school discipline; (3) the relationship between the school and the juvenile/criminal justice system; and (4) professional development to support teachers and other school stakeholders. As part of this course, participants will develop an action plan for school discipline reform in their respective settings. They will determine how potential system-wide barriers will be addressed (e.g., resources for teaming, support for MTSS planning, implementation and evaluation, teaming, leadership/administrative support, teacher buy-in and support, community engagement).

Course equivalencies: CIEP 537 / LAW 686

LAW 687 Introduction to Legislative and Policy Advocacy (3 Credit Hours)

The purpose of this course is to provide tools and strategies for students interested in learning the techniques for effective advocacy at the state and federal levels. The first portion of the course will provide historical context on the three branches of governments; ability to make policy. The course will then examine the processes that turn a problem into a legislative solution, including how to move a bill into law. These tools include identifying an issue, conducting national surveys, building a base through community organizing, drafting, lobbying, and offering testimony in committee. A recurring theme in the course is the need to examine external obstacles that impact policy making. Students will also learn how to conduct racial equity impact assessments and how the absence of this work has impacted policy decisions in the United States in the past.

LAW 688 International Family Law (1 Credit Hour)

This one-credit class serves as an introduction to international and comparative family law. Over the course of the class, students will examine selected international and regional instruments as well as domestic laws governing private family matters. Topics include marriage, dissolution of marriage, family formation, child custody, domestic violence, international adoption, and the intersection between immigration and family law.

LAW 689 Family Law (3 Credit Hours)

This 3-credit elective course in family law specifically designed for post J.D. students provides an overview of the laws and court decisions in the United States that have shaped family life and the institutions of marriage and parenthood, with a special emphasis on the role of the legal system as it affects children's rights and welfare within these institutions. With a base line understanding of the general principles of constitutional law in family law cases, students then turn to an exploration of thematic topics, including evolving standards for child custody and the factors in custody decisions, including race, religion and domestic violence and the formation of multiple-parent families and child custody. We also explore corporal punishment and other parental decisions of child rearing, including emerging issues of children's privacy in the age of social media and the increasing recognition in family law of children's rights to be heard in decisions affecting their welfare.

LAW 690 Financial Aspects of Divorce (3 Credit Hours)

The Financial Aspects of Divorce is a 3 credit course designed for students practicing in the area of family law that will cover what a practitioner needs to know from both theoretical and pragmatic perspectives. The course will explore the historical background of divorce law and the jurisdictional limitations on resolving financial issues in divorce litigation. We will study the establishment, modification and enforcement of child support and spousal maintenance obligations. We will examine numerous aspects of property distribution, including determining the marital or nonmarital character of property, equitable distribution of marital property, valuation and treatment of specific types of property such as real estate, retirement accounts and business interests, and dissipation of marital assets. The course will also include discussions of financial discovery and awards of attorneys fees in divorce litigation.

LAW 691 Domestic Violence: Theories, Policies and Societal Impact (3 Credit Hours)

Domestic Violence (Theory, Policies and Societal Impact) will provide students with an understanding of the evolution of domestic violence theory; an overview of what acts constitute domestic violence; myths surrounding the causes of domestic violence; common misconceptions regarding the types of people who abuse and are abused; the various state and federal laws that affect domestic violence arrests, police liability, prosecution, and services; and the impact of domestic violence in family law, child welfare, and immigration proceedings. Through weekly modules incorporating readings, lectures, videos and supplemental materials, students will become familiar with the many components (social and legal) of this complex subject.

LAW 692 Special Education Law and Advocacy (2 Credit Hours)

This online course will deal in depth with current and timely issues in the education of children with disabilities. Students will learn federal and State statutory and regulatory procedures in determining eligibility for services, evaluation, development of the individualized education program, and provision of services in the least restrictive environment. The education of special needs children from early childhood through post-secondary transition will be addressed. The course will focus on advocacy, statutory and regulatory compliance, and dispute resolution. Students will form teams assuming the roles of parent/student advocate, school administrators, and school service providers in a variety of simulated activities throughout the semester, including: participation in eligibility and IEP conferences; disciplinary manifestation determination reviews; resolution sessions, mediation, and pre-hearing due process procedures; and determining Section 504 eligibility and developing and implementing a Section 504 service plan.

LAW 706 Advanced Care Planning and Client Counseling (3 Credit Hours)

This capstone course focuses on the legal and practical challenges relating to the provision of health care at the end of life, with a particular emphasis on patients' authority to direct treatment once they are no longer able to communicate their own wishes directly. Students will learn the substantive law of patient rights and advance care planning, work with physicians to understand ethical challenges in end-of-life care, engage in client representation for patients living with HIV/AIDS, and develop model policies for an Illinois healthcare institution. The legal skills practiced in this course are transferrable to the practice of law in any setting. This is a Skills and Experiential Learning course. Students must be eligible for a 711 license to participate.

LAW 707 Health Law Writing Competition (1 Credit Hour)

Working closely with a supervising faculty member, each student will write a 20-30 page independent research paper for submission to a national student writing competition in health law. Papers may be on any topic related to health law or policy.

LAW 709 Health Care Disparities (2 Credit Hours)

Health care disparities is a capstone course that will focus on three major topics in this broad area of public health, providing students with the opportunity to plan and execute projects that will require the drafting of a white paper and a community needs assessment and implementation plan, as well conducting interviews of key thought leaders. Topics for the 2015 course include responding to the medical needs of veterans in the light of the crisis in the Veterans Administration, addressing teenage pregnancy in Latino populations, and crafting innovative approaches to the growing need for community mental health programs. Classes will be discussion based and various group presentations will be integrated into class sessions as well. The course will stress a variety of legal and public policy approaches to the issues at hand.

Course equivalencies: LAW 609 / LAW 709

LAW 710 Health Law: Patients and Populations (3 Credit Hours)

This course provides a broad survey of the most fundamental legal issues surrounding the delivery of health care in America. No prior knowledge of health law is required. Major topics include state and federal regulation of health care providers and institutions; tort liability in the context of medical care; patient and provider rights and obligations; public and private insurance systems; and basic issues in bioethics and public health. By the end of this course, students should understand both the current state of American health law, and the social forces that have shaped its historical development.

LAW 711 Corporate Transactions in Health Law (2-3 Credit Hours)

This course addresses key corporate and regulatory concepts impacting the delivery of health care. The course focus will be transactional, with students first gaining an understanding of basic corporate law and regulatory principles, and then learning to integrate core federal and state laws into choice and use of corporate structures and operational strategies. The course will examine health care transactions from the perspectives of a hospital, physicians and other providers. It is recommended that students take Health Law: Business & Finance and Business Organizations prior to taking this course.

LAW 713 Health Law Directed Study (1-3 Credit Hours)

Pre-requisites: none

Open to: LLM, MJ, SJD, and DLaw students. LLM, MJ, SJD, and DLaw students may earn credit for participation in a targeted research tutorial. The scope and subject are chosen with the guidance of a faculty member who directs the students. (JD students can research in the health law field, but must register for the JD Directed Study.) This is a Non-Graded Course.

LAW 714 Health Law Graduate Externship (1-3 Credit Hours)

Open to: LLM students enrolled in campus courses. Students enrolled in the LLM in Health Law degree program may earn externship credit for working at an approved health law externship site. This program is designed to offer students practical experience to further develop lawyering skills and health law expertise. Students may receive up to three credits. This is a Non-Graded course.

LAW 715 Bioethics, Law & Policy (2-3 Credit Hours)

This course provides an overview of American law as it relates to emerging ethical issues in medicine and health care. It is intended to give students an appreciation of the ways in which medical practice and decision-making are guided by modern American principles of constitutional, tort, administrative, and criminal law. Students will learn how the law's regulatory powers have been used to set boundaries in medicine, and, in turn, how theories of medical ethics and practice have informed modern legal developments. Topics covered vary from year to year, but may include issues in end-of-life care, research ethics, reproductive autonomy, distributive justice, and genetic technology. This course counts as a Perspective Elective course.

LAW 717 Mental Health Law (2 Credit Hours)

This course introduces students to the cases, statutes, and legal doctrines relating to the rights, treatment, and commitment of persons with mental illness, developmental disabilities, or intellectual disabilities. Topics covered include: confidentiality of mental health records, forms of surrogate decision-makers (i.e. guardianship, powers of attorney), mental health treatment for minors, right to refuse treatment, special education, and the Americans with Disabilities Act (ADA). Students will discuss real-life cases and examples to compare and contrast application of the law and policies.

LAW 718 Food and Drug Law (3 Credit Hours)

This course provides an overview of the regulation of a variety of health care and medical products overseen by the Food & Drug Administration, including foods, dietary supplements, pharmaceuticals, medical devices, and tobacco products. The course will explore topics regarding premarket research and development, clinical trials, review and approval, and post-marketing monitoring and reporting. Legal concepts of agency rulemaking, products liability, commercial free speech, human subjects research, state regulation and preemption, civil and criminal remedies, and enforcement mechanisms will also be explored. A science background is not required for this course.

LAW 719 Health Care Labor Law Sem (1 Credit Hour)

This course serves as an introduction to labor and employment in the health care industry. Topics covered will include union representation, supervisory status, harassment and discrimination, independent contract relationships, employment at will, and wage and hour standards.

LAW 720 Health Care Payment and Policy (2 Credit Hours)

Health Care Payment and Policy is a course which focuses on the roles of payers, purchasers, providers and consumers in the shifting arena of health care coverage. Throughout the course, we will consider the Affordable Care Act and the regulations implemented over the past decade to implement that law and set in motion the health care industry's move to value-based care. The first part of the course will explore the development of health insurance, the growth of managed care models and the role of employers in shaping health benefits. The second portion of the course will explore the evolution of Medicare and Medicaid. The final portion of the course will consider the ongoing transition to value-based care payment and delivery models. This will include an evaluation of new payment models such as Accountable Care Organizations and Patient Centered Medical Homes. Students will also examine value-based strategies that drive better quality outcomes, enhance patient experiences and lower health care costs, including those needed to improve health and wellness of individuals and address the social determinants of health across communities.

LAW 722 Health Care Innovation & Regulatory Compliance (1 Credit Hour)

The health care sector features rapid changes in technology, business models, patient needs, and payor requirements. Innovation can create potential risk under legal frameworks that were not designed with a modern health system in mind. While it is important to identify these legal risks, clients often want lawyers to go a step further to design legally-compliant solutions to facilitate innovation. This course will help students learn practical skills to evaluate and manage legal risk for novel or developing health care concepts. These skills may include: evaluating exposure under anti-fraud laws like the Anti-Kickback Statue to scenarios where no safe harbor applies, understanding implications of different uses or transfers of Personal Health Information, understanding the role of coverage policies (Medicare, Medicaid, commercial), and evaluating FDA guidance concerning Software as a Medical Device. For example, students may be asked to write an Advisory Opinion request or other request for guidance from an applicable Federal or State agency regarding an innovative model, or a draft policy memo identifying applicable legal risks and potential.

LAW 723 Law and Public Health (2 Credit Hours)

This course explores the role of law and government regulation in the area of public health. The public health process (measurement, problem definition, strategy, design, implementation and evaluation) is explored in reference to current issues that are both timely and expositive of the ways in which law and regulation shape public health practice at the local, state, federal and international levels. Topical areas for analysis and discussion are drawn from the primary environments of public health; biological, physical, social, individual behavior, and national/international health systems. Students are required to work on group projects, and write a research paper.

LAW 725 Antitrust Health Care Field (1 Credit Hour)

This course will cover the full range of antitrust issues affecting the activities of all participants in the healthcare field, including different types of healthcare service providers (hospitals, physicians, and ancillary service providers), payors (government and commercial), and suppliers of products to providers and their patients. Following an introduction to the antitrust laws generally, the course will specifically address the competitive issues posed by mergers and joint ventures involving competing healthcare providers or payors, the formation and operation of provider networks (including Accountable Care Organizations) and managed care contracting, the activities of trade associations and group purchasing organizations, medical staff privileges and credentialing, single firm conduct, and specific statutory provisions (e.g., Robinson-Patman Act), exemptions and immunities.

LAW 726 Health Law Competition Team (1 Credit Hour)

This course is to be taken by students selected to compete on Loyola's health law competition teams. A JD student representing Loyola at either the L. Edward Bryant, Jr. National Health Law Competition OR at the Maryland Health Law Regulatory & Compliance Competition may register for one ungraded credit. This course will count for skills credit.

LAW 727 Annals of Health Law Executive Editors (1-3 Credit Hours)

Pre-requisites: none

Open to: JD students by permission only. Annals of Health Law Executive Editors are solely responsible for the management of the entire process of publication of the Annals, including selecting the staff, communicating with authors, and performing final edits on all articles before publication. Additionally, Executive Editors oversee the planning of the annual symposium, maintain the website, and work on other special projects. These selected positions require immense dedication and responsibility. Executive Editors must possess superior legal knowledge and editing/writing skills. Additionally, the abilities to manage, delegate and supervise others are essential. This is a Non-Graded course.

LAW 729 Health Care Litigation and Medical Malpractice (2 Credit Hours)

This course will cover key areas of health care litigation. Students will explore the substantive and procedural law of medical negligence litigation and learn about pretrial matters such as drafting pleadings, motions and deposing experts. Students will have the opportunity to develop trial techniques including preparing direct and cross examinations. They will also be able to participate in a medical negligence mock trial. Additional topics will include compliance and internal investigations, licensing procedures, technology litigation, managed care litigation, and ERISA preemption. This is a Skills course.

LAW 730 Health Justice Policy Practicum (2-3 Credit Hours)

Government Health Policy is a two-credit seminar course that focuses on background and current perspectives concerning key health regulatory matters dealt with by government authorities. Broad considerations involving access to service, cost containment and quality improvement will serve as foundational themes in exploring legal and policy matters, from both a domestic and international perspective. While an array of subjects impacting health delivery will be covered, special emphases will be placed on public and private health insurance policy and regulation. There is no text for the course but a series of readings from current literature will be required. Students' grades will be based on three papers and presentations.

LAW 731 Medicare and the Affordable Care Act (1 Credit Hour)

The U.S. Medicare program is a health insurance program for the aged, severely disabled and people with end stage renal disease. As a major federal entitlement program, the Medicare program raises a host of legal issues for beneficiaries of the Medicare program and the providers and suppliers who provide health care services to these beneficiaries. This course is a survey of the important legal issues that health lawyers are likely to face in representing Medicare beneficiaries, providers and suppliers. This course also provides an overview of how the Medicare program affects the regulation of health care organizations and professionals.

LAW 732 Health Care Fraud and Abuse (1 Credit Hour)

This course will examine the three major Federal laws governing healthcare fraud and abuse: the Stark law, the Anti-Kickback Statute, and the False Claims laws. Students will learn how to navigate through the complex maze of statutes and regulations. In addition, the public policy concerns which underlie each law will be discussed in great detail throughout the semester. The goal of the course is to equip the future lawyer with the tools necessary to properly identify healthcare fraud and abuse issues, and to effectively advise their clients on these issues.

LAW 733 Annals of Hlth Law Senior Editors (1-2 Credit Hours)*Pre-requisites:* none

Open to: JD students by permission only. Annals of Health Law Senior Editors prepare each article for publication. They generally supervise the editing work of Annals members. They manage and oversee the cite-checking process. This is a Non-Graded course.

LAW 734 Annals of Health Law Members (1 Credit Hour)*Pre-requisites:* none

Open to: JD students by permission only. The members of the Annals of Health Law are responsible for editing and cite-checking article submissions, including providing substantive recommendations. They generally assist the Senior Members with the preparation of articles for publication. Members must be organized, detail-oriented, and dedicated to their role in the Annals publication process. They must possess superior cite-checking and editing skills. Additionally, each member must write an article of publishable quality for Advance Directive, the Annals online counterpart. This is a Non-Graded course.

LAW 739 Health Information Privacy and Technology (1-2 Credit Hours)

This course covers the Health Insurance Portability and Accountability Act and the statutory and regulatory framework for the privacy and security of health information. Students will learn about the historical basis of privacy and global comparisons. Topics will include data privacy, security, oversight, and breaches of protected health information.

LAW 741 Health Law: Business and Finance (3 Credit Hours)

In a survey format, this course will introduce tenets of healthcare business, and how operations and business status introduce potential legal issues. In order to explore these issues, we will introduce the variety and types of healthcare businesses and organizations and their attendant financial operations, as well as the types of relationships and situations that give rise to potential lawsuits (including fiduciary trust relationships between physicians and patients and insurers and their customers, and the government and its citizens or residents).

LAW 742 Health Law LLM Thesis Project, Term 1 (2 Credit Hours)

LLM students are required to complete a written thesis, demonstrating scholarly research of an important legal issue. The thesis must be of a quality determined to be acceptable by the student's faculty advisor, reflecting mastery of the subject matter explored, critical thinking and clear, sophisticated writing. The thesis is completed over the course of two semesters in close cooperation with a faculty advisor. This first thesis course will focus on choosing a topic, creating a thesis statement, detailed outline, research methodology, introduction, and writing a partial draft. This course is for students in the campus LLM program.

LAW 745 Access to Health Care (2 Credit Hours)

Access to Health Care is a seven-week course exploring the legal, political, environmental, financial and medical issues surrounding access to health in the United States and internationally, with particular emphasis on people who are experiencing poverty and the uninsured. The course is complemented with a required spring break field study to an impoverished region in the United States or abroad.

LAW 749 Anti-Kickback Law and False Claims Act Seminar (1 Credit Hour)

This seminar will serve as an introduction to health care fraud and abuse, with a focus on the federal anti-kickback law and the False Claims Act.

LAW 750 Health Law LLM Thesis Project, Term 2 (2 Credit Hours)

LLM students are required to complete a written thesis, demonstrating scholarly research of an important legal issue. The thesis must be of a quality determined to be acceptable by the student's faculty advisor, reflecting mastery of the subject matter explored, critical thinking and clear, sophisticated writing. The thesis is completed over the course of two semesters in close cooperation with a faculty advisor. This second course will focus on completing and refining the thesis project, and presenting a thesis defense to faculty and fellow students. This course is for students in the campus LLM program.

LAW 751 LL.M. Paper Supervision (3 Credit Hours)

Open to: LLM students only with permission. LLM students who do not complete the LL.M. Paper within the requisite period of time must register for this class each semester until the paper has been accepted by the advisor. This is a Non-Graded course.

LAW 752 Comparative Health Law (1-2 Credit Hours)

This course explores the health care system and relevant laws of the host country in which it is being taught. Generally offered in China, the course will explore the evolution and development of the Chinese health system from the days of the bare foot doctor to the national health reforms initiated under President Hu, guaranteeing all Chinese citizens equal access to basic health insurance. The course will consider public health policies in China with a focus on infectious disease prevention and control integration of traditional medicine with Western medicine, birth control and family planning, environmental health, smoking, food safety and the impacts of aging on health. Comparisons will be drawn between China and other Asian countries as well the United States and Canada. This is a Perspective Elective course.

LAW 754 Health Justice Lab (3 Credit Hours)

This interprofessional and experiential course will bring together students from law, public health, and medicine to explore racism and its impact on health.

LAW 755 Health Justice Project (3-4 Credit Hours)

The Health Justice Project is a medical-legal partnership clinic that provides law students with an intensive, challenging education in the fundamentals of legal practice, interdisciplinary collaboration, creative upstream problem solving, poverty law, systemic advocacy, and professionalism. Through collaborative and holistic representation of vulnerable low-income families and individuals, student attorneys will address the social, legal and systemic barriers that prevent long-term health and stability. HJP student attorneys may handle cases in a variety of areas of law including public benefits, access to health care, disability, education, housing, family law, as well as other areas of law that impact client health and well-being. Enrollment in the Clinic requires a significant time commitment and flexibility in the student's schedule. Students are required to manage their own cases in teams of two, maintain client relationships, attend hearings and court appearances, collaborate with interdisciplinary partners, and tend to other client matters throughout the semester. Students must be available to participate in a mandatory orientation prior to the start of the semester. LAW 755-022 Student attorneys will address the health harming legal needs of vulnerable low-income families and individuals by conducting holistic client intake interviews with patients referred by HJPs health partners, issue spotting, engaging in legal research, identifying appropriate resources, and drafting intake memos and advice and referral letters to clients. Students may handle cases in a variety of areas of law including public benefits, access to health care, disability, education, housing, family law, as well as other areas of law that impact client health and well-being. Enrollment in the Clinic requires a significant time commitment and flexibility in the student's schedule. Students are required to manage their own intakes, collaborate with HJP partners, and be responsive to supervising attorneys.

LAW 756 Interdisciplinary Health Advocacy (2 Credit Hours)

This course is taken in conjunction with the Health Justice Project course and provides students with an opportunity to participate in an interdisciplinary team to address health problems of low-income patients. Students partner with medical residents and doctors to explore communication and ethical issues among disciplines and actively participate in precepting and grand rounds with medical and social work partners. (Permission is required.) This is a Skills and Experiential course.

LAW 757 Advanced Health Justice Project (2-4 Credit Hours)

Students who have successfully completed the Health Justice Project clinic may enroll in the Advanced Health Justice Project, in which they will continue to represent clients and complete projects to improve the health and well-being of vulnerable low income families and individuals in Chicago through holistic, collaborative, and systemic advocacy. Faculty permission required.

LAW 759 International Products Liability (2 Credit Hours)

This course will focus on international tort issues, including products liability, medical malpractice, and the role of torts in terrorism.

LAW 760 Disability Law (2 Credit Hours)

In this class we will explore the disability rights movement and the laws, including the ADA, the Fair Housing Act, and the Individuals with Disabilities Education Act, that inform and advance the movement. The class will also discuss the philosophy of disability rights theory that aims to transform societal thinking on disability away from a construct of charity and pity and toward a construct of power and civil rights. Taught by a disability rights attorney, the class will also feature a handful of guest lectures by other disability rights attorneys.

LAW 761 Health Justice Policy (3 Credit Hours)

Students who successfully complete Health Justice Project or Introduction to Health Justice are eligible to become advanced participants in the policy clinic. Students enrolled in the Advanced Health Justice Policy course may engage in policy work. Students will participate in bi-monthly supervisory meetings. (Permission is required.) This is a Skills and Experiential course.

LAW 764 Global Public Health Law (1 Credit Hour)

This course will explore mechanisms for global governance in the area of public health focusing on the roles of the United Nations, the World Health Organization, the World Bank and Global and regional trade organizations. Broad topical areas will be used as vehicles to coalesce individual sessions concentrating on health system development, infectious disease reporting and prevention, chronic illnesses, particularly obesity and diabetes, as well as global tobacco control. A focus of the course will be on the exploration of legal rights and policy development for migrant and indigenous populations. This is a Perspective Elective course.

LAW 765 Constitutional Issues in Health Law (2 Credit Hours)

The Supreme Court's recent decision upholding the major provisions of the Patient Protection and Affordable Care Act has brought new attention to the intersection between constitutional law and health care. This seminar gives students the opportunity to engage deeply with some of the most compelling constitutional issues of our time, including the use of federal spending powers to expand state Medicaid programs; the health insurance mandate as a regulation of interstate commerce; federalism conflicts in the medicalization of marijuana; medical providers' free speech rights; compelled commercial speech in the tobacco industry; religious objections to controversial medical procedures; cruel and unusual medical treatment of prisoners; as well as substantive due process challenges relating to public health, end of life care, and reproductive autonomy.

LAW 766 Advanced Health Justice Policy (2 Credit Hours)

Students who successfully complete Health Justice Project or Introduction to Health Justice are eligible to become advanced participants in the policy clinic. Students enrolled in the Advanced Health Justice Policy course may engage in policy work. Students will participate in bi-monthly supervisory meetings. This is a Skills and Experiential course.

LAW 768 Topics in Long Term Care (2 Credit Hours)

Provides students with an overview of key legal and policy issues in the diverse and growing field of long term care. In the context of the seminar long term care will be cast broadly as an area that deals with diverse populations that have profound and ongoing health/social needs including disabled populations and the elderly. While much of the course will focus on statutory and regulatory law, significant emphasis will be placed on evolving public policies in long term care that impact programmatic developments in quality assurance, insurance coverage and the regulation of institutional and community actors. Specific areas of focus will be selected for each term for review and analyses including diseases of aging, prevention of abuse and neglect, uses of telehealth, senior housing policy and end of life care. Materials from the United States, Canada, the EU and Japan will be referenced. Students will be required to write two memoranda and participate in a group project.

LAW 769 Health Justice Advocacy (3 Credit Hours)

The Health Justice Advocacy course is a live-client clinic that provides law students with an intensive, challenging education in the fundamentals of legal practice. Students practice and hone their ability to investigate facts, interview, issue spot, and advocate on behalf of a client. Students may address a variety of legal matters related to the client's health, including medical debt forgiveness, advance care planning, housing conditions and public benefits denials. Students also gain experience collaborating on an interprofessional level and an understanding of legal systems that affect poverty and health. This course is ideal for a student embarking on a public interest, social justice or health law career. This course is only open to 1Ls during the Spring as a Perspective Elective course. Faculty permission required for all other students during the spring.

LAW 770 Doctoral Dissertation Research I (2 Credit Hours)

Pre-requisites: none

Open to: SJD and DLaw students only. Candidates will be required to rework the doctoral proposal s/he submitted with his/her admission application into a 30-40 page summary paper which shall serve as a roadmap for the first draft of the dissertation. Students must also make a presentation on an aspect of their research to a group of doctoral students and advisors. This is a Non-Graded course.

LAW 772 Doctoral Dissertation Research II (2 Credit Hours)

Pre-requisites: Doctoral Dissertation Research I

Open to: SJD and DLaw students only. Candidates must draft a detailed dissertation outline, have it evaluated by his/her advisor, and incorporate any necessary changes into a final outline. Once the dissertation outline is approved, the first draft of the dissertation should be completed and submitted to the advisor. This is a Non-Graded course.

LAW 773 Doctoral Dissertation Supervision (0 Credit Hours)

Pre-requisites: Doctoral Dissertation Research I and II, Bibliography Tutorial

Open to: SJD and DLaw students only. The dissertation advisor will work with the candidate to form a doctoral committee comprised of the advisor and two outside readers. (In the case of foreign students, one outside reader may be sufficient.) The committee will assist the student by consulting on dissertation substantive issues, reviewing the working draft and approving the final product. Dissertations should represent important contributions to the field, (minimum length 150 pages and double spaced) but specific format and content needs to be clarified between the candidate, the advisor, and the committee. Once clarified, the suggested format must be followed. Once the dissertation has been completed, it must be presented at an open forum to be attended by interested members of the law school community. Students must enroll in this course during both fall and spring semesters of his/her second year. This is a Non-Graded course.

LAW 776 Law and the Life Sciences (2 Credit Hours)

This course will examine a variety of legal, policy, and ethical issues impacting advancements in the life sciences. Topics will be explored using an interdisciplinary approach, drawing upon a diverse set of reading materials. Topics to be covered include the intersection of law and science, genetics, stem cell research, biotechnology, nanotechnology, neuroscience, and synthetic biology. A science background is not necessary. The course is a 2-credit course with a final paper (8-10 pages) and presentation, including two short reaction essays during the semester. It will examine a variety of legal, policy, scientific, social, and ethical issues at the forefront of advancements in the life sciences. The course will take an interdisciplinary approach to examination of these issues, drawing upon a diverse set of reading materials spanning various legal fields such as food and drug law, antitrust law, consumer protection law, environmental law, intellectual property law, and bioethics. Topics to be covered include the intersection of law and science, human subjects research, wearable medical apps, genomics and genetic enhancement, nanotechnology and nanobiotechnology, neuroscience, and synthetic biology. The core focus of the course will be on exploration of these issues for purposes of developing solid academic legal research and writing.

LAW 777 Doctoral Dissertation Supervision and Completion (0 Credit Hours)

Pre-requisites: Doctoral Dissertation Research I and II, Bibliography Tutorial

The dissertation advisor will work with the candidate to form a doctoral committee comprised of the advisor and two outside readers. (In the case of foreign students, one outside reader may be sufficient.) The committee will assist the student by consulting on dissertation substantive issues and reviewing the working draft. Students must enroll in this course during the fall semester of his or her second year. Open to: S.J.D. and D.Law students only

LAW 778 Law and Science (3 Credit Hours)

This course will focus on the intersection of science and health care, with a focus on development of treatments, drugs, and devices and the trial and testing process.

LAW 779 Current Topics in Pandemic Law and Policy (2 Credit Hours)

This course examines the legal and ethical foundations of pandemic and emergency preparedness, intervention, and evaluation in the context of the ongoing SARS-CoV-2/COVID-19 pandemic. Using open-access resources developed by health law experts, students will study the pandemic from multi-doctrinal (e.g., constitutional, criminal, administrative, health, employment, privacy, and civil rights) perspectives.

LAW 780 Corporate Health Care Litigation (1 Credit Hour)

This course will cover key concepts in common areas of health care litigation with a focus on practical skills. Topics covered will include medical staff bylaws, medical staff disciplinary proceedings, state and federal qui tam actions, and medical restrictive covenants. In addition to learning the substantive law surrounding these types of litigation, students will also perform exercises, including oral arguments, in class.

LAW 793 Administrative Law and Health Care Regulation (2 Credit Hours)

Administrative Law (Law 221) is a pre-requisite.

LAW 797 Risk Management, Patient Safety & Quality (2 Credit Hours)

Students will utilize reading materials, case studies, hospital risk management scenarios and data sets provided in class to apply knowledge to specific RM and patient safety scenarios and to use critical thinking skills to solve problems. Through the readings and case study analysis students will learn to identify legal, ethical, administrative, compliance, risk management and patient safety issues and to reach resolutions for the problems presented, even when a clear legal response may not be available or in the best interests of the patient. We will be learning how to respond to a variety of risk management issues from the perspective of clinicians, lawyers, administrators, managers and patients and appreciate how events are perceived and managed. We will also discuss how these perceptions of key stakeholders are in conflict and how those conflicts can be managed. Finally, students will also learn how principles of risk management have changed since the 1998 IOM Report and how the changes in our current health care system will further challenge both patients and providers. This report called for increased focus on systemic failures and moving away from a culture of blame and shame to a culture of transparency and learning. With the passage of the ACA and not efforts to repeal and replace we will also discuss how risk management, safety and compliance are likely to further change as our health care delivery system evolves.

LAW 798 Health Care Compliance (2 Credit Hours)

This course is designed to expose law students to key legal concepts in the health care corporate compliance and ethics fields, which may be broadly defined as the application of internal corporate initiatives to ensure compliance with applicable federal and state laws and regulations. Health care is a highly regulated industry, and a health care attorney must have a broad understanding of compliance issues. Through readings and class discussion on common health law topics such as the Anti-kickback Statute, the Stark law, the False Claims Act and its whistleblower provisions, students will develop an understanding of the need for and the role of the Compliance Officer in a health care institution. Students also will begin to explore recent movement toward more broadly-based organizational integrity and ethics programs. Underlying course themes will include how to structure an effective compliance program and the role of government enforcement in controlling health care costs. Readings will derive from various sources. There is no required book. Case law, legislation, regulations, government reports and legal articles will be available on Sakai. As in any graduate-level course, thinking about and discussing the issues with an open and creative mind is actively encouraged.

LAW 799 Health Law Colloquium (2 Credit Hours)

This is a unique course offered once a year to a select group of students from Loyola and DePaul. Enrolled students read and discuss draft articles of nationally renowned professors in the field of health law. They must also write a three page memo (double spaced) with comments on the article that will be useful to the professor. The articles are typically draft law review articles. The discussions are focused on helping the professors to refine and improve their articles, such that a strong foundation of health law is expected, even though there is no official prerequisite. This course meets every week, but the students only meet in person roughly half the time, with the other half of the sessions done by videoconference. Three of the in-person classes will be at DePaul and the other three in-person classes will be at Loyola. Please be sure that your schedule allows you to arrive at either law school by 4 p.m. There is no final exam or research project required for this class. Instead, students are required to attend and actively participate in all classes and write comment memos as described above. Students must apply to the supervising professor at the law school they attend in order to be sure that they understand the nature of the course. Email the instructor to assure to arrange for this interview.

LAW 800 M.J. Introduction to Business & Law (3 Credit Hours)

This course is taken in the first semester of study to gain an overview of the structure and functioning of our legal system. The class introduces the basic law school curriculum from a business law perspective including: Constitutional Law; Contracts Law; Torts Law; Civil Procedure; Criminal Law; and, the UCC. Students are also introduced to legal analysis and reasoning, including how to read and analyze written judicial opinions and statutes. This course also provides an overview of the laws that affect businesses day-to-day including ethical business conduct policies, consumer protection, human resources and employment issues, real estate, intellectual property and corporate governance.

LAW 801 Introduction to Legal Studies and Legal Writing (4 Credit Hours)

This course introduces legal research methods and principles of legal writing in the first semester of the program. Through a series of exercises on relevant topics, students will refine their writing skills. By researching and writing on varied issues, students learn to apply legal research techniques. Students read and analyze legal authority and learn how to apply legal authorities to particular fact situations. Through a series of legal memoranda writing assignments, students develop their analytical and writing skills. Computerized research techniques are included in the course.

LAW 803 Business Organizations (3 Credit Hours)

Pre-requisites: Introduction to Business Law

This course is taken in the second semester of study and introduces agency law, partnership law, corporate law and the LLC. Principal emphasis is on the law as it applies to the organization and functioning of business entities, including the duties and obligations of managers of such entities. The course focuses on structure and mechanics, capitalization, distribution, organic changes, and duties and liabilities of directors, officers, and controlling shareholders. The federal securities acts are introduced with particular attention to Rule 10b-5. Substantial attention is given to the special problems of the close corporation.

LAW 806 Introduction to Business Law Clinic for International LLM Students (1-2 Credit Hours)

This course is designed to introduce international students to clinical work with for profit and not for profit businesses in the Chicagoland area, developing their counseling and drafting skills.

LAW 808 Governance, Ethics, & Compliance (3 Credit Hours)

This capstone class emphasizes the importance of legal compliance and ethics to the mission of the corporation and the business entrepreneur. Students will write a paper undertaking a legal case study of losses sustained by actual business (in reputation or otherwise) from acting in an unethical or illegal manner. The role of the corporation and the business leader in society is examined.

LAW 809 MJ Business Planning (2 Credit Hours)

This course teaches planning issues in connection with: (i) The organization of a business (e.g., the types of legal entities including: corporation, "S" corporation, partnership, and limited liability company), organizational documents for a corporation and a limited liability company, control issues including the problems of minority shareholder in a privately owned business; (ii) The financing of that business (including compliance with the federal securities laws in connection with private offerings and public offerings, bank borrowing and granting collateral pursuant to Article 9 of the UCC); (iv) Buying and selling a business (including certain tax and non tax issues, documentation, hostile tender offers, going private and leveraged buyouts); and (v) The financially troubled business.

LAW 810 MJ Corporate Tax (2 Credit Hours)

This course is intended for those with familiarity with federal income taxation. It focuses on the income tax consequences associated with the three principal business forms; the corporation; the partnership, and the limited liability company. The tax issues confronted at the start-up, operating and winding-down phases are examined for each business form.

LAW 811 MJ US Corporate Governance (2 Credit Hours)

In this course, students will study and analyze the law and practice of corporate governance law for publicly held corporations. Introductory sessions will detail corporate governance law and regulation, with a specific focus on the impact of the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010. Thereafter, a number of alternative proposed reforms will be assessed. Finally, the course will address practical elements of corporate governance practice including professional responsibility issues, the director selection process, board diversity, and empirical learning regarding the best corporate governance practices.

LAW 812 Financial Institution Regulation (2 Credit Hours)

The course has two objectives. First, it will examine and analyze the current bank regulatory system. Consideration will be given to the function and regulation of depository institutions, as well as, that of various classes of affiliated entities such as those involved in the issuance of securities, insurance and merchant banking. Second, the course will examine the mechanics of key bank operations including, syndicated lending, underwriting and the securitization of debt securities.

LAW 813 Financial Institution Regulation II (2 Credit Hours)

Pre-requisites: MJ Financial Institute Regulation

This course will examine the regulatory regime applicable to securities broker-dealers and futures commission merchants. Primary focus will be on the substantive content of the Securities Exchange Act of 1934 and the Commodity Exchange Act of 1970, and the regulations promulgated thereunder. Secondly, the course addresses the self-regulatory agencies responsible for overseeing the securities and commodities trading system.

LAW 814 Business Law Graduate Externship (1-3 Credit Hours)

Open to: LLM students enrolled in campus courses. Students enrolled in the LLM in Business Law degree program may earn externship credit for working at an approved business law externship site. This program is designed to offer students practical experience to further develop lawyering skills and business law expertise. Students may receive up to three credits.

LAW 815 Advanced Appellate Advocacy (3 Credit Hours)

This course is intended for LL.M. students, but J.D. student may be permitted to take the class with instructor permission. The course begins where traditional legal writing and advocacy courses leave off, teaching advanced legal research strategies, brief writing, oral argument technique, and the components of appellate procedure. Students will be required to compose appellate briefs and to deliver oral arguments.

LAW 816 Racial Justice Seminar Series (3 Credit Hours)

This course exposes students to seven unique and emerging racial justice in health care or compliance. Each emerging issue is selected based on its likely impact on the industry and its timeliness, given current political, business or health care challenges. This course is structured over 13 weeks, in which we alternate between reading weeks, where students are given reading material to introduce them to each issue, and synchronous classroom lectures by national experts on each subject. At the end of the course, each student is asked to write a reflective paper on one of the issues presented and describe the impact that they believe it will have on their practice.

LAW 817 Compliance and Securities Regulation (3 Credit Hours)

This course will focus on the basic principles of the Securities Act of 1933, which sets forth the requirements for registration of all securities sales unless an exemption is available. The course will cover the concept of what is a security, the registration requirements of Section 5 of the '33 Act, the exemptions from registration, particularly the intrastate offering exemption (Section 3 (a)(1) and Rule 147); Section 4(1) and 4(2) (and Regulation D) regarding private offerings; Rule 144A "big boy" transactions and certain other exemptions; the timing and rules for preparation of registration statements and prospectuses under Section 5; key aspects of Regulation S-X; the consequences of the failure to register (Sections 11, 12, 13 and 17); jurisdiction; and other similar topics.

LAW 818 MJ Securities Regulation II (2 Credit Hours)

Pre-requisites: Securities Regulation II

This course will focus on the aftermath of becoming a public company, including reporting responsibility under the Securities and Exchange Act of 1934; proxy solicitations under SEC regulations; tender offers and the Williams Act; compliance with the Sarbanes-Oxley Act of 2005; responsibilities of officers and directors of public companies; secondary market disclosure and Regulation FD; the impact of the Dodd-Frank Act of 2010; and Section 10b of the '34 Act and Rule 10b-5; and, the impact and operation of the Private Securities Litigation Reform Act and class action lawsuits.

LAW 820 Compliance and Culture (2 Credit Hours)

Seeking a name change plus change to study of the importance of corporate culture with compliance, best practices in the compliance industry and lessons learned from corporate scandals. This course will continue to provide the students with experience in dealing with "compliance issues" across multiple industries. The course will be organized as a series of hypotheticals presented to the students who will work through issue spotting regulatory and compliance concerns, developing an audit plan for the issues, protocols, identifying needed policies and procedures, and establishing corrective actions for remediation. Corporate Compliance, Law 839 or Health Care Compliance Law 910 are preferred prerequisites.

LAW 821 International Business Transactions (2 Credit Hours)

This course serves as an introduction to the background and legal framework of international business transactions. Students will: - study the business and legal issues that impact international business transactions; - gain insight into the dynamics of structuring international business transactions; - learn about the role that lawyers and legal professionals play in international business; - examine key legal topics that often arise in international business transactions; and - explore careers in international business law.

LAW 823 Privacy and Security of Corporate Information (2 Credit Hours)

This course provides an overview of compliance issues and requirements in information management, including information technology and record keeping requirements.

LAW 824 Where Business Meets Law (3 Credit Hours)

Pre-requisites: Business Organizations In this course, students will focus on contract drafting, communications, transactions analysis, matter management, negotiation and client service

We will use simulations, role playing, in-class negotiations and a five week drafting and negotiation lab to introduce you to the basic work of a transactional lawyer. The goal of this course is to offer you a basic primer on the actual practice of transactional law.

LAW 825 Business Law Center Clinical & Seminar (2-4 Credit Hours)

The Business Law Clinic (the "BLC") is a live client transactional legal clinic that represents for profit and not for profit businesses in the Chicagoland area. Student clinicians work with several BLC clients during the course of a semester. All work is overseen by BLC faculty. In addition to client work, the BLC includes a weekly seminar (Wednesday from 3:00 to 4:50 p.m.), which covers relevant substantive law, ethical issues and pragmatic lawyering skills, such as drafting, negotiating and client counseling. The work in the BLC is completely transactional in nature. The BLC does not handle contested matters or complex tax. Participation in the BLC requires a significant time commitment (a minimum of 3 hours per week per credit hour, in addition to the seminar), and a degree of flexibility in the student's schedule. All student clinicians are expected to communicate with their clients regularly, meet with their clients as needed, efficiently and effectively perform the related transactional work, maintain their client's files in an organized and professional manner, regularly attend the seminar classes and participate in various seminar exercises. Recommended courses, in order of preference, are Business Organizations, Federal Income Tax and Corporate & Partnership Tax. Class is limited to 14-16 students and instructor permission and an application is required. This is a Skills and Live Client Experience course.

LAW 826 Business Law Clinic II (1-3 Credit Hours)

Pre-requisites: Business Law Clinic and Seminar I, Permission Required Business Law Clinic II is a continuation of Business Law Clinic I. Student clinicians will continue working with for profit and not for profit businesses in the Chicagoland area. Learning from their experience in Clinic I, Clinic II students have the opportunity to further develop their counseling and drafting skills. Clinic II student clinicians have the same hourly requirements as Clinic I, however, there is no seminar component.

LAW 827 Succession Planning For The Family Business (3 Credit Hours)

This Capstone Course is limited to twelve, 3Ls who have completed Estate & Gift Tax and Advanced Corporate Tax. For the first half of the semester, the capstone students will be part of the Estate Planning class taught by Prof. Rhodes during which time they will learn the fundamentals of estate planning. After spring break, the Capstone students will have their own specialized classes co-taught by Professors Kwall and Rhodes that focus on family business planning. The Capstone Course is intended to serve as a bridge to practice for future lawyers representing entrepreneurs of successful multi-generation, family-owned businesses. These clients expect to be serviced by a lead professional who can integrate business, income tax, and estate planning objectives. Although the Tax Certificate program offers a rich curriculum in income tax and estate tax, these courses only provide the building blocks to comprehensive planning. This Capstone Course is designed to equip students with the integrative understanding necessary to meet the demands of the mature entrepreneur who will expect his/her business planning, retirement planning, and death planning to be led by a lawyer with foresight, judgment and a big picture perspective. The Capstone Course students will focus on a case study that raises a myriad of income tax and estate planning issues. Students will diagnose and analyze existing tax problems and develop a variety of options including a transfer of the business to a younger generation, a sale of the business to unrelated parties, or a reorganization of the business. The students will work in teams and each team will be expected to produce a detailed planning outline explaining the problems, alternative solutions and the issues they present that can be used to educate the client and develop a course of action. There will not be a final exam. As to grading, 50% will be based on the first half of the semester and 50% will be based on the second half of the semester. This is an Experiential Learning course.

LAW 828 LLM Externship Field Placement (1-3 Credit Hours)

Open to: LLM students enrolled in campus courses. Students enrolled in any campus based LLM program may earn between one to three externship credits for working at an approved LLM externship site. This externship is designed to offer practical experience to further develop law related skills and expertise in various legal fields. A maximum of 3 credit hours can be attained during the LLM program. This is an Experiential Learning course.

LAW 829 Global Compliance (2 Credit Hours)

This course will offer students the opportunity to study significant areas of law from foreign jurisdictions that impact doing business abroad or foreign companies doing business in the U.S. A selection of areas of law that will be covered include the UK Bribery Act, European Union privacy regulation, technology transfer laws (including U.S. import-export controls), national security issues associated with doing business in certain companies, and developing laws of emerging markets in Asia.

LAW 831 Business Planning (4 Credit Hours)

Business Planning is a case studies oriented course in which students use skills learned through substantive lectures to draft and edit crucial business planning documents individually and/or in teams. Issues covered include the structure of corporate structures, fiduciary duty, valuing, capitalizing and organizing a corporation, drafting shareholder agreements and buy/sell agreements, sale of a business and similar issues in regard to LLCs and partnerships. Assignments include drafting legal and planning memoranda, drafting articles of incorporation and by-laws, and marking up forms to accomplish a specified purpose.

LAW 832 Contracts (3 Credit Hours)

This course describes the basic anatomy of a contract, including the key components of contracts and how they are organized. The course then uses multiple exercises to teach how to review, negotiate, and draft provisions of business contracts. Students will also learn how to manage risk through careful drafting.

LAW 833 Securities Regulation for Lawyers (2 Credit Hours)

This course will provide attorneys with an overview of securities regulation as well as case studies and practical drafting exercises designed for the securities attorney.

LAW 834 Transactional Skills (2 Credit Hours)

This course is designed to provide the new transactional attorney with an overview of key transactional skills, including drafting, client counseling, and negotiation.

LAW 835 Compliance Training Methods (3 Credit Hours)

This course is designed to provide students with practical experience in developing training and education material. An emphasis will be placed on explaining complex regulations and laws to a workforce. The course will also explore varying pedagogical methods for delivering compliance education.

LAW 836 Compliance Seminar Series (1 Credit Hour)

This course is designed to provide an overview of recent developments in corporate compliance. The course will feature bi-weekly guest speaker on topics of interest to the compliance community. Students will be assessed through short written responses to each lecture and a final essay.

LAW 837 Breach Incident Management and Reporting (3 Credit Hours)

A breach of privacy is considered inappropriate use or disclosure of personal data. Numerous laws regulate what constitutes a breach and the legal obligations if there is a breach. This course will examine: (a) what constitutes a "breach" or "incident" under a variety of scenarios and industries, (b) what legal obligations regulated entities have to act on a breach or incident, (c) what liabilities in tort or contract may exist as the result of breaches, (d) corrective actions to manage breaches and minimize recurrence, (e) electronic security measures to minimize breaches and incidents, (f) a survey of the most common cyberattacks for students to gain familiarity with trends in electronic breaches, and (g) practice in drafting notices, incident reports, and corrective actions.

LAW 838 European Union Privacy Law (3 Credit Hours)

European Union Regulation 2016/679 was adopted by the European Parliament and European Council in 2016 and has world-wide privacy law implications, not merely for activities inside the European Union. The law seeks to protect natural persons when their personal data is used by any regulated entity doing business in the EU. The law also requires regulated entities to have organized compliance efforts on a global scale. The course will examine: (a) the history of privacy law in the EU, (b) the response of the EU member states to past EU privacy directives and the current law, (c) the current EU privacy law's impact on business and data storage around the world, (d) the compliance organizational structures needed to respond to the law, and (e) liability associated with non-compliance. No background on EU law is needed; the course will begin with teaching the basic legal and constitutional structure of the European Union in order to situate the course privacy law material.

LAW 839 Corporate Compliance (2 Credit Hours)

This course will cover the elements necessary to implement a basic compliance and ethics program in a company. Students will become familiar with the basic principles of the Federal Sentencing Guidelines that define an effective compliance program. Students will learn the fundamentals of the job of Chief Compliance Officer by working with compliance issues in the media, commercially available compliance training programs and compliance techniques used in major corporations.

LAW 841 Intntl Commercial Arbitration & the CISG (1-3 Credit Hours)

The course uses as a focus the Willem C. Vis International Moot Arbitration Competition. Sponsored by Pace Law School, the Vis Moot is based on a problem governed by the U.N. Convention on Contracts for the International Sale of Goods (CISG). In the spring, an oral competition is held in two different venues, Vienna and Hong Kong. Recently, Loyola has been able to send a different team of students to each of the venues. The course includes about three weeks of study of the CISG, as well as approximately three weeks of study of international commercial arbitration, including basic laws and rules, how to draft an arbitration clause, how to choose an arbitrator, and how to participate in an arbitration as an advocate and as an arbitrator. While the first half of the semester is spent learning about the CISG and arbitration, the second half is spent putting that knowledge into practice. When the problem on which the Moot Competition is based comes on line in October, students work collaboratively to draft Claimants' and Respondents' memoranda. The Claimant's memorandum is due in early December, and the Respondent's memorandum is due in late January. Students also present two oral arguments: one at the law school before a panel of moot alumni, and one before arbitrators from Chicago law firms, at the offices of the respective law firms. At the end of the semester, eight students are chosen who will have the opportunity to compete in Vienna and Hong Kong during the spring semester, for an additional two hours of credit. Through the emphasis on both brief writing and oral arguments, students make significant progress in their skills as advocates, as well as their understanding of dispute resolution in an international context. Their accomplishments have been well recognized in both competitions. More information about the Vis Moot is on the Pace Law School Website: www.cisg.law.pace.edu/vis.html. Eligibility: If a student is part of a moot court team that will be arguing in the fall semester, he or she is not eligible to take this course, since this is a skills-based course requiring substantial out of class effort in both brief writing and oral argument. If a student is part of a moot court team that will be arguing in the spring semester, he or she is eligible to take the course in the fall, but will not be eligible to compete to be an oralist in the Vienna or Hong Kong competition. Corboy Fellows are not permitted to take this course. Important: Permission of the professor is required. In order to apply, please submit a resume and a statement of interest by mid-April to Professor Moses, mmoses1@luc.edu explaining a little about your background, and why you are interested in taking this course.

LAW 842 International Commercial Arbitration (1-2 Credit Hours)

The course uses as a focus the Willem C. Vis International Moot Arbitration Competition. Sponsored by Pace Law School, the Vis Moot is based on a problem governed by the U.N. Convention on Contracts for the International Sale of Goods (CISG). In the spring, an oral competition is held in two different venues, Vienna and Hong Kong. Recently, Loyola has been able to send a different team of students to each of the venues. The course includes about three weeks of study of the CISG, as well as approximately three weeks of study of international commercial arbitration, including basic laws and rules, how to draft an arbitration clause, how to choose an arbitrator, and how to participate in an arbitration as an advocate and as an arbitrator. While the first half of the semester is spent learning about the CISG and arbitration, the second half is spent putting that knowledge into practice. When the problem on which the Moot Competition is based comes on line in October, students work collaboratively to draft Claimants' and Respondents' memoranda. The Claimant's memorandum is due in early December, and the Respondent's memorandum is due in late January. Students also present an oral argument before arbitrators from Chicago law firms, at the offices of the respective law firms. At the end of the semester, a second oral argument is held at the law school, after which students are chosen who will have the opportunity to compete in Vienna and Hong Kong during the spring semester, for an additional two hours of credit. Through the emphasis on both brief writing and oral arguments, students make significant progress in their skills as advocates, as well as their understanding of dispute resolution in an international context. Their accomplishments have been well recognized in both competitions. More information about the Vis Moot is on the Pace Law School Website: www.cisg.law.pace.edu/vis.html. Eligibility: If a student is part of a moot court team that will be arguing in the fall semester, he or she is not eligible to take this course, since this is a skills-based course requiring substantial out of class effort in both brief writing and oral argument. If a student is part of a moot court team that will be arguing in the spring semester, he or she is eligible to take the course in the fall, but will not be eligible to compete to be an oralist in the Vienna or Hong Kong competition. Corboy Fellows are not permitted to take this course. Important: Permission of the professor is required. In order to apply, please submit a resume and a statement of interest to Professor Moses, mmoses1@luc.edu explaining a little about your background, and why you are interested in taking this course

LAW 844 Advanced Trial Practice (3 Credit Hours)

This course will teach students the law and techniques used during the trial process. The course will instruct students and require them to simulate jury selection and voir dire, opening statements, witness examinations, exhibits, objections, and closing statements.

LAW 845 The Foreign Corrupt Practices Act (3 Credit Hours)

This course will examine the FCPA in-depth from the perspective of U.S. companies doing business in foreign jurisdictions and interacting with public officials and regulatory bodies. The course will also examine how companies that might consider themselves a "U.S.-only" business could find themselves with FCPA risk. The course will examine both the law and enforcement actions. The course will also review ways to incorporate FCPA risk into a compliance program so that a company's workforce is educated on FCPA risk and examine how to remediate potential non-compliance with FCPA.

LAW 847 Business Law Graduate Directed/Independent Study (1-3 Credit Hours)

Open to campus based LLM or MJ students. Students will work under the supervision of a member of the Loyola law faculty for purposes of completing scholarly work as defined by the supervising faculty member. This may include but is not limited to assisting a faculty member on an article for publication or on the development of new teaching methods particularly those using technology as part of instructional practices, or producing a scholarly proposal or paper, relating to business law topics, which can be counted as preliminary work towards the completion of a the LLM or MJ thesis requirement. Students may receive up to three credits.

LAW 853 Intellectual Property Survey (3 Credit Hours)

The course is an introduction to the law of intellectual property designed for competition lawyers and other professionals in the field. The focus of the course is on understanding the distinctions and similarities between the various aspects of intellectual property law. The predominant focus on the course is on trademark, patent, and copyright law (in about equal proportions), with some attention also devoted to the law of trade secrets. No technical background is expected or required.

LAW 856 Advanced Alternative Dispute Resolution (3 Credit Hours)

The course will focus on the substantive and procedural elements of the various forms of alternative dispute resolution techniques in the United States. The class will cover arbitration, negotiations, mediation, mini-trials, non-binding arbitration using legal assistance, and the role of counsel in each of these processes. A significant amount of class time will deal with mediation as well as both administered and non-administered arbitration. The class will address established principles of arbitration law, the various types of arbitrations, the rules governing arbitration, the role of counsel in the processes, as well as the power, responsibilities and ethical requirements of both mediators and arbitrators. The course will combine a traditional lecture format with practical experience designed to provide the student with a strong substantive basis in mediation and arbitration, as well as clinical experience with several mock mediations and arbitrations interspersed during the course term.

LAW 857 Leadership and Strategy (3 Credit Hours)

As a leader or manager in your organization, it is your job to find the right people, engage and motivate them, and structure and operate the organization in a way that enables and inspires people to perform at their best. And, you have to do this in a way that preserves the organization's financial health and protects it from legal risks. Your professional success depends directly on your ability to make the right strategic decisions, and effectively lead and inspire individuals, teams and projects. This course is designed to enhance your ability to do this. This course also will enable students to examine varied approaches to leadership that are based on personal and organizational mission, vision and values. Students will have an opportunity to explore their own values and approach to leadership and accountability.

Outcomes:

By the end of this class students will be able to: Model the characteristics and skills of visionary leaders; Critically define and analyze business problems and formulate data- and information-driven business decisions; Articulate the responsibility leaders have to all stakeholders and the application of ethical principles to business practices; Successfully participate in and lead multi-functional team projects; and Demonstrate proficiency in the various forms of communication

LAW 858 Cybersecurity Management (3 Credit Hours)

This course will introduce students to the key legal, business and ethical issues related to cybersecurity. Students will gain familiarity with a framework for approaching cybersecurity through evaluating threats, risks and vulnerabilities and developing appropriate and proportional policies, processes and countermeasures to maintain the integrity of computers, systems and data.

LAW 859 Environmental Enforcement and Compliance (2 Credit Hours)

This class will provide an overview of corporate compliance principles applied in the environmental context, as well as to provide a general overview of federal environmental law compliance. This course will examine the principles of an effective corporate environmental compliance program and will provide a framework for students to identify, prevent, detect, respond and correct any environmental non-compliance.

LAW 860 LLM Tax Seminar (2 Credit Hours)

In the LLM Tax Seminar, tax LL.M. students will research a topic in tax deeply and write a thesis on that topic.

LAW 863 Consumer Protection Law (2 Credit Hours)

The course surveys consumer law from a transactional perspective, beginning with issues of deception, including false advertising, related to consumer purchases. There is coverage of the law of consumer credit, including issues of discrimination, overpriced credit and deceptive credit practices, and standard form contracts of adhesion and recent rulings covering binding arbitration and class actions. Consumer remedies and special issues of consumer fraud on the Internet complete course coverage.

LAW 864 Federal Criminal Trial Advocacy (2 Credit Hours)

Students will follow the evolution of a federal criminal case from investigation to trial. The class will focus on one mock problem - which will likely be a federal narcotics investigation that resulted in a two-count indictment. The indictment will allege that the defendants conspired to distribute more than 280 grams of a controlled substance and that they indeed distributed the controlled substance. Because it will be too complex for a one-semester course, I do not recommend that the mock problem include a Title III investigation. The class will be divided into three parts: 1) Investigation 2) Suppression Hearing and 3) Trial.

LAW 865 Corporate Compliance (2 Credit Hours)

This course will familiarize law students with the world of corporate compliance focusing on competition law issues, and provide basic skills to be employed in a corporate compliance department. Students will obtain a basic understanding of the legal principles related to compliance, or preventive law, and learn the interplay between compliance and ethics. They will become familiar with the principles of Chapter 8 of the United States Federal Sentencing Guidelines, which describe the fundamental rules for creating an effective compliance program. They will be able to understand and articulate how compliance and ethics failures impact on the success or failure of a business.

LAW 866 Antitrust & Intellectual Property (2 Credit Hours)

This seminar focuses on the interface between Intellectual Property (IP) and antitrust law. Patents, copyrights and trademarks and other IP regimes confer exclusionary rights. Exclusive rights provide incentives and serve other ends, but their exercise can also impede competition distort otherwise competitive markets. This seminar will address the intersection of IP and Antitrust with respect to issues such as standard setting, licensing, corporate strategy, product design, efforts to increase market share and mergers and acquisitions.

LAW 867 Chinese and Indian Competition Law (2 Credit Hours)

The People's Republic of China promulgated its Anti-Monopoly Law (AML) in 2008 following nearly a decade of study, drafting, debate, and revision. The AML is a unique and important competition law given China's status as both a socialist market economy and the world's second largest economy. This course will provide a survey of the development of the AML, its principal provisions, its unique method enforcement by three different government agencies, the early track record of enforcement, and the continuing questions regarding the effectiveness and fairness of the AML.

LAW 868 U.S. Antitrust Law (2 Credit Hours)

This course treats in depth many aspects of the Sherman and Clayton Acts. Emphasis is placed on an understanding of the policies and objectives underlying the antitrust laws and the extent to which enforcement of the antitrust laws has fulfilled those objectives. Areas examined include monopolies, price fixing, division of markets, exclusive dealing arrangements, boycotts, resale price maintenance, and mergers. Recent trends in sports and health care industry antitrust cases may be discussed. The impact of economic analysis in the antitrust area is also examined.

LAW 872 International Merger Regulation (2 Credit Hours)

This course provides an overview of the laws and legal issues related to the review and regulation of mergers from an antitrust and competition law perspective. Although the course will draw primarily from the experiences in the United States and Europe, we will discuss and compare many jurisdictions around the world and the challenge of applying multiple merger laws to the same merger. We will start by distinguishing mergers from other types of business conduct which implicate antitrust and competition laws and address the question of why mergers are treated differently. The course will then address basic principles used in the substantive review of mergers. We will start by identifying the economic rationale supporting the prohibition of mergers and the basic economic theories used to distinguish permissible mergers from impermissible mergers. We will then ask whether these theories apply across jurisdictions. We also will devote several sessions to the procedural context of merger review. We will discuss the basic question of why mergers need to be scrutinized in advance and the efficiencies of this approach. We will also address the complexities of securing merger review clearance for a multinational transaction in a world of differing, overlapping and sometimes conflicting merger laws. That discussion will inevitably lead us to the issue of extraterritoriality: To what extent may a jurisdiction apply its merger laws to a transaction occurring outside of that jurisdiction? The course will conclude with a discussion of the internationalization of merger review. This will include various proposals at convergence, harmonization and the creation of a supra-national merger review authority. It will also involve a discussion of the various institutions which are trying to address the issues created by a world of differing, overlapping and sometimes conflicting merger laws such as the International Competition Network, UNCTAD and the WTO.

LAW 874 Environmental, Social, and Governance (ESG) (3 Credit Hours)

"LAW 874 will examine the relationship between corporate Compliance and the emerging corporate governance principles known as Environmental, Social and Governance (ESG). ESG represents a set of operating principles assist business entities as they strive to be both profitable and socially responsible. The ESG model has grown in use and popularity over the past decade and now is considered essential for many businesses. This course will examine the application of Compliance principles as outlined in the Federal Sentencing Guidelines to the ESG framework. It will examine discrete elements of each principle, such as climate change, sustainability and emission standards for Environmental; workers; and human rights, equality and fairness and diversity and inclusion for Social and board independence, fair compensation and ethics and compliance for Governance. It will trace the roots of the ESG movement from the Triple Bottom Line to sustainability to Corporate Social Responsibility to ESG. It will also examine the fundamental purposes of corporations and whether the Friedman Model from the Chicago School remains viable. We will also consider various reporting models for ESG elements and their impact upon corporate governance and investing. Upon completion of LAW 874 (ESG) students will: understand ESG, its fundamental elements and the context of its existence recognize the relationship between Compliance and ESG apply reporting methodologies relating to ESG develop best practices for corporate governance and ESG "

LAW 878 Orientation Program for International LLM Students (1 Credit Hour)

Introduction to Core Concepts of Common Law and Studying Techniques for International LLM Students This online summer course is limited to international LLM students. The orientation is an immersive preparation for students and lawyers trained abroad who will learn what to expect from their law school courses and how they can meet the expectations of their professors. We will introduce core common law concepts and structure of US legal institutions. Students will hone their written and oral communication skills and train practice skills critical to success in law school.

LAW 879 Crisis Management and Compliance (3 Credit Hours)

The Collaborative Crisis Management course will provide students with an understanding of what role the compliance function plays to identify, minimize and respond to risks created by a corporate crisis. Students will gain this understanding through role-play, assignments, class participation and examination

LAW 880 Introduction to the Law of the United States I (1 Credit Hour)

This course is required for international students in the LL.M. in U.S. Law or the LL.M. in International Law. This required foundational course introduces students to the sources and functions of law in our society. The course begins with an explanation of the structure and traditions of the American court system. Students then learn to read and analyze cases and statutes and develop basic legal written and oral presentation skills. The course uses cases from various fields and provides students with the background they will need for understanding American law.

LAW 881 Legal Research and Writing I (2 Credit Hours)

This course is required for international students in the LL.M. in U.S. Law or the LL.M. in International Law. During the fall semester, students take Legal Research and Writing I and are introduced to legal research methods and the fundamentals of legal writing. Students read and analyze legal authority and learn how to apply the legal authorities to particular fact situations. Through a series of legal memoranda and exam writing assignments, students develop their analytical and writing skills. Students are taught legal research methods through written exercises, research memos, and lectures. During the spring semester, students take Legal Research and Writing II which builds on the basic writing, analysis, and research skills learned in the first semester. In the spring semester, students are also introduced to persuasive writing and learn how to present an oral argument to the court. Computerized research techniques are included in the course.

LAW 882 Legal Research and Writing II (2 Credit Hours)

This course is required for international students in the LL.M. and U.S. Law or the LL.M. in International Law. During the fall semester, students take Legal Research and Writing I and are introduced to legal research methods and the fundamentals of legal writing. Students read and analyze legal authority and learn how to apply the legal authorities to particular fact situations. Through a series of legal memoranda and exam writing assignments, students develop their analytical and writing skills. Students are taught legal research methods through written exercises, research memos, and lectures. During the spring semester, students take Legal Research and Writing II which builds on the basic writing, analysis, and research skills learned in the first semester. In the spring semester, students are also introduced to persuasive writing and learn how to present an oral argument to the court. Computerized research techniques are included in the course.

LAW 883 Introduction to the Law of the United States II (1 Credit Hour)

This course is required for international students in the LL.M. in U.S. Law or the LL.M. in International Law. It is taught as a 1-credit hour course in the spring semester (I) and in the fall semester (II). This required foundational course introduces students to the sources and functions of law in our society. The course begins with an explanation of the structure and traditions of the American court system. Students then learn to read and analyze cases and statutes and develop basic legal written and oral presentation skills. The course uses cases from various fields and provides students with the background they will need for understanding American law.

LAW 884 Doctoral Dissertation Research and S.J.D. Colloquium I (0 Credit Hours)

This course will consist of three distinctive components: 1. Doctoral Research: Candidates will learn research methods as well as get thoroughly acquainted with the variety of research materials, (on-campus, online and otherwise) that will aid them in the development of their dissertation projects. 2. Legal Theory: Candidates will learn the fundamentals of current legal academic thought in areas such as comparative law, law and economics, legal theory, legal realism, and critical race theory. 3. Scholars Forum: Candidates will discuss their research with their peers and others and elicit feedback on drafts of their work at various stages.

LAW 885 Doctoral Dissertation Research and S.J.D. Colloquium II (0 Credit Hours)

Pre-requisites: (LAW 884) Doctoral Dissertation Research and S.J.D. This course will allow further development of the three distinctive components from part one of this course: 1. Doctoral Research: Candidates will continue to learn research methods as well as get thoroughly acquainted with the variety of research materials, (on-campus, online and otherwise) that will aid them in the development of their dissertation projects. 2. Legal Theory: Candidates will continue to learn the fundamentals of current legal academic thought in areas such as comparative law, law and economics, legal theory, legal realism, and critical race theory. 3. Scholars Forum: Candidates will continue to discuss their research with their peers and others and elicit feedback on drafts of their work at various stages. Colloquium I

LAW 886 Doctoral Dissertation Supervision (0 Credit Hours)

Pre-requisites: (LAW 885) Doctoral Dissertation Research and S.J.D. This course will allow candidates to focus on developing their dissertation and building on the preliminary research they conducted during the first year. Candidates will continue to meet, either in person or by remote means, with their Advisory Committee twice a year. Colloquium II

LAW 887 Doctoral Dissertation Supervision and Completion (0 Credit Hours)

Pre-requisites: (LAW 877) Doctoral Dissertation Supervision II This course will allow candidates to continue to develop and complete the dissertation.

LAW 899 Online LLM Thesis Project (4 Credit Hours)

Students are expected to complete a thesis project. The project is completed in close cooperation with a faculty advisor. This is the first course for students completing their LLM thesis. This course will focus on creating a detailed outline, introduction, and writing a partial draft and final draft.

LAW 900 Introduction to Legal Study and Legal Writing (4 Credit Hours)

This foundation course introduces students to the sources and functions of law in our society. The course begins with an explanation of the structure of the American court system. Students then learn to read and brief cases, synthesize cases, and develop basic legal writing and analysis skills. Through multiple short writing assignments, students learn to construct a legal office memorandum, the final course requirement. The course utilizes health law cases and problems and provides students with background for future health law studies. This course is open to online Master of Jurisprudence students in the Health Law and Business Law programs.

LAW 901 Introduction to Legal Research (1 Credit Hour)

This course provides an overview of the legal research process. The student will learn basic legal research skills with a focus on online legal sources. Students will search for health law cases, statutes, regulations and law journal articles. They will learn how to use citators to verify that a case or statute is still good law and also learn the proper form for citation of legal authorities.

LAW 902 Introduction to Health Law and Policy (3 Credit Hours)

This course is designed to expose students to the legal issues that arise from the relationship between and among patients and health care providers. Primary areas include: conflicts between cost effective and high quality health care; access to care; individual and institutional liability; public and private regulation; accreditation and licensure; hospital/medical staff relationships; patient rights, with a special focus on informed consent; and other legal issues in the acute care setting.

LAW 903 Health Care Financing (3 Credit Hours)

Students explore the general principles and techniques of financial management and accounting as applied to health care organizations. Considerable focus is placed upon definition, history, and methods by which providers of health care services are reimbursed by third parties.

LAW 904 Health Care Regulation and Policy (3 Credit Hours)

This course looks at patient representation issues in the context of judicial advocacy and public policy formation and explores patient rights in the context of federal opinions and strategies they utilize. The role of government in health care is explored through a review of major government health programs, particularly Medicare and Medicaid, with a focus on the fundamentals of legislative and administrative processes in health policy development and implementation. Issues to be explored will be drawn from the wide array of health matters in which governments are involved.

LAW 906 Health Care Contracts (2 Credit Hours)

This course provides an overview of the health care related contracts. Fundamental principles of contract law, illustrated primarily through a study of issues and cases drawn from the healthcare industry, are discussed and explored in this course. Students will learn how to spot important issues (beyond the dollars) and interpret contracts commonly used in the health care setting.

LAW 907 Bioethics & Social Justice (2 Credit Hours)

Students investigate issues arising from advances in biological science and technology and learn about their impact on the legal rights and of patients, health providers, and government policy makers. Issues explored range from legal and ethical dilemmas in the treatment of individuals to broader societal issues addressing the allocation of health care resources.

LAW 909 Risk Management, Patient Safety and Quality (2 Credit Hours)

This course is designed as a general survey course to provide you with an introduction to the concepts associated with managing risk, promoting quality and enhancing safety in the health care industry. The course begins with a general description of traditional risk management and then proceeds to discussion the various aspects of risk management, patient safety and quality that influence the delivery of health care.

LAW 910 Health Care Compliance (2 Credit Hours)

This course will progress from the basics of a compliance program, including the compliance operations and the Code of Conduct, to specific issues facing the healthcare industry such as anti-kickback, Stark, False Claims Act, and civil monetary penalties; conflicts of interest and governance; tax; coding and billing; privacy, technology, data, and security; and the link between regulatory issues and quality of care. Students will be assigned projects to show them how to implement in a practical setting the various laws, regulations, and standards as well as understand the enforcement environment. THIS CLASS IS ONLY AVAILABLE ONLINE AND WITH PERMISSION.

LAW 911 Writing Fundamentals (1 Credit Hour)

Students will review basic writing mechanics including grammar and punctuation. They will enhance their writing skills by editing passages, producing written assignments, and doing focused writing exercises. Students will also learn to develop sound arguments by practicing the art of logical flow. The goal is to help students to produce clear, well-organized, grammatically correct prose. This course will also offer some guidance regarding how to approach the thesis project.

LAW 912 Liability & Dispute Resolution in Health Care (2 Credit Hours)

In this course students will take an in-depth look at both the substantive and procedural law of medical negligence litigation and ways to avoid litigation through communication and resolution processes and the use of other alternative means of reconciliation following harm. Students will also review and discuss the motivations behind medical malpractice litigation and will include detailed discussions about the comprehensive, principled, and systematic approach to the prevention and response to patient harm including communication and resolution programs such as the Michigan Model, CANDOR, and the BETA HEART program. Students will discover, during the course, the impact of medical harm and litigation on patients, families, caregivers and society. Case-based videos involving actual patient harm events and demonstrating the power of empathic communication are used throughout the course.

LAW 916 Telemedicine (2 Credit Hours)

This class will explore the evolution of Telemedicine to Telehealth. It will begin by describing the legal and regulatory framework which governs all Telehealth encounters and the reimbursement and coverage parity issues which have, for years, limited growth in this critical aspect of health care. The course will also cover the impact of state licensing compacts, the challenges associated with technology, HIPAA and privacy concerns and how Telehealth can serve to reduce health care disparities and issues associated with access to needed health care services for geriatric and other patients.

LAW 917 Public Health and the Law (2 Credit Hours)

"Public Health Law is a two-credit survey course that covers core legal issues encountered in regulation and public policy affecting population health. The course will provide students with an overview of topics that concern regulatory theory, administrative law, legislation, and individual rights concerns. As public health authorities are confronted with ever complex challenges, the role of law is pivotal in both directing regulatory responses, as well in shaping strategies to combat perceived abuses of government power. Few areas of law and policy are as dynamic as public health law as the field plays a central role in major, ongoing areas of population health such as Covid-19, opioid abuse, climate change, disaster preparedness and response, etc. The course will focus on four themes: (1) the structure and powers of public health agencies in confronting traditional and evolving health threats, (2) the challenge of balancing individual rights against population health concerns, (3) the role of civil litigation in influencing changes in public health with a focus on legal settlements in the areas of tobacco and opioids, (4) international and comparative law approaches to meeting cross border health challenges. The course is taught online and combines several live class sessions with programmed modules. Students will be required to make several in-class presentations that will be the basis of three required essay assignments."

LAW 918 Health Care Privacy and Security (2 Credit Hours)

This course is an overview of Health Information Law and Policy as it pertains to data security and privacy of electronic health records here in the United States. Students will examine how individual health information is collected, maintained, and transferred in this electronic information age, and the ramifications when such information is improperly protected, stolen, and misused.

LAW 919 Medical Records Billing and Coding (2 Credit Hours)

Today's healthcare professional needs a working knowledge of the business side of medicine; specifically medical record documentation, coding and billing. Non-compliance with rules and regulations on medical record documentation can result in refunds to health insurers, civil penalties, criminal proceedings, and/or exclusion from federal health care programs. Poor medical record documentation also puts patients at risk. This course will provide students with an in-depth knowledge of the legal role of the medical record, specifically in the context of obligations for the organization of the medical record and its support for reimbursement of services. Medical records must meet all State and federal legal, regulatory and accreditation requirements along with the Medicare Conditions of Participation at 42 CFR §482.24. Upon completion of this course, the student will have an understanding of the components of the medical record, the types of coding used by different providers, the methods of reimbursement based upon the provider type and risks associated with non-compliance.

LAW 920 Health Law Seminar Series (1 Credit Hour)

This course exposes students to seven unique and emerging issues impacting the health care industry. Each issue has the potential to impact providers, health care organizations, health care attorneys, and consumers. Each emerging issue is selected based on its likely impact on the industry and its timeliness, given current political and health care challenges. This course is structured over 14 weeks, in which we alternate between reading weeks, where students are given reading material to introduce them to each issue, and synchronous classroom lectures by national experts on each subject. At the end of the course, each student is asked to write a reflective paper on one of the issues presented and describe the impact that they believe it will have on their practice or the delivery of health care in general. This course is graded pass/fail. THIS CLASS IS ONLY AVAILABLE ONLINE AND WITH PERMISSION.

LAW 921 Health Insurance and Health Care Regulation (2 Credit Hours)

This course is designed around the regulation of health insurance companies in the United States with an eye toward the coming changes brought about by the Affordable Care Act. Although the Affordable Care Act (ACA) is federal, its implementation is reliant on the states. This course will address how the current regulatory system will adapt to the new federal health care scheme.

LAW 922 Advanced Health Care Compliance (2 Credit Hours)

Pre-requisites: LAW 910 - Health Care Compliance (Online) or LAW 798 - Health Care Compliance (Chicago-Based)

This course explores advanced concepts in health care compliance. This course will present a complex health care compliance scenario each module which the student must analyze and comment upon. The scenarios will cover a broad array of regulatory subject matters which must be analyzed in the context of compliance program principles.

LAW 923 Privacy Program Management (3 Credit Hours)

This course explores advanced concepts in privacy and security law and is designed as a continuation of either of the introductory privacy courses (LAW 918 or LAW 823). This course will present a complex compliance privacy and security scenarios each module which the student must analyze and comment upon. LAW 918 or LAW 823 is a prerequisite

LAW 924 Conducting Internal Investigations (2 Credit Hours)

This course will cover practical techniques in responding to suspected non-compliance as well as liability exposure in how investigations are handled. The course will also discuss resolution of identified non-compliance and methods for discharging an organization's legal obligations to correct non-compliance, including self-disclosures and refunds. Additionally, the course will cover responding to government inquiries and audits. LAW 910 (Health Care Compliance) or LAW 839 (MJ Corporate Compliance) are preferred prerequisites but are not required.

LAW 925 Drafting Policies and Procedures (3 Credit Hours)

This course is designed to provide practical experience in drafting operational policies from compliance regulations. Having clear policies and procedures is an essential element of an effective compliance program. The course will explore liability associated with how policies are drafted as well as non-compliance with an institution's policy commitment. The course will teach skills and techniques for turning complex regulations into accessible policies for the workforce. LAW 910 (Health Care Compliance) or LAW 839 (MJ Corporate Compliance) are preferred prerequisites but are not required.

LAW 926 Human Subjects Protection (2 Credit Hours)

This course will cover the law of protecting human subjects in clinical research. Federal agencies require institutions conducting research to have a study approved by an Institutional Review Board (IRB), obtain informed consent from the human subject, and self-disclose to the government various events. The course will review the regulations governing IRBs, the content of informed consent forms, the monitoring of research studies, and the disclosure of unanticipated events and significant non-compliance. The course will look at enforcement cases as well as tort liability. Financial relationships between investigators and sponsors will also be covered. LAW 958 (Life Sciences, Research and the FDA) is a preferred prerequisite but is not required.

LAW 927 Food and Drug Law (2 Credit Hours)

This course will cover advanced topics in the law governing development and approval of devices, drugs, and biologics under the jurisdiction of the U.S. Food and Drug Administration. The course will review regulatory obligations for both manufacturers and providers conducting FDA-regulated clinical research. The course will also cover enforcement of non-compliance and how organizations develop compliance infrastructure to manage the highly detailed FDA regulations. LAW 958 (Life Sciences, Research & the FDA) is a preferred prerequisite but is not required.

LAW 928 Health Care Field Study (1-2 Credit Hours)

This course provides online students a unique opportunity to participate in a trip to study the health care system in a particular location.

LAW 929 Enterprise Risk Management (2 Credit Hours)

Enterprise Risk Management (ERM) provides a comprehensive framework for making strategic decisions, taking into consideration concepts of both value creation and value protection. The approach looks at strategies for managing risk, uncertainty and growth and their relationship to total value. This course will cover the specific skills and techniques necessary to manage risk across increasingly complex organizations and to align business strategies with goals and culture.

LAW 930 Leadership and Management Seminar Series (3 Credit Hours)

This course is comprised of a series of lectures on topics in leadership and management by different experts in the field. Every other week students attend a live synchronous class on a leadership or management topic. Topics vary each term and are intended to cover hot topics and essential skills in leadership and management. The course is open to students in online business and health law programs.

LAW 931 Applied Learning Simulation (1 Credit Hour)

This course presents a simulated legal and/or compliance scenario in which students participate during an Education Immersion Weekend. Students must participate in the entire simulation exercise to earn course credit. Additionally, students must complete a short assignment upon completion of the simulation. Sample topics including privacy breaches, compliance program violations, and developing policies and providing compliance training

LAW 949 MJ Thesis Completion (4 Credit Hours)

MJ students who do not complete their thesis projects within the grace period must register for this course in order to get credit for completing the thesis.

LAW 951 MJ Thesis Project Term One (2 Credit Hours)

MJ students are required to complete a written thesis, demonstrating scholarly research of an important legal issue. The thesis must be of a quality determined to be acceptable by the student's faculty advisor, reflecting mastery of the subject matter explored, critical thinking and clear, sophisticated writing. The thesis is completed over the course of two semesters in close cooperation with a faculty advisor. This first thesis course will focus on choosing a topic, creating a thesis statement, detailed outline, research methodology, introduction, and writing a partial draft. This course is for students in the online MJ program.

LAW 952 MJ Thesis Project Term Two (2 Credit Hours)

MJ students are required to complete a written thesis, demonstrating scholarly research of an important legal issue. The thesis must be of a quality determined to be acceptable by the student's faculty advisor, reflecting mastery of the subject matter explored, critical thinking and clear, sophisticated writing. The thesis is completed over the course of two semesters in close cooperation with a faculty advisor. This second course will focus on completing and refining the thesis project, and presenting a thesis defense to faculty and fellow students. This course is for students in the online MJ program.

LAW 955 Administrative Law and Health Care Regulation (3 Credit Hours)

The course focuses on the role of federal and state agencies and government branches in regulating health care. Students will learn the fundamentals of administrative law through a health care lens. Topics covered will include government rulemaking, investigations, and enforcement. Students will learn how to locate and understand the interplay of sources of administrative law and analyze statutes and regulations.

LAW 956 Health Care Payment and Policy (2 Credit Hours)

This course covers the types of health care payors and the relationships between them, including HMOs, PPOs, CMPs, Medicare and Medicaid, and other managed care arrangements. Topics will include utilization review, ERISA, agency doctrine and payor operational and contracting issues. Students will become familiar with managed care and analyze healthcare plans and policies. (LLM only or with permission)

LAW 957 Corporate Health Care Transactions (2 Credit Hours)

This course covers the business and legal issues that arise in health care transactions and the business and regulatory environment surrounding transactions. Topics covered will include organizational operations, the contents and role of organizational documents, and the application of tax laws to transactions. Students will analyze organizational documents and prepare presentations on issues presented by transactions (LLM only or with permission.)

LAW 958 Clinical Research Compliance (2 Credit Hours)

This course serves as an introduction to the growing area of health law known as "life sciences". The theme for this course centers on the research and development of pharmaceutical drugs and devices and the role of the FDA in regulating this process. Topics covered will include genomics, personalized medicine, the FCPA, basic patent and intellectual property issues, and financing. Students will learn to analyze the FDA approval process (LLM only or with permission.)

LAW 959 Physician Regulation & Practice Management (2 Credit Hours)

This course is designed to introduce students to the laws, agencies, and other bodies that license, regulate and discipline physicians. Topics covered will include licensing proceedings and hearings and health care entity policies addressing these issues (LLM only or with permission.)

LAW 960 Fraud and Abuse - Stark Intensive (3 Credit Hours)

This course covers federal physician self-referral law, commonly known as stark law, and fraud and abuse law. Students will learn about the statutes, regulations and advisory opinions that define the parameters of physician referrals and anti-kickback laws, analyzing case studies for fraud and self-referral issues. Students will also familiarize themselves with the laws, regulations and government regulatory actions designed to combat false claims and other types of fraudulent activities. (LLM only or with permission.)

LAW 962 Antitrust Law (2 Credit Hours)

This course will provide an overview of the antitrust laws and will illustrate the antitrust issues that face businesses on a daily basis. The antitrust enforcement authorities believe that preserving competition provides the best mechanism for allocating economic resources, and that preventing unreasonable restraints of trade will benefit consumers by yielding high-quality, low priced goods and services and result in greater innovation. We will examine the value of competitive markets and the role antitrust law plays in addressing problems posed by mergers and acquisitions, joint ventures, monopolies, and other competitive collaborations across a wide variety of industries (including various aspects of the health care industry). We will also assess the antitrust implications of certain contracting practices such as exclusive dealing, non-compete clauses, and the impact of various other strategic business decisions. The subject matter is organized topically and will entail a discussion of competition theory and the practical application of those antitrust principles to everyday fact patterns, with a special emphasis on providing students real-world experience as they analyze antitrust issues routinely faced by antitrust practitioners.

LAW 970 Drafting (1 Credit Hour)

This course is designed to give students practical experience drafting revising, an analyzing contracts and other such documents. Students will analyze sample contracts for health law transactions, such as mergers, acquisitions, joint ventures and physician contracts and also draft portions of these documents. (LLM only or with permission.)

LAW 971 Tax Exempt and Financing Intensive (1 Credit Hour)

This course focuses on basic federal tax-exemption law as it applies to health care, with a particular focus on 50(c)(3) status and its implications. Areas to be covered include private benefits, increments, excess benefit transactions, community benefit and the impact of the federal health reform legislation. Additionally, this course will examine mechanisms for financing health care transactions, exploring the roles of private and public financing in health care. (LLM only or with permission.)

LAW 995 LLM Thesis Project Term One (2 Credit Hours)

LLM students are required to complete a written thesis, demonstrating scholarly research of an important legal issue. The thesis must be of a quality determined to be acceptable by the student's faculty advisor, reflecting mastery of the subject matter explored, critical thinking and clear, sophisticated writing. The thesis is completed over the course of two semesters in close cooperation with a faculty advisor. This first thesis course will focus on choosing a topic, creating a thesis statement, detailed outline, research methodology, introduction, and writing a partial draft. This course is for students in the online LLM program.

LAW 996 LLM Thesis Project Term Two (2 Credit Hours)

LLM students are required to complete a written thesis, demonstrating scholarly research of an important legal issue. The thesis must be of a quality determined to be acceptable by the student's faculty advisor, reflecting mastery of the subject matter explored, critical thinking and clear, sophisticated writing. The thesis is completed over the course of two semesters in close cooperation with a faculty advisor. This second course will focus on completing and refining the thesis project, and presenting a thesis defense to faculty and fellow students. This course is for students in the online LLM program.

LAW 998 LLM Thesis Completion (3 Credit Hours)

LLM students who do not complete their thesis projects within the grace period must register for this course in order to get credit for completing the thesis.

Legal Environment of Business (LREB)

Discover, search, courses!

LREB 315 Law and the Regulatory Environment of Business I (3 Credit Hours)

Pre-requisites: Junior standing

This course is designed to familiarize the student with the American legal system. Intended primarily for students who have not previously studied law, the course includes a review of the concept of law, the function of the courts, and the dual judicial system of the United States. An appreciation of legal history and the operation of law are developed through the vehicle of a detailed analysis of contract law and a survey of other topical headings. Outcome: The students should achieve an awareness of the necessity of voluntary compliance with general legal concepts in order for society to enable all persons to live together in harmony. An understanding of the court system as a substitute for self-help is deemed essential and knowledge of binding contract law is fostered as a basis for all agreements.

Course equivalencies: LREB315/315H

LREB 315H Law and the Regulatory Environment of Business I - Honors (3 Credit Hours)

Pre-requisites: Junior standing; restricted to SBA honors students

This course is designed to familiarize the student with the American legal system. Intended primarily for students who have not previously studied law, the course includes a review of the concept of law, the function of the courts, and the dual judicial system of the United States. An appreciation of legal history and the operation of law are developed through the vehicle of a detailed analysis of contract law and a survey of other topical headings. An understanding of the court system as a substitute for self-help is deemed essential and knowledge of binding contract law is fostered as a basis for all agreements.

Course equivalencies: LREB315/315H

Outcomes:

The students should achieve an awareness of the necessity of voluntary compliance with general legal concepts in order for society to enable all persons to live together in harmony

LREB 443E Executive Legal Liability (1.5 Credit Hours)

Enrollment is restricted to students in the Executive MBA Program. Treats selected areas of corporate activities in which officers and directors are subject to personal liability including conflicts of interest, security transactions, and provisions of the Foreign Corrupt Practices Act. Students will design company compliance programs related to such matters including anti-trust regulations.

Course equivalencies: LREB600E/LREB443E

LREB 445 Entrepreneurship Law (3 Credit Hours)

Pre-requisites: Quinlan School of Business graduate students

This course provides aspiring and established business owners with an understanding of the recurring legal issues at various stages in entrepreneurship. Comprehending these principles will assist business owners in better organizing their business structures and operations.

Outcomes:

The goal is to help increase a business' duration and profitability by implementing appropriate processes to reduce the potentially substantial costs and irreparable harm associated with failing to apply proper attention to foreseeable commercial risks

Linguistics (LING)

Discover, search, courses!

LING 302 Meth of Tchng Foreign Lang (3 Credit Hours)

This course is an introduction to the fields of Second Language Acquisition as well as Foreign Language Teaching. Outcome: Students will gain a solid understanding of the underlying psychological processes of language acquisition, and how this knowledge is used in the design of pedagogical materials for the second/ foreign language classroom. Students will also receive pragmatic instruction in the teaching of the different linguistic skills.

Literature in Translation (LITR)

Discover, search, courses!

LITR 161 Introduction to Italian Culture (3 Credit Hours)

This course introduces students to major social, artistic, and intellectual currents in the cultural history of Italy from antiquity to contemporary times. The overall goal is to reflect on how Italian culture has transcended the strict confines of its national origin to become a source of universal values and inspiration. Students will become familiar with differing traditions and cultural perspectives. Students will enhance their reading and critical thinking skills.

Interdisciplinary Option: European Studies, Global Studies, Italian American Studies, Italian Studies

Outcomes:

Students will be able to identify the historical roots of Italian cultural phenomena

LITR 200 European Masterpieces (3 Credit Hours)

Requirement: UCLR 100 for students admitted to Loyola University for Fall 2012 or later. No requirement for students admitted to Loyola prior to Fall 2012 or those with a declared major or minor in the Department of English, Department of Classical Studies, or Department of Modern Languages and Literatures. Major European literary texts will be examined in a historical and cultural context and in their transhistorical, universal aspects that make them masterpieces. Students will understand how literary masterpieces help us develop critical consciousness of our experience.

Knowledge Area: Tier 2 Literary Knowledge

Interdisciplinary Option: European Studies, Global Studies

Course equivalencies: LITR200/INTS200

LITR 202 European Novel (3 Credit Hours)

Requirement: UCLR 100 for students admitted to Loyola University for Fall 2012 or later. No requirement for students admitted to Loyola prior to Fall 2012 or those with a declared major or minor in the Department of English, Department of Classical Studies, or Department of Modern Languages and Literatures. This course will focus on major EUROPEAN novels. Outcome: Students will gain an overview of the literary production of representative EUROPEAN novelists studied in the historical and societal context.

Knowledge Area: Tier 2 Literary Knowledge

Interdisciplinary Option: European Studies, Global Studies

Course equivalencies: LITR202/INTS204

LITR 203 European Drama (3 Credit Hours)

This course will focus on major EUROPEAN novels. Outcome: Students will learn how drama enhances our understanding of human interaction, violence, social order and the margins of individual freedom.

Interdisciplinary Option: European Studies, Global Studies

Course equivalencies: X-LITR203/INTS205

LITR 204 European Film (3 Credit Hours)

This course will focus on major EUROPEAN films in order to give students an overview of the film production of representative EUROPEAN filmmakers studied in the historical and societal context. Outcome: Students will gain an understanding of the distinctive aspects of the major European movements such as Italian neorealism, French new wave, New German Cinema and old and new Spanish surrealism.

Interdisciplinary Option: European Studies, Film & Digital Media Studies, Global Studies, International Film & Media Studies

Course equivalencies: X-LITR204/INTS206/IFMS205

LITR 211 Latina Authors (3 Credit Hours)

The course will examine the writings of Latina authors: women writers from diverse Hispanic backgrounds who make their home in the United States and publish their writings in a particular form of English full of offerings from standard Spanish, "street Spanish", regional speech, and Spanglish. Outcome: Students will gain an understanding of the principal thematic and formal differences and similarities that characterize today's writings by Latina authors.

Interdisciplinary Option: Global Studies

Course equivalencies: LITR211/INTS207

LITR 219 African Film (3 Credit Hours)

This course will survey African film from the 1960s to the present, concentrating on the cinema of Francophone West Africa, the center of the African film industry. Outcome: Students will gain an understanding of the legacies of colonialism, identity formation, corruption and violence in post-colonial society, globalization, the positive and negative effects of tradition, and changing sex roles in modern Africa.

Interdisciplinary Option: Film & Digital Media Studies, Global Studies, International Film & Media Studies

Course equivalencies: X-LITR219/INTS219/IFMS219

LITR 221 Polish Authors (3 Credit Hours)

This course focuses on the major Polish writers from the Renaissance through the Enlightenment and Romantic periods, and into the modern era. Outcome: Students will gain an understanding of the Polish cultural traditional and the basis of Polish cultural identity.

Interdisciplinary Option: European Studies, Global Studies, Polish Studies

Course equivalencies: X-LITR221/INTS221

LITR 225 Russian Masterpieces (3 Credit Hours)

This course will study 18th, 19th, and 20th century Russian literature, including poetry, drama, and fiction. Outcome: Students will learn of the importance of Pushkin, Russia's most influential poet and about influential Russian psychological realists - Gogol, Turgenev, Dostoevsky, Tolstoy and Chekhov.

Interdisciplinary Option: Global Studies

Course equivalencies: X-LITR225/INTS225

LITR 230 German Masterpieces (3 Credit Hours)

Students will study German novels or other literary texts in which German authors explore their historical and human experience and reflect on the process of literary creation. Outcome: Student will gain or enhance their abilities to examine the portrayal of human values in literary texts.

Interdisciplinary Option: European Studies, Global Studies

Course equivalencies: X-LITR230/INTS230

LITR 238 Arabic Literature in Translation (3 Credit Hours)

Requirement: UCLR 100 for students admitted to Loyola University for Fall 2012 or later. No requirement for students admitted to Loyola prior to Fall 2012 or those with a declared major or minor in the Department of English, Department of Classical Studies, or Department of Modern Languages and Literatures. This course is a survey of Arabic literature in translation with a focus on continuity and change, influence, and major trends, themes, and genres. Outcome: Students will gain a foundational knowledge of literature in the Arabic language.

Knowledge Area: Tier 2 Literary Knowledge

Interdisciplinary Option: Arabic Language and Culture, Global Studies, Islamic World Studies

Course equivalencies: LITR238/INTS238/IWS238

LITR 243 South Asian Literature (3 Credit Hours)

This course will explore literature originally written in languages of the Indian sub-continent such as Hindi, Urdu, Bengali, Assamese, or Tamil. Themes such as nationalism, the Partition experience, communal identities, gender and class may be highlighted. Outcome: Students will gain an understanding of how social hierarchies, gendered structures, and religious differences are central issues in the historical and social evolution of South Asian nations.

Interdisciplinary Option: Asian Studies, Global Studies

Course equivalencies: X-LIT243/INTS243/ASIA243

Through case studies, the course applies the principles of strategic analysis to business situations so as to integrate all of the core courses in the undergraduate business program. Pre-requisites: Senior Standing; C- in MGMT 201, MARK 201, (SCMG 332 or SCMG 332H or SCMG 232 or SCMG 232H), and (FINC 301 or FINC 334) Students will also build their skills in conducting strategic analyses in a variety of industries and competitive situations and gain a stronger understanding of the competitive challenges of the market environment.

Course equivalencies: MGMT304/304H

Outcomes:

Students will develop executive and general management skills through an understanding of how the various functions of an organization operate as a whole

MGMT 304H Strategic Management - Honors (3 Credit Hours)

This is a capstone course that analyzes the responsibilities of general management in formulating, communicating and implementing a strategic plan. Through case studies, the course applies the principles of strategic analysis to business situations so as to integrate all of the core courses in the undergraduate business program. Pre-requisites: Senior standing; minimum grade of "C-" in MGMT 201 or MGMT 201H, MARK 201 or MARK 201H, SCMG 332 or SCMG 332H or SCMG 232 or SCMG 232H, and FINC 301 or FINC 334 or FINC 334H; restricted to SBA honors students. Students will also build their skills in conducting strategic analyses in a variety of industries and competitive situations and gain a stronger understanding of the competitive challenges of the market environment.

Course equivalencies: MGMT304/304H

Outcomes:

Students will develop executive and general management skills through an understanding of how the various functions of an organization operate as a whole

MGMT 315 International Management (3 Credit Hours)

Pre-requisites: Junior Standing, minimum grade of "C-" in MGMT 201

This course analyzes the problems of managing in an international marketplace by focusing on cultural differences, political/economic influences, global market factors, and other contingencies with which managers of multinational enterprises must contend. Outcome: Students will be able to demonstrate an understanding of the major theoretical perspectives and frameworks underlying international management, as well as evaluate and develop international and cross-cultural skills through self-observation and reflection.

Interdisciplinary Option: Global Studies, International Business

Course equivalencies: X-MGMT315/INTS315

MGMT 318 Organizational Development and Change (3 Credit Hours)

Pre-requisites: Junior Standing, minimum grade of "C-" in MGMT 201 or HSM 368

This course examines the theory and practice of organizational development and change, with an emphasis on effective change management. Outcome: Students will understand the complexity of change in organizations and learn how to use change interventions to manage different types of organizational changes, including the redesign of jobs and restructuring.

MGMT 320 Leading and Managing Teams (3 Credit Hours)

Pre-requisites: Junior Standing, minimum grade of "C-" in MGMT 201

This course examines the characteristics of effective teams and team players in an organizational context and covers theories and concepts of team composition, roles and leadership, decision making, team charters, conflict management, team networks and international teams. Outcome: Students will gain an understanding of team processes and team performance in organizations, learn tools that make teams effective, develop team skills and practice creating, monitoring and improving an ongoing team effort.

MGMT 321 International Business Ethics (3 Credit Hours)

Pre-requisites: Sophomore standing; minimum grade of C- in MGMT 201 and ECON 202

No course description is available

Course equivalencies: PHIL185/283/MGMT341/H/BHNR341

MGMT 331 Managing Nonprofit Organizations (3 Credit Hours)

Students will learn the knowledge, skills, and values for managing nonprofit organizations. We will examine how non-profits develop their mission, strategic plan, and program model, as well as how they fund their efforts and continuously improve their performance. Students will apply their knowledge through case study explorations of different Chicagoland non-profits. MGMT 201 required as a Prerequisite or Co-requisite Students will demonstrate an understanding of the evolving non-profit sector; students will demonstrate an analytic ability to assess non-profit strategy; students will understand the management skills needed at high-performing non-profits

MGMT 335 Micro-enterprise Consulting (3 Credit Hours)

Pre-requisites: Junior Standing, minimum grade of "C-" in MGMT 201 Instructor permission. In the Jesuit tradition of using knowledge to serve humanity, students utilize and improve their business knowledge and skills by meeting the real-life business consulting needs of individual entrepreneurial and not-for-profit clients starting up or operating businesses in economically distressed communities. Outcome: Students improve skills in service-oriented communication, project management, teamwork, and cross-functional business analysis; and learn how locally-owned business can foster community economic development. Consulting clients receive a feasibility analysis or business plan to help guide business operations and obtain financing for a new or struggling business.

This course satisfies the Engaged Learning requirement.

MGMT 341 Ethics in Business (3 Credit Hours)

This course focuses on ethical issues in the world of business and commerce. This course will address a number of interrelated questions: What are the rights and obligations of business in society? Can businesses "do good" and "do well"? Is business ethics a viable goal or an unachievable ideal? *Pre-requisites:* Junior standing; minimum grade of C- in MGMT 201 or HSM 368 and ECON 202.

Course equivalencies: PHIL185/283/MGMT341/H/BHNR341

MGMT 341H Ethics in Business - Honors (3 Credit Hours)

Pre-requisites: Junior standing; minimum grade of "C-" in MGMT 201 or MGMT 201H and ECON 202 or ECON 202H; restricted to SBA honors students

This course focuses on ethical issues in the world of business and commerce. This course will address a number of interrelated questions: What are the rights and obligations of business in society? Can businesses "do good" and "do well"? Is business ethics a viable goal or an unachievable ideal?

Course equivalencies: PHIL185/283/MGMT341/H/BHNR341

MGMT 345 Ethics, Economics & Entrepreneurship (3 Credit Hours)

Pre-requisite: Junior Standing, 'C-' or better in MGMT 201 The entrepreneur has been reviled as a social parasite and cheered as a moral hero. Through an examination of some classic works on entrepreneurship and the writings of our guest speakers, in Ethics, Economics, and Entrepreneurship we will take up three main questions: Who is the entrepreneur - that is, what activities or characteristics make one an entrepreneur? Why did the entrepreneur largely disappear from intellectual discourse in the middle 20th century? How ought we to evaluate the entrepreneur morally - and does the answer depend upon who we understand the entrepreneur to be?

MGMT 360 Values-Based Leadership (3 Credit Hours)

Pre-requisites: Junior Standing, minimum grade of "C-" in MGMT 201 An examination of several major approaches to leadership that are based on personal and organizational values. Outcome: Students will understand major approaches to leadership, examine their own values and approach to leadership and improve their leadership skills.

Course equivalencies: MGMT360/360H

MGMT 395 Independent Study in Management (1-3 Credit Hours)

Pre-requisites: Junior standing; Instructor and Dean permission

No course description is available

This course satisfies the Engaged Learning requirement.

MGMT 399 Special Topics in Management (1-3 Credit Hours)

Pre-requisites: Junior standing

No course description is available

MGMT 400B Values-Based Leadership (1.5 Credit Hours)

This course will explore major approaches to leadership that are based on personal and organizational values. Students will have an opportunity to explore their own values and approach to leadership and be challenged to identify opportunities for improvement.

Outcomes:

Students will: 1) learn and understand fundamental and diverse principles and theories of leadership and management; 2) develop a clearer understanding of and commitment to personal values as a way of developing a sound basis for making personal and professional decisions; 3) apply what they learn in this course to clarify thinking on leadership and to solve problems in the future; 4) learn to analyze and critically evaluate different ideas, concepts and points of view on the concepts of leadership and management; 5) develop a personal style that will begin to answer the question "What kind of leader do I want to be?"; and 6) Understand the meaning of "vocation" and how it applies to each student's life

MGMT 401B Innovative Corporate Social Responsibility (1.5 Credit Hours)

This course will analyze why and how global businesses are innovating to address corporate responsibility expectations. The course will focus on companies that are co-creating value and will examine impacts from businesses, civil society and public policy that enhance (or detract from) competitiveness. Outcomes Students will be able to: 1) examine the interaction between market and civil society institutions in the development of corporate responsibility initiatives; 2) demonstrate understanding of changing legal, social, and political environments as they affect organizations; and 3) analyze organizational situations, identify key issues, and formulate arguments and appropriate ways to innovatively implement changes.

MGMT 402B Social Enterprise (1.5 Credit Hours)

Social enterprise seeks to create ventures that provide critical social services in innovative ways using the concepts and methods of business. This course aims to prepare students to engage in social enterprise by focusing on how to create social value by business means; how to start and sustain an entrepreneurial social venture; how to scale social innovation and grow an organization; how to obtain funding and generate earned revenue; how to adopt an appropriate legal governance structure and tax status; and how to measure, document, and communicate social impact.

Outcomes:

Students will demonstrate: 1) an understanding of the social enterprise sector, including what distinguishes social entrepreneurship from both traditional social services and traditional entrepreneurship; 2) a strategic understanding of how social enterprises succeed; 3) the ability to use analytical tools to develop and measure the impact of social enterprise models; and 4) the ability to formulate their ideas into a social enterprise model presentation

MGMT 403B Creating Ethical Work Environments (1.5 Credit Hours)

This course will explore how companies create and sustain ethical work environments and challenge students to systematically think about ethical dilemmas in human resources. The course will explore ethical practice across four areas of human resources: 1) acquiring employees (employment planning, recruitment, and selection); 2) developing employees (training, mentoring, performance feedback); 3) rewarding employees (salary, incentives, benefits); and 4) managing employment relations (unions, safety). The course will include an emphasis across these areas on diversity, inclusion, and social responsibility. Outcomes Students will: 1) have familiarity with major ethical issues in human resources; 2) understand how companies make ethical human resources decisions aligned with their values; and 3) demonstrate knowledge of current human resource approaches to diversity, inclusion, and social responsibility.

MGMT 404B ESG Investing (1.5 Credit Hours)

This course will explore the growing integration of environmental, social and governance (ESG) factors into global investment decision-making. Students will learn about: 1) the history and growth of ESG in investing; 2) how to assess a company's climate impact, water management, health and safety policies, supply chain integrity and other ESG factors in the context of financial risk and performance analysis; and 3) how companies can improve their ESG performance.

Outcomes:

Students will: 1) understand why ESG factors influence a company's financial performance; 2) assess a company's ESG performance; and 3) develop recommendations for ESG improvement

MGMT 405B Sustainable Business Management (1.5 Credit Hours)

Outcome: Understand the dimensions of sustainability; understand economics for sustainability; understand the tools and techniques to apply sustainability in each functional area of the business.

MGMT 406B Influential Leadership (1.5 Credit Hours)

This course will equip students with the tools to be influential leaders by better understanding their own leadership styles, further developing their emotional intelligence, and learning how to best apply their styles effectively in the workplace. Students will be able to: 1) identify their personal leadership styles; 2) know how to apply their leadership most effectively in different organizational contexts with an emphasis on emotional intelligence; and 3) demonstrate familiarity with coaching techniques to improve personal and team performance.

MGMT 407B Impact Investing (1.5 Credit Hours)

This course will explore the rise of investments aimed simultaneously at social, environmental, and financial returns. Students will: 1) understand how impact investing works and the growing spectrum of investment firms with impact investing strategies; and 2) be able to evaluate an investment with an SROI (social return on investment) framework.

MGMT 426N Leadership Development (1.5 Credit Hours)

Leader development is a systematic process that outlines self-improvement goals and strategies to assist leaders to take advantage of opportunities. Development planning consists of identifying development needs, prioritizing development needs, building a development plan, and modifying the development plan. Restricted to School of Business graduate students Develop an understanding of the skills that are necessary to be an effective leader. 2. Create a development plan to become a more effective leader and responsible leader who exhibits personal integrity and ethical awareness.

Outcomes:

1

MGMT 430B Strategy and Leadership (3 Credit Hours)

The MBA Capstone explores the manner in which companies develop and implement a strategic plan and examines characteristics of effective general managers and leaders. This course is restricted to students in the MBA program and should be taken during the student's final quarter. Students will also sharpen their team, analytical, writing, and presentation skills and begin to evaluate the type of leadership skills they will need to move into increasingly more responsible positions inside organizations.

Outcomes:

Students will develop an explicit personal way of thinking about the business enterprise as a total system and the manner in which it can gain a sustainable competitive advantage by drafting a complete business plan for a start-up entity

MGMT 430E Capstone (1.5 Credit Hours)

Enrollment is restricted to students in the Executive MBA Program. Brings all of the learning together from the program as it concludes. This course builds on the Entrepreneurship course by having teams prepare a complete business plan for the concept they have developed.

Course equivalencies: MGMT610E/MGMT430E

MGMT 430N Strategy and Leadership (3 Credit Hours)

Pre-requisites: Graduate School of Business Student; MGMT 425N, 426N; ISSCM 595N, ISSCM 596N, ISSCM 484N

No course description is available

MGMT 431N Business Consulting Course (3 Credit Hours)

Pre-requisites: Graduate School of Business Student; MGMT 425N, 426N; ISSCM 595N, ISSCM 596N, ISSCM 484N Outcomes: 1

This applied fieldwork project provides an opportunity to apply the knowledge and skills learned in the classroom to a client. The student teams will work directly with companies to create implementable business solutions. Increase proficiency in integrating the techniques, processes and procedures of the fundamental business disciplines. 2. Learn to apply the theory, skills, and knowledge from the business disciplines to business practice. 3. Demonstrate an innovative, entrepreneurial approach to management decisions.

MGMT 441 Business Ethics (3 Credit Hours)

This course examines the ethical aspects of individual and corporate decision making in business and provides resources for making ethical decisions within the context of managerial practice. Outcome: Students will be acquainted with the concepts and principles of ethical reasoning that have been developed in ethical theory; be aware of the specific ethical issues that arise in management and of the ways in which these issues are commonly analyzed; and be able to make sound ethical and managerial decisions and to implement those decisions within the context of an organization in a competitive marketplace.

MGMT 441B Business Ethics (1.5 Credit Hours)

This course examines the ethical aspects of individual and corporate decision making in business and provides resources for making ethical decisions within the context of managerial practice. Outcome: Students will be acquainted with the concepts and principles of ethical reasoning that have been developed in ethical theory; be aware of the specific ethical issues that arise in management and of the ways in which these issues are commonly analyzed; and be able to make sound ethical and managerial decisions and to implement those decisions within the context of an organization in a competitive marketplace.

MGMT 441N Business Ethics (3 Credit Hours)

Students are introduced to theories about social and political institutions, and how they affect our ability to make moral decisions. Topics may include: social psychology, capitalism and its critics, democratic theory, labor relations, and social inequalities. Classes are dedicated to understanding and engaging with social and political theory on this topic. Assignments will involve students using these theories to critically assess corporate practices and contexts. School of Business graduate degree students Communication Skills: communicating complex moral and philosophical ideas effectively and appropriately in an oral and written manner.

Outcomes:

Global Perspective & Awareness of Diversity: developing a global perspective and appreciating diversity, including class, culture, race, religion, and gender

Enrollment is restricted to students in the Executive MBA Program. Explores the complexity and dynamics of change in organizations. Topics covered include organization development, managing resistance, and change leadership.

Course equivalencies: MGMT 602E/MGMT 472M

MGMT 474E Strategic Management (1.5 Credit Hours)

Enrollment is restricted to students in the Executive MBA Program. This course introduces and develops strategic techniques to facilitate an organization's articulation of its mission and goals and its formation, implementation, and evaluation of key strategies. Additional topics include: strategic thinking, competitive advantage, vertical and horizontal integration, and planning horizon.

Course equivalencies: MGMT 604E/MGMT474E

MGMT 475 Cross-Cultural Dimensions of Intl Mgmt & Marketing (3 Credit Hours)

This course examines cross-cultural management and marketing topics both within the business organization and across the global marketplace. Outcome: Students learn how differences in national and ethnic cultures affect the behavior of employees working in organizations, managers making business decisions and consumers making product choices. Special note: MGMT 475 is cross-listed with MARK 475.

Course equivalencies: X-MARK475/MGMT475

MGMT 477 Family Business (3 Credit Hours)

This course examines the family, ownership and management challenges involved in operating a family business, including governance and leadership succession.

Outcomes:

Students will be able to analyze the stumbling blocks to family business succession, compare differences between family and non-family owned firms and understand the impact of systems of family ownership and management on a firm's stakeholders and advisors

MGMT 479 Independent Study in Management (3 Credit Hours)

Student will conduct in-depth research or reading, initiated by the student and jointly developed with a faculty member, into a specialized area of management not otherwise covered by department course offerings.

Outcome: Students will be able to demonstrate in-depth understanding of a specialized area or topic in management.

MGMT 480 Recognizing Entrepreneurial Opportunities (3 Credit Hours)

This course will focus on the very early stages of the entrepreneurial process. We will discuss how new opportunities are discovered and how societal value is created throughout this process. In its approach, the course will be based on classic theoretical readings, the insights of economics, strategic management, organizational studies, psychology and cognitive science.

Outcomes:

Apply analytical and critical thinking skills to identify untapped entrepreneurial opportunities

MGMT 481 Entrepreneurship (3 Credit Hours)

This course enables the students to develop their new venture ideas. We discuss how to cultivate new business ideas, form venture teams, evaluate the opportunities, and design a firm to bring the ideas to life. At the end, each venture team produces a business plan. This course will help those who might want to start their own business in the future. It will also help those who will work for existing companies by encouraging them to think more strategically and creatively about business.

Outcomes:

The students learn how all major functions of a business come together in a new venture

MGMT 481E Innovation and the Entrepreneurial Mindset (1.5 Credit Hours)

Enrollment is restricted to students in the Executive MBA Program. Introduces the tools necessary for an individual to determine a relevant business concept and prepare to form a business to take that concept to market.

Course equivalencies: MGMT 607E/MGMT 481E

MGMT 482 Entrepreneurial Marketing (3 Credit Hours)

This course is about the marketing challenges in an entrepreneurial firm. Entrepreneurship is the discovery, enactment and pursuit of new business opportunities. Successful execution of an entrepreneurial idea requires a sound marketing plan. In this course, we will investigate how marketing tools can enable entrepreneurs to realize the full potential of their ideas."

MGMT 483 Strategic Entrepreneurship and Innovation Management (3 Credit Hours)

This course will focus on the application of strategic management tools to entrepreneurial situations with an emphasis on the early stages of new venture creation. We will discuss how new opportunities are discovered, how inventions are turned into innovations, and how societal value is created throughout this process. At the end of this course, you will be able to: Recognize and discover entrepreneurial opportunities; Manage the creation and appropriation of the value generated by innovations; Apply analytical and critical thinking skills in an uncertain business environment; Apply your learning in a real-life project.

MGMT 485 Social Enterprise (3 Credit Hours)

Social enterprise seeks to create ventures that provide critical social services in innovative ways using the concepts and methods of business. This course aims to prepare students to engage in social enterprise by focusing on how to create social value by business means; how to start and sustain an entrepreneurial social venture; how to scale social innovation and grow an organization; how to obtain funding and generate earned revenue; how to adopt an appropriate legal governance structure and tax status; and how to measure, document, and communicate social impact.

MGMT 499 Special Topics in Management (3 Credit Hours)

Pre-requisites: Graduate Business Student

MGMT 573 Business Strategy (3 Credit Hours)

This course analyzes the responsibilities of general management in formulating, communicating, and implementing a strategic plan. Whereas corporate strategy (MGMT 574) defines the vertical and horizontal scope of a firm, business strategy (MGMT 573) is concerned with how the firm generates and sustains competitive advantage within a particular industry or product market. Students will develop executive and general management skills through an understanding of how the various functions of an organization operate as a whole. Through case studies, students will also build their skills in conducting strategic analyses in a variety of industries and competitive situations and gain a stronger understanding of the challenges of the business environment.

MGMT 574 Corporate Strategy (3 Credit Hours)

This course focuses on the strategic management of multi-business firms. Whereas business strategy or competitive strategy is concerned with how the firm competes within a particular industry or product market, corporate strategy defines the scope of the firm in terms of the industries and markets in which it competes.

MGMT 602E Organizational Change & Development (1.5 Credit Hours)

Explores the complexity and dynamics of change in organizations. Topics covered include organization development, managing resistance, and change leadership.

Course equivalencies: MGMT 602E/MGMT 472M

MGMT 605E Conflict Management & Negotiation (1.5 Credit Hours)

Students participate in hands-on exercises designed to increase their knowledge of conflict resolution and negotiation techniques.

Course equivalencies: MGMT 605E/HRER 511E

MGMT 606E International Immersion (3 Credit Hours)

Students take an international trip to two countries to gain a better understanding of the opportunities and challenges and opportunities related to international business endeavors.

MGMT 607E Entrepreneurship (1.5 Credit Hours)

Introduces the tools necessary for an individual to determine a relevant business concept and prepare a business concept for the marketplace.

Course equivalencies: MGMT 607E/MGMT 481E

MGMT 610E Capstone (1.5 Credit Hours)

Enrollment limited to students in MBA for Executives program.

This course brings together all of the learning from the program as it concludes. Students prepare and present a complete business plan for the concept they developed in the Entrepreneurship course (MGMT 607E).

Course equivalencies: MGMT610E/MGMT430E

Marketing (MARK)

Discover, search, courses!

MARK 201 Principles of Marketing (3 Credit Hours)

Pre-requisites: Sophomore standing

This course develops an understanding of the marketing systems by which organizations plan, price, promote and distribute products and services to selected target markets. Outcome: Students analyze market conditions and apply the basic tools to develop marketing strategies to successfully meet the customers' needs resulting in a viable, profitable organization.

Course equivalencies: MARK201/201H/301/CPST340

MARK 201H Principles of Marketing - Honors (3 Credit Hours)

Pre-requisites: Sophomore standing or above; Restricted to SBA honors students

This course develops an understanding of the marketing systems by which organizations plan, price, promote and distribute products and services to selected target markets.

Course equivalencies: MARK201/201H/301/CPST340

Outcomes:

Students analyze market conditions and apply the basic tools to develop marketing strategies to successfully meet the customers' needs resulting in a viable, profitable organization

MARK 310 Consumer Behavior (3 Credit Hours)

Pre-requisites: Junior standing, minimum grade of "C-" in MARK 201

This course develops an understanding of how consumers behave before, during and after the consumption process through a discussion of cultural, social and perceptual factors. Outcome: Students evaluate consumer behavior and apply their understanding in the creation of a marketing plan designed to improve the brand equity of a firm.

MARK 311 Marketing Research (3 Credit Hours)

Pre-requisites: Junior standing, minimum grade of "C-" in MARK 310 and ISSCM 241

This course develops an understanding of the research process from problem formulation through research report preparation. Both qualitative and quantitative research methodologies are discussed. The focus is on using research results in marketing decision making. Empirical data are analyzed using state of the art analytical tools. Data collection and analysis is discussed. Cases, exercises and/or a written research proposal or report is a primary outcome of the course.

This course satisfies the Engaged Learning requirement.

Outcomes:

Students identify managerial problems, research objectives, design data collection instruments, and sampling procedures

MARK 312 Gender and Marketing (3 Credit Hours)

Pre-requisites: Junior standing; Minimum grade of "C-" in MARK 201

Outcomes: Understand how marketing strategy reflects and shapes socio-cultural norms so that you can build strategies that reflect and shape those norms

How do the 4Ps of Marketing, product, price, place, and promotion, influence gender, and how does gender influence the 4Ps? Students will learn how to address the relationship between Gender and Marketing. Example topics may include, but are not limited to, Masculinity, Media, and Marketing, Women, Media, and Marketing, and Millennials, Gender and Marketing. Learn how research on social trends is conducted and how it is used in strategy, so that you can perform such research in marketing contexts.

MARK 320 Marketing for Environmental Sustainability (3 Credit Hours)

Pre-requisites: MARK 201 and Junior Standing *Outcomes:* Provide students with the knowledge and skills needed to develop marketing products that contribute to environmental sustainability

The course shows students how to use marketing to address the complexities of sustainability including: climate change, poverty, food shortages, oil depletion and species extinction. Design-for-environment, full-cost pricing, greening the channels of distribution and life-cycle impact are some of the concepts covered in this course.

MARK 321 Ignatian Design Thinking (3 Credit Hours)

This course will provide an in-depth look into the role design thinking plays in our Ignatian tradition for servant leadership. Through human-centered design practices, we will explore our Ignatian imagination to seek and solve for our world's grandest challenges. *Pre-requisites:* Minimum grade of C- in MARK 201 and Junior standing.

This course satisfies the Engaged Learning requirement.

Outcomes:

An understanding in the scope and application of human-centered design as a Mindset and a Method

MARK 323 Personal Selling (3 Credit Hours)

Pre-requisites: Junior standing, minimum grade of "C-" in MARK 201

This course develops an understanding of the role of personal selling and sales force management, which are extremely critical in business-to-business marketing strategies, and the ethical and legal responsibilities of sales managers. *Outcome:* Students develop skills in sales force organization and sales techniques as well as in the recruiting, selecting, training, motivating, compensating and evaluating sales people.

MARK 334 Services Marketing (3 Credit Hours)

Pre-requisites: Junior standing and minimum grade of C- in MARK 201 *Differentiate* between product & service characteristics; understand, analyze, develop, modify employee behavior in a service environment, identify critical issues to service design, understand importance of facility location

Service organizations (e.g. banks, transportation companies, hotels, hospitals, educational institutions, & professional services) require a distinctive approach to marketing strategy in both development and execution. Also, the course focuses on the role of service in manufacturing businesses. The course will cover why people are essential to service success.

MARK 360 Retailing Management (3 Credit Hours)

Pre-requisites: Junior standing, minimum grade of "C-" in MARK 201

This course develops an understanding of retailing and the role that retailing plays in the marketing system and in marketing strategies. *Outcome:* Students analyze and develop retail strategies that fit and support overall marketing strategies.

MARK 363 International Marketing (3 Credit Hours)

Pre-requisites: Junior standing, minimum grade of "C-" in MARK 201

This course develops an understanding of how marketing strategies are developed in the global environment. *Outcome:* Students evaluate cultural, governmental, economic and competitive conditions to illustrate how these factors impact an organization's marketing strategy. Attention is paid to the positive and negative consequences of globalization.

Interdisciplinary Option: Global Studies, International Business

Course equivalencies: X-MARK363/INTS363

MARK 367 Multicultural Marketing (3 Credit Hours)

Pre-requisites: Junior Standing, minimum grade of "C-" in MARK 201

In this course, we address (1) past and current knowledge on multicultural marketing, (2) important challenges with respect to marketplace diversity and inclusion, and (3) what approaches can be used to construct better marketing plans and tactics.

Outcomes:

Students should have a working knowledge of the principal theories and research findings in multicultural marketing and should be able to integrate and apply this knowledge with respect to effective strategies for marketplace diversity and inclusion

MARK 370 Political Marketing (3 Credit Hours)

Pre-requisites: Junior standing, minimum grade of "C-" in MARK 201

No course description is available

Interdisciplinary Option: International Business, International Studies

MARK 373 Integrated Marketing Communications (3 Credit Hours)

Pre-requisites: Junior standing, minimum grade of "C-" in MARK 201

This course develops an understanding of advertising strategy and advertising campaigns, including the external environment, how agencies are structured and how consumer metrics are integrated. *Outcome:* Students develop skills in managing the integration of media, strategy and creative design in developing sound advertising campaigns. This course satisfies the Engaged Learning requirement.

MARK 380 Digital Marketing (3 Credit Hours)

Pre-requisites: Junior standing, minimum grade of "C-" in MARK 201

Emphases is on strategies and tactics for creating, retaining, and enhancing customer relationships via the World Wide Web, and on integrating the digital environment into the marketing mix. In addition to learning fundamental principles of the digital channel, students will apply the learned principles of the digital channel in a class project. Readings, lectures, and industry professionals may be used to provide insights and relevance to this area of marketing.

Outcomes:

Students will be able to analyze and assess online marketing platforms and develop an integrated digital marketing plan

MARK 390 Marketing Strategies (3 Credit Hours)

This capstone course develops an understanding of all marketing decisions involved in planning marketing strategies. *Pre-requisites:* Senior standing, minimum grade of "C-" in MARK 310, (FINC 301 or FINC 334 or FINC 334H), (SCMG 332 or SCMG 332H or SCMG 232 or SCMG 232H), and prior or concurrent enrollment in MARK 311.

Course equivalencies: MARK390 / MARK324

Outcomes:

Students develop a comprehensive marketing plan by applying skills in financial analysis, competitive scanning, and appropriate marketing strategies

MARK 395 Independent Study (1-3 Credit Hours)

Pre-requisites: Junior standing; Instructor and Dean permission
Independent Study is an in-depth research or reading, initiated by the student and jointly developed with a faculty member, into a specialized area of marketing not otherwise covered by the department course offerings. Outcome: Varies with topic.

MARK 399 Special Topics in Marketing (1-3 Credit Hours)

Pre-requisites: Junior standing
Special Topics are scheduled classes offered on an ad hoc basis. Specific titles and content will vary. Outcome: Varies with topic.

MARK 425N Business Communication (1.5 Credit Hours)

Effective communication skills are important because they give leaders and followers the ability to transmit and receive information with a high probability that the intended message is passed from sender to receiver. Good leaders communicate ideas, articulate arguments, advocate positions, solicit ideas from others, and persuade others. Restricted to School of Business graduate students. Learn to communicate effectively in an oral presentation. 2. Develop specific skills to enhance effective professional interpersonal communication as well as written and oral communication.

Outcomes:

1

MARK 460 Marketing Management (3 Credit Hours)

This course develops a broad understanding of the marketing principles that undergird successful marketing strategies and marketing plans with special attention given to international and ethical considerations. Outcome: Students use and apply marketing principles, strategic research, consumer analysis and target marketing to either a project or to case studies.

MARK 460B Marketing Management (3 Credit Hours)

This course develops a broad understanding of the marketing principles that undergird successful marketing strategies and marketing plans with special attention given to international and ethical considerations. Outcome: Students use and apply marketing principles, strategic research, consumer analysis and target marketing to either a project or to case studies.

MARK 460E Marketing Management/International Management (3 Credit Hours)

Enrollment is restricted to students in the Executive MBA Program. Introduces use of strategic research, customer analysis, target market, and the application of marketing tools to a variety of case problems. Emphasis is placed on product planning, pricing policies, promotional methods, and distribution channels. Considers cultural, governmental, economic, business, and environmental factors affecting the marketing of goods and services globally.

Course equivalencies: MARK600E/MARK460E

MARK 461 Research Methods in Marketing (3 Credit Hours)

This course develops an understanding of the marketing research process and the role of survey research in it. *Pre-requisite:* MARK 460
Outcome: Students formulate research problems and a design research study, including the development of a questionnaire, selection of an appropriate sample and data analysis.

MARK 463 Sales and Strategic Leadership (3 Credit Hours)

Pre-requisites: MARK 460

This course develops an understanding of the tools and techniques required for developing a sales force and for managing revenue generation within organizations. Outcome: Students apply processes for hiring and managing sales professionals; tools for successful account management; and skills in solving revenue generation problems facing profit and non-profit organizations.

MARK 464 Integrated Marketing Communication (3 Credit Hours)

Pre-requisites: MARK 460; MARK 467 is recommended

This course develops an understanding of how advertising, sales promotion, public relations, personal selling and in some cases packaging decisions form a coordinated marketing communications plan.

Outcomes:

Students apply the elements of integrated marketing communications and develop a coordinated Marketing Communications plan for a project or case study

MARK 465 International Marketing (3 Credit Hours)

Pre-requisites: MARK 460 or by Department Consent

This course develops an understanding of marketing problems in an international context with particular attention given to how international factors impact consumers, competition, and marketing strategies. Outcome: Students apply the principles of marketing to solve marketing problems in an international context. Students analyze cases and identify optimal solutions to international marketing problems

MARK 467 Consumer Behavior (3 Credit Hours)

Pre-requisites: MARK 460

This course develops an understanding of how consumers behave before, during, and after the consumption process by exploring both the micro-level mental processes that impact consumer decision-making as well as the macro-level cultural and social influences on consumer behavior.

Outcomes:

Students apply course concepts and theories to develop a consumer analysis and marketing strategies for a firm or non-profit organization

MARK 468 Digital Marketing (3 Credit Hours)

Pre-requisites: MARK 460 or by Department Consent

This course develops an understanding of the Internet as part of an overall marketing strategy by considering the ways in which the Internet has changed marketing and business. The course covers topics such as online consumer behavior, web analytics, online advertising, email, social media, mobile, and search engine marketing (paid and organic). In addition to learning fundamental principles of digital channels, students will apply the learned principles in a class project; example projects include creating a paid search campaign for a client, running a digital marketing simulation, writing a digital marketing plan, or conducting a social media audit. Outcome: Students develop the power to act effectively by using technology in increasingly complex buying environments.

MARK 469 Indp Study-Marketing Mgmt (3 Credit Hours)

Pre-requisites: MARK 460

Independent study is in-depth research or reading, initiated by the student and jointly developed with a faculty member, into a specialized area not otherwise covered by department course offerings. Variable credit. Permission of area coordinator required. Special Topics are scheduled classes; specific titles and content will vary. Outcome: Varies with course of study selected.

MARK 470N Research, Insights and Storytelling (3 Credit Hours)

Students will learn to monitor trends and shifts in the socio-cultural landscape, identify relevant market information, gather consumer research and translate into actionable strategies through storytelling. Pre-requisites: MARK 460 or equivalent. Enrollment limited to MBA Students. Collect, analyze & glean insights from data. Apply & translate insights into compelling stories for actionable business outcomes & social impact.

Outcomes:

Understand research process & approaches

MARK 472E Market Opportunity Analysis (1.5 Credit Hours)

Enrollment is restricted to students in the Executive MBA Program. Enables students to discover market opportunities and business relationships that are critical to sustainable business growth. Course will challenge students to move away from "copy cat" business ideas to innovative business solutions.

Course equivalencies: MARK 604E/MARK472E

MARK 561 Comparative Consumer Behavior (3 Credit Hours)

Pre-requisites: MARK 460 This course develops an understanding of the marketing implications of cultural differences and similarities between the people of two or more nations and considers two opposing views of marketing scholars as to whether the similarities or the differences are the more important factor

Outcome: Students apply methods of cross-cultural analysis as well as examine frameworks for assessing multinational strategies.

MARK 562 Database Marketing Strategy (3 Credit Hours)

Pre-requisites: MARK 460

This course develops an understanding of the development and use of databases for marketing, retrieval of appropriate data and analysis of that data to increase marketing effectiveness. Outcome: The student will perform database manipulation and analysis of data. Analysis includes at least univariate analysis, cross-tabulation, creation of new variables, regression analysis and recency-frequency-monetary analysis.

MARK 564 Brand Equity and Marketing Strategy (3 Credit Hours)

Pre-requisites: MARK 460 or by Departmental Consent This course develops an understanding of the way firms may increase their share of market and profits by creating, building, and managing strong, unique, and favorable brand equity for their products and services

Outcome: Students develop a Brand Plan, evaluating the contributions of traditional brand elements, and develop a framework for creating the marketing strategies required for successfully building and managing brand equity.

MARK 566 Integrated Media Planning (3 Credit Hours)

The course provides an overall understanding of media planning: basic media concepts, buying and selling of media, development and evaluating effective media strategies and plans, and the role that media plays in an integrated marketing and communications plan. The course is recommended for students with little or no media planning experience.

MARK 567 Customer Relationship Management (3 Credit Hours)

Pre-requisites: MARK 460; MARK 468 is recommended

This course develops an understanding of CRM as a business philosophy that involves acquiring new customers as well as maintaining long-term and profitable relationships with existing customers. Key concepts such as customer experience, customer satisfaction, loyalty, customer lifetime value, among others, will be explored. Outcome: Students conduct an analysis and critique of a firm's CRM strategy and provide recommendations for improving the customer-firm/customer-brand relationship.

MARK 568 Social Media & Content Marketing (3 Credit Hours)

Pre-requisites: MARK 460

This course examines the connection between social media and content marketing for the purposes of branding, acquisitions, customer retention, employee recruitment, and other important organizational initiatives.

Assess, implement, and leverage tools to build community and attract customers. Prove the ROI of any social media or content marketing effort.

Outcomes:

Develop social media and content marketing strategies that drive value

MARK 569 Special Topics: (3 Credit Hours)

Pre-requisites: MARK 460 Scheduled classes are offered on an ad hoc basis

Specific titles, prerequisites and content will vary. Outcome: Students will be able to demonstrate understanding of specialized topics not otherwise covered by department regular course offerings

MARK 661 Customer Analytics (3 Credit Hours)

Pre-requisites: MARK 460, ISSCM 491, HRER 417, and MARK 461

Suggested Additional Prerequisites: INFS 492, INFS 791 and FINC 620

Through applications of statistical models to the analysis of the real-world databases, the students will learn how firms may use customer data to serve customers better

In this course the students will study how to use data analytics to learn about customer needs and improve targeting individual consumers.

The course will encourage students to apply scientific methods and models to predict and respond to customer choices. This is the key part of learning Big Data. The term Big Data is viewed in the broad sense as it relates to various aspects of the consumer behavior, which may be captured, measured, and transformed to the digital form.

MARK 662 Marketing Metrics (3 Credit Hours)

Pre-requisites: MARK 460, ISSCM 491, HRER 417, and MARK 461

Suggested Additional Prerequisites: INFS 492, INFS 791 and FINC 620

Learning Outcomes: The objectives of this course are the following: 1 This course is designed with marketing managers in mind. As profession marketing is evolving, it is no longer based primarily on the conceptual content. Marketers get exposed to thousand times the volume of data she(he) saw five years ago. More data cannot lead to better decision making unless managers learn how to use that data in meaningful ways. In this course, the students will be introduced to the analytical decision models that assist modern managers in making marketing decisions related to the targeting, product design, communications, etc. To learn analytical techniques and decision models for enhancing marketing decision making in the modern organizations 2. Improve skills to viewing marketing processes and relationships systematically and analytically 3. To learn power of decision models applied in the real managerial contexts 4. To provide students with toolkit that may be used to assess and measure return on marketing investments in organizations

Master of Public Health (MPBH)

Discover, search, courses!

MPBH 400 Determinants of Population Health (3 Credit Hours)

This course will introduce students to the public health perspective population perspective. A major focus of the course is understanding the fundamentals of health disparities and how they are produced and reproduced, and how simple solutions to our most pressing public health problems are unlikely to succeed. Graduate standing in the MPH or Public Health Certificate Program, or permission of instructor.

MPBH 401 Environmental Health (3 Credit Hours)

This course is designed as an introduction to environmental public health issues, laws, regulations, research, and advocacy. Environmental factors including biological, physical and chemical factors that affect the health of a community will be presented. The environmental media (air, water and land) and various community exposure concerns will also be presented. The course will utilize available internet resources to access environmental data, and focus related research. A team project will be completed requiring literature review and presentation and critical assessment of a successful (or unsuccessful) environmental advocacy campaign.

Course equivalencies: X-ENVS301/PUBH301/MBPH401

MPBH 402 Public Health Practice and Management (3 Credit Hours)

This course will provide an introduction to public health practices and cover management basics as applied to the public health field. The topics covered in the course will be examined through the lenses of prevention, social justice and the role of governmental public health. In Part I of the course, we will study basic public health concepts, core public health functions and practices, public health infrastructure at the local, state and federal levels, and the major areas of public health services and interventions. In Part II, we will cover management principles and functions such as planning, organizing, controlling and leading. We will apply these concepts to the administration of public health organizations.

MPBH 403 Introduction to Epidemiology (3 Credit Hours)

Epidemiology is the study of the distribution and determinants of disease in populations and remains the basic science of public health. This methodology is unique to epidemiology, and in some cases, has even been appropriated by other fields. The objective of this course is to familiarize students with the range of tools used to conduct epidemiologic analysis, including design and measures of association. This course will be taught as an online course combined with an intensive interactive session with faculty and students one weekend in Spring.

Course equivalencies: X- PUBH 303/ENVS 303/MPBH 403

MPBH 404 Biostatistics for Health and Biological Science (3 Credit Hours)

Introductory course allows students to utilize SAS software to perform analytical methods including Graphical and Numerical Descriptive Statistics, Probability calculations and distributions with emphasis on the binomial(discrete) and normal (continuous) distributions, Inferential Statistics: Point Estimation, Interval Estimation and Hypothesis Testing, Nonparametric statistical methods and Sample Size Calculation.

Course equivalencies: CRME420/BMSC402/MPBH404

MPBH 407 Public Health Policy: Concepts and Practice (3 Credit Hours)

Pre-requisite: Open for registration for MPH students. All other students require department approval.

Course equivalencies: PUBH 307/MPBH 407

MPBH 409 Biostatistics I (3 Credit Hours)

Introductory biostatistics course which allows students to utilize STATA software and perform/ operate analytic methods. Course provides outline of tests of statistical significance and probability theory. Prerequisites : Introductory course Students will conduct statistical hypothesis testing using methods presented in class.

MPBH 410 MPH Practicum (1-3 Credit Hours)

All MPH students are required to complete at least 1 credit of a practicum (internship) to gain a better understanding of a public health practice, directly utilize their own MPH training, and network with public health professionals in the field. Students need to provide a signed agreement and must be in the process of completing 21 credit hours, including at least four core courses.

MPBH 411 MPH Capstone (1-3 Credit Hours)

The goal of the Capstone project is to provide students the opportunity to demonstrate knowledge and skills acquired in the academic coursework and through practicum experience. The objective is to enable the student to work on a project which translates both general and discipline specific information into public health practice. Students should complete the core, program specific courses. We recommend to split credits over last two semesters and register 1 credit each semester. Outcomes : The Capstone will provide the students an opportunity to exhibit their proficiency in public health skills through a written report and oral presentation.

MPBH 412 Intro to Statistical Computing for Public Health (2 Credit Hours)

Pre-requisites: This course is designed for students who have taken or are taking Introduction to Epidemiology (MPBH 403) and Biostatistics I (MPBH 404 or 409)

This course introduces students to statistical computing. The emphasis is on manipulating data sets and basic statistical procedures such as t-tests, chi-square tests, and correlations. The course currently focuses on the use of SAS and STATA software packages.

Outcomes:

Upon completion of this course, students will be able to use statistical software to: read in data files, subset data, create variables, recode data values, analyze data, summarize the results

MPBH 413 The Epidemiology of Obesity: An Energy Balance Perspective (3 Credit Hours)

This course is a survey course designed to expose MPH and other interested inter-professional students, e.g. nursing and dietetic students, to the multiple domains of the worldwide obesity epidemic. The course will explore determinants, outcomes and public health policy associated with obesity from the perspective of energy balance, i.e. that ultimately all determinants and outcomes of obesity. Pre-requisites: MPBH 403 or department consent. Explain the scope and historical trends of obesity prevalence among children and adults in both the industrialized and developing worlds.

Outcomes:

Describe the concept of energy balance and how it is related to the development, treatment and prevention of overweight and obesity

MPBH 414 Introduction to Global Health (3 Credit Hours)

Introduction to Global Health is an introductory course to global health, both epidemiology and policy aspects, focusing on health disparities on the international level.

Course equivalencies: X-HSM210/PUBH314/ENVS385

MPBH 416 Health Services Research Methods (3 Credit Hours)

This course introduces students to the scope of health services research by addressing issues central to understanding and applying modern research to public health and health policy. Formulate questions and develop studies using primary data collection approach that are timely and relevant to contemporary organization, financing, and delivery of U.S. public health.

Outcomes:

Determine health services research's scope

MPBH 417 Global Maternal & Child Health (3 Credit Hours)

Pre-requisites: MPBH 414 Introduction to Global Health and MPBH 403 Introduction to Epidemiology

This course will be required for the newly approved Global Health Equity track of the Master in Public Health Program

Course equivalencies: X-HSM210/PUBH314/ENVS385

MPBH 420 Public Health Law: Theories and Cases (3 Credit Hours)

This course explores how the law can be utilized to promote, or impede, proposed public health interventions at the local, state, federal level. Students review key theories of public health law that examine the role of the legislature, executive agencies, and the courts in crafting, executing, reviewing public health policy. This course is geared towards MPH students in Public Health Policy and Management track, and no prior training in law or legal analysis is assumed.

Outcomes:

Describe the inter-dependence of law and public health; Identify areas of law applicable to promoting public health; Articulate the legal, ethical and practical conflicts that arise in approaching public health through law

MPBH 421 Biostatistics II (3 Credit Hours)

Pre-requisites: MPBH 409 Biostatistics I Students will utilize text on Biostatistics for Public Health

Course will cover linear and logistic regression and ANOVA. Students will utilize STATA software for hypothesis testing.

Outcomes:

Students will conduct statistical hypothesis testing using methods presented in class

MPBH 422 Population Health Planning & Management (3 Credit Hours)

This course prepares students to confront--thoughtfully and systematically--resource allocation decisions by developing the knowledge, tools, and skills needed to plan, implement, and evaluate programs, interventions, and services that address public health problems, improve population health, and reduce inequities.

MPBH 423 Intermediate Epi (3 Credit Hours)

Pre-requisites: MPBH 403 Introduction to Epidemiology
Intermediate Epidemiology focuses on analysis of observational data. Students should have completed Introduction to Epidemiology and Biostatistics I prior to enrolling in this course.

MPBH 424 Health Economics and Healthcare Financing (3 Credit Hours)

This course will examine selected topics in health economics with major implications for healthcare delivery, healthcare financing and clinical and public health research. Essential economic theories and methods for exploring each topic will be discussed along a review of existing empirical research. Outcomes : Describe the US health delivery and financing system; Apply essential economic theories/methods to study consumer behavior and healthcare demand, healthcare market and supply of services, and medical cost-effectiveness analysis

MPBH 425 Policy Analysis (3 Credit Hours)

This course will provide an introduction to the issues and methods of health policy analysis. Health policy analysis requires several distinct sets of skills: technical understanding of analytical tools, understanding the policy and managerial context within and outside of your organization, and the ability to produce and communicate practical advice. This is a track-specific requirement for MPH Graduates in the Health Policy track Outcome: Students will develop a good working understanding of the methods specific to these issues examined through this course and will also learn how to apply these to specific problems.

MPBH 426 Infectious Disease Epidemiology (3 Credit Hours)

Pre-requisites: Introduction to Epidemiology (MPBH 403)

This course will introduce the basic methods for infectious disease epidemiology and review case studies of important disease syndromes and entities. Important terminology and definitions for infectious disease epidemiology will be reviewed, including nomenclature related to outbreak investigations, disease surveillance, laboratory diagnosis, molecular epidemiology, disease transmission and susceptibility.

MPBH 427 Introduction to Correlated Data Analysis (1 Credit Hour)

This course covers a broad overview of statistical models and estimation methods for outcome variables (normal and non-normal) that are clustered or measured repeatedly in time or space. The focus is on applications and computer software methods for correlated regression models, including ANOVA based methods, hierarchical linear models, etc. The co requisites for this course are MPBH 421 (or prior completion of a two-semester course sequence in Biostatistics) and one course in statistical computing such as MPBH 412.

MPBH 430 Environmental Health Policy (3 Credit Hours)

This course provides an introduction overview of the health consequences associated with climate change and the local, federal, and global response to mitigate these negative health outcomes. During the course students will be expected incorporate course content and develop a realistic response public health plan to climate change for a locality of their choosing. This course is offered both online and in-person. 2) Identify and critique future steps forward to reduce public health concerns of climate change.

Outcomes:

1) Outline fundamental public health concerns that have been associated with climate change

MPBH 431 Grant Writing (3 Credit Hours)

This course will provide an overview of the NIH extramural funding process, with additional information on funding opportunities outside NIH. Students will learn the key components of successful grants and factors that may lead to grants not being reviewed favorably. The focus will be on grant writing skills.

Outcomes:

Students will be required to write a 10-12 page R01-style grant proposal (application), as described in the NIH guidelines

MPBH 432 Health Impact Assessment (3 Credit Hours)

This course is an introduction to health impact assessment which is a decision-support tool that uses a combination of procedures, methods, and approaches to determine how a policy, project/program may affect the health of a community, and the distribution of those effects within the population of the community.

MPBH 433 Clinical Trials (3 Credit Hours)

Clinical Trials course is designed for students interested in the design, implementation and management of clinical trials and their ethical and clinical implications. Topics include trial design, randomization, recruitment and sample size, monitoring and analysis. Students should have completed Introduction to Epidemiology and Biostatistics I prior to enrolling in this course.

MPBH 434 Systematic Review and Meta-Analysis (3 Credit Hours)

Meta analysis course provides instruction on methods for synthesizing clinical research information and how to assess the strength of the evidence for policy development and clinic contexts. The course is designed to highlight rigorous systematic review methods while students complete a systematic review on a topic of their choice. Students should have completed Introduction to Epidemiology and Biostatistics I prior to enrolling in this course.

MPBH 495 Special Topics (1-3 Credit Hours)

This course covers a specific topic in public health. Restricted to students in the Master of Public Health (MPH) program, or with permission of the instructor. Outcome: students will be able to articulate a general understanding of the selected topic.

MPBH 499 Public Health in Action (3 Credit Hours)

Public Health in Action prepares MPH students for the real world through practical hands-on learning that addresses the cross-disciplinary competencies in advocacy, leadership, budgeting, planning and implementing programs with limited resources, building a shared vision and mission, setting priorities and goals, contributing on inter-professional teams, advancing cultural diversity and inclusiveness in community health efforts, building partnerships, leading community initiatives, and communicating to media. It is intended students will take this course at the end of the MPH program. Enrollment Conditions: Graduate standing in the MPH Program and graduating in the current or following semester, or permission of instructor. Students should have completed at least 18 credit hours of coursework, including all other core courses. MD/MPH students may take this course in the spring of their first year in the program.

Master of Public Policy (MPP)

Discover, search, courses!

MPP 400 Policy Design and Analysis (3 Credit Hours)

Students will learn to analyze issues to determine if there is a role for government intervention, to evaluate public policy options that could address the identified problem, and to design programs that would target the specific issues. The role of political factors in affecting these decisions is also covered.

MPP 401 Analytical Tools in Public Policy (3 Credit Hours)

This class covers diverse modeling tools in public policy, drawing from fields such as economics, geography, demography, spatial analysis, risk analysis, decision theory. The emphasis is on applied analysis to address current public policy issues.

MPP 402 Cost Benefit Analysis (3 Credit Hours)

The course cover the basics of the CBA technique with applications in several policy areas. CBA is grounded in the policy evaluation framework, including discussion of ethical issues and the use of CBA information in policy and program decisions.

Outcomes:

Ability to conduct CBA analysis, understand its use in the policy process, including ethical issues

MPP 403 Public Budget and Finance (3 Credit Hours)

This course provides students with practical knowledge about the budget process and the tools to construct and analyze a public budget. General theories of public finance and the role of the budget as a political document are covered. Assignments will provide practice in the budgeting approaches covered in the readings.

MPP 404 Public Policy Process (3 Credit Hours)

This class provides an introduction to the major theories of the public policy process. We consider issues of problem definition, social construction, agenda setting, the role of government institutions and interest groups in determining policy outcomes. Outcome: Students will understand how political considerations, institutions, and rules of government affect public policy outcomes.

MPP 405 Statistical Methods & Analysis for Public Policy I (3 Credit Hours)

This course is an introduction to statistical modeling, and hypothesis testing for applied problems in urban affairs and public policy. This class will provide the foundation for thinking about casual relationships, determining differences among groups, and what might account for those differences. Outcome: Students will learn to conduct basis statistical analysis and write literate data analysis reports.

MPP 406 Statistical Methods & Analysis Public Policy II (3 Credit Hours)

Pre-requisites: MPP 405 This class develops the multiple linear regression model and extensions of it that are commonly used in the study of public policy

We investigate the relationships between the type of data available and the quantitative models to use, including logistic analysis and use of simultaneous equations. Outcome: Students will learn to use the tools necessary to understand, critique, and conduct advanced statistics.

MPP 407 Local Economic Development (3 Credit Hours)

Students will learn the current theories of local economic development, including the role of infrastructure, access to markets, workforce quality (human capital), technology development, the role of universities, and the value of networks among business actors. Students will use these theories to create a metropolitan benchmarking report and strategic plan.

MPP 408 Political Feasibility Analysis (3 Credit Hours)

Pre-requisites: Graduate Students Only Students will analyze strategies for assessing the political feasibility of enacting and implementing public policies

Crafting a message, use of media to communicate that message, identification of allies and opponents, and how to navigate legislative and bureaucratic processes will be covered. Includes: creating messages, use of media, development of grassroots campaign, work within legislatures and government agencies.

Outcomes:

Ability to craft and implement a comprehensive political strategy to change public policy outcomes

MPP 409 Education Policy and Politics (3 Credit Hours)

Pre-requisites: Graduate Students Only This seminar focuses on K-12 policy in the U.S. using a policy analysis framework

We evaluate alternative policy proposals related to different theories of equality and school quality. We examine market-driven, standards-based, human capital, fiscal, and community-based models of reform. The course concludes by examining the political context for reform.

Outcomes:

Develop analytical ability to identify the contemporary problems with education, what causes them, and what policy reforms could be used to address those problems

MPP 410 Special Topics in Public Policy (3 Credit Hours)

This seminar course will cover specialized topics in public policy in greater detail. Outcome: Students will learn about current issues related to the topic, relevant theoretical approaches, and application of theories to the specific issue in order to develop policy solutions.

MPP 411 Environmental Governance (3 Credit Hours)

Environmental governance examines the institutions used to manage the environment and natural resources. The class pulls from political, economic, sociological and ecological frameworks to develop an interdisciplinary examination of the management of resources, both in the US and abroad.

MPP 412 Urban Politics and Policy (3 Credit Hours)

The course examines sources of power in the city and their impact on city policies, including the role of economic power, federalism, government structures, neighborhood groups, and voting. The focus is on any systematic bias in city policies and how likely that the bias could be overcome.

Outcomes:

Understand the major theories of urban politics and use them to analyze potential policy outcomes in cities

MPP 413 Intergovernmental Relations (3 Credit Hours)

This class looks at what determines the allocation of responsibility and power across U.S. levels of government, how do the different levels interact with each other, and how does this system affect why some policy problems appear to receive a lot of attention and others do not. Department consent required. Outcome: Understand how principles of federalism shape policy subsystems, which then affects who addresses policy problems and how outcomes are shaped by the various governments.

MPP 414 Affordable Housing Finance and Policy (3 Credit Hours)

This course focuses on how affordable housing programs work - the policy side, the development side, the investment side, and the legal side. This requires an understanding of the legal principles underlying real estate finance, the principles of investment, impact of tax laws, and demographic and economic factors that affect the supply and demand for housing. Department Consent Required

Outcomes:

Gain knowledge of affordable housing criteria, needs assessments, financial and investment factors that affect supply, structure of common affordable housing policies

MPP 461 Education Law & Policy (3 Credit Hours)

This seminar explores legal, political and practical issues confronting American education. The course begins with analysis of fundamental political and philosophical principles underlying the educational system. Students then apply these principles to areas of education law – such as school finance, governance, the balance between federal and state roles in curriculum. Department consent required for enrollment.

Course equivalencies: MPP 461/LAW 461

Outcomes:

Students will be able to: understand fundamental legal doctrines governing U.S. education law, research legal and political issues in education policy; analyze education problems and develop policy options

MPP 499 Directed Readings (3 Credit Hours)

An independent study course provides the opportunity for a student to develop knowledge regarding a particular topic of interest, beyond that available in traditional courses. The student will develop a contract with the faculty member who supervises the independent study to specify the topics covered, the tasks to be performed, and the grading criteria. Students are expected to participate in development of a reading list. Regular meetings of the student and the faculty supervisor will occur throughout the semester.

MPP 500 Public Policy Evaluation (3 Credit Hours)

Pre-requisites: PLSC 476 or SOCL 414

This class covers basic methods of evaluating the impact of public policies. We will read examples of each type of evaluation and discuss the difficulties each case illustrates in doing applied research – including statistical problems, ethical issues, and the potential impact of the evaluation on policy change.

MPP 501 Public Policy Internship (3 Credit Hours)

Enrollment is restricted to students in MUAPP program. Students will work with an organization in the public sector (typically nonprofit or government) to apply concepts and skills from the first-year MUAPP curriculum. They will develop a portfolio of work products to demonstrate their competencies and interests to future employers. Students will gain relevant work experience; apply concepts and skills developed in other courses in the MUAPP curriculum; create a portfolio of work products to demonstrate abilities to future employers.

MPP 502 Professional Development Skills (1 Credit Hour)

Requirement for MPP graduate students. The class develops professional skills for students to identify and pursue internship and career options. Policy practitioners discuss their experiences, illustrating different work in the policy field. Job search strategies, resume writing, and informational interviews are covered.

MPP 503 Public Policy Practicum (3 Credit Hours)

Enrollment is restricted to students in MUAPP program. This is a capstone course for the masters degree in public policy or urban affairs. The goal is to gain experience working as a team conducting a policy analysis or program evaluation project. Faculty will determine the topic for the course, often based on a real world client's interests. Outcome: Students apply concepts and skills developed in the MUAPP curriculum to a real world problem; work with a client and stakeholders; create a research report appropriate to an applied environment.

MPP 606 Childlaw Legislation and Policy Clinic (3 Credit Hours)

Permission of instructor is required prior to registration. Students work on a legislative project under faculty supervision that involves: developing an advocacy and coalition building strategy, drafting bills, developing fact sheets and summaries for pending legislative in Springfield, visiting the state legislature to observe and participate in the process of policy advocacy regarding a child or family law issue.

Outcomes:

Develop skills necessary in policy advocacy: critiquing legislation, assessing a legislative problem, researching the problem, proposing solutions, and drafting materials and presenting information orally

Maternal/Child Nursing (MCN)

Discover, search, courses!

MCN 273 Family Health Patterns I (3 Credit Hours)

Pre-requisites: Must have taken and passed MSN 277, GNUR 294 with a C- or better

Must have taken and passed MSN 277L with a P. Must also enroll in MCN 273L. This course allows students to apply concepts from systems theory and the levels of prevention models to structure the presentation of selected concepts related to health promotion and health maintenance of childbearing and parenting families. Outcome: The student will be able to use critical thinking to apply knowledge from nursing and other disciplines in the care of childbearing and parenting families. This course satisfies the Engaged Learning requirement.

MCN 273L Family Health Patterns I: Lab (3 Credit Hours)

Must enroll on MCN 273.

This course satisfies the Engaged Learning requirement.

MCN 374 Family Health Patterns II: Care of the Child and Family (3 Credit Hours)

Must have taken and passed MSN 277 and 277L, GNUR 294 with a C- or better. Must also enroll in MCN 374L. This course uses the Health People 2010 initiative to structure the presentation of selected concepts related to the health promotion, health maintenance and health restoration of infants, children, adolescents and their families. Outcome: Students will be able to use critical thinking to apply knowledge from nursing and other disciplines in the care of infants, children, adolescents and their families. This course satisfies the Engaged Learning requirement.

MCN 374L Family Health Pat II:Lab (3 Credit Hours)

Must also enroll in MCN 374.

This course satisfies the Engaged Learning requirement.

MCN 401 Child/Family Health (3 Credit Hours)

MCN 401 is designed to prepare the Nurse Practitioner to assume responsibility for the coordination and management of health care for children, birth through adolescence. A developmental perspective is used to address the primary health care needs of the childrearing family with an emphasis on meeting the psychosocial and developmental needs of children and families. A major focus of the course is to prepare the student to assess, diagnose and manage selected common health problems of the pediatric population in primary care settings. Indications for collaboration, consultation, and/or referral to other members of the health care team are emphasized as an integral part of the nurse practitioner's role. The accompanying practicum offers the student an opportunity to exercise critical clinical judgment and implement theoretical knowledge in the management of the pediatric population, both in health and when experiencing common health problems. Prerequisites: B- or higher in GNUR 413, GNUR 425, and GNUR 442.

MCN 414 Childbearing/Family (3 Credit Hours)

Pre-requisites: GNUR 413 & GNUR 442 (minimum grade of B-); Co-requisites: GNUR 425 This course will prepare the advanced practice nurse to manage the health care of essentially normal childbearing women during the prenatal and postpartum periods. Theories and knowledge from biological, behavioral, social and nursing sciences will be applied in the provision of care for childbearing women and families. Emphasis is on the concept of wellness during pregnancy, recognition of high-risk conditions requiring referral or collaborative practice, and the importance of support from family and community networks.

MCN 420 APN Practicum: Child/Family Health (1-3 Credit Hours)

This practicum course guides the student toward a synthesis of content from nursing and related sciences and the application of this knowledge to the advanced practice role of Nurse Practitioner in primary care.

During each practicum, the student will care for patients progressing in complexity from health promotion and disease prevention to assessment and management of the most common acute, chronic, and complex health problems. The student's level of performance is expected to progress throughout the clinical practicum from requiring assistance to becoming primarily independent.

Course equivalencies: MCN 420 / MCN 406

MCN 516 Pediatric Primary Care NP Practicum (3 Credit Hours)

This course guides the student toward a synthesis of content from nursing and related sciences, applying this knowledge to the role of the nurse practitioner in the primary care of pediatric patients. During this practicum experience, the student will care for children from birth through adolescence across a continuum from health promotion to the management of common health problems. Prerequisite(s): MCN 401 Child/Family Health Perform a complete physical, psychological and social health assessment incorporating principles of child development, health promotion and health maintenance. 2. Provide developmentally appropriate teaching, counseling, and anticipatory guidance. 3. Apply preventive interventions and risk reduction strategies for infants through adolescents, and their families. 4. Evaluate cultural, spiritual, ethical, legal, financial, and policy factors that influence care in the clinical environment through a social justice lens. 5. Implement evidence-based, developmentally supportive plans of care for pediatric patients and their families. 6. Modify management plans according to clinical responses and changes in condition. 7. Utilize technology to manage information, support decision-making, deliver care, and evaluate outcomes. 8. Demonstrate effective communication, collaboration and relationship building with patients, families, and interprofessional team members. 9. Analyze quality issues in the clinical setting, prioritizing patient safety and cost effectiveness.

Outcomes:

At the successful completion of this practicum, students will be able to: 1

MCN 530 Topical Seminar for Nursing (1-5 Credit Hours)

These are seminars in specialty areas of nursing theory (e.g., Parse theory), methods (e.g., historical research, grounded methods), as well as concepts (e.g., spirituality, decision-making, bereavement). Students are encouraged to take those seminars to prepare them for their dissertation. Restricted to Graduate Nursing students. Outcome: Students are expected to use the specialty information to further enhance their understanding of their research phenomenon.

Mathematical Sciences (MATH)

Discover, search, courses!

MATH 99 Problem-Solving Methods in Mathematics (0 Credit Hours)

This course offers a review of topics in arithmetic and basic algebra such as percentages, decimals, basic algebraic operations, equations, graphing, and elementary word problems Outcome: Students with weak backgrounds in basics mathematics will receive the preparation needed to enroll in Mathematics 100.

MATH 100 Intermediate Algebra (3 Credit Hours)

This course covers the fundamentals of algebra, ranging from linear equations and their graphs through exponents and systems of equations. Outcome: Students with weak algebraic backgrounds will receive the preparation needed to use algebra in other courses or, if they plan to take calculus, to enroll in College Algebra.

Course equivalencies: ACMAT100/MATH100

MATH 108 Real World Modeling with Mathematics (3 Credit Hours)

This course investigates mathematical modeling applied to a variety of topics such as linear programming, coding information, probability and statistics, scheduling problems and social choice. Outcome: Students will understand the usefulness of mathematical modeling in a variety of disciplines within the life sciences, the social sciences, and business. This course satisfies the quantitative literacy requirement of the core curriculum.

Knowledge Area: Quantitative Knowledge

MATH 117 Precalculus I (3 Credit Hours)

Pre-requisites: Math Placement Test or MATH 100 This course covers algebraic topics ranging from functions and their applications to complex numbers to inverse functions to the fundamental theorem of algebra. No course description is available.

Course equivalencies: ACMAT 117/MATH 117

Outcomes:

Students who plan to study calculus will obtain the algebraic background needed to enroll in precalculus.

MATH 118 Precalculus II (3 Credit Hours)

This course covers topics ranging from exponential and logarithmic functions to trigonometric functions to the complex plane and elementary optimization problems. *Pre-requisites:* Math Placement Test or Math 117 *Outcome:* Students will obtain the background needed to enroll in either of the departments calculus sequences.

Course equivalencies: MATH 118/ ACMAT 118

MATH 123 Topics (1-3 Credit Hours)

Freshman Mathematics/Statistics Seminar (1-3 Credit Hours): A freshman seminar with no prerequisites on topics in the mathematical sciences drawn from algebra, geometry, statistics, and their applications. This course satisfies the Engaged Learning requirement.

MATH 131 Applied Calculus I (3 Credit Hours)

Pre-requisites: Math Placement Test or MATH 118 *Outcomes:* Students will obtain an understanding of calculus and methods for applying calculus (especially differential calculus), including modeling/analyzing processes (such as population growth and cooling), interpreting the derivative (numerical, graphical, and algebraic), and optimization (such as finding the time and level for a peak drug concentration).

An introduction to differential and integral calculus, with an emphasis on applications. This course is intended for students in the life and social sciences, computer science, and business. Topics include: modeling change using functions including exponential and trigonometric functions, the concept of the derivative, computing the derivative, applications of the derivative to business and life, social and computer sciences, and an introduction to integration.

Interdisciplinary Option: Bioinformatics, Forensic Science

MATH 132 Applied Calculus II (3 Credit Hours)

Pre-requisites: MATH 131 This course is a continuation of Mathematics 131.

Topics include: definition and interpretations of the integral (numerically, graphically, and algebraically), basic techniques for computing anti-derivatives, applications to probability, an introduction to multi-variable calculus and optimization for functions of several variables, and mathematical modeling using differential equations. (This course is not a substitute for MATH 162.) *Outcome:* Students will obtain an understanding of integral and multi-variable calculus, including modeling/analyzing processes with the integral, optimization of functions of several variables, and modeling with differential equations.

Interdisciplinary Option: Bioinformatics, Forensic Science

MATH 140L Geometry for Middle Grade Teachers (3 Credit Hours)

The content covered in this course will include: Area, perimeter, volume, surface area, Properties of two and three dimensional figures, points, lines, planes, space, the Pythagorean theorem, transformations, fractals, tessellations, perspective drawings and informal proofs. The material covered will address Illinois Learning Standard Goal 7 and Goal 9 and related content performance descriptors for educators. The course is designed for Elementary education majors that wish to enhance, enrich and deepen their knowledge of Geometry and apply for a 6th-8th grade Mathematics endorsement from the State of Illinois. Mathematics Content Area Standards 7 (Measurement) and 9 (Geometry) from the Content-Area Standards for Educators document published by the Illinois State Board of Education will be emphasized. *Outcome:* Students will obtain an understanding of the geometry topics taught in the middle grade mathematics curriculum.

MATH 141L Number Theory for Middle Grade Teachers (3 Credit Hours)

Greatest common divisors, prime factorization, decimal fractions, continued fractions, primes, composite numbers, tests for divisibility, perfect numbers, polygonal numbers, numbers bases, and patterns in addition and multiplication tables are a sample of the topics covered. (Illinois Learning Standard Goal 6 and related performance descriptors). Appropriate use of technology (spread sheets, CAS, etc.) will also be addressed. *Outcome:* Students will obtain an understanding of topics from Number Theory that are addressed in the middle grade mathematics curriculum.

MATH 142L History of Mathematics for Middle Grade Teachers (3 Credit Hours)

This course will provide a thematic approach to the history of mathematics with emphasis on contributions by noted mathematicians, mathematical societies and scientists highlighting women and under-represented populations. The history of numbers and numerals, computation, geometry, algebra, trigonometry, calculus, and science patterns will be explored emphasizing the contributions of the Babylonian, Egyptian, Chinese, and Roman civilizations as well as such individuals as Euclid, Fermat, Archimedes, Kepler, Pythagoras, Euler, Hypatia, Sonjs Kovalevsky, Emmy Noether and others as appropriate. The influence of technology and its applications will also be presented as appropriate. *Outcome:* Students will obtain a unique historical perspective on the various areas of mathematics that are studied in the middle grade mathematics curriculum.

MATH 143L Probability and Statistics for Middle Grade Teachers (3 Credit Hours)

Data collection and display, simulations, surveys, probability and elementary statistics such as mean, median, mode, standard deviation, etc. will be the focus of this course (Illinois Learning Standard Goal 10) Appropriate techniques for graphing (scatter plots, histograms, regression, correlation) with and without technology will be a focus of this course. *Outcome:* Students will obtain a background in the fundamentals of descriptive and inferential statistics, along with an understanding of their uses and misuses, as addressed in middle school mathematics curriculum.

MATH 147 Mathematics For Teachers I (3 Credit Hours)

For course description, see CIEP 104, page XX.

This course satisfies the Engaged Learning requirement.

Course equivalencies: X-CIEP104/MATH147

MATH 148 Mathematics For Teachers II (3 Credit Hours)

For course description, see CIEP 105, page XX.

Course equivalencies: X-CIEP105/MATH148

MATH 149 Intro to Computer Sci For Tchrs (3 Credit Hours)

For prerequisite and description, see COMP 120, page XX.

Course equivalencies: X-COMP120/MATH149

MATH 161 Calculus I (4 Credit Hours)

This course provides a standard introduction to differential and integral calculus and covers topics ranging from functions and limits to derivatives and their applications to definite and indefinite integrals and the fundamental theorem of calculus and their applications. Pre-

requisites: Math Placement Test or MATH118

Interdisciplinary Option: Bioinformatics, Forensic Science

Course equivalencies: ACMAT 161/MATH 161

Outcomes:

Students will obtain the background needed to enroll in Calculus II

MATH 162 Calculus II (4 Credit Hours)

Pre-requisites: MATH 161 This course is a continuation of Calculus I and includes the calculus of various classes of functions, techniques of integration, applications of integral calculus, three-dimensional geometry, and differentiation and integration in two variables

Outcome: Students will obtain the background needed for further study in mathematics and to apply mathematics in the physical sciences.

Interdisciplinary Option: Bioinformatics

Course equivalencies: ACMAT 162/MATH 162

MATH 162A Calculus II, Alternate (4 Credit Hours)

Pre-requisites: MATH 161 This course is a continuation of Calculus I and includes the calculus of various classes of functions, techniques of integration, applications of integral calculus, sequences and infinite series, and an introduction to differential equations

This course follows a traditional approach to calculus sequencing.

Interdisciplinary Option: Bioinformatics

Outcomes:

Students will obtain the background needed for further study in mathematics and to apply mathematics in the physical sciences

MATH 162T Tutoring for Math 162 - NO CREDIT (0 Credit Hours)

Tutoring for Math 162 - NO CREDIT

MATH 170 Service Learning in Mathematics (3 Credit Hours)

Students will learn best practices to communicate mathematical concepts and skills to diverse populations by engaging in tutoring mathematics to the undergraduate population at Loyola. This course is designed to promote and encourage engagement and rigor in mathematical concepts and skills among the diverse communities of learners at Loyola. Pre-requisites: B+ or higher in any of the following (Math 118 or Math 131 or Math 132 or Math 161 or Math 162 or Math 263 or MATH 263A).

This course satisfies the Engaged Learning requirement.

Outcomes:

Students in this course will deepen their understanding of mathematical concepts and skills and be able to communicate this effectively to diverse communities of learners

MATH 201 Introduction to Discrete Mathematics & Number Theory (3 Credit Hours)

This course covers topics from discrete mathematics and number theory, areas of mathematics not seen in calculus courses and abundant in applications, that provide students with the concepts and techniques of mathematical proof needed in 300 level courses in mathematics.

Outcome: Students will obtain an understanding of the basic concepts and techniques involved in constructing rigorous proofs of mathematical statements.

MATH 212 Linear Algebra (3 Credit Hours)

Pre-requisites: MATH 132 or MATH 162 or MATH 162A This course provides an introduction to linear algebra in abstract vector spaces with an emphasis on $\mathbb{R}^n$, covering topics such as Gaussian elimination, matrix algebra, linear independence and spanning, linear transformations and eigenvalues; software packages such as MAPLE may be used

Outcome: Students will receive an introduction to abstract mathematics in a setting that encourages the thinking needed in more advanced mathematics courses.

MATH 215 Object-Oriented Programming with Mathematics (3 Credit Hours)

Pre-requisites: MATH 132 or MATH 162 or MATH 162A This is an introductory programming course for students interested in mathematics and scientific computing

Students will program primarily in a general object-oriented language such as Python, with supplementary exercises in a computer algebra system. Examples will be drawn primarily from applications of calculus, elementary number theory, and cryptography. Outcome: Students will learn basic scripting and object-oriented programming, with the goal of being able to solve mathematical and scientific problems.

Course equivalencies: X-COMP215/MATH215

MATH 263 Multivariable Calculus (4 Credit Hours)

Pre-requisites: MATH 162 Outcome: Students will obtain an understanding of multivariable calculus and its applications, as well as background needed for the study of more advanced mathematics

This course covers the differential and integral calculus of multivariable and vector valued functions, and sequences and infinite series, culminating with Green's Theorem, the Divergence Theorem, and Stokes' Theorem; software packages such as MAPLE may be used.

Knowledge Area: Quantitative Knowledge

MATH 263A Multivariable Calculus, Alternate (4 Credit Hours)

Pre-requisites: MATH 162A Outcomes: Students will obtain an understanding of multivariable calculus and its applications, as well as background needed for the study of more advanced mathematics

This course covers the differential and integral calculus of multivariable and vector valued functions, culminating with Green's Theorem, the Divergence Theorem, and Stokes' Theorem; software packages such as MAPLE may be used. This course follows a traditional approach to calculus sequencing.

Knowledge Area: Quantitative Knowledge

MATH 264 Ordinary Differential Equations (3 Credit Hours)

Prerequisite/ co-requisite: MATH 263 or MATH 263A This course covers the theory, solution techniques, and applications surrounding linear and non-linear first and second-order differential equations, including systems of equations; software packages such as MAPLE may be used. Pre- or co-requisites: MATH 263 or MATH 263A Outcome: Students will obtain an understanding of elementary differential equations and their applications.

MATH 266 Differential Equations and Linear Algebra (3 Credit Hours)

This course provides an introduction to basic topics in ordinary differential equations and linear algebra. Topics include first and second-order differential equations, Laplace transform, systems of first-order differential equations, systems of linear algebraic equations, matrix algebra, bases and dimension for vector spaces, linear independence, linear transformations, determinants, eigenvalues, and eigenvectors. Pre-requisites or Co-requisite: MATH 263 or MATH 263A

Outcomes:

Students will learn fundamental results and methods in ordinary differential equations and linear algebra, with a strong emphasis on topics that are particularly relevant for Engineering Science

MATH 277 Problem-Solving Seminar (1 Credit Hour)

In a seminar setting, students discuss and present proofs (or computer examples) as solutions to regional and national mathematics contest problems usually involving techniques drawn from elementary logic, calculus of one and several variables, combinatorics, number theory, geometry, basic algebra, and abstract algebra. Learning Outcome: To improve a student's ability to communicate mathematically and to strengthen the student's problem-solving skills.

MATH 298 Mathematics Seminar (1-3 Credit Hours)

This course is a sophomore-level seminar covering topics in areas such as number theory, logic, set theory, metric spaces, or history of mathematics. Outcome: Students will obtain an initial insight into a number of areas of advanced study in mathematics.

MATH 301 History of Mathematics (3 Credit Hours)

Pre-requisites: MATH 132 or MATH 162 or MATH 162A

This course explores selected topics in the history of mathematics ranging from Babylonian and Egyptian mathematics to Pythagoras and Euclid to the Hindu-Arabic numeration system to Newton and Leibniz to geometries other than Euclid's to the mathematical art of Escher. Outcome: Students will obtain a unique historical perspective on the various areas of mathematics that they are studying in their other courses.

MATH 304 Introduction to Probability (3 Credit Hours)

For prerequisites and description, see STAT 304.

Course equivalencies: X-MATH304/STAT304

MATH 305 Introduction to Mathematical Statistics (3 Credit Hours)

For prerequisites and description, see STAT 305, page XX.

Course equivalencies: X-MATH305/STAT305

MATH 306 Intro to Stochastic Processes (3 Credit Hours)

For prerequisites and description, see STAT 306, page XX.

Course equivalencies: X-MATH306/STAT306

MATH 309 Numerical Methods (3 Credit Hours)

This course offers an introduction to topics such as error analysis, interpolation and approximation, and the numerical solution of problems involving differentiation, integration, and ordinary and partial differential equations. *Pre-requisites:* (COMP 170 or COMP 215) and [(MATH 212 and 264) or MATH 266] Outcome: Students will obtain an understanding of how numerical methods can be used in a variety of areas of mathematics.

Course equivalencies: X-COMP309/MATH309

MATH 313 Abstract Algebra (3 Credit Hours)

This course provides a rigorous introduction to the study of structures such as groups, rings, and fields; emphasis is on the theory of groups with topics such as subgroups, cyclic groups, Abelian groups, permutation groups, homomorphisms, cosets, and factor groups. *Pre-requisites:* MATH 201 and 212 Outcome: Students will obtain an understanding of abstract structures that will prepare them for advanced work in mathematics.

MATH 314 Adv Topics Abstract Algebra (3 Credit Hours)

Pre-requisites: MATH 313 This course studies advanced algebraic systems such as commutative and non-commutative rings, integral domains, fields, and additional selected topics

Outcome: Students will obtain an understanding of advanced abstract structures that will prepare them for graduate level work in mathematics.

MATH 315 Advanced Topics in Linear Algebra (3 Credit Hours)

Pre-requisites: MATH 313 This course offers a rigorous abstract approach to vector spaces and transformations, including similarity, duality, canonical forms, inner products, bilinear forms, Hermitian and unitary spaces, and other selected topics

Outcome: Students will obtain an understanding of advanced linear algebra structures that will prepare them for graduate level work in mathematics.

MATH 318 Combinatorics (3 Credit Hours)

Pre-requisites: MATH 162 or MATH 162A This course offers a rigorous introduction to combinatorics, including topics such as induction, the pigeon-hole principle, permutations, combinations, recurrence relations, generating functions, the inclusion-exclusion principle, and other selected topics

Outcome: Students will obtain an understanding of the basic topics in combinatorics that will prepare them for advanced study of related topics in mathematics and computer science.

MATH 320 Mathematical Logic (3 Credit Hours)

Pre-requisites: MATH 201 This course in modern mathematical logic begins with a study of propositional logic and leads to the study of first-order predicate logic, including quantifiers, models, syntax, semantics, the completeness and compactness theorems, and other selected topics Outcome: Students will develop a fuller understanding of mathematical logic and therefore of the underlying theory behind proofs of mathematical assertions.

MATH 322 Advanced Number Theory (3 Credit Hours)

Pre-requisites: MATH 201 This course will cover Pythagorean triples, problems related to Fermat's Last Theorem, Pell's equation, Fermat's method of descent, primes in arithmetic progressions, Mersenne primes, perfect numbers, primitive roots, primality testing, Carmichael numbers, RSA public key encryption, quadratic residues, and quadratic reciprocity Additional topics will be covered as time permits. Students will be exposed to both significant recently solved number theory problems and currently unsolved conjectures.

Outcomes:

Students will be able to solve important practical and theoretical number theory problems

MATH 328 Algebraic Coding Theory (3 Credit Hours)

Pre-requisites: MATH 212 or MATH 266 Codes with algebraic structure for error control are examined

Block codes including Hamming codes and Reed-Muller codes, BCH codes, and other cyclic codes and their implementation are treated. Other topics may include: convolutional codes, efficiency considerations, and Shannon's fundamental theorem of information theory.

Course equivalencies: X-MATH328/COMP328

MATH 331 Cryptography (3 Credit Hours)

Pre-requisites: Theoretical Foundations: MATH201 or COMP363;

Programming Foundations: COMP125 or COMP150 or COMP170 or COMP/MATH 215 This course introduces the formal foundations of cryptography and also investigates some well-known standards and protocols, including private and public key cryptosystems, hashing, digital signatures, RSA, DSS, PGP, and related topics. Outcome: Students will gain an understanding of cryptosystems widely used to protect data security on the internet, and be able to apply the ideas in new situations as needed.

Course equivalencies: X-COMP331/MATH331

MATH 344 Geometry (3 Credit Hours)

Pre-requisites: MATH 212 This course discusses axiomatic systems which define geometries and includes topics from synthetic and analytic projective geometry

Outcome: Students will obtain an understanding of the many different geometries that are studied by teachers and researchers.

MATH 345 Introduction to Financial Mathematics Derivatives (3 Credit Hours)

Pre-requisites: (MATH 264 or MATH 266) and MATH 304 The course provides an introduction to the mathematical theory of option pricing. We will rigorously derive option relationships using no arbitrage conditions, introduce rudimentary stochastic calculus and Brownian motion as models for stock prices, and give an introduction to methods for solving partial differential equations to give explicit Black-Scholes formulas.

Outcomes:

The students will gain knowledge of the theory of options, bond and stock pricing, portfolio optimization, and will be exposed to other relevant applications of Mathematics to Finance

MATH 351 Introduction to Real Analysis I (3 Credit Hours)

This course provides a rigorous treatment of the real numbers and real-valued functions of a real variable, including sequences, the Bolzano-Weierstrass and Heine-Borel theorems, topology, uniform continuity, fixed-point theorems, derivatives, and other selected topics. *Pre-requisites:* MATH 201 and MATH 263 and (MATH 212 or MATH 266) Outcome: Students will obtain an understanding of the fundamentals of real analysis that will prepare them for advanced work in mathematics.

MATH 352 Introduction to Real Analysis II (3 Credit Hours)

Pre-requisites: MATH 351 This course, a continuation of Mathematics 351, provides the theoretical background for differentiability and integrability on $\mathbb{R}$ and $\mathbb{R}^n$ and Taylor's theorem, the change of variable theorem, the inverse and implicit function theorems, Lebesgue integration, and other selected topics

Outcome: Students will obtain an understanding of topics in advanced analysis that will prepare them for graduate level work in mathematics.

MATH 353 Introductory Complex Analysis (3 Credit Hours)

Pre-requisites: (MATH 264 and MATH 266) and MATH 351 This course provides an introduction to the theory of functions of a complex variable, including analytic functions, contour integrals, the Cauchy integral formula, harmonic functions, Laurent series, residues and poles, conformal mapping, and other selected topics

Outcome: Students will obtain an understanding of the fundamentals of complex analysis that will prepare them for advanced work in mathematics.

MATH 355 Methods of Applied Mathematics (3 Credit Hours)

Pre-requisites: MATH 264 Vector calculus, linear transformations, matrices, series solutions of differential equations, special functions; Fourier series, Fourier and Laplace transforms; Partial differential equations and topics from complex analysis, Green's functions, integral equations, the calculus of variations

Outcome: Facility with mathematical methods used in sciences and engineering.

Course equivalencies: X-PHYS301/PHYS271/MATH355

MATH 356 Mathematical Modeling (3 Credit Hours)

This course will teach students how to use various areas of mathematics, such as vector calculus, linear algebra, and ordinary differential equations, to formulate mathematical models in, for example, particle and continuum mechanics, biology, economics, finance, etc. *Pre-requisites:* MATH 266 Linear Algebra and Differential Equations or (MATH 264 Ordinary Differential Equations and MATH 212 Linear Algebra) Outcome: Students will learn how to formulate mathematical models.

MATH 358 Introduction to Optimization (3 Credit Hours)

The course is an introduction to linear, nonlinear, and integer optimization, and may include optimization on graphs, stochastic optimization, etc. Modeling of real-life problems as optimization problems, mathematical analysis of resulting optimization problems, and computational approaches to solving the problems will be covered. *Pre-requisites:* (MATH 162 or MATH 263A) and (MATH 212 or MATH 266)

Course equivalencies: X-MATH358/STAT358

Outcomes:

Students will learn how to recognize optimization problems, model real-life challenges as optimization problems, perform mathematical analysis of the problems, and solve the problems using computational tools

MATH 360 Introduction to Game Theory (3 Credit Hours)

Pre-requisites: MATH 162 or MATH 162 The noncooperative and cooperative theories of games

Two person zero sum matrix games, nonzero sum N -person games, Nash equilibria of games with a continuum of strategies, auctions, duels. Cooperative game theory, including the theory of bargaining, the theory of fair allocation of rewards using the nucleolus and using the Shapley value. Students will obtain an understanding of the fundamentals of mathematical game theory.

MATH 365 Introduction to Partial Differential Equations (3 Credit Hours)

Pre-requisites: MATH 264 or MATH 266 Outcomes: Students will learn fundamental results and methods in partial differential equations and their applications

This course provides an introduction to basic topics in partial differential equations (PDE). In addition to first order PDE, such as the transport equation, the main types of second order PDE, including the Laplace equation, the heat equation, and the wave equation, will be studied in detail.

MATH 366 Applied Dynamical Systems (3 Credit Hours)

Modeling, analysis, and prediction of short-term and asymptotic behavior of dynamical systems is studied. Continuous-time and discrete-time dynamical systems are considered, and modeled by differential and difference equations, respectively. Motivation comes from biological, chemical, mechanical, and engineering systems. *Pre-requisites:* MATH 266 Linear Algebra and Differential Equations or (MATH 264 Ordinary Differential Equations and MATH 212 Linear Algebra) Students will learn how to model dynamical systems and predict their behavior.

MATH 376 Formal Lang & Automata (3 Credit Hours)

Pre-requisites: COMP 163 or MATH 201 or MATH 212 or MATH 266 This course introduces formal language theory, including such topics as finite automata and regular expressions, pushdown automata and context-free grammars, Turing machines, undecidability, and the halting problem Outcome: An understanding of the theoretical underpinnings of computability and complexity in computer science.

Course equivalencies: X-COMP376/MATH376

MATH 386 Introduction to Topology (3 Credit Hours)

Pre-requisites: MATH 351 This first course in topology discussed topological spaces, continuity, connectedness, path-connectedness, compactness, product spaces, quotient spaces, Tychonoff's theorem, the Baire category theorem, and other selected topics

Outcome: Students will obtain a background in topology that will allow them to apply this topic to other areas of mathematics or to pursue graduate studies.

MATH 388 Special Topics in Mathematics (1-3 Credit Hours)

This course covers advanced topics in mathematics, including analysis, topology, algebra, applied mathematics, and logic. *Outcome:* Students will obtain an understanding of an advanced topic in their major.

MATH 390 Undergraduate Seminar (1 Credit Hour)

Pre-requisites: Senior Standing, including completion of Math 304/Stat 304 or Math 313 or Math 351

The seminar will cultivate students' presentation skills through participation in and critical discussion of brief lectures on familiar and unfamiliar topics; preparation and presentation of two brief lectures by the student (one on a familiar topic from the curriculum, one on a higher level material not customarily from the curriculum); and preparation of an extended abstract summarizing the advanced material presented.

Outcomes:

Students will gain the ability to present material in Mathematics and applications to a general audience

MATH 395 Capstone Seminar (3 Credit Hours)

Pre-requisites: MATH 313 Abstract Algebra, MATH 351 Introduction to Real Analysis I, and MATH 390 Undergraduate Seminar The course unifies the knowledge gained in previous Mathematics courses and provides an opportunity for in-depth study and presentation of advanced material not usually covered in the standard Mathematics curriculum No course description is available

Outcomes:

Students will learn how to integrate previous knowledge in exploring new topics in Mathematics, discover applications to other disciplines, and refine their mathematical writing and presentation skills

MATH 398 Independent Study (1-6 Credit Hours)

This course allows students to engage in independent study on selected topics in mathematics under the supervision of a faculty member.

Outcome: Students will obtain an understanding of an advanced topic in their major.

MATH 401 Introduction to Graduate Study in Mathematics (1 Credit Hour)

This is a professional development seminar for the beginning graduate student. Through short lectures, faculty panels, career panels, regular reading and writing assignments, and assorted workshops, it provides the student with the tools they need to succeed in the program, and beyond.

Pre-requisites: Graduate Student status

Outcomes:

Students will: gain practice reading, writing, listening to, and summarizing advanced mathematics; learn the pedagogical, ethical, and DEI matters associated with careers in the mathematical sciences; gain practice giving lectures, writing problem-sets, and grading mathematics; explore possible career trajectories

MATH 404 Probability & Statistics I (3 Credit Hours)

As the first part in a two-semester sequence, this course introduces basic principles of probability including combinatorial methods, probability and cumulative density and mass functions, moment generating functions and applications, expected values and variance and other moments, and order statistics. This course emphasizes related theorems and proofs.

Course equivalencies: X-MATH404/STAT404

MATH 405 Probability & Statistics II (3 Credit Hours)

As the second part in a two-semester sequence, this course thoroughly explores the central limit theorem and its variants and uses, estimation, hypothesis testing, sufficiency, efficiency, uniformly most powerful methods, information, and asymptotic methods. Time permitting, Bayesian topics may also be explored and discussed.

Course equivalencies: X-MATH405/STAT405

MATH 406 Stochastic Processes (3 Credit Hours)

This course addresses topics such as finite-state Markov processes and Markov chains, classification of states, long-run behavior, continuous time processes, birth and death processes, random walks, and Brownian motion.

Course equivalencies: X-MATH406/STAT406

MATH 409 Advanced Numerical Analysis (3 Credit Hours)

Introduction to computational methods and error analysis. Topics include numerical solution of equations, interpolation and approximation, numerical differentiation and integration, numerical solution of ordinary and partial differential equations. Numerical methods in linear algebra, such as approximate solutions to the eigenvalue problem, will also be covered.

Course equivalencies: X-COMP409/MATH409

MATH 413 Algebra I (3 Credit Hours)

As the first part in a two-semester sequence, this course covers basic algebraic structures, focused mainly on groups. Topics include normal subgroups, isomorphism theorems, actions on sets, and Sylow theorems. Additional topics chosen from linear groups, category theory, homological algebra, and representation theory.

MATH 414 Algebra II (3 Credit Hours)

As the second part in a two-semester sequence, this course covers basic algebraic structures, focused mainly on rings and fields. Topics include integral domains, vector spaces, modules, etc., Additional topics chosen from Galois theory, Dedekind domains, category theory, tensor products, homological algebra, and representation theory.

MATH 415 Topics in Linear Algebra (3 Credit Hours)

An abstract approach to the study of finite- and infinite-dimensional vector spaces and their transformations. Selected topics may include similarity, duality, canonical forms, singular value decomposition, inner products, discrete Fourier transform, bilinear forms, Hermitian and unitary spaces.

MATH 416 Survey of Algebra (3 Credit Hours)

A survey course in three parts. I: the theorems of Burnside, Sylow, and Jordan-Hölder, toward the classification of finite simple groups. II: (noncommutative) rings and modules over PIDs, including applications to classification problems. III: additional topic chosen by instructor, e.g., category theory, homological algebra, division rings, and representation theory. *Pre-requisites:* Graduate Student status Students will recognize the common theme of classification uniting the course topics.

Outcomes:

Students will demonstrate facility with standard proof techniques in abstract algebra, and the ability to work with algebraic structures (including actions, morphisms, and quotients; concretely and abstractly)

MATH 418 Combinatorial Mathematics (3 Credit Hours)

An introduction to the basic methods of counting and generation, including: induction, pigeon-hole principle, permutations, combinations, recurrence relations, generating functions, and inclusion-exclusion principle. Topics drawn from partitions, graph theory, graph coloring, and combinatorial design, Polya's theory, Ramsey's theorem, and optimization problems.

Course equivalencies: X-COMP418/MATH418

MATH 420 Topics in Mathematical Logic (3 Credit Hours)

Pre-requisites: MATH 313 or MATH 351 or permission of the instructor

This course will be a mathematical study of the concepts of truth and proof and how they relate to each other

The main topics to be covered are propositional logic, first order predicate logic, computability and undecidability results.

Outcomes:

Students will develop proof writing skills, expand mathematical literacy, understand the expressive power and limitations of propositional and predicate logics and learn the mathematical meaning of "truth" and "proof"

MATH 422 Advanced Topics in Number Theory (3 Credit Hours)

Pre-requisites: MATH 201 or the equivalent or permission of the instructor

Topics chosen from: Pythagorean triples, Fermat's Last Theorem, Pell's equation, Fermat descent, primes in arithmetic progressions, Mersenne primes, perfect numbers, primitive roots, primality testing, Carmichael numbers, RSA encryption, quadratic residues, quadratic reciprocity, integers as the sum of squares, Gaussian integers, continued fractions, the distribution of primes, Diophantine approximation, elliptic curves; others

Understand the proofs of related theorems. Solve problems and prove theorems from topics covered in class.

Outcomes:

Understand the importance of historically significant concepts and problems in number theory

MATH 428 Algebraic Coding Theory (3 Credit Hours)

Codes with algebraic structure for error control are examined. Block codes including Hamming codes and Reed-Muller codes, BCH codes, quadratic residue codes, and other cyclic codes and their implementation are treated. Other topics may include: convolutional codes, efficiency considerations, and Shannon's fundamental theorem of information theory.

Course equivalencies: X-COMP428/MATH428

MATH 431 Cryptography (3 Credit Hours)

This course introduces the formal foundations of cryptography and also investigates some well-known standards and protocols, including private and public key cryptosystems, hashing, digital signatures, RSA, DSS, PGP, and related topics. Additional topics may include more modern cryptosystems, such as those based on elliptic curve and lattices.

Course equivalencies: X-COMP431/MATH431

MATH 443 Intro to Algebraic Topology (3 Credit Hours)

In the study of topology, algebraic constructions (called "invariants") are used to help determine whether two differently presented topological spaces are indeed different. In this course, we introduce various topics related to this endeavor, including homotopy equivalence of topological spaces, group presentations, homomorphisms of spaces and of groups, covering spaces, the fundamental group, and homology theories. Time permitting, the cohomology ring of a space will also be introduced.

MATH 444 Topics in Geometry (1-3 Credit Hours)

An axiomatic approach to the study of geometry. While Euclidean geometry will be the main focus, elliptic and hyperbolic geometries will also be studied in detail. Additional non-Euclidean geometries (including projective, metric, and finite) and additional approaches (such as transformations and synthetic treatments) will also make an appearance.

MATH 445 Financial Math Derivatives (3 Credit Hours)

A first course in the mathematics of derivatives pricing. Topics include options markets, Black-Scholes pricing formulas, stochastic calculus, hedging schemes, binomial option pricing, exotic options, and more general derivatives.

MATH 451 Analysis I (3 Credit Hours)

A first course in the foundations of analysis. Topics include measure theory, Lebesgue integration, Hilbert and Banach spaces, and complex analysis.

MATH 452 Analysis II (3 Credit Hours)

A second course in the foundations of analysis. Topics include the Fubini Theorem, differentiation, and linear and nonlinear functional analysis.

MATH 453 Complex Analysis (3 Credit Hours)

An introduction to functions of a single complex variable. Topics include analytic functions, contour integrals, Cauchy integral formula, harmonic functions, Liouville's theorem, Laurent series, analytic continuation, and conformal mapping. Additional topics may include theorems of Picard and Rouché, the Riemann mapping theorem, Riemann surfaces, and the fast Fourier transform. *Pre-requisites:* Graduate Student Status

Outcomes:

Students will be able to: analyze limits and continuity for complex functions; evaluate contour integrals (by the fundamental theorem, by Cauchy integral formula, and by the residue theorem); and represent functions as Laurent series, classifying singularities and poles

MATH 454 Survey of Analysis (3 Credit Hours)

An introduction to advanced topics in analysis, including measure theory, functional analysis and partial differential equations. Measurable sets; the Lebesgue integral in $\mathbb{R}^n$; L^p and other function spaces; weak convergence; Lax-Milgram Theorem; and the calculus of variations.

These topics are then applied to the study of linear PDEs. *Pre-requisites:* Graduate Student status Students will be able to apply these concepts to study PDEs.

Outcomes:

Students will understand the central elements of Lebesgue integration (from measurable sets to the fundamental theorem of calculus for Lebesgue integrals) and of L^p spaces (including Minkowski and Hölder inequalities)

MATH 456 Introduction to Mathematical Modeling (3 Credit Hours)

A course in modelling. Mathematics has the power to describe the world and predict future events. This can be seen through its use in physics, economics, and biology. In this course students will learn how to harness the power of mathematics to model real world phenomenon. This will mainly be done using calculus and differential equations, but other mathematical tools will be used as well.

MATH 458 Topics in Optimization (3 Credit Hours)

This course presents the study of selected mathematical models and their application to applied problems. Topics in linear and mathematical programming, optimization theory, and game theory are examined.

Course equivalencies: X-MATH458/STAT458/428

MATH 460 Theory of Games (3 Credit Hours)

The noncooperative and cooperative theories of games. Two person zero sum matrix games, nonzero sum N-person games, Nash equilibria of games with a continuum of strategies, auctions, duels. Cooperative game theory, including the theory of bargaining, the theory of fair allocation of rewards using the nucleolus and using the Shapley value.

MATH 464L History of Math with Science Contributions for Mid Grd (3 Credit Hours)

This course will provide a thematic approach to the history of mathematics with emphasis on contributions by noted mathematicians, mathematical societies and scientists highlighting women and under-represented populations. The history of numbers and numerals, computation, geometry, algebra, trigonometry, calculus, and science patterns will be explored emphasizing the contributions of the Babylonian, Egyptian, Chinese, and Roman civilizations as well as such individuals as Euclid, Fermat, Archimedes, Kepler, Pythagoras, Euler, Hypatia, Sonja Kovalevsky, Emmy Noether and others as appropriate. The influence of technology and its applications will also be presented as appropriate. Course Outcome: Students will obtain a unique historical perspective on the various areas of mathematics in the middle grades.

MATH 465 Introduction to Partial Differential Equations (3 Credit Hours)

This course is an introduction to the subject of partial differential equations. Focus will be on studying linear partial differential equations, such as the wave equation, that appear ubiquitously in nature. To solve these equations we will use techniques such as separation of variables and Fourier series. We will also discuss different boundary conditions, and their physical interpretation.

Course equivalencies: X-MATH465/STAT465

MATH 466L Geometry with Science Applications for the Middle Grades (3 Credit Hours)

This course is limited to graduate education students only; it is not accepted for other Mathematics and Statistics graduate degree programs.

MATH 468L Prob and Stat with Science Applications for Mdle Grd (3 Credit Hours)

Pre-requisites: School of Education Graduate Program Data collection and display, simulations, surveys, probability and elementary statistics such as mean, median, mode, standard deviation, etc. will be the focus of this course (Illinois Learning Standard Goal 10) Appropriate techniques for graphing (scatter plots, histograms, regression, correlation) with and without technology will be a focus of this course

No course description is available

Outcomes:

Students will obtain a background in the fundamentals of descriptive and inferential statistics

MATH 469L Mathematics and Science Applications for Mid Grd (3 Credit Hours)

Mathematical concepts such as rates, ratios and proportions, probability and statistics and measurement that support scientific investigation and analysis will provide the focus for this course. Hands-on activities that illustrate the connections be used. Hands-on activities that illustrate the connections between Science and Math and appropriate use of technology will be emphasized. Course

Outcomes:

Students will acquire knowledge of mathematics that supports scientific investigation for the middle grades

MATH 475 Functional Analysis (3 Credit Hours)

Metric, normed, Banach, Hilbert, and sequence spaces. Linear operators and Fourier analysis. Hahn-Banach extension principle, Baire category, and uniform boundedness. Selected applications to economics, physics, engineering, and quantum theory.

MATH 476 Automata & Formal Languages (3 Credit Hours)

Pre-requisites: MATH 201 or MATH 212 or COMP 163

No course description is available

Course equivalencies: X-COMP476/MATH476

MATH 486 General Topology (3 Credit Hours)

General theory of topological and metric spaces, compact spaces, convergence and completeness in metric spaces, connected spaces.

MATH 488 Special Topics in Mathematics (1-4 Credit Hours)

Selected topics in mathematics not covered in the department's regular course offerings. May be repeated for credit.

MATH 495 Graduate Practicum in Mathematics (2 Credit Hours)

A project-based course. Under faculty consultation, students will design and independently carry out a research project devoted to the development, pedagogy, or application of mathematics. To earn credit for this course, the student will deliver both an oral presentation and technical paper at the level expected in the professional workplace. *Pre-requisites:* Math 401 and (Math 414 or Math 452 or Math 416 or Math 454). Graduate Student status

Outcomes:

Students will have: analyzed professional literature from multiple sources, resulting in a motivating question for the project; gained practice communicating clearly, concisely, and in-step with discipline norms; and contributed to the learning, teaching, or application of mathematics through their findings

MATH 498 Independent Study (1-6 Credit Hours)

This is a directed study course undertaken by advanced students and supervised by a member of the graduate faculty.

MATH 595 Thesis Supervision (6 Credit Hours)

Research under faculty guidance including training in scientific writing and the production of a thesis and research presentation.

MATH 605 Master's Study (0 Credit Hours)

This course is a non-credit means of permitting students to be formally enrolled at Loyola while preparing for the final practicum.

Medical Laboratory Science (MLS)

Discover, search, courses!

MLS 401 Laboratory Fundamentals (2 Credit Hours)

Introduction to life in the clinical laboratory. Safety practices, laboratory mathematics, statistical analysis, and fundamental laboratory training in phlebotomy, pipetting, microscopy and calibrations. Enrollment conditions: Admission to M.S. in Medical Laboratory Science program

Outcomes:

Upon completion, students will demonstrate safe and professional knowledge consistent with the field of Medical Laboratory Science, including use of universal precautions, phlebotomy, processing specimens, microscopy, and calibrations

MLS 410 Clinical Immunology (2 Credit Hours)

This course focuses on principles and procedures of immunology and serology. Emphasis will be on the role of the immune system in health and disease and developing an understanding of the role of both humoral and cellular immunity. Admission to M.S. in Medical Laboratory Science program Upon completion, students will demonstrate understanding of the discipline of immunology and apply theoretical concepts to differentiate patient health and disease states.

MLS 415 Urinalysis and Body Fluids (2 Credit Hours)

Theoretical and applied concepts related to the formation, collection, processing, and evaluation of urine and body fluids. Study of urine and body fluids including chemical, physical, and microscopic properties. This course also encompasses the evaluation of normal fluid characteristics, and those that reflect abnormality or disease. Restricted to students in the M.S. in Medical Laboratory Science program. Upon completion, students will be able to explain the formation of fluids in the human body and correlate normal and pathological states associated with chemical, physical and microscopic findings.

MLS 420 Molecular Diagnostics (2 Credit Hours)

This course is will provide students with an understanding of the processes which have been collectively referred to as molecular biology as they relate to laboratory medicine. Instruction emphasizes molecular methodologies and current applications of molecular diagnostics utilized in the clinical laboratory. Upon completion of this course students will gain a background in molecular biology which will promote critical thinking and problem solving as it relates to clinical molecular diagnostics.

MLS 430 Clinical Chemistry I (3 Credit Hours)

Pre-requisites: Admission to M.S. in Medical Laboratory Science program *Outcomes:* Upon completion of this course, students will describe chemical constituents of bodily fluids, their regulation and laboratory methods of analysis for compounds including electrolytes, carbohydrates, lipids and proteins

This course is designed for medical laboratory science students to gain an understanding of the analytical principles and components of instrumentation utilized in clinical chemistry laboratories.

MLS 440 Clinical Chemistry II (2 Credit Hours)

Advanced course in clinical chemistry/biochemistry which continues study of measurement and interpretation of chemical constituents in human blood and body fluids. Topics include endocrinology, organ systems, therapeutic drug monitoring, toxicology, tumor markers and nutritional chemistry. This course will prepare students for their clinical practicum in Clinical Chemistry. Enrollment Condition: Admission to the M.S. in Medical Laboratory Science program

Outcomes:

Upon completion, students will be able to identify interrelated human metabolic functions in normal and disease states, analyze laboratory data, interpret results, and utilize information to determine a diagnosis

MLS 450 Hematology (4 Credit Hours)

Study of formed elements of blood including normal and abnormal conditions. Recognition and correlation of pathological changes in cells of the peripheral blood and bone marrow to disease states. This course will prepare students for a clinical practicum in Hematology. Admission to the M.S. in Medical Laboratory Science program required. Identification of morphological characteristics for normal and abnormal cellular elements of blood and associations to disease states.

Outcomes:

Students will describe the physiology, development of cells, and process of hematopoiesis

MLS 455 Hemostasis (2 Credit Hours)

This course will cover the mechanisms by which blood coagulates. Topics explored include the pathophysiology of hemostatic disorders and the antithrombotic therapies utilized to manage them. Focus on examination of the coagulation system and correlations of laboratory results to clinical findings in the classification of disorders. Admission to the M.S. in Medical Laboratory Science program Upon completion of this course students will apply knowledge of the process of coagulation to interpret laboratory results as they relate to hemostatic dysfunctions and treatment of clinical disease.

MLS 460 Immunohematology (5 Credit Hours)

Focus on principles of the antigen/antibody reactions and their relevance to Immunohematology. ABO/Rh and major blood group systems, regulation, procedures, adverse reactions, and donation of blood components are all studied as integral parts to the practice of transfusion medicine. This course prepares students for a clinical practicum in Immunohematology. Enrollment Condition: Admission to the M.S. in Medical Laboratory Science program.

Outcomes:

Upon completion of this course students will be able to apply theoretical concepts and techniques to analyze and determine Immunohematology results

MLS 465 Laboratory Leadership I (1 Credit Hour)

Pre-requisites: Admission to the M.S. in Medical Laboratory Science program

This first of three courses in the leadership series, prepares the student for an entry-level laboratory position by developing skills in basic laboratory management practices including principles of leadership, functions of a manager, and personnel management.

Outcomes:

Upon completion of this course students will be able to utilize leadership theories to evaluate and demonstrate effective management through evaluation of common clinical laboratory issues

MLS 466 Laboratory Leadership II (1 Credit Hour)

The second installment in the three course Leadership series prepares the student for a laboratory position by developing skills in basic laboratory management practices including financial considerations, laboratory regulations, and laboratory operations. Admission to the M.S. in Medical Laboratory Science program Upon completion of this course students will exhibit knowledge of the financial requirements needed for effective laboratory management and the role of laboratorians in regulation and accreditation of laboratories.

MLS 467 Laboratory Leadership III (1 Credit Hour)

The final installment in the Leadership series of courses prepares the student for a laboratory position by developing skills in career planning, introduction to professional development, grant writing, and process improvement planning. Completion of MLS 466 Laboratory Leadership II and good academic standing as defined by the M.S. in Medical Laboratory Science handbook. Upon completion of this course students will exhibit skills needed for effective laboratory management including departmental improvement planning, professional development and performance feedback.

MLS 470 Bacteriology and Virology (5 Credit Hours)

Introduction to bacteria and viruses, with a focus on organisms that are medically relevant to humans. Specimen collection, processing, identification techniques, and recognition of key diagnostic features will be emphasized. Students will correlate clinical features to laboratory findings. This course will prepare students for their clinical practicum in Microbiology. Pre-requisite: Admission to the M.S. in Medical Laboratory Science program.

Outcomes:

Upon completion, students will be able to identify bacterial or viral organisms by characteristic clinical features of infections through laboratory testing

MLS 475 Clinical Parasitology and Mycology (2 Credit Hours)

Study of parasites and fungi that are medically relevant to humans. This course introduces students to the taxonomy and identification of morphologic and microscopic characteristics of parasites and fungi. Diagnosis of disease states based upon laboratory findings will be emphasized. Admission to the M.S. in Medical Laboratory Science program Upon completion of this course, students will be able to identify the pathogenesis, symptomatology, laboratory diagnosis, and treatment for the parasites and fungi included in the course.

MLS 481 Clinical Practice in Hematology (3 Credit Hours)

Pre-requisites: Completion of MLS 410, MLS 415, MLS 450, MLS 466 and good academic standing as defined by the M.S. in Medical Laboratory Science Handbook

Clinical experience in Hematology under the guidance of qualified medical laboratory professionals. Students will apply knowledge and clinical skills gained in their first year courses. This course focuses on the acquisition of manual and automated laboratory skills, laboratory safety, understanding the principles of test procedures, instrumentation, and quality control.

Outcomes:

Upon completion of this course students will provide evidence of possessing the knowledge and skills necessary to perform Hematology testing in a medical laboratory

MLS 482 Clinical Practice in Chemistry (3 Credit Hours)

Pre-requisites: Completion of MLS 440, MLS 466, and good academic standing as defined by the M.S. in Medical Laboratory Science Handbook

Clinical experience in Chemistry under the guidance of qualified medical laboratory professionals. Students will apply knowledge and clinical skills gained in their first year courses. This course focuses on the acquisition of manual and automated laboratory skills, laboratory safety, understanding the principles of test procedures, instrumentation, and quality control. Outcome: Upon completion of this course students will provide evidence of possessing the knowledge and skills necessary to perform Chemistry testing in a medical laboratory.

MLS 483 Clinical Practice in Immunohematology (3 Credit Hours)

Clinical experience in Immunohematology under the guidance of qualified medical laboratory professionals. Students will apply knowledge and clinical skills gained in their first year courses. This course focuses on the acquisition of manual and automated laboratory skills, laboratory safety, understanding the principles of test procedures, instrumentation, and quality control. Completion of MLS 455, MLS 460, MLS 466, and good academic standing as defined by the M.S. in Medical Laboratory Science Handbook. Upon completion of this course students will provide evidence of possessing the knowledge and skills necessary to perform Immunohematology testing in a medical laboratory.

MLS 484 Clinical Practice in Hemostasis and Body Fluids (1-2 Credit Hours)

Pre-requisites: MLS 415, MLS 455, MLS 466, and good academic standing as defined by the M.S. in Medical Laboratory Science Handbook Clinical experience in Hemostasis, Urinalysis, and other Body Fluid analyses under the guidance of qualified medical laboratory professionals. Application of knowledge and clinical skills gained from first year courses. Focus on acquisition of manual and automated laboratory skills, laboratory safety, principles of test procedures, instrumentation, and quality control.

Outcomes:

Upon completion of this course students will demonstrate evidence of possessing the knowledge and skills necessary to perform Hemostasis, Urinalysis, and Body Fluid analyses testing in a medical laboratory

MLS 485 Clinical Practice in Microbiology (3 Credit Hours)

Pre-requisites: Completion of MLS 470, MLS 475, and good academic standing as defined in the M.S. in Medical Laboratory handbook Clinical experience in Microbiology under the guidance of qualified medical laboratory professionals. Students will apply knowledge and clinical skills gained in their first year courses. This course focuses on the acquisition of manual and automated laboratory skills, laboratory safety, understanding the principles of test procedures, instrumentation, and quality control. Outcome : Upon completion of this course students will provide evidence of possessing the knowledge and skills necessary to perform Microbiologic testing in a medical laboratory.

MLS 486 Clinical Practice- MLS Special Topics (1-2 Credit Hours)

Clinical experience in specialty areas of laboratory medicine under the guidance of qualified medical laboratory professionals. Students will actively engage in applying the medical knowledge and clinical skills gained in the didactic and student training laboratory courses in Molecular Diagnostics, Flow Cytometry, HLA testing, and laboratory administration. Completion of MLS 420, MLS 466, and good academic standing as defined in the M.S. in Medical Laboratory Science handbook. Upon completion of this course students will provide evidence of possessing the knowledge and skills needed to enter into specialty areas of a medical laboratory.

MLS 490 MLS Educational Practice and Review (2 Credit Hours)

Pre-requisites: Completion of MLS 466 and good academic standing as defined by the M.S. in Medical Laboratory Science handbook This course will prepare students for taking a Medical Laboratory Science certification exam. Students will gain basic educational and pedagogical approaches needed to train others in the field of Medical Laboratory Science. Application of theories demonstrated through presentation of review lectures and assisting in kinesthetic instruction for laboratory sessions. Outcome: Upon completion of this course students will be able to utilize effective teaching strategies to plan and present a lecture unit, including writing objectives and assessment strategies.

MLS 495 Medical Laboratory Science Capstone (1-2 Credit Hours)

Pre-requisites: Completion of MLS 466 and good academic standing as defined by the M.S. in Medical Laboratory Science handbook The MLS Capstone exposes students to leadership and ancillary niche aspects beyond those of a standard Medical Laboratory Science curriculum. Students will create a Capstone project to reflect on their unique experience in the field and demonstrate the capacity to utilize knowledge and make evidence-based decisions regarding laboratory medicine. Outcome: This course will provide students the opportunity to demonstrate knowledge and skills acquired in the academic coursework, professional practice, and their Capstone Experience.

Medical Physics (MPHY)

Discover, search, courses!

MPHY 400 Interactions of Radiation with Matter (3 Credit Hours)

Introductions of radiation with matter and provides the foundation for future courses in imaging and therapy. Topics covered include: exponential attenuation, x-ray production, interactions of radiation with matter, radioactive decay, atomic and nuclear structure, charged particle equilibrium, cavity theory, dosimetry, ionization chambers and other measurement devices.

Outcomes:

Students will understand how x-rays are produced, basic interactions of photons and electrons in matter, cavity theory, ionization chambers and other devices

MPHY 402 Image-Based Anatomy and Physiology (3 Credit Hours)

This course will cover all the expected basic elements of human anatomy and medical physiology with a particular emphasis on the radiographic anatomy of relevance to medical physicists. Prerequisite(s): Graduate standing in the MPHY program or permission of instructor

MPHY 404 Physics and Mathematics of Medical Imaging I (3 Credit Hours)

The fundamental physics and mathematics related to image creation are the primary focus of this course. Specific topics related to imaging include: linear algebra, Fourier analysis, sampling theory, random variables and stochastic processes, image formation, biokinetics and compartmental analysis. Prerequisite(s): Enrollment in MPHY 400. Graduate standing in the MPHY program or permission of instructor

MPHY 410 Medical Physics Seminar (1 Credit Hour)

Held once per week, seminars are required for all graduate students in Medical Physics so as to introduce them to the research actively being pursued by the program's faculty and senior graduate students. Prerequisite(s): Graduate standing in the MPHY program or permission of instructor

Medical/Surgical Nursing (MSN)

Discover, search, courses!

MSN 277 Medical/Surgical Nursing: Adult Health I (4 Credit Hours)

Pre-requisite: Must have taken and passed PSYC 273 or PSYC 274 and GNUR 294 with a C- or better OR Must have taken and passed PSYC 273 or PSYC 274 with a C- or better and be enrolled in GNUR 294 This course is designed to use levels of prevention to provide nursing care for adults with selected health issues. Emphasis is placed on health promotion, early detection and treatment and restoration of health for individuals, families and communities across the health care continuum. This course satisfies the Engaged Learning requirement.

MSN 277L Medical/Surgical Nursing: Adult Health Lab I (3 Credit Hours)

Must also enroll in MSN 277 This course is designed to apply levels of prevention in nursing care for adults with selected health issues. Emphasis is placed on health promotion, early detection and treatment and restoration of health for individuals, families, and communities across the health care continuum.

This course satisfies the Engaged Learning requirement.

MSN 377 Adult Health II - Advanced Medical-Surgical (4 Credit Hours)

Pre-requisites: Must have taken and passed MSN 277, MSN 277L, GNUR 290, GNUR 294, GNUR 360, with a C- or better

Must also enroll in MSN 377L. This course builds on MSN 277, Adult Health I, and focuses on the nursing care of adults experiencing selected critical health issues. Physical, psychosocial, cultural, spiritual assessments and health data are incorporated into the identification of interventions within the context of life-threatening conditions. Students incorporate evidence-based practice guidelines and interdisciplinary collaboration to maximize health outcomes.

This course satisfies the Engaged Learning requirement.

Outcomes:

Nursing care of adults experiencing selected critical health issues

MSN 377L Adult Health II - Advanced Medical Surgical Clinical (3 Credit Hours)

Must also enroll in MSN 377. This course builds on MSN 277 L, Adult Health I Clinical, and focuses on the nursing care of adults experiencing selected critical health issues. Physical, psychosocial, cultural, spiritual assessments and health data are obtained and interventions are provided within the context of life-threatening conditions. Students incorporate evidence-based practice guidelines and interdisciplinary collaboration to maximize health outcomes.

This course satisfies the Engaged Learning requirement.

Outcomes:

Nursing care of adults experiencing selected critical health issues - clinical

MSN 408 APN Practicum (1-9 Credit Hours)

Pre-requisites: GNUR 413 & 442 (minimum grade of B-); Co-requisites: GNUR 425 This course prepares the student to understand that scholarly inquiry, evaluation of evidence, and the development of evidence-based practices/protocols form the foundation for evidence-based practice. Methods of operationalizing scholarly inquiry include: understanding relationships among nursing theory, research, principles of epidemiology and practice; formulating research questions and evidence-based practice questions; identifying and appraising existing literature; critically evaluating research methodologies used in the study of an issue or problem; and applying inquiry to practice. The importance of the translation of scientific evidence to improve practice is emphasized. Social, cultural, political and ethical issues related to research are addressed, consistent with the Jesuit values surrounding social justice.

MSN 431 12-Lead ECG Interpretation (1 Credit Hour)

12-Lead ECG Interpretation is a summer course that promotes in-depth exploration of the significant diagnostic ECG challenges encountered in the advanced practice nursing environment. An understanding of the importance of clinical assessment skills and clinical judgment associated with diagnosis of clients in a variety of settings is an underlying assumption of faculty teaching this course. Included in this course are techniques for interpreting a variety of basic and advanced dysrhythmias and the ECG changes associated with bundle branch block, myocardial ischemia and infarct, atrial and ventricular hypertrophy, electrolyte imbalance, drug effects on the ECG, and other miscellaneous changes. Diagnostic characteristics, causes of the disorder, clinical significance, and management strategies will be highlighted. The student will be provided with opportunities for practicing 12-lead ECG interpretation using a variety of media.

MSN 432 Diagnostic Imaging for Advanced Practice Nurses (1 Credit Hour)

This course offers the advanced practice registered nurse (APRN) basic principles of radiographic interpretation. A systematic approach to interpret chest x-rays (CXR) will be discussed. Normal and abnormal findings commonly seen in emergency departments and critical care areas are presented. Correlation between symptoms and radiographs will be delineated. Common indications for obtaining a plain x-ray, CT, or MRI and orthopedic injury will be discussed in regard to patient safety, cost contained care and optimization of outcome.

MSN 433 Suturing and Acute Wound Management (1 Credit Hour)

This course is designed to enable the APRN student to obtain the theoretical knowledge and practical skills necessary to assess and manage acute wounds. This didactic/lab course discusses principles of wound care and teaches students techniques of wound closure including pain control, basic suturing and advanced skin closures; management of infections and injuries to the skin, hands and feet; and simple incision and drainage of abscesses. The student will be able to practice advanced skills that essential in the clinical management of the patient with acute wounds.

MSN 447 CNS Practice Across the Adult Age Spectrum (3 Credit Hours)

This course promotes in-depth exploration of significant clinical problems occurring in adult health patients from the vantage point of the advanced practice nurse prepared as a clinical nurse specialist (CNS). This course will prepare the CNS student for expert clinical practice and the competencies to translate clinical expertise into quality, cost-effective outcomes for adult patients. A major focus of the course is to prepare CNS students to assume responsibility for coordination, management and assurance of safety and quality of care of adult patients across the three spheres of influence: patient/client, nurses and nursing practice, organization/system of adult health patients. Attention will be directed to identifying and analyzing selected problems, designing effective advanced nursing interventions and evaluating health care outcomes related to adult health patients. Special consideration will be given to the top Medicare diagnoses, National Patient Safety Goals, CMS core performance measures, and new models for healthcare delivery. Indications for leadership, collaboration and consultation with other health care professionals are emphasized to insure optimal clinical management and achievement of evidence-based outcomes for the hospitalized adult patient. Strategies for improving the quality of health care through patient safety interventions and strategies are incorporated into patient care protocols at the individual, group and system level. The subsequent APN practicum offers the student an opportunity to exercise critical judgment and implement theoretical knowledge in the coordinating and managing the care of adults experiencing acute and chronic health problems.

MSN 449 Management of Complex Adult Health Problems (3 Credit Hours)

One course of a three-course sequence, MSN 449 is designed to prepare the Nurse Practitioner to assume the responsibility for coordination and management of adult/older adult health care. A major focus of the course is to prepare the student to assess and manage selected complex health problems of adults/older adults in primary care settings. Indications for collaboration, consultation, and/or referral to other health care providers are emphasized as an integral part of the nurse practitioner's role. The accompanying practicum offers the student an opportunity to exercise critical judgment and implement theoretical knowledge in the management of care of adults/older adults who are experiencing complex health problems. Analyze pathophysiologic and psychosocial components of complex health problems while doing client assessments. 2. Select appropriate and cost effective diagnostic tests and procedures for complex health problems. 3. Choose appropriate and cost effective traditional and alternative therapeutic approaches in the management of complex health problems, with emphasis on health restoration and maintenance. 4. Formulate prognoses and expected outcomes for persons with complex health problems. 5. Determine when consultation and collaboration with and referral to appropriate health care providers are necessary. 6. Design an appropriate plan of care for the adult /older adult with complex health problems synthesizing knowledge from ethics, research, and biological, behavioral, and nursing science. 7. Evaluate the management outcomes of adults with complex health problems and revise management as appropriate.

Outcomes:

1

MSN 485 APN Practicum: Adult/Older Adult Acute Care NP (1-12 Credit Hours)

Pre-requisites: GNUR 413 & 442 (minimum grade of B-); Co-requisites: GNUR 425 This clinical practicum is designed to guide the student toward the development of scientific knowledge and advanced practice skills in the area of acute care nursing. The attainment of this advanced practice mastery involves the synthesis of concepts, knowledge and skills gained in the previous courses applied to the care of the acutely ill adult patient. Course content focuses primarily on the advanced practice of acute care nursing and guides the student toward an actualization of the role of the acute care practitioner. The student will care for the acute care patient from admission to the tertiary care center through discharge/rehabilitation when possible. Through the use of nursing frameworks, nursing diagnosis, the nursing process, application of advanced knowledge, and advanced practice skills, the student will develop strategies for the nursing management of the critically ill patient. Professional, legal, cultural and ethical implications are presented. The practicum offers the student opportunities to work with the interdisciplinary team and to develop skills necessary for advanced practice nursing, advanced management, and exploration of research in the area of acute care nursing. Clinical seminars will include discussion of concepts that have been introduced in previous courses and will be built upon with added depth. A grand rounds/case study approach will be utilized with cases cared for by students in the clinical arena. Other possible topics include: implementation of the advanced practice nursing role, social support, patient advocacy, vulnerable populations, cultural diversity, contracting, credentialing, privileging, etc. Seminars will also include identification of ethical issues in the students' practice, application of research findings, applying a Jesuit philosophy in the care of the acutely ill individual or family, and individual development of a philosophy of advanced practice nursing. Seminars will include student and faculty-led discussions.

MSN 510 Clinical Practicum for Advanced Practice in the CNS role (2-4 Credit Hours)

This practicum course guides the student toward a synthesis of concepts and content from nursing and related sciences, and toward the application of this knowledge to the advanced practice nursing of patients across the adult age spectrum. Clinical Nurse Specialist (CNS) students are prepared to impact three spheres: client, nurse/ nursing practice and the healthcare system. This course prepares students to make important contributions to health care including: disseminating new knowledge; designing and evaluating innovative strategies to improve quality of care and safety in all settings; improving systems of care; providing leadership that promotes interprofessional collaboration; and influencing and shaping health policy. Clinical experiences are provided in clinical areas related to the student's population as well as area of specialization in order to demonstrate achievement of quality, cost-effective, patient focused outcomes across all three spheres of impact. Pre-requisites: MSN 447 CNS Practice Across the Adult Age Spectrum Apply nursing health related models in the clinical practice setting; 2. Collaborate with the interprofessional team to support and improve patient outcomes; 3. Demonstrate the role of the CNS across the three spheres of impact: client, nurse/ nursing practice, and the healthcare system; 4. Design, deliver and evaluate evidence-based solutions to health-care problems that represent translation of best evidence into practice; 5. Utilize technology to manage information, support decision-making, deliver care, and evaluate outcomes; 6. Incorporate teaching-learning principles in meeting the educational needs of patients, their families, professional nursing staff, and the community at large; and 7. Analyze psychosocial, legal, ethical, political, and spiritual factors relevant to advanced nursing practice across the three spheres of impact.

Outcomes:

At the end of the course the student will be able to: 1

MSN 516 Adult Gerontology Acute Care NP Practicum (2-5 Credit Hours)

This practicum course guides the student toward a synthesis of content from nursing and related sciences and the application of this knowledge to the advanced practice role of the nurse practitioner in acute care. The practicum offers the student opportunities to work with the interprofessional team and to develop skills necessary for advanced practice nursing, including advanced management and exploration of evidence in the area of acute care nursing. Prerequisite(s): GNUR 536 Mgmt of Adults with Acute/Critical Conditions I and 538 Mgmt of Adults with Acute/Critical Conditions II Assess acutely ill adults applying nursing, behavioral and natural sciences concepts. 2. Collaborate with an interprofessional team in providing care to acutely ill patients in primary, secondary and tertiary health care settings. 3. Apply evidence-based strategies to the management of acutely ill adults 4. Utilize technology to manage information, support decision-making, deliver care, and evaluate outcomes. 5. Incorporate teaching-learning principles in meeting the educational needs of patients, families, and the community at large. 6. Examine quality improvement issues in the clinical setting, prioritizing patient safety and cost effectiveness. 7. Evaluate cultural, spiritual, ethical, legal, financial, and policy factors that influence care in the clinical environment through a social justice lens.

Outcomes:

1

Medieval Studies (MSTU)

Discover, search, courses!

MSTU 300 Integrative Experience I (1.5 Credit Hours)

This course is the first in a two semester sequence of courses designed to provide students with a synoptic view of the field of Medieval Studies and train them to do cross-disciplinary work within that field. Outcome: Students will be able to produce original research on some topic pertaining to the Middle Ages that utilizes and integrates no less than two methodologies drawn from diverse disciplines.

Interdisciplinary Option: Medieval Studies

This course satisfies the Engaged Learning requirement.

MSTU 301 Integrative Experience II (1.5 Credit Hours)

This course is the second in a two semester sequence of courses designed to provide students with a synoptic view of the field of Medieval Studies and train them to do cross-disciplinary work within that field.

Outcome: Students will be able to produce original research on some topic pertaining to the Middle Ages that utilizes and integrates no less than two methodologies drawn from diverse disciplines.

Interdisciplinary Option: Medieval Studies

This course satisfies the Engaged Learning requirement.

Microbiology and Immunology (MIIM)

Discover, search, courses!

MIIM 402 Microbes & Hosts (3 Credit Hours)

Pre-requisites: Cell Biology BMSC 412, and Molecular Biochemistry BMSC 410 or permission from the instructor

Microbes & Hosts conveys important concepts in bacteriology, virology and immunology as well as the interactions of microbes with host organisms. Through a combination of didactic lectures and group discussions, students will come to appreciate fundamental processes which influence microbe-host interactions.

Outcomes:

Students will have a strong understanding of basic principles of microbiology, virology and immunology as well as an understanding of key concepts related to microbe-host interactions

MIIM 411 Basic Molecular Microbiology (2-3 Credit Hours)

This course is an introduction to fundamental concepts in microbiology Outcome: Students will be able to demonstrate an understanding of the morphology, growth, division, development, molecular biology, genetics and physiology of microorganisms.

MIIM 413 Basic Concepts of Immunology (2 Credit Hours)

This course is an introduction to the concepts of host immunity and defense. Outcome: Students will be able to understand the fundamental principles of immunobiology, immunochemistry and immunogenetics, host immunity and defense, and the basic concepts of normal host defense versus the untoward responses (hypersensitivity) and their consequences.

MIIM 414 Virology (3 Credit Hours)

This is a survey course that examines animal viruses and their interactions with host cells. Outcome: Students will be able to demonstrate an understanding of viral structure and multiplication, and molecular interactions of important animal viruses with their host cells.

Course equivalencies: X-MBIO414/MIIM414

MIIM 415 Medical Immunology (2 Credit Hours)

Pre-requisites: General Biology and/or Cell Biology Course is open to all Integrated Program in Biomedical Sciences PhD and MS students, graduate Nursing students, medical students, and advanced undergraduate students

The medical immunology course provides an in depth description of the components of the innate and adaptive immune system and how they interact to protect humans against infectious microorganisms. The course will have two 3 hour sessions per week for 8 weeks as well as 2 written exams.

Outcomes:

Be able to describe the development and mechanism(s) of activation of the innate and adaptive immune systems, their regulation and outcomes of their inability to do so

MIIM 420 Meth & Techn in Micro Res (1 Credit Hour)

This course is an introduction to the theory of techniques used for research in microbiology and immunology. Outcome: Students will be able to demonstrate competency with various research techniques including spectrophotometry, centrifugation, chromatography, photography, as well as other methods necessary for the study of microbiology, immunology or virology.

MIIM 431 The Molecular Biology of Viruses (3 Credit Hours)

Pre-requisites: Include undergraduate or graduate-level courses in cell biology and biochemistry, graduate course 402 Microbes and Hosts, and / or prior approval from the course director(s)

The course will cover molecular biology and biochemistry of virus infections. Current understanding of virus-cell entry, replication, and assembly will be prominent themes. Course will include lectures on viral evolution, ecology, pathogenesis and viral immunology. The interactive course will include lectures, review of current virology literature, and student-led presentations.

Course equivalencies: MBIO431/MIIM431

Outcomes:

Detailed understanding of virology; be able to integrate concepts in this field with chemistry and health science; comprehend and appreciate current literature; be prepared for lab studies

MIIM 441 Immunology-Immunochemistry (3 Credit Hours)

This is an advanced immunology course that emphasizes structural concepts in immunology. Review and discussion of current literature exemplifies concepts presented in lecture. Outcome: Students will demonstrate an understanding of the chemical definition of antigens, immunogens, structural concepts in immunology, immunoglobulin structure, structure of antigens and their interactions, and recognition of antigen by T-cells and B-cells.

MIIM 442 Cell & Molecular Immunology (3 Credit Hours)

This is an advanced immunology course that examines the cellular and molecular basis of the immune response. Outcome: Students will be able to demonstrate an understanding of the cellular and molecular basis of the immune response, as well as the cellular cooperation essential to the nature of immunology.

MIIM 443 Molecular B-Cell Immunology (4 Credit Hours)

This is an advanced molecular immunology course with emphasis on proteins, genes and molecular interactions within the B-lymphocyte compartment of the immune system. Course includes critical evaluation of recent literature. Outcome: Students will demonstrate an understanding of proteins, genes and molecular interactions within the B-lymphocyte compartment of the immune system.

MIIM 461 Microbi Cytology & Ultrastruct (3 Credit Hours)

This is an advanced course that presents the principles and application of light and electron microscopes for the study of cell structure and function. Outcome: Students will demonstrate an understanding of the principles of light and electron microscopes and their use as tools in cellular and molecular biology.

MIIM 471 Molecular Microbial Genetics (4 Credit Hours)

This course introduces advanced students to the importance of genetics to a wide range of biological problems. Outcome: Students will demonstrate an ability to read, think, write, and speak critically about various genetic approaches used to identify essential genes, mutagenesis and recombination, transcription, development, symbiosis, and pathogenesis.

MIIM 490 Molecular Biol of Oncogenesis (2 Credit Hours)

This course is an advanced course that provides a detailed analysis of molecular events that result in the tumorigenic transformation of eukaryotic cells. Outcome: Students will demonstrate an understanding of oncogenesis by DNA and RNA tumor viruses, the role of oncogenesis and their relationship to normal genes, hormonal effects, and chromosomal abnormalities.

MIIM 492 Research (1-9 Credit Hours)

Independent research for thesis or dissertation under the supervision of a faculty research advisor. Credit varies based upon assigned effort and time spent in the laboratory. Students receive a letter grade from their research advisor.

MIIM 501 Seminar (0 Credit Hours)

This course provides opportunities for students to hear about cutting-edge research being conducted nationally and internationally. Outcome: Students will be able to demonstrate a general awareness of current research in the area of microbiology, immunology and virology.

MIIM 502 Special Topics (1-4 Credit Hours)

This course covers a specific topic in microbiology, immunology or virology. Outcome: Students will be able to articulate a general understanding of the selected topic.

MIIM 503 Current Literature (1 Credit Hour)

This course is a paper-driven course in which papers of current interest are read and discussed.

Outcomes:

Students will demonstrate an ability to identify, critically analyze and articulate key concepts of scientific papers

MIIM 595 Thesis Supervision (0 Credit Hours)

This course allows the student to pursue a research topic under the mentorship of a faculty advisor. Outcome: Students will contribute to the existing body of scientific knowledge and/or methodology in their thesis area. They will defend their results to their committee members.

MIIM 600 Dissertation Supervision (0 Credit Hours)

This course allows the student to pursue a research topic under the mentorship of a faculty advisor. Outcome: Students will add new knowledge to the existing body of scientific knowledge in their dissertation area. They will defend their results in a public forum.

Course equivalencies: BMSC600/MIIM600/PIOL600

Military Science (MLSC)

Discover, search, courses!

MLSC 101 Leadership and Personal Development (1 Credit Hour)

This course is open to all students. MLSC 101 section 001 is taken concurrently with MLSC 101 section 002, the laboratory component. MLSC 101 examines the personal challenges and competencies that are critical for effective leadership and communication. The primary focus is on leadership and leadership development. Additionally a framework is established to understand and utilize time management, stress and stress management, personal development, nutrition and goal setting.

Outcomes:

Students will develop basic knowledge and comprehension of leadership dimensions, attributes and core leader competencies while enhancing their personal development skills

MLSC 102 Introduction to Leadership (1 Credit Hour)

Enrollment Requirements: MLSC 101 or Departmental Consent is required to enroll in this course. MLSC 102 section 001 is taken concurrently with MLSC 102 section 002, the laboratory component. MLSC 102 overviews leadership fundamentals such as problem-solving, listening skills, presenting briefs, providing feedback, and effective writing skills. Leadership models learned in MLSC 101 are analyzed more in-depth. Students will explore dimensions of leadership attributes and core leader competencies in the context of practical, hands-on, and interactive tactical exercises. Students will learn to develop their leadership character and presence, while developing critical communication skills and learning fundamental military concepts and tactics.

Outcomes:

Students will explore, in more detail, leadership philosophies

MLSC 132 Leadership Development II (1 Credit Hour)

This course overviews leadership fundamentals such as problem-solving, listening skills, presenting briefs, providing feedback, and effective writing skills. Leadership models learned in MLSC 101 are analyzed more in-depth. Students will explore dimensions of leadership attributes and core leader competencies in the context of practical, hands-on, and interactive tactical exercises.

MLSC 133 Leadership Development III (2 Credit Hours)

This course overviews leadership fundamentals such as problem-solving, listening skills, presenting briefs, providing feedback, and effective writing skills. Leadership models learned in MLSC 101 are analyzed more in-depth. Students will explore dimensions of leadership attributes and core leader competencies in the context of practical, hands-on, and interactive tactical exercises.

MLSC 134 Leadership Development IV (2 Credit Hours)

This course overviews leadership fundamentals such as problem-solving, listening skills, presenting briefs, providing feedback, and effective writing skills. Leadership models learned in MLSC 101 are analyzed more in-depth. Students will explore dimensions of leadership attributes and core leader competencies in the context of practical, hands-on, and interactive tactical exercises.

MLSC 151 Physical Training I (1 Credit Hour)

Enrollment Requirements: This course is open to all students. ROTC students must take MLSC 151 section 001. Non-ROTC students must take MLSC 151 section 002. MLSC 151 is designed to develop fitness capabilities. The course implements stretching, strength building and cardiovascular exercises from the Army Physical Readiness Training Program to develop students physically and mentally by building muscular strength and cardiovascular endurance.

Outcomes:

Introduced to the basics of military fitness in order to develop muscular strength, cardiovascular endurance, and flexibility

MLSC 152 Physical Training II (1 Credit Hour)

Enrollment Requirements: MLSC 151 or Departmental Consent is required to enroll in this course. ROTC students must take MLSC 152 section 001. Non-ROTC students must take MLSC 152 section 002. MLSC 152 is designed to develop fitness capabilities. The course implements stretching, strength building and cardiovascular exercises from the Army Physical Readiness Training Program to develop students physically and mentally by building muscular strength and cardiovascular endurance.

Outcomes:

Introduced to the basics of military fitness in order to develop muscular strength, cardiovascular endurance, and flexibility

MLSC 201 Foundations of Leadership (2 Credit Hours)

Enrollment Requirements: MLSC 102 or Departmental Consent is required to enroll in this course. MLSC 201 section 001 is taken concurrently with MLSC 201 section 002, the laboratory component. MLSC 201 explores the dimensions of innovative tactical leadership strategies and styles by examining team dynamics. Aspects of personal development such as the importance of communication, ability to present information as a briefing and time management as a leader and a member of a group are also discussed. Upon completing this course students will be able to practically apply learned leadership theories and work more effectively as a member of a team.

MLSC 202 Tactical Leadership (2 Credit Hours)

Enrollment Requirements: MLSC 201 or Departmental Consent is required to enroll in this course. MLSC 202 section 001 is taken concurrently with MLSC 202 section 002, the laboratory component. MLSC 202 examines situational, transformational, and adaptive leadership theories and how to assess leadership styles. The course highlights dimensions of terrain analysis, patrolling, and operation orders. Further study of the theoretical basis of the Army Leadership Requirements Model explores the dynamics of adaptive leadership in the context of military operations.

Outcomes:

Upon completing this course students will be able to assess and apply leadership skills as both a leader and member of a team

MLSC 251 Physical Training III (1 Credit Hour)

Enrollment Requirements: MLSC 152 or Departmental Consent is required to enroll in this course. ROTC students must take MLSC 251 section 001. Non-ROTC students must take MLSC 251 section 002. MLSC 251 is designed to develop fitness capabilities. The course implements stretching, strength building and cardiovascular exercises from the Army Physical Readiness Training Program to develop students physically and mentally by building muscular strength and cardiovascular endurance.

Outcomes:

Effectively execute a physical fitness plan presented to them using proper leadership techniques

MLSC 252 Physical Training IV (1 Credit Hour)

Enrollment Requirements: MLSC 251 or Departmental Consent is required to enroll in this course. ROTC students must take MLSC 252 section 001. Non-ROTC students must take MLSC 252 section 002. MLSC 252 is designed to develop fitness capabilities. The course implements stretching, strength building and cardiovascular exercises from the Army Physical Readiness Training Program to develop students physically and mentally by building muscular strength and cardiovascular endurance.

Outcomes:

Effectively execute a physical fitness plan presented to them using proper leadership techniques

MLSC 301 Adaptive Team Leadership (3 Credit Hours)

Pre-requisites: MLSC 202 or Departmental Consent is required. This course is restricted to ROTC Students only. MLSC 301 section 001 is taken concurrently with MLSC 301 section 002, the laboratory component. MLSC 301 teaches students analytical problem solving critical to successful leadership. They learn planning processes and leadership skills necessary to organize and direct the completion of tasks in all environments. Students will learn and demonstrate complex military tactics during discussions and practical exercises, and organize and deliver military briefings. Enrollment restricted to ROTC students. Students will be evaluated on leadership performance and expected to improve with developmental feedback.

Outcomes:

Upon completion, students should be prepared to demonstrate more complex leadership abilities

MLSC 302 Applied Team Leadership (3 Credit Hours)

Enrollment Conditions: MLSC 301 is required to enroll in this course. This course is restricted to ROTC students only. MLSC 302 section 001 is taken concurrently with MLSC 302 section 002, the laboratory component. MLSC 302 applies the fundamentals of Army Leadership, ethics, personal development, and tactics to the team and squad level. Students will receive specific feedback on your leader attributes and core leader competencies as you take on leadership roles in the ROTC program to develop into a capable and dynamic leader.

This course satisfies the Engaged Learning requirement.

Outcomes:

At the conclusion of this course, you will be capable of planning, coordinating, and leading a squad in a tactical mission during practical instructions in a field environment

MLSC 311 Advanced Leadership (3 Credit Hours)

Enrollment Requirements: MLSC 302 is required to enroll in this course. This course is restricted to ROTC students only. MLSC 311 section 001 is taken concurrently with MLSC 311 section 002, the laboratory component. MLSC 311 focuses on learning how to train and develop subordinates. Students learn the responsibilities of an Army officer and apply the Military Decision Making Process, and the Army's Training Management processes during Training Meetings to plan, execute and assess ROTC training events. Upon completion students will be prepared for the Basic Officer Leader Course. Students have developed leadership capabilities, applied critical thinking skills, and capable of leading soldiers in full spectrum operations.

MLSC 312 Leadership in a Complex World (3 Credit Hours)

Enrollment Requirements: MLSC 312 is required to enroll in this course. This course is restricted to ROTC students only. MLSC 312 section 001 is taken concurrently with MLSC 312 section 002, the laboratory component. MLSC 312 explores the dynamics of leading in the complex situations of current military operations. Students will examine differences in customs, military law, principles of war, and rules of engagement in the face of international terrorism. Students explore aspects of interacting with non-government organizations, civilians, and host nations.

Outcomes:

Upon completion students are able to effectively communicate and exhibit the ability to deal with the complex ethical demands of leading soldiers as a commissioned officer in the US Army

MLSC 351 Physical Training V (1 Credit Hour)

Enrollment Requirements: MLSC 252 is required to enroll in this course. This course is open to all students. ROTC students must take MLSC 351 section 001. Non-ROTC students must take MLSC 351 section 002. MLSC 351 is designed to develop fitness capabilities. The course implements stretching, strength building and cardiovascular exercises from the Army Physical Readiness Training Program to develop students physically and mentally by building muscular strength and cardiovascular endurance.

Outcomes:

Effectively develop and execute physical training plan through proper leadership, clear examples and directions, presented with a command presence

MLSC 352 Physical Training VI (1 Credit Hour)

Enrollment Requirements: MLSC 351 is required to enroll in this course. This course is open to all students. ROTC students must take MLSC 352 section 001. Non-ROTC students must take MLSC 352 section 002. MLSC 352 is designed to develop fitness capabilities. The course implements stretching, strength building and cardiovascular exercises from the Army Physical Readiness Training Program to develop students physically and mentally by building muscular strength and cardiovascular endurance.

Outcomes:

Effectively develop and execute physical training plan through proper leadership, clear examples and directions, presented with a command presence

MLSC 361 Physical Training VII (1 Credit Hour)

Enrollment Requirements: MLSC 352 is required to enroll in this course. This course is open to all students. ROTC students must take MLSC 361 section 001. Non-ROTC students must take MLSC 361 section 002. MLSC 361 is designed to develop fitness capabilities. The course implements stretching, strength building and cardiovascular exercises from the Army Physical Readiness Training Program to develop students physically and mentally by building muscular strength and cardiovascular endurance.

Outcomes:

Provide direct guidance and supervision to the creation of PT Plans; evaluate a physical fitness programs developed and executed by subordinates

MLSC 362 Physical Training VIII (1 Credit Hour)

Enrollment Requirements: MLSC 361 is required to enroll in this course. This course is open to all students. ROTC students must take MLSC 362 section 001. Non-ROTC students must take MLSC 362 section 002. MLSC 362 is designed to develop fitness capabilities. The course implements stretching, strength building and cardiovascular exercises from the Army Physical Readiness Training Program to develop students physically and mentally by building muscular strength and cardiovascular endurance. Outcome: Provide direct guidance and supervision to the creation of PT Plans; evaluate a physical fitness programs developed and executed by subordinates.

MLSC 399 Military History - Independent Study (3 Credit Hours)

This is an online, independent study course and is open to all students. This course provides students with a historical perspective into decisions made by American military leaders; challenges encountered as an Army officer - battlefield complexity, resource limitations, teamwork deficiencies - circumstances that are faced on the contemporary operational environment and are required to make an informed decision.
Outcomes:

Upon completing this course students will understand the history of the United States military, the decisions that have accompanied its changes and inevitably be a stronger and more decisive leader

Modern Greek (MDGK)

Discover, search, courses!

MDGK 101 Introduction to Modern Greek I (3 Credit Hours)

This course develops basic skills in pronunciation, vocabulary, grammar, reading, listening comprehension and oral and written communication within the context of Greek culture. Outcome: Students will learn to actively communicate in Greek, write simple sentences, read uncomplicated selections, understand spoken Greek in everyday contexts and gain an appreciation of contemporary Greece.

MDGK 102 Introduction to Modern Greek II (3 Credit Hours)

Pre-requisites: MDGK 101 This course develops basic skills in pronunciation, vocabulary, grammar, reading, listening comprehension and oral and written communication within the context of Greek culture Outcome: Students will learn to actively communicate in Greek, making spontaneous use of structures and vocabulary studied, write simple sentences, read uncomplicated selections, understand spoken Greek in everyday contexts and gain an appreciation of contemporary Greece.

Music (MUSC)

Discover, search, courses!

MUSC 101 Music:Art of Listening (3 Credit Hours)

Focus is on the acquisition and enhancement of listening skills through direct experience of musical works along with an examination of cross-cultural similarities and differences among musical styles. Concert attendance is required. Outcome: A cultivation of musical perception through a process of repeated and guided listenings; strengthening of listening skills while developing and expanding styles perspectives.
Knowledge Area: Artistic Knowledge and Experience

MUSC 102 Class Piano for Beginners (3 Credit Hours)

For the student who has never had keyboard instruction and is interested in learning the art of performance on the piano. Fundamentals of music theory, note reading and personal enjoyment are emphasized. Strongly recommended for those preparing to teach music in elementary school. Outcome: A basic keyboard ability with an emphasis on reading music symbols accurately while also enjoying the making and doing of music.
Knowledge Area: Artistic Knowledge and Experience

MUSC 103 Class Guitar for Beginners (3 Credit Hours)

For the student who has never had guitar instruction and is interested in learning the art of performance on the guitar. Fundamentals of music theory, note reading and personal enjoyment are emphasized. Strongly recommended for those preparing to teach music in elementary school. Outcome: A basic guitar ability with an emphasis on reading music symbols accurately while also enjoying the making and doing of music.
Knowledge Area: Artistic Knowledge and Experience

MUSC 104 Gospel Choir (1 Credit Hour)

Admission through audition. A mixed ensemble of singers performing primarily Gospel music (Spirituals, Blues, etc). Admission through audition. The choir participates in at least one public performance each semester. May be repeated to a limit of eight hours. They reflect on their personal and collective artistic growth through the process.
Interdisciplinary Option: African Studies and the African Diaspora, Black World Studies

This course satisfies the Engaged Learning requirement.

Course equivalencies: X-MUSC104/BWS 104

Outcomes:

Students gain proper vocal/choral technique and knowledge of the musical literature offered each semester through rehearsal and performance

MUSC 105 Symphony Orchestra (1 Credit Hour)

Admission through audition. The study and performance of standard orchestral literature. Students must provide their own instruments and should have previous ensemble experience. Admission through audition. The ensemble gives at least two concerts each semester. Students reflect on their personal and collective artistic growth throughout the process.
Knowledge Area: Artistic Knowledge and Experience

Outcomes:

Students gain proper instrumental technique and knowledge of the musical literature offered each semester through rehearsal and performance

MUSC 106 Guitar Ensemble (1 Credit Hour)

Admission through audition. For advanced guitarists. The study, rehearsal and performance of transcriptions and original works for guitar ensemble. Repertoire from the Renaissance through the present will be performed. Students must provide their own instruments. Gives at least one concert each semester. Students reflect on their personal and collective artistic growth throughout the process.
This course satisfies the Engaged Learning requirement.

Outcomes:

Students gain proper guitar technique and knowledge of the musical literature offered each semester through rehearsal and performance

MUSC 107 Chorus (1 Credit Hour)

University Chorus is a topics course in ensemble singing devoted to the study, rehearsal and performance of standard choral literature of all periods. Admission through audition. Gives at least two performances each semester. Some sections require audition for admission. They reflect on their personal and collective artistic growth throughout the performance process.

This course satisfies the Engaged Learning requirement.

Outcomes:

Students improve their vocal/choral technique and knowledge of the musical literature through rehearsal and performance

MUSC 108 Liturgical Choir: Cantorum (1 Credit Hour)

Admission through audition. An SATB ensemble providing music for the Sunday liturgies in Madonna della Strada Chapel and other university liturgical and choral functions and concerts. Repertoire includes both traditional and contemporary sacred music. Admission through audition. This course satisfies the Engaged Learning requirement.

Outcomes:

Students gain proper vocal/choral technique and knowledge of the musical literature offered each semester through rehearsal and performance Students reflect on their personal and collective artistic growth throughout the performance process

MUSC 109 Jazz Ensemble (1 Credit Hour)

Admission through audition. Rehearsal and performance of standard Jazz and Big Band music. Members must have previous Jazz Band experience. Performs publically at least twice each semester of the academic year. Admission through audition. Students reflect on their personal and collective artistic growth throughout the performance process.

Interdisciplinary Option: African Studies and the African Diaspora, Black World Studies

This course satisfies the Engaged Learning requirement.

Course equivalencies: X-MUSC109/BWS 109

Outcomes:

Students improve instrumental technique and gain knowledge of the musical literature offered through rehearsal and performance

MUSC 110 Wind Ensemble (1 Credit Hour)

Admission through audition. The study and performance of standard wind ensemble literature. Students must provide their own instruments and should have previous ensemble experience. The ensemble gives at least two concerts each semester. Students reflect on their personal and collective artistic growth throughout the performance process.

Knowledge Area: Artistic Knowledge and Experience

Outcomes:

Students improve instrumental technique and gain knowledge of the musical literature offered through rehearsal and performance

MUSC 111 Percussion Ensemble (1 Credit Hour)

The study and performance of standard percussion ensemble literature. The ensemble gives at least two concerts each semester. Enrollment Requirements: Audition and permission of the instructor. Students reflect on their personal and collective artistic growth throughout the performance process.

Outcomes:

Students improve instrumental technique and gain knowledge of the musical literature offered through rehearsal and performance

MUSC 122 Introduction to Digital Music (3 Credit Hours)

Computers and digital tools have been seeping into the world of music, and this course aims to explore this newly formed territory. This course is intended for students who wish to learn more about electronic music, signal processing, and algorithmic music composition. Understanding of the physics of musical sound and digital audio, facility with hands-on applications of algorithmic music composition and musicology, and ability to design and render digital instruments.

Knowledge Area: Quantitative Knowledge

Course equivalencies: X-COMP 122/MUSC 122

MUSC 142 Class Voice for Beginners (3 Credit Hours)

For the student who has never had voice instruction and is interested in learning the art of vocal performance. Fundamentals of music theory, note reading and personal enjoyment are emphasized. Strongly recommended for those preparing to teach in elementary school. Outcome: A basic vocal ability with an emphasis on reading music symbols accurately while also enjoying the making and doing of music.

Knowledge Area: Artistic Knowledge and Experience

Course equivalencies: THTR242/THTR142/MUSC142

MUSC 144 Music Theory I (3 Credit Hours)

Co-requisite: MUSC 145. An introduction to the fundamentals of melodic construction in all the diatonic modes (major/minor and modal) and culminates in control of two-part counterpoint. Melodies will be examined and broken down into their essential components. The class strengthens the basic musicianship skills of the student through performance of the students' written compositions illustrating the class concepts. Must be taken concurrently with MUSC 145. Outcome: Through the study of melody students will develop an understanding of musical notation, the organization and color of all diatonic scales (major/minor and modal), interaction between intervals, transposition and its implications, rhythmic and beat structure, and begin developing critical analysis skills.

MUSC 145 Musicianship Lab I (1 Credit Hour)

Co-requisite: MUSC 144. This course reinforces concepts presented in Music Theory I and introduces students to the basic concepts of sight singing, ear training and dictation. The voice is the class's primary focus. This course must be taken concurrently with MUSC 144. Learning Apply these concepts to student's primary instrument.

Outcomes:

Recognize Music Theory I concepts by ear, dictate accurately those concepts, and recreate them on the voice and piano

MUSC 153 The Music of China (3 Credit Hours)

This course surveys the broad range of Chinese musical traditions as well as the practice of fieldwork, music theory and methodological issues encountered in Chinese music studies. Outcome: Students will identify Chinese musical traditions throughout history and their connections to the Chinese language, history, cultural and religious studies and politics.

MUSC 154 Intro to Opera (3 Credit Hours)

Survey of opera from 1600 to the present and consideration of opera as an art form which combines music and drama. Analysis of libretto structure and study of the variety of operatic styles are included.

Outcome: Fundamental acquaintance with a wide selection of operatic literature and the principle eras of the European and American traditions.

Knowledge Area: Artistic Knowledge and Experience

Course equivalencies: X-MUSC154/THTR154

MUSC 154R Introduction to Opera in Rome (3 Credit Hours)

This course offers the student an overview of the development of opera in Europe with a particular emphasis on some of the most representative Italian operas and authors from the 17th to the 20th century. As the course considers opera as a cultural phenomenon, the historical, intellectual, political, social, religious and economic conditions that influenced the development of this art will be also examined.

Knowledge Area: Artistic Knowledge and Experience

Interdisciplinary Option: Italian Studies

Course equivalencies: X-MUSC154/THTR154

Outcomes:

Students will acquire the basic understanding the cultural phenomenon of opera and the style differences of different historical periods, as well as musical terms

MUSC 155 Intro to Symphonic Music (3 Credit Hours)

Survey of the principal forms of orchestral music from the Baroque to the present. Course will include: the symphony, concerto suite, overture, and symphonic poems. (Also offered at Rome Center.) Outcome: Functional knowledge of the language and grammar of music through selected analysis and experience of specific symphonic literature.

MUSC 156 Intro to Jazz (3 Credit Hours)

Survey of the development of jazz emphasizing the major trends and artists of this unique American style. Listening skills will be developed. Outcome: Functional knowledge of the language and grammar of this uniquely American music through selected analysis and experience of specific Jazz literature.

Interdisciplinary Option: African Studies and the African Diaspora, Black World Studies

Course equivalencies: X-MUSC156/BWS 156

MUSC 157 America Popular Song (3 Credit Hours)

Survey of American popular song from the early 19th century minstrel shows to the present. The evolution of this music and its relationship to society will be studied. Listening skills will be developed. Outcome: Functional knowledge of the language and grammar of popular music through selected analysis and experience of specific repertoire.

MUSC 161 Music in United States (3 Credit Hours)

An historical survey and guided listening experience of the evolution of music in the United States from the earliest inhabitants and settlers to the dawn of the 21st century. Special emphasis will be given to a selected era and/or music type. Outcome: An understanding of the societal influences on the music of the United States and an appreciation of its music repertoire.

MUSC 185 Jazz Improvisation (3 Credit Hours)

Previous basic understanding of theory and analysis is essential. Fundamentals will be expanded and enhanced through writing, listening and performing. An emphasis will be placed on learning the jazz language by ear. Students will also learn to read lead sheets and chord symbols, developing the ability to apply the jazz language to the repertoire. Outcome: Appreciation for and ability to create and perform jazz improvisation.

MUSC 186 Jazz Arranging (3 Credit Hours)

Fundamentals of composition and arranging will be expanded and enhanced through writing and listening. Students will learn information about the instrumentation of the big band, instrument ranges, and how to use software to make arrangements. Previous basic understanding of theory and analysis is essential.

MUSC 201 Music Technology I (3 Credit Hours)

This introductory course in Music Technology is designed to introduce students to MIDI orchestration, sequencing and digital audio editing. The course is designed to present software and hardware as tools for the creation of sound design as musical composition. Outcome: Demonstrate proficiency in using software as a musical instrument to orchestrate, perform and record.

Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies

MUSC 202 Class Piano II (3 Credit Hours)

Pre-requisites: MUSC 102 or permission of the instructor

This applied group class is designed for students who have successfully completed MUSC 102, or have previously attained a similar level of proficiency. Emphasis is on a variety of styles and levels of keyboard repertoire to promote a balance of new information with musical material that reinforce concepts. Learning

Outcomes:

Students will demonstrate basic keyboard skills, piano repertoire and musical styles, to express themselves musically at the piano

MUSC 203 Class Guitar II (3 Credit Hours)

Pre-requisites: MUSC 103 or permission of the department

This course is a continuation of (MUSC 103) or a previously attained equivalent level of study and musical skill development. Throughout the course students refine technical skills and music theory as applied to the guitar. Students perform in both solo and ensemble settings.

Outcomes:

Students will demonstrate an ongoing development of coordination skills, fingerboard knowledge, sight-reading skills, performance practices and intermediate repertoire knowledge

MUSC 207 Chamber Choir (1 Credit Hour)

Audition Required. An ensemble of advanced singers performing works written especially for the smaller choir. Performance of music from all historical periods suitable for this type of choir. The choir participates in at least two public performances each semester. Admission through audition. May be repeated for up to eight credit hours. Students reflect on their personal and collective artistic growth throughout the performance process.

This course satisfies the Engaged Learning requirement.

Outcomes:

Students gain knowledge of the musical literature offered through rehearsal and performance, while integrating proper vocal/choral technique

MUSC 244 Music Theory II (3 Credit Hours)

Pre-requisites: MUSC 144 An introduction to the fundamentals of harmonic progressions controlled through either expansions of a tonic-dominant phrase structure, elaborations of two-part counterpoint structures, or control of the three basic root motion models

Co-requisite: MUSC 245; Music will be analyzed using chord matrixes and reductions into two-part frameworks. The class strengthens the basic musicianship skills through performance students compositions illustrating the class concepts. Must be taken concurrently with MUSC 245. Outcome: Through the study of harmony students will develop an understanding of all chord types, root motion, cadence types, how tonal music expands upon the basic tonic-dominant phrase, voice leading techniques, and begins exploring the techniques of chromaticism and modulation. The class will also further develop the student's critical analysis skills.

MUSC 245 Musicianship Lab II (1 Credit Hour)

Co-requisite: MUSC 244. Students build on basic voice and board skills acquired in Musicianship Lab I and reinforce concepts introduced in Music Theory II by recreating the concepts on the keyboard and voice. This course must be taken concurrently with MUSC 244. Learning Apply these concepts to student's primary instrument.

Outcomes:

Recognize Music Theory II concepts by ear, dictate accurately those concepts, and recreate them on the voice and piano

MUSC 246 Composition I (3 Credit Hours)

Course deals with the study of music theory and simple and binary forms. In addition to that, students compose an original piece of music for two instruments that receives public performance. Outcome: Through the study of relevant music scores, students learn the principles of composition and instrumentation to then apply them to their own compositions.

This course satisfies the Engaged Learning requirement.

MUSC 247 Composition II (3 Credit Hours)*Pre-requisites:* MUSC 246

This course deals with the study of melody, counterpoint, harmony, and shorter forms. In addition to the study of theory and form, students compose an original piece of music for two instruments that is presented professionally at a public performance. Outcome: Through the study of related scores and with the supervision of instructor, students compose an original work for violin and piano or violoncello and piano.

MUSC 248 Jazz Composition and Arranging (3 Credit Hours)

Pre-requisites: MUSC 144 A study of the harmonic, melodic, and rhythmic theories that lead to the ability to compose and arrange in the jazz idiom. Emphasis will be placed on common harmonic progressions, scale / chord relationships, melody, song forms, and extended harmony and reharmonization. Students will also learn the basic principles of arranging and music notation, culminating in a final composition and arranging project for jazz quintet.

Outcomes:

The ability to compose and arrange music for small jazz combos of up to two horns plus rhythm section

MUSC 252 Music History I (3 Credit Hours)

Pre-requisite: MUSC 144 and MUSC 145 or taken concurrently. European music from the Medieval to the early Baroque where vocal music dominated and the study of counterpoint led to the birth of harmony.

Interdisciplinary Option: Catholic Studies, European Studies*Outcomes:*

Through listening, performance and study students demonstrate an understanding of how melodic composition gave rise to harmony and formed the foundation of Western music

MUSC 255 Music in Catholic Worship (3 Credit Hours)

This course will trace the development of music in liturgy from Gregorian chant through Vatican II and to the present, examining repertoire and forms, musical and theological trends, and how music has been employed in the expression of the living prayer of the Roman Catholic Church through the centuries. *Pre-requisites:* MUSC 252

Interdisciplinary Option: Catholic Studies*Course equivalencies:* X-MUSC255/CATH255*Outcomes:*

Students can identify the major shifts and movements of music in the Catholic Church from the Middle Ages to the present, including the shifts represented by the Second Vatican Council

MUSC 256 Jazz Music History (3 Credit Hours)

This course is a historical and listening survey exploring the development of jazz music from its origins at the turn of the 20th century to the music of the present era. Many styles of jazz and a multitude of important musicians will be discussed, as well as important cultural and sociological aspects of the art form.

Interdisciplinary Option: Italian American Studies*Outcomes:*

Through listening, lecture, required reading, and concert attendance, the student will gain an understanding of the basic musical elements of jazz, its musical and sociological contexts, and how these elements have developed and changed over the music's varied history

MUSC 260 Conducting (3 Credit Hours)

The student will acquire a personal conducting style through study and practical application and will develop the basic skills that make one an effective, well-rounded conductor.

Outcomes:

Students will demonstrate rudimentary skills of conducting: including conducting patterns, cues, score reading and analysis

MUSC 261 Lyric Diction I: Italian and German (1 Credit Hour)

This course will acquaint students with the rules of diction in the two major languages of classical singing, German and Italian. Students will gain both a theoretical understanding of the rules of diction and the practical ability to make the relevant sounds and sing in these languages. Concurrent enrollment in 280K Applied Music: Voice is required.

Outcomes:

To successfully transcribe Italian and German into IPA; To learn and produce all of the relevant sounds of German and Italian; To sing in German and Italian with accurate diction

MUSC 262 Lyric Diction II: French and Other Languages (1 Credit Hour)

This course will acquaint the student with the rules of French, English and Latin. Students will gain both a theoretical understanding of the rules of diction and the practical ability to make relevant sounds and sing in these languages. Concurrent enrollment in 280K Applied Music: Voice is required.

Outcomes:

To successfully transcribe French, English and Latin texts into IPA; To learn to produce all of the relevant sounds of French; To sing in French, English and Latin with accurate diction

MUSC 280A Applied Music: Clarinet (1 Credit Hour)

Twelve 30-minute individual lessons in clarinet. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.

Outcomes:

Functional to advanced performance ability based on technical and musical development

MUSC 280AA Applied Music: Conducting (1 Credit Hour)

Pre-requisites: MUSC 144, MUSC 145, MUSC 244, MUSC 245, MUSC 260 Twelve 30-minute individual lessons in conducting. Topics include: baton techniques, gestural mechanics, ear training, score study, transpositions, orchestral basics, phrasing, and chord recognition. Choral, orchestral, or wind band considerations will be explored in greater detail, according to the background of the student. Outcome: Advanced skills in conducting both small and large ensembles, score study, rehearsal, and concert programming.

MUSC 280B Applied Music: Percussion (1 Credit Hour)

Twelve 30-minute individual lessons in percussion. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.

Outcomes:

Functional to advanced performance ability based on technical and musical development

MUSC 280BB Applied Music: Improvisation (1 Credit Hour)

Twelve 30-minute individual lessons in improvisation. Building upon a strong theoretical foundation attained from the prerequisite courses, students receive focused instruction on the harmonic, melodic, and rhythmic theories that lead to the ability to improvise. Students may study with any of the jazz faculty regardless of their primary instrument. *Pre-requisites:* MUSC 144, 145, 244, 245, 185, 385

Outcomes:

Students will learn to improvise over intermediate to advanced tunes in the jazz repertoire

MUSC 280C Applied Music: Oboe (1 Credit Hour)

Twelve 30-minute individual lessons in oboe. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.

Outcomes:

Functional to advanced performance ability based on technical and musical development

MUSC 280E Applied Music: Trumpet (1 Credit Hour)

Twelve 30-minute individual lessons in trumpet. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.

Outcomes:

Functional to advanced performance ability based on technical and musical development

MUSC 280F Applied Music: Saxophone (1 Credit Hour)

Twelve 30-minute individual lessons in saxophone. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours. Outcome: Functional to advanced performance ability based on technical and musical development.

MUSC 280G Applied Music: Guitar (1 Credit Hour)

Twelve 30-minute individual lessons in classical or electric guitar. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.

Outcomes:

Functional to advanced performance ability based on technical and musical development

MUSC 280I Applied Music: Organ (1 Credit Hour)

Twelve 30-minute individual lessons in organ. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.

Outcomes:

Functional to advanced performance ability based on technical and musical development

MUSC 280J Applied Music: Piano (1 Credit Hour)

Twelve 30-minute individual lessons in piano. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.

Outcomes:

Functional to advanced performance ability based on technical and musical development

MUSC 280K Applied Music: Voice (1 Credit Hour)

Twelve 30-minute individual lessons in voice. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.

Outcomes:

Functional to advanced performance ability based on technical and musical development

MUSC 280L Applied Music: Violin (1 Credit Hour)

Twelve 30-minute individual lessons in violin. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.

Outcomes:

Functional to advanced performance ability based on technical and musical development

MUSC 280M Applied Music: Flute (1 Credit Hour)

Twelve 30-minute individual lessons in flute. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.

Outcomes:

Functional to advanced performance ability based on technical and musical development

MUSC 280N Applied Music: Cello (1 Credit Hour)

Twelve 30-minute individual lessons in cello. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.

Outcomes:

Functional to advanced performance ability based on technical and musical development

MUSC 280O Applied Music: Double Bass (1 Credit Hour)

Twelve 30-minute individual lessons in double bass. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.

Outcomes:

Functional to advanced performance ability based on technical and musical development

MUSC 280P Applied Music: Viola (1 Credit Hour)

Twelve 30-minute individual lessons in viola. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.

Outcomes:

Functional to advanced performance ability based on technical and musical development

MUSC 280Q Applied Music: Horn (1 Credit Hour)

Twelve 30-minute individual lessons in horn. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.

Outcomes:

Functional to advanced performance ability based on technical and musical development

MUSC 280R Applied Music: Trombone (1 Credit Hour)

Twelve 30-minute individual lessons in trombone. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.

Outcomes:

Functional to advanced performance ability based on technical and musical development

MUSC 280S Applied Music: Harp (1 Credit Hour)

Twelve 30-minute individual lessons in harp. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.

Outcomes:

Functional to advanced performance ability based on technical and musical development

MUSC 280U Applied Music: Drum Set (1 Credit Hour)

Twelve 30-minute individual lessons in drum set. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.

Outcomes:

Functional to advanced performance ability based on technical and musical development

MUSC 280V Applied Music: Tuba (1 Credit Hour)

Twelve 30-minute individual lessons in tuba. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.

Outcomes:

Functional to advanced performance ability based on technical and musical development

MUSC 280Y Applied Music: Bassoon (1 Credit Hour)

Twelve 30-minute individual lessons in bassoon. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.

Outcomes:

Functional to advanced performance ability based on technical and musical development

MUSC 280Z Applied Music: Composition (1 Credit Hour)

Pre-requisites: MUSC 144, 244, 145, 245; 246 or 248 Outcome: The ability to more fully develop original musical ideas into completed, and professionally notated, compositions

Twelve 30-minute individual lessons. Building upon a strong theoretical foundation attained from the prerequisite courses, students receive focused instruction to develop original compositions from concept to completion. Idioms, genres, forms, instrumentation, and other considerations will vary from student to student. May be repeated for up to 8 credit hours.

MUSC 289 Chamber Ensemble (1 Credit Hour)

Admission by audition. Small group applied music study through ensemble playing. One or more public performance is required.

Admission by audition. Students reflect on their personal and collective artistic growth throughout the performance process.

This course satisfies the Engaged Learning requirement.

Outcomes:

Students gain knowledge of the musical literature offered and improve their ensemble playing skills through rehearsal and performance

MUSC 290 Jazz Combo (1 Credit Hour)

Small group applied jazz music study through ensemble playing. One or more public performance is required. Enrollment Conditions: Audition and permission of the instructor. Students reflect on their personal and collective artistic growth throughout the performance process.

Outcomes:

Students gain knowledge of the musical literature and improve their ensemble playing skills through rehearsal and performance

MUSC 320 Rehearsal and Performance (1 Credit Hour)

This course allows students to receive credit for performing in an on-campus production during the semester. Completion and submission of a journal or paper is required. Permission of department is required.

This course satisfies the Engaged Learning requirement.

MUSC 333 Music and Ritual in Catholic Liturgical Life (3 Credit Hours)

Drawing both from liturgical documents and the ritual texts themselves, this course explores how the theology and spirituality of our Catholic tradition are expressed in the music, liturgies, and rituals of the Roman Catholic Church.

Outcomes:

Students are conversant with the components, structure, and musical elements of the Catholic liturgy and how the Mass interacts with the spiritual and cultural lives of the faithful

MUSC 344 Music Theory III (3 Credit Hours)

Pre-requisites: MUSC 244 or permission of chair

Study of large compositional forms and the extended harmonic vocabulary of music of the 19th century. Continued development of aural, keyboard, sight-singing, compositional and analytical skills in class, computer lab and small group sessions. Outcome: Expansion and deepening of knowledge of the language and grammar of music and their interaction. Ability to use this understanding in both written and aural analysis and to form and defend evaluative judgments about music.

MUSC 345 Music Theory IV (3 Credit Hours)

Pre-requisites: MUSC 344 or permission of chair

Continued examination of the structural aspects of music with a focus on contrapuntal forms. Study of the compositional vocabularies of 20th century music. Continued development of aural, keyboard, sight-singing, compositional and analytical skills in class, computer lab and weekly skills sessions. Outcome: Expansion and deepening of knowledge of the language and grammar of music and their interaction. Ability to use this understanding in both written and aural analysis and to form and defend evaluative judgments about music.

MUSC 347 Composition III (3 Credit Hours)

Pre-requisite: MUSC 247 Course provides students with the ability to compose an original work for string quartet and examines larger forms, chromatic harmony, extended tonality, and modern techniques.

Outcomes:

Through the writing of original music and the study of related scores students demonstrate an understanding of musical forms and techniques and the ability to compose music for string quartet

MUSC 353 Music History II (3 Credit Hours)

Pre-requisites: MUSC 244 and MUSC 245 A new shared musical language spreads through Europe during the Baroque through Romantic period giving rise to the best known composers of Western music

Outcome: Students demonstrate an understanding of how composers developed music during this common practice period to create some of the most well known works of the Western cannon.

Interdisciplinary Option: European Studies

Course equivalencies: MUSC353 / MUSC253

MUSC 354 Music History III (3 Credit Hours)

Pre-requisites: MUSC 244 and MUSC 245 Composers in the modern era turn to innovative and foreign influences as technological developments allow the Western musical tradition to spread throughout the world

Outcome: Students are able to identify and articulate the many musical innovations and movements that helped turn Western music into a global force of expression.

Course equivalencies: MUSC354 / MUSC254

MUSC 363 Foundations of Vocal Technique and Pedagogy (3 Credit Hours)

This course will acquaint students with the basics of anatomy and physiology associated with singing technique, including the anatomy of the larynx, the structure of posture and breathing, and the physics of resonance. Additional topics will include vocal registers, healthy use of voice, and the basics of vocal instruction. Recognize healthy modes of phonation across musical styles. Learn to structure a voice lesson.

Outcomes:

Identify the major anatomical structures used in singing and their function

MUSC 364 Vocal Repertoire (3 Credit Hours)

This course covers a broad spectrum of vocal repertoire from 1600 to the present. Emphasis will be given to the application of stylistic conventions and the development of effective performance skills, culminating in public performance.

Outcomes:

To gain knowledge of important vocal repertoire and history; To develop the creative capacity to perform vocal music of different styles and eras

MUSC 365 Vocal Performance Workshop (3 Credit Hours)

The class aims to develop students' ability to deliver compelling performances on the musical stage. The first portion of the semester is focused on gaining and applying theoretical knowledge of acting for the singer. The second portion of the class focuses on preparing and performing opera/musical scenes.

Outcomes:

Acquire foundational skills in acting for singers / Learn basics of stagecraft for musical production / Perform operatic and/or musical theatre scenes

MUSC 370 The Business of Music (3 Credit Hours)

The Business of Music will offer a broad overview as to how the music industry works and provide insight into various career options. The course will include weekly discussions on current events in the music industry as they occur and feature a host of guest speakers. Students will also learn about the recording industry, music publishing, and the digital music world.

Outcomes:

An understanding of careers in the areas of performance, composition, production, management, education, and radio

MUSC 374 Musical Theatre Repertoire (4 Credit Hours)

This capstone repertoire course synthesizes musical theatre history, theory and performance. It is designed to develop students' ability to perform vocally, dramatically and physically within the canon of musical theatre repertoire. It culminates in a musical theatre showcase which features student performance of the repertoire learned in class. Outcome: Students will demonstrate an understanding of the history of musical theatre performance by comparing the work of significant composers, directors and choreographers and demonstrate understanding of the intrinsic requirements for effective synthesis of vocal, dramatic and dance performance.

This course satisfies the Engaged Learning requirement.

MUSC 380A Applied Music Advanced: Clarinet (1 Credit Hour)

Twelve 60-minute individual lessons in clarinet. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.

Outcomes:

Functional to advanced performance ability based on technical and musical development

MUSC 380AA Applied Music Advanced: Conducting (1 Credit Hour)

Pre-requisites: MUSC 144, MUSC 145, MUSC 244, MUSC 245, MUSC 260
Twelve 60-minute individual lessons in conducting. Topics include: baton techniques, gestural mechanics, ear training, score study, transpositions, orchestration basics, phrasing, and chord recognition. Choral, orchestral, or wind band considerations will be explored in greater detail, according to the background of the student.

Outcomes:

Advanced skills in conducting both small and large ensembles, score study, rehearsal, and concert programming

MUSC 380B Applied Music Advanced: Percussion (1 Credit Hour)

Twelve 60-minute individual lessons in percussion. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.

Outcomes:

Functional to advanced performance ability based on technical and musical development

MUSC 380BB Applied Music Advanced: Improvisation (1 Credit Hour)

Twelve 60-minute individual lessons in improvisation. Building upon a strong theoretical foundation attained from the prerequisite courses, students receive focused instruction on the harmonic, melodic, and rhythmic theories that lead to the ability to improvise. Students may study with any of the jazz faculty regardless of their primary instrument. *Pre-requisites:* MUSC 144, 145, 244, 245, 185, 385

Outcomes:

Students will learn to improvise over intermediate to advanced tunes in the jazz repertoire

MUSC 380C Applied Music Advanced: Oboe (1 Credit Hour)

Twelve 60-minute individual lessons in oboe. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.

Outcomes:

Functional to advanced performance ability based on technical and musical development

MUSC 380E Applied Music Advanced: Trumpet (1 Credit Hour)

Twelve 60-minute individual lessons in trumpet. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.

Outcomes:

Functional to advanced performance ability based on technical and musical development

MUSC 380F Applied Music Advanced: Saxophone (1 Credit Hour)

Twelve 60-minute individual lessons in saxophone. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.

Outcomes:

Functional to advanced performance ability based on technical and musical development

MUSC 380G Applied Music Advanced: Guitar (1 Credit Hour)

Twelve 60-minute individual lessons in classical or electric guitar. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.

Outcomes:

Functional to advanced performance ability based on technical and musical development

MUSC 380I Applied Music Advanced: Organ (1 Credit Hour)

Twelve 60-minute individual lessons in organ. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.

Outcomes:

Functional to advanced performance ability based on technical and musical development

MUSC 380J Applied Music Advanced: Piano (1 Credit Hour)

Twelve 60-minute individual lessons in piano. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.

Outcomes:

Functional to advanced performance ability based on technical and musical development

MUSC 380K Applied Music Advanced: Voice (1 Credit Hour)

Twelve 60-minute individual lessons in voice. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.

Outcomes:

Functional to advanced performance ability based on technical and musical development

MUSC 380L Applied Music Advanced: Violin (1 Credit Hour)

Twelve 60-minute individual lessons in violin. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.

Outcomes:

Functional to advanced performance ability based on technical and musical development

MUSC 380M Applied Music Advanced: Flute (1 Credit Hour)

Twelve 60-minute individual lessons in flute. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.

Outcomes:

Functional to advanced performance ability based on technical and musical development

MUSC 380N Applied Music Advanced: Cello (1 Credit Hour)

Twelve 60-minute individual lessons in cello. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.

Outcomes:

Functional to advanced performance ability based on technical and musical development

MUSC 380O Applied Music Advanced: Double Bass (1 Credit Hour)

Twelve 60-minute individual lessons in double bass. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.

Outcomes:

Functional to advanced performance ability based on technical and musical development

MUSC 380P Applied Music Advanced: Viola (1 Credit Hour)

Twelve 60-minute individual lessons in viola. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.

Outcomes:

Functional to advanced performance ability based on technical and musical development

MUSC 380Q Applied Music Advanced: Horn (1 Credit Hour)

Twelve 60-minute individual lessons in horn. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.

Outcomes:

Functional to advanced performance ability based on technical and musical development

MUSC 380R Applied Music: Advanced Trombone (1 Credit Hour)

Twelve 60-minute individual lessons in trombone. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.

Outcomes:

Functional to advanced performance ability based on technical and musical development

MUSC 380S Applied Music Advanced: Harp (1 Credit Hour)

Twelve 60-minute individual lessons in harp. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.

Outcomes:

Functional to advanced performance ability based on technical and musical development

MUSC 380U Applied Music Advanced: Drum Set (1 Credit Hour)

Twelve 60-minute individual lessons in drum set. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.

Outcomes:

Functional to advanced performance ability based on technical and musical development

MUSC 380V Applied Music Advanced: Tuba (1 Credit Hour)

Twelve 60-minute individual lessons in tuba. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.

Outcomes:

Functional to advanced performance ability based on technical and musical development

MUSC 380Y Applied Music Advanced: Bassoon (1 Credit Hour)

Twelve 60-minute individual lessons in bassoon. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.

Outcomes:

Functional to advanced performance ability based on technical and musical development

MUSC 380Z Applied Music Advanced: Composition (1 Credit Hour)

Pre-requisites: MUSC 144, 244, 145, 245; 246 or 248 Twelve 60-minute individual lessons

Building upon a strong theoretical foundation attained from the prerequisite courses, students receive focused instruction to develop original compositions from concept to completion. Idioms, genres, forms, instrumentation, and other considerations will vary from student to student. May be repeated for up to 8 credit hours. Outcome: The ability to more fully develop original musical ideas into completed, and professionally notated, compositions.

MUSC 385 Jazz Improvisation II (3 Credit Hours)

Pre-requisites: MUSC 185 Jazz Improvisation A continued study of the harmonic, melodic, and rhythmic theories that lead to the ability to improvise in the jazz genre

Emphasis is on ear training, listening, extended harmony, motivic development, rhythm, and scale /chord relationships. Outcome: Students will be able to construct bass lines, build four-part chordal accompaniment at the piano, and improvise melodies and improvise over intermediate to advanced tunes in the jazz.

MUSC 386 Orchestration (3 Credit Hours)

Pre-requisites: MUSIC 144 or permission of chair

Immersion in the art of writing for the instruments of the orchestra in order to understand and write /arrange music for the indigenous capability of each instrument while achieving desired sound effects.

Outcomes:

Ability to score effectively for every instrumental family and also to write/ arrange music for any instrumental ensemble

MUSC 387 Solo Recital: MUSC Capstone (1-4 Credit Hours)

Pre-requisites: Department's permission and audition Preparation and presentation of a full-length, balanced program by memory in one's major area of performance

This may be taken twice for credit. Outcome: For the performance oriented student, the capstone of 4 years of applied study as well as fulfillment of an experience required by graduate schools for performance majors.

MUSC 388 Lecture/Recital: MUSC Capstone (3 Credit Hours)

Pre-requisites: Music Major only

A directed studies capstone experience course. Project proposal must be approved by the course advisor by the end of the first week of the semester. A Public presentation of the project is required. Examples of appropriate capstone projects include, a performance of a composition, paper presentation, digital music design for a commercial product, conduct a chamber ensemble or the creation of a music installation. Outcome: Synthesize previous course work into a public presentation in the students' area of interest.

This course satisfies the Engaged Learning requirement.

MUSC 389 Topics in Music (1-9 Credit Hours)

Specific course titles and content will vary. May be taken as directed study under the supervision of a designated faculty member for independent or small group research in special areas of interest. Because of variations described, students may repeat the course for a total of six hours. Outcome: Opportunity to experience a music elective which is not ordinarily in the music offerings and thus enables individual enhancement of unique interests.

MUSC 394 Internship in Music (1-6 Credit Hours)

Music students complete a semester long internship providing an opportunity to use their technical, research or organizations skills in a professional setting. Students must complete and reflect upon 50 hours of internship experience per credit hour that is pre-approved by the Department of Fine and Performing Arts. Department permission required. No more than 6 credit hours of Internship or Fieldwork can be applied to the major. Outcome: Students gain professional experience working at a music organization while reflecting on their work experience and applying theories and techniques acquired from their music courses. This course satisfies the Engaged Learning requirement.

MUSC 397 Fieldwork in Chicago - Music (1-6 Credit Hours)

Variable credit (1-6 hours) given for performances or projects undertaken with professional music organizations outside the university. Students keep a journal and write evaluative papers. Permission of the Department of Fine and Performing Arts Required. Repeatable for up to 6 credit hours, however no more than 6 credit hours can be applied towards the major. Outcome: Specific outcomes and credit hours to be assigned to be determined by the student in consultation with the Director of Music and the project supervisor.

This course satisfies the Engaged Learning requirement.

MUSC 399 Independent Study (1-6 Credit Hours)

Pre-requisites: written permission of chairperson Independent study projects may be of various kinds and in any recognized area of the theatre arts

Such projects should be done under the close supervision of a music faculty member. Outcome: Specific outcomes and credit hours assigned to be determined by the student in consultation with the chairperson and theatre faculty supervisor.

Neuroscience (NEUR)

Discover, search, courses!

NEUR 101 Introduction to Neuroscience (3 Credit Hours)

This course will introduce students to basic concepts and the variety of topics in the field of neuroscience, including neuroanatomy (gross and cellular), physiology, neural basis of behavior, malfunctions due to disease and injury, and methods used to study these areas; laying a foundation for advanced coursework in neuroscience. Pre-requisite: None; Recommended: BIOL 101 and PSYC 101

Interdisciplinary Option: Neuroscience

Course equivalencies: X-BIOL 202/PSYC202/NEUR 101

Outcomes:

Knowledge of the organization of the nervous system, cellular events that underlie emotions, learning, and behavior, and awareness of classical and modern methods for advancing the field

NEUR 300 Seminar in Neuroscience (1 Credit Hour)

Pre-requisites: NEUR 101 with grade of C- or better

The seminar introduces students to the interdisciplinary nature of modern neuroscience with an emphasis on the various neuroscience research activities that take place at Loyola University Chicago, and reviews current neuroscience research topics. NEUR 300 is cross-listed with BIOL 303. Outcome: Students will demonstrate understanding of the interdisciplinary and multidisciplinary nature of modern neuroscience, and the research questions and experimental approaches used at the Lakeshore and Medical Center campuses. Students will complete one midterm essay and one final essay exam that will reflect their understanding of the topics discussed in the seminars.

Interdisciplinary Option: Neuroscience

Course equivalencies: X-BIOL303/NEUR300

NEUR 301 Laboratory in Neuroscience I (4 Credit Hours)

Pre-requisites: NEUR 101, BIOL 251; and students must be either a Molecular/Cellular Neuroscience Major, a Cognitive/Behavioral Neuroscience major, or a Neuroscience Minor

Students will be trained in various anatomical, physiological, behavioral, and neurobiological modeling techniques used to study the nervous system and the brain in the laboratory. This course is cross-listed as NEUR 301 & PSYC 388.

Interdisciplinary Option: Neuroscience

Course equivalencies: X-NEUR301/PSYC388/BIOL373

Outcomes:

Students will demonstrate understanding of several research designs and methodologies of use in neuroscience research and will gain experience with basic neuroscience laboratory techniques

NEUR 302 Laboratory in Neuroscience II (3 Credit Hours)

Pre-requisites: NEUR 301 Students will receive additional training and experience in specialized laboratory methods and techniques used by Loyola faculty in their Neuroscience research

Outcome: Students will have the opportunity to conduct independent research projects in faculty and student laboratories. This experience will help prepare them to contribute creatively to neuroscience research. Students will be assessed as to the quality of 3 items: 1) a written proposal for the independent research project; 2) a 'meeting quality' scientific poster; and 3) a written 'publication quality' scientific paper summarizing the work done for the independent research project.

Interdisciplinary Option: Neuroscience

Course equivalencies: X-BIOL374/NEUR302/PSYC389

Peace Studies (PAX)

Discover, search, courses!

PAX 201 Peace Studies Overview (3 Credit Hours)

A general introduction to peace studies as an area of inquiry. Students identify concrete social justice issues and their relevance to domains of societal, international and ecological spheres of violence and address literature on nonviolence or limited use of violence through a critical research paper and other course applications.

Interdisciplinary Option: Interreligious and Interfaith Studies, Peace Studies

PAX 390 Dir Readings in Peace Studies (3 Credit Hours)

An independent program of reading and research developed in consultation with a supervising faculty member and the PAX director. It usually includes a review of the peace studies literature in the student's major field, with a final research project that integrates the student's major with peace studies.

Interdisciplinary Option: Peace Studies

PAX 397 Sp Tp in Peace Studies: (3 Credit Hours)

Topics relating to peace and justice issues as taught on occasion at the upper level in other departments.

PAX 398 Practicum in Peace Studies (3 Credit Hours)

Pre-requisites: permission of PAX director

Supervised field experience in a social justice- or peace-related program or project.

Interdisciplinary Option: Peace Studies

Pharmacology (PHAR)

Discover, search, courses!

PHAR 405 Pharmacology Journal Club (1 Credit Hour)

This course involves students in reading and presenting the scientific literature in journal club format with the goals of learning to, i) evaluate the pharmacological literature and voice a critique in a constructive manner, ii) present such literature in a peer-context, and iii) assimilate information presented by other speakers and formulate, ask, and discuss around relevant appropriate questions.

PHAR 406 Special Probs in Pharmacology (1-4 Credit Hours)

This course covers a specific topic in pharmacological or biomedical sciences. The topics can vary among different special topics courses.

PHAR 407 Fundamentals of Drug Discovery and Development (3 Credit Hours)

This course introduces the process of drug discovery, and students will explore the theoretical and practical aspects of the entire process from concept to clinical trials. Topics include selection, design and use of disease models, current methods and strategies of drug target identification, lead molecule identification, the clinical trial process and pre- and post-market safety. Discuss the methods and strategies used to identify potential drug targets; 2. Describe approaches used to screen for lead molecules; 3. Articulate the general FDA regulatory requirements encountered in bringing a new drug to market; 4. Identify requirements for pre-clinical assessment of potential compounds; 5. Define and describe the steps of the clinical trials process; and 6. Articulate and discuss ethical aspects in drug development, including, but not limited to, animal use, clinical trials, intellectual property and research design and integrity

Outcomes:

Upon completion of this course, the students will have sufficient understanding of the drug discovery process to: 1

PHAR 408 Molecular Basis of Disease and Therapeutics (3 Credit Hours)

The course focus is on understanding contemporary research in the pathophysiology of major human diseases and in the development of respective therapeutic treatment strategies. Emphasis will be on cutting edge studies in molecular medicine, including topics in cardiology, endocrinology, oncology, inflammatory diseases and in the neurosciences. There are no prerequisites, but students should have a solid understanding of cell and molecular biology, biochemistry and systems physiology.

Outcomes:

Understand contemporary research strategies applicable to investigating the molecular basis of disease and therapeutics and develop critical thinking and writing skills in hypothesis testing, experimental design and data analyses

PHAR 409 Principles of Pharmacology (3 Credit Hours)

This course introduces students to the fundamental principles of pharmacology and the clinical use of the major classes of drugs currently used with a focus upon fundamental concepts. Topics include drugs and their receptors, molecular aspects of drug targets and drug action, pharmacodynamics and the quantitative aspects of drug-receptor interactions, pharmacokinetic properties of drugs influencing drug distribution and drug dosing, drug metabolism and the effects of genetics on drug action, mechanisms of drug toxicity, and scientific approaches to the discovery of new drugs. Finally, the pharmacology and clinical uses of the major classes of drugs, including drugs used to treat diseases of various systems including cardiovascular, central nervous system, endocrine/reproductive systems, and cancer are covered.

PHAR 410 Signal Transduction (3 Credit Hours)

This course is open to all Ph.D., M.D./Ph.D., and M.S. students. Students will gain a theoretical and practical understanding of how extracellular signals are transduced through receptors into metabolic events. It is designed for second year PhD students who have completed the Biomedical Sciences core curriculum. The format is one lecture followed by one research paper discussion for each topic. Students will also gain in-depth knowledge of the signal transduction topics covered in the course.

Outcomes:

Students will be able to interpret data and design experiments examining signal transduction pathways

PHAR 415 Current Topics in Pharmacology and Epidemiology of Disease (2 Credit Hours)

This advanced graduate level course will cover an up-to-date overview of topics directly relevant to pharmacovigilance, pharmacoepidemiology, and the factors that play a role in success or failure of approved therapeutic agents.

Outcomes:

Students who complete this course will gain knowledge of major epidemiology concepts and statistical principles used in epidemiology and pharmacovigilance

PHAR 420 Pharmacovigilance: A Practical Approach (4 Credit Hours)

This advanced graduate level course will provide an up-to-date and in-depth understanding of pharmacovigilance in the context of modern pharmaceutical drug development and pharmacology. Pharmacovigilance is the pharmacological science relating to the detection, collection, assessment, monitoring, and prevention of adverse effects associated with pharmaceutical products. Enrollment Condition: Drug Discovery (PHAR 407), recommended but not required. Students will be able to identify and describe the regulatory environment and product safety as it pertains to the collection, assessment, reporting and analysis of adverse events.

Outcomes:

Upon completion of this course, students will demonstrate an understanding of pharmacovigilance and patient safety

PHAR 453 The Teaching of Pharmacology (1 Credit Hour)

This course teaches the practice and pedagogy of graduate level teaching. Students work under supervision to prepare and present a didactic lecture which is reviewed by faculty and students.

PHAR 499 Research (1-12 Credit Hours)

Independent research for thesis or dissertation under the supervision of a faculty research advisor. Credit varies based upon assigned effort and time spent in the laboratory. Students receive a letter grade from their research advisor.

PHAR 595 Thesis Supervision (0 Credit Hours)

Supervised research and writing leading to the completion of the masters of science thesis and degree.

PHAR 600 Dissertation Supervision (0 Credit Hours)

Supervised research and writing leading to the completion of the Ph.D. dissertation and degree.

Philosophy (PHIL)

Discover, search, courses!

PHIL 130 Philosophy & Persons (3 Credit Hours)

This course introduces students to the fundamental philosophical issues that bear on our understanding of persons in three equally weighted components, namely, Persons & Knowledge, Persons & Values, and Persons & Reality.

Knowledge Area: Foundational Philosophical Knowledge

Course equivalencies: PHIL120/130/180/ACPHI130

Outcomes:

Students will be able to explain a claim to truth, to explain theories of value in human life, and to describe theories of the metaphysical nature of human persons

PHIL 180 Being Human: Philosophical Perspectives (3 Credit Hours)

The course examines the way philosophy looks for fundamental characteristics that identify life as a properly human life, asks about its ultimate meaning or purpose, and raises questions about what counts as a good life. Outcome: Students will be able to demonstrate understanding of the various approaches of the philosophical question of what it means to be human.

Course equivalencies: PHIL120/130/180/ACPHI130

PHIL 181 Ethics (3 Credit Hours)

This course is a general introduction to ethics and moral philosophy. Outcome: Students will be able to demonstrate understanding of criteria for choosing between conflicting ethical theories, moral disagreement, the justification of moral judgments, and the application of ethical standards to practical decision-making and ethical questions that arise in everyday life.

Knowledge Area: Ethics

Course equivalencies: PHIL 181 / PHIL 281 /ACPHI 281

PHIL 182 Social and Political Philosophy (3 Credit Hours)

This course will investigate one of the central questions of philosophy and social theory: how we, as human beings, should live together.

Outcome: Students will be able to demonstrate understanding of the major philosophical questions in the area of social philosophy with attention to the historical and conceptual development of these questions, and be able to articulate some of the major problems and responses central to this area of philosophy.

Knowledge Area: Ethics

Course equivalencies: PHIL162/182/262/282/ACPHI205

PHIL 190 Loyola's Mission: The Philosophical Vision (3 Credit Hours)

Enrollment is limited to transfer students with 30 or more credit hours. The course introduces transfer students to the mission of LUC, especially "Transformative Education," by means of the methodology of philosophy. Outcome: Students who take the course acquire an intellectual and experiential assimilation of LUC's mission, especially as it relates to "Transformative Education."

PHIL 191 Traditional Chinese Philosophy (3 Credit Hours)

Students will investigate Chinese ancient philosophy in a way to let its own tendencies be sensed and appreciated. Topics include Confucianism, Mencius, Sunzi, Taoism, Legalism, Yin-Yang School, Tung Chung-shu, Chinese Buddhism and Neo-Confucianism. In addition, students learn about the relations among different schools or different thinkers in the same school. Comparisons between Chinese philosophies and western ones are encouraged.

Knowledge Area: Tier 2 Philosophical Knowledge

Interdisciplinary Option: Asian Studies, Chinese Language & Culture

Course equivalencies: X-PHIL191/ASIA191

PHIL 192 Chinese Ethics and Asian Values (3 Credit Hours)

This course offers an overview of the spirit of Chinese ethics, covering sacred and secular as well as intellectual and practical elements.

Knowledge Area: Tier 2 Philosophical Knowledge

Interdisciplinary Option: Asian Studies, Chinese Language & Culture, Global Studies

Course equivalencies: X-PHIL192/ASIA192/INTS192

PHIL 193 Contemporary Chinese Philosophy (3 Credit Hours)

Students will analyze the development of Chinese contemporary thought in its different stages: rejection of the tradition and its recent reevaluation.

Interdisciplinary Option: Asian Studies, Global Studies

Course equivalencies: X-PHIL193/ASIA193/INTS193

PHIL 262 Social & Political Philosophy - Civic Engagement (3 Credit Hours)

Pre-requisites: PHIL 130 This course will investigate one of the central questions of philosophy and social theory: how we, as human beings, should live together

Because it includes a service learning experience it satisfies the civic engagement core requirement.

This course satisfies the Engaged Learning requirement.

Course equivalencies: PHIL162/182/262/282/ACPHI205

Outcomes:

Students will be able to demonstrate understanding of the major philosophical questions in the area of social philosophy with attention to the historical and conceptual development of these questions, and be able to articulate some of the major problems and responses central to this area of philosophy

PHIL 263 Contemporary Ethical Issues - Civic Engagement (3 Credit Hours)

Pre-requisites: PHIL 130 This course explores ethical reasoning by considering a variety of contemporary issues in ethics

Because it includes a service learning experience it satisfies the civic engagement core requirement.

This course satisfies the Engaged Learning requirement.

Outcomes:

Students will develop a deeper appreciation of moral problems, and will gain practice in using philosophical moral reasoning

PHIL 264 Health Care Ethics - Civic Engagement (3 Credit Hours)

Requirement: PHIL 130 for students admitted to Loyola University for Fall 2012 or later. No requirement for students admitted to Loyola prior to Fall 2012 or those with a declared major or minor in the Department of Philosophy or Department of Political Science. This course studies philosophical ethics as practiced in the health care setting. It includes a service learning experience and satisfies the civic engagement core requirement. Outcome: Students will be able to demonstrate understanding of traditional moral theories in a health care framework, as well as the varieties of ethical challenges facing contemporary health care.

Interdisciplinary Option: Bioethics

This course satisfies the Engaged Learning requirement.

Course equivalencies: PHIL184/284BIET184PHIL164BIET164

PHIL 267 Aesthetics - Civic Engagement (3 Credit Hours)

Requirement: PHIL 130 for students admitted to Loyola University for Fall 2012 or later. No requirement for students admitted to Loyola prior to Fall 2012 or those with a declared major or minor in the Department of Philosophy or Department of Political Science. The course explores philosophical issues in aesthetics like the nature of art and beauty through, in part, service-learning in retirement communities and theaters, as examples. Outcome: Students will be able to demonstrate their understanding of aesthetics and the value of leadership development and civic engagement.

Knowledge Area: Tier 2 Philosophical Knowledge

PHIL 271 Philosophy of Religion (3 Credit Hours)

Requirement: PHIL 130 for students admitted to Loyola University for Fall 2012 or later. No requirement for students admitted to Loyola prior to Fall 2012 or those with a declared major or minor in the Department of Philosophy or Department of Political Science. This course explores the development, not only of some classic positions within the philosophy of religion, but also of how these views have affected the formulation of more contemporary discussions. Outcome: Students will be able to demonstrate understanding of the enterprise of using reason, broadly construed, to articulate issues arising out of religious belief and practice and to formulate and defend positions with respect to those issues.

Knowledge Area: Tier 2 Philosophical Knowledge

Course equivalencies: PHIL 171 / PHIL 271

PHIL 272 Metaphysics (3 Credit Hours)

Requirement: PHIL 130 for students admitted to Loyola University for Fall 2012 or later. No requirement for students admitted to Loyola prior to Fall 2012 or those with a declared major or minor in the Department of Philosophy or Department of Political Science. This course examines the fundamental principles by which the nature of reality can be explained.

Outcome: Students will be able to demonstrate understanding of the central issues surrounding the field of metaphysics.

Knowledge Area: Tier 2 Philosophical Knowledge

Course equivalencies: PHIL 172 / PHIL 272

PHIL 273 Philosophy of Science (3 Credit Hours)

Requirement: PHIL 130 for students admitted to Loyola University for Fall 2012 or later. No requirement for students admitted to Loyola prior to Fall 2012 or those with a declared major or minor in the Department of Philosophy or Department of Political Science. This course examines the nature of scientific knowledge and its claim to possess a distinctive method of inquiry. Outcome: Students will be able to demonstrate understanding of the mode of inquiry which is the scientific method.

Knowledge Area: Tier 2 Philosophical Knowledge

Interdisciplinary Option: Neuroscience

Course equivalencies: PHIL 173 / PHIL 273

PHIL 274 Logic (3 Credit Hours)

Requirement: PHIL 130 for students admitted to Loyola University for Fall 2012 or later. No requirement for students admitted to Loyola prior to Fall 2012 or those with a declared major or minor in the Department of Philosophy or Department of Political Science. This course is a detailed study of the deductive methods and principles of correct reasoning, from both the traditional and modern point of view. Outcome: Students will be able to formally analyze, evaluate, and demonstrate the various aspects of argumentation.

Knowledge Area: Tier 2 Philosophical Knowledge

Course equivalencies: PHIL 174/PHIL 274/ACPHI 274

PHIL 275 Theory of Knowledge (3 Credit Hours)

Requirement: PHIL 130 for students admitted to Loyola University for Fall 2012 or later. No requirement for students admitted to Loyola prior to Fall 2012 or those with a declared major or minor in the Department of Philosophy or Department of Political Science. This course examines both the nature and the reliability of human knowledge. Outcome: Students will be able to demonstrate understanding of the various approaches to the study of knowledge.

Knowledge Area: Tier 2 Philosophical Knowledge

Course equivalencies: PHIL 175 / PHIL 275

PHIL 276 Philosophy of Mind (3 Credit Hours)

This course is a study of the different philosophical views regarding the nature and the existence of the mind and its relation to material bodies. Outcome: Students will be able to demonstrate understanding of the various philosophical views and problems regarding the mind and its relation to matter.

Interdisciplinary Option: Neuroscience

Course equivalencies: X-PSYC 276/ PHIL 276/PHIL 176

PHIL 277 Aesthetics (3 Credit Hours)

Requirement: PHIL 130 for students admitted to Loyola University for Fall 2012 or later. No requirement for students admitted to Loyola prior to Fall 2012 or those with a declared major or minor in the Department of Philosophy or Department of Political Science. This course will explore one or more of the following philosophical questions in aesthetics: What is art? What is good art (art evaluation or critical theory)? What is beauty? What is it about human nature that allows us to experience beauty?

Outcome: Students will be able to demonstrate understanding of the various approaches to the philosophical study of beauty and the arts.

Knowledge Area: Tier 2 Philosophical Knowledge

Course equivalencies: PHIL 177 / PHIL 276

PHIL 277R Aesthetics: the Aesthetic Experience in Rome (3 Credit Hours)

Pre-requisites: PHIL 130 or HONR 101 This course will explore one or more of the following philosophical questions in aesthetics, with reference particularly to aesthetic experience in Rome: What is art? What is good art (art evaluation or critical theory)? What is beauty? What is it about human nature that allows us to experience beauty? Outcomes: Students will be able to demonstrate understanding of the various approaches to the philosophical study of beauty and the arts

No course description is available

Knowledge Area: Tier 2 Philosophical Knowledge

Interdisciplinary Option: Italian Studies

Course equivalencies: PHIL 177 / PHIL 276

PHIL 279 Judgment and Decision-making (3 Credit Hours)

This course examines the philosophical and psychological foundations of decision-making. Students can take only one course from PHIL 279, PSYC 279, PSYC 280. Prerequisite(s): Requirement: PHIL 130 for students admitted to Loyola University for Fall 2012 or later. No requirement for students admitted to Loyola prior to Fall 2012 or those with a declared major or minor in the Department of Philosophy or Department of Political Science.

Knowledge Area: Tier 2 Philosophical Knowledge

Outcomes:

Students will be able to demonstrate understanding of the principles of reasoning and decision-making

PHIL 283 Business Ethics (3 Credit Hours)

****Effective Spring 2007** students who have taken and successfully passed PHIL 185 are not eligible to take MGMT 341. This course is an introduction to ethics which focuses on ethical issues in the world of business and commerce. Outcome: Students will be able to examine and assess various ethical theories and apply those theories to ethical issues in business.

Course equivalencies: PHIL185/283/MGMT341/H/BHNR341

PHIL 284 Health Care Ethics (3 Credit Hours)

Requirement: PHIL 130 for students admitted to Loyola University for Fall 2012 or later. No requirement for students admitted to Loyola prior to Fall 2012 or those with a declared major or minor in the Department of Philosophy or Department of Political Science. This course studies philosophical ethics as practiced in the health care setting. Outcome: Students will be able to demonstrate understanding of traditional moral theories in a health care framework, as well as the varieties of ethical challenges facing contemporary health care.

Knowledge Area: Tier 2 Philosophical Knowledge

Interdisciplinary Option: Bioethics

Course equivalencies: PHL184/284BIET184PHL164BIET164

PHIL 285 Contemporary Ethical Issues (3 Credit Hours)

This course explores ethical reasoning through consideration of a variety of contemporary issues in ethics, such as: abortion, euthanasia, corruption, discrimination, poverty, and justice. Outcome: Students will develop a deeper appreciation of moral problems, and will gain practice at using philosophical moral reasoning to come to justifiable ethical choices and answers.

Interdisciplinary Option: Bioethics, Black World Studies, Bioethics, Black World Studies

PHIL 286 Ethics and Education (3 Credit Hours)

Requirement: PHIL 130 for students admitted to Loyola University for Fall 2012 or later. No requirement for students admitted to Loyola prior to Fall 2012 or those with a declared major or minor in the Department of Philosophy or Department of Political Science. This course examines philosophical ethics as it informs and guides the activity of teaching. Outcome: Students will be able to examine and assess various ethical theories, and apply those theories to ethical issues in teaching.

Knowledge Area: Tier 2 Philosophical Knowledge

PHIL 287 Environmental Ethics (3 Credit Hours)

Requirement: PHIL 130 for students admitted to Loyola University for Fall 2012 or later. No requirement for students admitted to Loyola prior to Fall 2012 or those with a declared major or minor in the Department of Philosophy or Department of Political Science. This course introduces students to ethical reasoning and to various topics in environmental ethics. Topics may include: pollution, animal rights, and natural resources.

Knowledge Area: Tier 2 Philosophical Knowledge

Interdisciplinary Option: Bioethics

Course equivalencies: PHIL187/BIET187

Outcomes:

Students will demonstrate an understanding of diverse ethical theories and an ability to use philosophical reasoning to defend positions in topics covered

PHIL 288 Culture and Civilization (3 Credit Hours)

Requirement: PHIL 130 for students admitted to Loyola University for Fall 2012 or later. No requirement for students admitted to Loyola prior to Fall 2012 or those with a declared major or minor in the Department of Philosophy or Department of Political Science. This course examines the nature, causes, and possible future development of human culture and civilization. Outcome: Students will be able to demonstrate understanding of the various approaches to the philosophical study of human culture and civilization.

Knowledge Area: Tier 2 Philosophical Knowledge

Course equivalencies: PHIL 288/288R

PHIL 288R Culture & Civilization in Rome (3 Credit Hours)

Pre-requisites: PHIL 130 This course examines the nature, causes, and possible future development of human culture and civilization with an emphasis on Italian philosophers during the Renaissance

Outcome: Students will be able to demonstrate understanding of the various approaches to the philosophical study of human culture and civilization.

Knowledge Area: Tier 2 Philosophical Knowledge

Interdisciplinary Option: Italian American Studies, Italian Studies

Course equivalencies: PHIL 288/288R

PHIL 289 Philosophy and Gender (3 Credit Hours)

This course considers gender as a philosophical question. Is gender simply a biological truth, or is it a social construct? How does gender affect our roles and opportunities in society? Should gender play a role in discussion of human rights? Outcome: The student will develop a philosophical understanding of gender, and will be able to articulate in a thoughtful manner understanding of issues concerning ethics, society and biology concerning gender.

PHIL 301 Symbolic Logic (3 Credit Hours)

This course is an introduction to the study of modern symbolic logic, emphasizing formalization and proof construction. The student is introduced to the terminology and chief concepts of modern logic.

Outcome: Students will be able to symbolically analyze, evaluate, and demonstrate the various aspects of formal reasoning.

PHIL 302 Topics in Formal Logic (3 Credit Hours)

Selected topic regarding logical theory or metatheory, such as the completeness of formal systems, non-standard logics, computability, foundational issues regarding mathematics. Outcome: Students will develop an advanced understanding of the selected topic in formal logic.

PHIL 304 History of Ancient Philosophy (3 Credit Hours)

Pre-requisites: Students must have taken at least two philosophy courses

This course studies the philosophies of the ancient Greeks, including the pre-Socratics, Plato, and Aristotle. Outcome: Students will be able to understand and articulate philosophical problems and answers representative of the ancient Greek philosophers.

Interdisciplinary Option: European Studies, Italian Studies

Course equivalencies: X-PHIL304/CLST304

PHIL 305 Medieval Philosophy (3 Credit Hours)

This course studies the philosophies of the major thinkers of the 4th to the 12th centuries, such as Augustine, Scotus, Boethius, Avicenna, Anselm, Abelard, Maimonides, and Averroes. Outcome: Students will be able to understand and articulate philosophical problems and answers representative of the early medieval philosophers.

Interdisciplinary Option: Catholic Studies, European Studies, Medieval Studies

Course equivalencies: X-PHIL305/CATH305/MSTU344

PHIL 306 19th Century Philosophy (3 Credit Hours)

Pre-requisites: Students must have taken at least two philosophy courses

This course studies 19th century post-Kantian philosophy from idealism toward phenomenology. May include philosophers such as Hegel, Nietzsche, and Husserl. Outcome: Students will be able to understand and articulate philosophical problems and answers representative of 19th century post-Kantian philosophy.

Interdisciplinary Option: European Studies, German Studies

PHIL 307 13th & 14th Century Philosophy (3 Credit Hours)

This course studies major thinkers of the 13th and 14th centuries, such as Albertus Magnus, Aquinas, Scotus, William of Ockham, Roger Bacon. Outcome: Students will be able to understand and articulate philosophical problems and answers representative of the late medieval philosophers.

Interdisciplinary Option: Catholic Studies, European Studies

Course equivalencies: X-PHIL307/CATH307

PHIL 308 Islamic Philosophy (3 Credit Hours)

Covers the development of classical Islamic philosophy from 800 to 1200 CE. Attention will be given to the central topics (God, the cosmos, knowledge, the human good) with which Muslim philosophers were concerned and to major figures such as Al-Kindi, Al-Farabi, Ibn Sina (Avicenna), Al-Ghazali and Ibn Rushd (Averroes). Outcome: Students will be able to articulate and discuss major philosophical problems of concern to Muslim philosophers of the classical period.

Interdisciplinary Option: Islamic World Studies, Islamic World Studies

Course equivalencies: X-PHIL308THEO357MSTU334IWS308

PHIL 309 Classical Modern Philosophy (3 Credit Hours)

Pre-requisites: Students must have taken at least two philosophy courses

This course studies selected philosophers from the early modern period, such as Descartes, Spinoza, Leibniz, Locke, Hume, Berkeley, Kant. Outcome: Students will be able to understand and articulate philosophical problems and answers representative of the early modern philosophers.

Interdisciplinary Option: European Studies, German Studies

PHIL 310 Issues in Phil of Human Nature (3 Credit Hours)

Pre-requisites: Students must have taken at least two philosophy courses

This course gives intensive consideration to various issues that pertain to being human, such as freedom, determinism, person, society, mind-body, immortality, etc. Outcome: Students will be able to understand and articulate a deeper awareness of philosophical problems and answers regarding key issues of human nature.

PHIL 311 Issues in Metaphysics (3 Credit Hours)

Pre-requisites: Students must have taken at least two philosophy courses

This course studies various philosophical issues regarding the nature of all reality, including existence, causality, relations, abstract entities, purpose, the possibility of knowledge of reality. Outcome: Students will be able to understand and articulate a deeper awareness of philosophical problems and answers regarding key metaphysical issues.

PHIL 312 Problems in the Philosophy of God (3 Credit Hours)

Pre-requisites: Students must have taken at least two philosophy courses

This course studies classical and contemporary approaches to knowledge of the existence of God, divine attributes, good and evil, providence and human freedom. Outcome: Students will be able to understand and articulate a deeper awareness of philosophical problems and answers regarding philosophical views of God.

Interdisciplinary Option: Catholic Studies

PHIL 318 Philosophy of Art (3 Credit Hours)

Reading and discussion of selected philosophical texts concerning the nature of art and artistic experience. Outcome: Students will be able to understand and articulate philosophical problems and answers to questions regarding the nature of art and artistic experience.

PHIL 319 Studies in Philos & Literature (3 Credit Hours)

This course is a study of selected works of literature and a discussion of philosophical issues in relation to these works. Outcome: Students will be able to understand and articulate a deeper awareness of philosophical problems and answers to questions regarding the nature of literary work, the relations of philosophical and literary language, and methods of interpretation.

PHIL 320 The Philosophy of St Augustine (3 Credit Hours)

This course is a study of the principal works of Augustine, such as the Confessions, City of God. Outcome: Students will be able to understand and articulate philosophical problems and answers found in the works of Augustine.

Interdisciplinary Option: Catholic Studies, Medieval Studies

Course equivalencies: X-PHIL320/CATH320/MSTU346

PHIL 321 Ethics and Society (3 Credit Hours)

Pre-requisites: Students must have taken at least two philosophy courses

This course is a study of the rights, duties, and virtues of individuals as members of societies, covering issues such as family and state, social justice, international society, war, and globalization. Outcome: Students will be able to understand and articulate a deeper awareness of philosophical problems and answers to questions regarding ethics in social contexts.

Interdisciplinary Option: Sociolegal Studies

PHIL 322 Phil Perspectives on Woman (3 Credit Hours)

Philosophical reflections on being a woman. Topics such as womanhood, representations of women, self-respect, oppression, affirmative action, sexism, and racism. Outcome: Students will be able to understand and articulate a deeper awareness of philosophical problems and answers to questions regarding conceptions of and experience of being a woman.

Interdisciplinary Option: Women & Gender Studies

Course equivalencies: X-PHIL322/WOST322/WSGS322

PHIL 323 Philosophy of Law (3 Credit Hours)

This course pursues a philosophical analysis of law. It deals with topics such as philosophical presuppositions of law, origin and purpose of law, law as social control, current legal problems involving ethical issues. Outcome: Students will be able to understand and articulate philosophical problems and answers to questions regarding law and its applications.

Interdisciplinary Option: Sociolegal Studies

PHIL 324 Topics in Ethics: X (3 Credit Hours)

Pre-requisites: Students must have taken at least two philosophy courses

This course studies a particular topic selected from the field of ethics. Outcome: Students will be able to understand and articulate a deeper awareness of philosophical problems and answers to questions regarding the selected topic.

PHIL 324B Bioethics Minor Capstone: Philosophical Topics (3 Credit Hours)

Pre-requisites: Two Science courses and two Ethics courses This course number will only be used when PHIL 324 is tagged with the Bioethics Minor Capstone course

Outcome: Students will understand the connection between ethical and scientific issues with regard to the special topic in philosophy.

Interdisciplinary Option: Bioethics

PHIL 325 Ethics & Case Based Reasoning (3 Credit Hours)

Pre-requisites: Two previous philosophy courses

This course is an engaged learning course that provides students with a unique opportunity to practice applying moral theories and argumentative principles to personal and social-ethical problems, and to teach middle school students how to do the same. The course focuses on presenting solutions to cases and hence involves research, writing, and oral presentation.

This course satisfies the Engaged Learning requirement.

Outcomes:

Students will be able to understand and articulate a deeper awareness of philosophical problems and answers to questions using a case based system

PHIL 326 Political Philosophy (3 Credit Hours)

This course is an examination of the major theories of political society, studying important aspects of political society and their relationships to human nature. Outcome: Students will be able to understand and articulate philosophical problems and answers to questions regarding the nature of political society in relation to its members.

Interdisciplinary Option: Sociolegal Studies

PHIL 327 Topics in Political Philosophy (3 Credit Hours)

This course will concentrate on a specific issue or issues in political philosophy. Typical topics include civil disobedience, war and peace, political revolution, punishment, and criminal justice. Outcome: Students will be able to understand and articulate a deeper awareness of philosophical problems and answers to questions regarding the selected topic.

PHIL 330 Theory of Knowledge (3 Credit Hours)

Pre-requisites: Students must have taken at least two philosophy courses

This course will study major philosophical positions regarding knowledge, belief, thought and language, truth, evidence, reason, perception, skepticism. Outcome: Students will be able to understand and articulate philosophical problems and answers to questions regarding the field of knowledge and related issues.

PHIL 333 Lang:Theories Ancient & Modern (3 Credit Hours)

Classical, modern, and contemporary philosophical theories on the nature and structure of human language. Outcome: Students will be able to understand and articulate some philosophical problems and answers regarding the nature and structure of human language.

Course equivalencies: X-LING333/PHIL333

PHIL 335 Asian Philosophy (3 Credit Hours)

A study of fundamental tenets of major Eastern philosophies (Chinese, Japanese, Indian) in comparison to Western tradition. Course may vary in emphasis on particular philosophies and themes. Outcome: Students will be able to understand and articulate philosophical problems and answers to questions regarding Eastern philosophical thought.

Interdisciplinary Option: Asian Studies, Global Studies, Japanese Language and Culture

Course equivalencies: X-PHIL335/ASIA335/INTS334

PHIL 340 Phil of St Thomas Aquinas (3 Credit Hours)

A study of the philosophy of Thomas Aquinas, including background regarding his life and medieval context. Outcome: Students will be able to understand and articulate philosophical problems and answers to questions regarding the thought of Aquinas and its medieval context.

Interdisciplinary Option: Catholic Studies, Medieval Studies

Course equivalencies: X-PHIL340/MSTU348

PHIL 342 Topics in the Catholic Philosophical Tradition (3 Credit Hours)

This course examines the Catholic philosophical tradition, beginning with its roots in ancient Greek philosophy, through the medieval period in the work of figures such as St. Augustine and St. Thomas Aquinas, and up to and including contemporary Catholic philosophy. Pre-requisites: One class in philosophy or permission of instructor

Course equivalencies: X-CATH 303 / PHIL 342

Outcomes:

Students will be conversant and familiar with the Catholic philosophical tradition throughout its history, demonstrating proficiency in operating within the philosophical framework of this tradition

PHIL 344 Philosophy of Human Nature (3 Credit Hours)

The course explores at an advanced level the relation of human nature and aesthetics through, in part, service-learning in retirement communities and theaters, as examples. Outcome: Students will be able to demonstrate advanced understanding of the relation between human nature and aesthetics and the value of leadership development and civic engagement.

This course satisfies the Engaged Learning requirement.

PHIL 350 Directed Reading (3 Credit Hours)

Pre-requisites: Students must have taken at least two philosophy courses

Independent research according to program developed jointly by the student and a faculty director. Open to majors and to non-majors with the permission of the chairperson.

Outcomes:

Students will be able to understand and articulate philosophical problems and answers regarding the selected topic

PHIL 355 Neuroethics (3 Credit Hours)

Pre-requisites: students must have taken at least two philosophy courses

This course focuses on ethical considerations emerging from contemporary research in neuroscience, as well as neuroscientific techniques for studying ethical questions. Students will be able to demonstrate understanding of the ways in which the study of ethics and neuroscience inform each other

Interdisciplinary Option: Bioethics

Course equivalencies: X - PSYC355/PHIL355

PHIL 360 Contemp European Philosophy (3 Credit Hours)

Pre-requisites: Students must have taken at least two philosophy courses

Readings and discussion drawn from contemporary French and German philosophers, such as Merleau-Ponty, Sartre, Heidegger, Derrida, Foucault. Outcome: Students will be able to understand and articulate philosophical problems and answers representative of contemporary French and German philosophy.

Interdisciplinary Option: European Studies

PHIL 362 The British Philosophers (3 Credit Hours)

Readings and discussion drawn from early modern and modern British philosophers such as Hobbes, Locke, Hutcheson, Hume, Smith, Bentham, Mill. Outcome: Students will be able to understand and articulate philosophical problems and answers representative of early British philosophy.

PHIL 369 Philosophy of Medicine (3 Credit Hours)

Pre-requisites: Students must have taken at least two philosophy courses

This course investigates philosophical questions concerning the practice of medicine, such as the epistemology of medicine, the nature of health and disease, what is a profession, and the nature of suffering. Outcome: The student will develop a critical understanding of the practice of medicine from a philosophical point of view.

Interdisciplinary Option: Bioethics

Course equivalencies: X-PHIL369/BIET369

PHIL 370 Intro to American Philosophy (3 Credit Hours)

This course studies American Philosophers such as Peirce, James, Dewey, with an evaluation of their principles. Outcome: Students will be able to understand and articulate philosophical problems and answers representative of American philosophy.

PHIL 374 Philosophy of History (3 Credit Hours)

Study of the nature of historical knowledge and of theories concerning historical process. Outcome: Students will be able to understand and articulate philosophical problems and answers regarding history as a discipline and a historical process.

PHIL 375 Philosophy of Marxism (3 Credit Hours)

A study of the philosophical dimensions of the thought of Karl Marx, his 19th century precursors and 20th century interpreters. Outcome: Students will be able to understand and articulate philosophical problems and answers to questions regarding the thought of Karl Marx and Marxism.

Interdisciplinary Option: German Studies

Course equivalencies: PHIL394/PHIL375

PHIL 380 Topics in Philosophy of Religion: (3 Credit Hours)

Pre-requisites: Students must have taken at least two philosophy courses

This course studies various philosophical issues regarding religion. May include issues such as religious concepts, types of religion, divine attributes, free will and providence, problem of evil. Outcome: Students will be able to understand and articulate a deeper awareness of philosophical problems and answers regarding key religious issues

Course equivalencies: PHIL391/PHIL380

PHIL 381 Philosophy of Science (3 Credit Hours)

Readings and discussion of selected texts regarding theories of scientific methods, scientific reasoning, metaphysical foundations of science, philosophical problems of scientific theories about physical reality. Outcome: Students will be able to understand and articulate philosophical problems and answers regarding scientific inquiry and theory.

PHIL 382 Philosophy of Social Science (3 Credit Hours)

Study of philosophical issues in the practice of contemporary behavioral sciences: theory, fact and value, causality, relativism, functionalism, statistical generalization, social planning. Outcome: Students will be able to understand and articulate philosophical problems and answers regarding issues in the behavioral sciences.

PHIL 383 Philosophy of Psychology (3 Credit Hours)

Pre-requisites: Students must have taken at least two philosophy courses

A philosophical analysis of theoretical positions in psychology. May include issues regarding methodology, perception, learning theory, rationality, emotions. Outcome: Students will be able to understand and articulate philosophical problems and answers regarding issues in the field of psychology.

PHIL 384 Topics in Philosophy & Science (3 Credit Hours)

Particular topics selected from philosophy and science. Typical topics include the Scientific Revolution, positivism, space and time, relativity theory, cosmology, evolution. Outcome: Students will be able to understand and articulate philosophical problems and answers regarding the selected topic.

PHIL 385 Environmental Ethics (3 Credit Hours)

This course will examine a number of controversial moral issues involving our environment. Theoretical and applied topics may include animal rights and species rights, nonwestern environmental perspectives, ecofeminism, duties to future generations, overpopulation, pollution, nuclear power, and environmental issues in policy making and business ethics.

PHIL 386 Analytic Philosophy (3 Credit Hours)

A survey of 20th century British and American philosophy in the analytic tradition, including philosophers such as Russell, Moore, Wittgenstein, Carnap, Quine. Outcome: Students will be able to understand and articulate philosophical problems and answers regarding the analytic tradition in philosophy.

PHIL 387 Philosophy of Mind (3 Credit Hours)

Pre-requisites: Students must have taken at least two philosophy courses

This course is a critical study of issues such as the mind-body problem, personal identity, knowledge of other minds, consciousness, perception. Outcome: Students will be able to understand and articulate philosophical problems and answers regarding issues in the philosophy of mind.

Interdisciplinary Option: Neuroscience

PHIL 388 History of Ethics (3 Credit Hours)

An intensive study of the ethical theories of several major figures in the history of western moral philosophy, including, for example, the systems of Aristotle, Kant, and Mill. Outcome: Students will develop a more advanced understanding of philosophical problems and answers to questions in the field of ethics by means of this historical study.

PHIL 389 Contemporary Issues: X (3 Credit Hours)

Pre-requisites: Students must have taken at least two philosophy courses

Study of a selected topic in some area of contemporary philosophy. Outcome: Students will be able to understand and articulate philosophical problems and answers regarding the selected topic.

Interdisciplinary Option: Black World Studies

PHIL 390 Independent Study for Majors (3 Credit Hours)

Pre-requisites: Students must be a philosophy major with adequate background

In-depth independent research developed jointly by the student and a faculty director. The topic should be one with which the student has some familiarity so that the research can be an examination of it in-depth. Outcome: Students will be able to understand and articulate philosophical problems and answers regarding the selected topic

PHIL 391 Topics in Phil of Relig: X (3 Credit Hours)

As of 6/2/06 PHIL 391 was re-numbered to PHIL 380.

Course equivalencies: PHIL391/PHIL380

PHIL 393 Phil & The Human Sciences (0 Credit Hours)

This seminar explores a selected theme in health care ethics. Extensive use is made of visiting guest experts. Students should have completed four courses in philosophy, including a course in health care ethics. Outcome: Students will develop a more advanced philosophical understanding of health care ethics, through direct student participation in an interactive seminar environment.

PHIL 395 Sem in Ancient Phil: X (3 Credit Hours)

This course will study selected issues from ancient philosophy. Course intended for philosophy majors. Students should have completed five philosophy courses, including Phil. 304. Outcome: Students will develop a more advanced understanding of ancient philosophy, through direct student participation in an interactive seminar environment.

PHIL 396 Sem in Medieval Phil: X (3 Credit Hours)

This course will study selected issues from ancient philosophy. Course intended for philosophy majors. Students should have completed five philosophy courses, including a course in medieval philosophy. Outcome: Students will develop a more advanced understanding of medieval philosophy, through direct student participation in an interactive seminar environment.

Interdisciplinary Option: Medieval Studies

Course equivalencies: X-PHIL396/MSTU350

PHIL 397 Capstone Seminar in Classical Modern Philosophy (3 Credit Hours)

This course will study selected issues from early modern philosophy. Course intended for philosophy majors. Students should have completed five philosophy courses, including Phil. 309. Outcome: Students will develop a more advanced understanding of early modern philosophy, through direct student participation in an interactive seminar environment.

PHIL 398 Capstone Seminar in Contemporary Philosophy (3 Credit Hours)

Pre-requisites: Course intended for philosophy majors
Students should have completed at least five philosophy courses. This course will study selected issues in contemporary philosophy. Course intended for philosophy majors. Students should have completed five philosophy courses. Outcome: Students will develop a more advanced understanding of contemporary philosophy, through direct student participation in an interactive seminar environment.

PHIL 399 Capstone Seminar on a Topic in Philosophy (3 Credit Hours)

Pre-requisites: Course intended for philosophy majors
Students should have completed at least five philosophy courses. This course engages the student in an analysis and discussion of special problems found in various areas of philosophy. Student should have completed five philosophy courses. Outcome: Students will develop a more advanced understanding of the philosophical enterprise, through direct student participation in an interactive seminar environment.

PHIL 400 Philosophy Research Tools (3 Credit Hours)

This course introduces students to several methodological approaches to philosophical issues.

PHIL 401 Plato (3 Credit Hours)

Prepares students for advanced work on the philosophical thought of Plato

Course equivalencies: X-PHIL401/CLST412

PHIL 402 Aristotle (3 Credit Hours)

Prepares students for advanced work on some aspect of the philosophical thought of Aristotle.

PHIL 403 Ancient Philosophy (3 Credit Hours)

Prepares students for advanced work on a particular philosophical theme or problem in ancient philosophy.

PHIL 405 Augustine (3 Credit Hours)

Prepares students for advanced work on the philosophical thought of Augustine.

PHIL 406 Aquinas (3 Credit Hours)

Prepares students for advanced work on the philosophical thought of Aquinas.

PHIL 407 Medieval Philosophy (3 Credit Hours)

Introduces students to a specialized topic in medieval philosophy.

PHIL 408 Late Medieval Philosophy (3 Credit Hours)

Prepares students for advanced work on one or more late medieval philosophers such as Scotus and Ockham.

PHIL 410 Descartes (3 Credit Hours)

Prepares students for advanced work on the philosophical thought of Descartes.

PHIL 411 Classical Rationalism (3 Credit Hours)

Introduces students to a specialized topic in early modern rationalism, typically with reference to Descartes, Leibniz, and/or Spinoza.

PHIL 412 Classical Empiricism (3 Credit Hours)

Introduces students to a specialized topic in early modern empiricism, typically with reference to Locke, Berkeley, and/or Hume.

PHIL 415 Kant (3 Credit Hours)

Prepares students for advanced work on the philosophical thought of Kant.

PHIL 416 17th-18th Cent Philosophy (3 Credit Hours)

Introduces students to a specialized topic in early modern philosophy from Descartes to Kant.

PHIL 420 Hegel (3 Credit Hours)

Prepares students for advanced work on the philosophical thought of Hegel.

PHIL 421 Marx (3 Credit Hours)

Prepares students for advanced work on Marx and Marxist philosophy.

PHIL 422 Nietzsche (3 Credit Hours)

Prepares students for advanced work on the philosophical thought of Nietzsche.

PHIL 425 19th Cent Philosophy (3 Credit Hours)

Introduces students to a specialized topic in nineteenth century philosophy.

PHIL 430 Husserl (3 Credit Hours)

Prepares students for advanced work on the phenomenology of Husserl.

PHIL 431 Marxism (3 Credit Hours)

Prepares students for advanced work on the philosophical thought of Marx and/or philosophers working in the Marxist tradition.

PHIL 432 Heidegger (3 Credit Hours)

Prepares students for advanced work on the thought of Heidegger.

PHIL 433 Phenomenology/Existentialism (3 Credit Hours)

Introduces students to a specialized topic in either phenomenology and/or existential philosophy.

PHIL 434 Hermeneutics & Critical Theory (3 Credit Hours)

Introduces students to a specialized topic in either philosophical hermeneutics and/or the critical theory of the Frankfurt School.

PHIL 436 Contemporary French Philosophy (3 Credit Hours)

Introduces students to a specialized topic in recent French philosophy.

PHIL 437 Contemporary German Philosophy (3 Credit Hours)

Introduces students to a specialized topic in recent German philosophy.

PHIL 438 Topics in Continental Phil (3 Credit Hours)

Introduces students to a specialized topic in some aspect of European philosophy from Kant to the present.

PHIL 439 Chinese Philosophy (3 Credit Hours)

Prepares students for advanced work on Chinese philosophy.

PHIL 440 American Philosophy (3 Credit Hours)

Prepares students for advanced work on the American philosophical tradition.

PHIL 441 Wittgenstein (3 Credit Hours)

Prepares students for advanced work on the philosophical thought of Wittgenstein.

PHIL 442 Anglo-American Philosophy (3 Credit Hours)

Prepares students for advanced work on some aspect of the pragmatist and/or analytic philosophical traditions.

PHIL 443 Anglo-American Epistemology (3 Credit Hours)

Introduces students to a specialized topic in analytic epistemology.

PHIL 444 Studies in Logic (3 Credit Hours)

Introduces students to some aspect of formal logic, such as formal systems, axiomatic set theory, mathematical logic, modal logic, tense logic, epistemic logic, deontic logic, formal semantics, and philosophical logic.

PHIL 445 Philosophy of Mind (3 Credit Hours)

Prepares students for advanced work on philosophical issues concerning the problem of consciousness and the nature of mental functions.

PHIL 446 Philosophy of Perception (3 Credit Hours)

Prepares students for advanced work on philosophical issues pertaining to perception.

PHIL 447 Issues in Cognitive Science (3 Credit Hours)

Introduces students to specialized topics in the philosophy of cognitive sciences.

PHIL 449 Philosophy of Language (3 Credit Hours)

Prepares students for advanced work on philosophical issues about the relationship between language, thought, meaning, and reference.

PHIL 450 Epistemology (3 Credit Hours)

Prepares students for advanced work on philosophical issues concerning the nature of belief and knowledge.

PHIL 451 Metaphysics (3 Credit Hours)

Prepares students for advanced work on philosophical issues about the nature of reality.

PHIL 452 Philosophy of Science (3 Credit Hours)

Prepares students for advanced work on philosophical issues pertaining to the natural sciences.

PHIL 454 Philosophy of Religion (3 Credit Hours)

Prepares students for advanced work on philosophical issues concerning religious practices and beliefs.

PHIL 455 Philosophical Theology (3 Credit Hours)

Prepares students for advanced work in philosophical issues and/or figures in philosophical theology.

PHIL 457 Aesthetics (3 Credit Hours)

Prepares students for advanced work on philosophical issues pertaining to the nature of art and aesthetic judgment.

PHIL 458 Philosophy of History (3 Credit Hours)

Prepares students for advanced work on philosophical issues pertaining to history and historiography.

PHIL 459 Philosophy of Law (3 Credit Hours)

Prepares students for advanced work on philosophical issues concerning legal institutions and practices.

PHIL 462 Kant's Moral Philosophy (3 Credit Hours)

Prepares students for advanced work on the practical philosophy of Kant.

PHIL 463 Virtue Ethics (3 Credit Hours)

Prepares students for advanced work on classical and/or contemporary themes in the virtue tradition in moral philosophy.

PHIL 464 Utilitarianism (3 Credit Hours)

Introduces students to classical and contemporary formulations of utilitarian ethics.

PHIL 466 Major Authors in Moral Phil (3 Credit Hours)

Prepares students for advanced work on the ethical theories of one or more key figures in the history of philosophy.

PHIL 467 Contemporary Ethical Theories (3 Credit Hours)

Prepares students for advanced work on issues in contemporary moral philosophy.

PHIL 468 Topics in Ethics (3 Credit Hours)

Introduces students to specialized topics in ethical theory.

PHIL 469 Ethics and Rationality (3 Credit Hours)

Introduces students to philosophical issues concerning the relationship between rationality and moral thinking.

PHIL 470 Ethics & Economic Justice (3 Credit Hours)

Prepares students for advanced work on ethical and social-political issues concerning economic practice and theory.

PHIL 474 Principles of Business Ethics (3 Credit Hours)

Introduces students to philosophical approaches to ethical issues concerning the relationship between business and society.

PHIL 475 Philosophy of Nursing: Nursing as a Moral Practice (3 Credit Hours)

This course provides an opportunity for students to analyze ethical issues and personal, institutional/organizational, societal and global values and beliefs that have an impact on nursing practice, the nursing profession, and healthcare delivery. Students will clearly and carefully articulate their thinking and approach to moral reasoning about various contemporary issues and justify their responses. Presuppositions about clinical practice, education, administration, and their impact will be explored. The realities of the social context and the effects on moral/ethical practice will be discussed.

Course equivalencies: X-GNUR540/PHIL475

PHIL 477 Social Health Care Ethics (3 Credit Hours)

Prepares students for advanced work in philosophical approaches to social issues in health care.

PHIL 479 Issues in Applied Ethics (3 Credit Hours)

Introduces students to specialized topics in applied ethics.

PHIL 480 Social & Political Philosophy (3 Credit Hours)

Introduces students to specialized topics in social and political philosophy, such as theories of justice, social contract theory, human rights, and issues pertaining to race, class, and gender.

PHIL 481 Philosophy of Action (3 Credit Hours)

This course deals with the distinction between action and mere behavior. Related topics: causal vs. teleological views, intention, reasons for action (as distinct from causes of action), practical identity, free agency, practical reason, deliberation and choice, the relationship between emotional capacities and responsible agency.

Outcomes:

Students will understand the basic features of human agency

PHIL 482 Philosophy of Social Science (3 Credit Hours)

Introduces students to philosophical issues concerning the social sciences.

PHIL 484 Philosophical Anthropology (3 Credit Hours)

Prepares students for advanced work about philosophical conceptions of human existence.

Interdisciplinary Option: Women & Gender Studies

PHIL 490 Current Philosophical Issues (3 Credit Hours)

Introduces students to specialized topics in some area of contemporary philosophy.

PHIL 500 Directed Readings and Research (3 Credit Hours)

This course is a directed reading focused on an advanced topic in philosophy. The student and the faculty supervisor will agree on the topic and nature of the work.

PHIL 501 Directed Readings & Research (3 Credit Hours)

This course is a directed reading focused on an advanced topic in philosophy. The student and the faculty supervisor will agree on the topic and nature of the work.

PHIL 502 Directed Readings & Research (3 Credit Hours)

This course is a directed reading focused on an advanced topic in philosophy. The student and the faculty supervisor will agree on the topic and nature of the work.

PHIL 503 Directed Readings & Research (3 Credit Hours)

This course is a directed reading focused on an advanced topic in philosophy. The student and the faculty supervisor will agree on the topic and nature of the work.

PHIL 505 Teaching Internship I (3 Credit Hours)

This course introduces students to best practices in philosophical pedagogy.

PHIL 510 Clinical Ethics Practicum (3 Credit Hours)

This course will include some combination of academic and non-academic work, involving some aspect of clinical ethics. The student and the faculty supervisor will agree on the scope of the project and the nature of the work.

PHIL 511 Social Ethics Practicum (3 Credit Hours)

This course will include some combination of academic and non-academic work, involving some aspect of social ethics. The student and the faculty supervisor will agree on the scope of the project and the nature of the work.

PHIL 550 Integrative Seminar (3 Credit Hours)

This course prepares students for advanced work in philosophy, and emphasizes ways in which philosophy can play an integrative role.

PHIL 590 Dissertation Proposal Seminar (0 Credit Hours)

This semester-long, non-credit, pass/non-pass course is intended for Ph.D. students in their third or fourth years. Our purpose consists in taking students from their initial, general ideas on a dissertation to a developed proposal.

Outcomes:

The class will culminate in producing a final dissertation proposal and a community of researchers who are able and willing to support each other in the development and writing up of dissertation proposals

PHIL 595 Thesis Supervision (0 Credit Hours)

This course allows continuing master's students to continue work on their master's thesis or paper. Please consult with philosophy department graduate program director before registering.

PHIL 600 Dissertation Supervision (0 Credit Hours)

This course is intended for students who have completed their dissertation proposal and are currently working on their dissertation. Please consult with department graduate program director before registering.

PHIL 605 Master's Study (0 Credit Hours)

This course allows continuing master's students to continue work on their master's thesis or paper. Please consult with philosophy department graduate program director before registering.

PHIL 610 Doctoral Study (0 Credit Hours)

This course is intended primarily for students who are currently working on their dissertation proposal. Please consult with philosophy department graduate program director before registering.

Physics (PHYS)

Discover, search, courses!

PHYS 101 Liberal Arts Physics (3 Credit Hours)

Pre-requisites: ENVS 101 or ENVS 137. No requirement for students with a declared major or minor in the Department of Anthropology, Department of Biology, Department of Chemistry, Department of Environmental Science, Department of Physics, Bioinformatics, Forensic Science or Neuroscience. For non-science majors. Selected topics from classical and modern physics emphasizing beauty, symmetry, and simplicity. Contemporary issues of physics and society.

Knowledge Area: Tier 2 Scientific Knowledge

Outcomes:

Understanding of interaction between theory and experiment, role of physics in society, science vs. nonscience; solve problems using algebra, geometry, vectors, and graphs; synthesize disparate physics topics

PHYS 101T Tutoring for Physics 101 - NO CREDIT (0 Credit Hours)

Tutoring for Physics 101 - NO CREDIT

PHYS 102 Planetary and Stellar Astronomy (3 Credit Hours)

Pre-requisites: ENVS 101 or ENVS 137. No requirement for students with a declared major or minor in the Department of Anthropology, Department of Biology, Department of Chemistry, Department of Environmental Science, Department of Physics, Bioinformatics, Forensic Science or Neuroscience. This course covers the astronomy of the solar system and planetary science as well as the astronomy of stars and galaxies. This includes study of earth and comparative study of all the planets, as well as the birth, evolution, and death of stars, the clustering of stars and galaxies, the expanding universe and cosmology.

Knowledge Area: Tier 2 Scientific Knowledge

Outcomes:

Students will demonstrate an understanding of the fundamental knowledge and concepts in astronomy, the qualitative and quantitative reasoning used, and how this science can be applied

PHYS 106 Physics of Music (3 Credit Hours)

Pre-requisites: ENVS 101 or ENVS 137. No requirement for students with a declared major or minor in the Department of Anthropology, Department of Biology, Department of Chemistry, Department of Environmental Science, Department of Physics, Bioinformatics, Forensic Science or Neuroscience. Language, structure, history and styles of music; motion, force, energy and waves applied to production of sound; physical properties of instruments and musical acoustics.

Knowledge Area: Tier 2 Scientific Knowledge

Outcomes:

Knowledge of music fundamentals; understand how instruments function; apply physics concepts and experimentation to analyze the production of music and acoustics

PHYS 111 College Physics I Lec / Dis (3 Credit Hours)

Pre-requisites: Math Placement Test or Math 118 Non-calculus introduction to vectors, kinematics, Newtonian mechanics of translational, rotational, and oscillatory motion, energy and momentum conservation, and thermodynamics

Outcome: Understanding of analytical description of motion and application of conservation laws; develop scientific insight and proficiency in solving representative problems.

Interdisciplinary Option: Forensic Science

PHYS 111L College Physics Laboratory I (1 Credit Hour)

Pre-requisite or Co-requisite PHYS 111 or PHYS 111K. Pre-requisite MATH 118 or MDT Laboratories cover selected topics in introductory mechanics, including freefall, uniform circular motion, work-energy, collisions, rotational motion, and harmonic motion. Outcome: Experience and familiarity with basic measuring devices and simple mechanics equipment. Understand measurement errors and their propagation, plotting and interpretation of data, the connection between theory and experiment for selected topics in elementary mechanics.

Interdisciplinary Option: Forensic Science

PHYS 111T Tutoring for Physics 111 - NO CREDIT (0 Credit Hours)

Tutoring for Physics 111 - NO CREDIT

PHYS 112 College Physics II Lec/Disc (3 Credit Hours)

Pre-requisites: Physics 111 or equivalent

Physics 111 and 112 provide a non-calculus introduction to physics. Topics include electricity and magnetism, sound, optics, and selected topics from modern physics. Outcome: Understand and apply electromagnetism to 2- and 3-dimensional problems in physical and biological sciences.

Interdisciplinary Option: Forensic Science

Course equivalencies: PHYS112/PHYS112K/PHYS122

PHYS 112L College Physics Lab II (1 Credit Hour)

Pre-requisite or co-requisite: PHYS 112 or PHYS 112K; also pre-requisite PHYS 111L. For ESBE, ESCE, and ESEE majors only: Pre-requisite or co-requisite of PHYS 112K Laboratories cover selected topics in electrical circuits and optics, including DC circuits, resonance in AC circuits, ray optics, and prism and grating spectrometers. Ability to correlate simple electronic schematic diagrams with actual circuits. Understand the connection between theory and experiment for selected topics in elementary electrical circuits and optics.

Interdisciplinary Option: Forensic Science

Outcomes:

Experience and familiarity with DC power supplies, digital multi-meters, function generators, oscilloscopes, mirrors, lenses, and spectrometers

PHYS 112T Tutoring for Physics 112 - NO CREDIT (0 Credit Hours)

Tutoring for Physics 112 - NO CREDIT

PHYS 121 College Physics I Lec/Dis (3 Credit Hours)

Pre-requisites: MATH 131 or 161

Calculus based introduction to vectors, kinematics, Newtonian mechanics of translational, rotational, and oscillatory motion, energy and momentum conservation, and thermodynamics. Outcome: Understanding of analytical description of motion and application of conservation laws; develop scientific insight and proficiency in solving representative problems.

Interdisciplinary Option: Forensic Science

PHYS 122 College Phys II Lec/Dis (3 Credit Hours)

Pre-requisites: PHYS 121 and (MATH 132 or 162)

Physics 121 and 122 provide a calculus based introduction to physics. Topics include electricity and magnetism, sound, optics, and selected topics from modern physics. Outcome: Understand and apply electromagnetism to 2- and 3-dimensional problems in physical and biological sciences.

Interdisciplinary Option: Forensic Science

Course equivalencies: PHYS112/PHYS112K/PHYS122

PHYS 125 General Physics I Lec/Dis (4 Credit Hours)

Co-requisites: PHYS 125L and MATH 161 This is a calculus-based introductory course that covers Mechanics and Thermodynamics. It is designed for physics majors or minors and dual-degree engineering students. Outcome: Understanding of vectors, forces, Newtonian mechanics related to translational, rotational, and oscillatory motion; thermodynamics.

Interdisciplinary Option: Forensic Science

PHYS 125L General Physics Laboratory I (1 Credit Hour)

Co-requisite: PHYS 125 Laboratories cover selected topics in introductory mechanics, including freefall, uniform circular motion, work-energy, collisions, rotational motion, and harmonic motion. Includes a freshmen project. Outcome: Experience and familiarity with basic measuring devices and simple mechanics equipment. Understand measurement errors and their propagation, plotting and interpretation of data, the connection between theory and experiment for selected topics in elementary mechanics.

Interdisciplinary Option: Forensic Science

PHYS 126 General Physics II Lec/Dis (3 Credit Hours)

Pre-requisites: PHYS 125 Co-requisites: PHYS 126F, PHYS 126L & MATH 162 A continuation of PHYS 125, covering Electricity and magnetism, sound, optics

Department Consent Required Outcome: Understanding of electrostatics, magnetostatics, time varying currents, resistive, capacitive and inductive elements, electromagnetic and sound waves, geometrical and wave optics, introductory special relativity.

Interdisciplinary Option: Forensic Science

This course satisfies the Engaged Learning requirement.

PHYS 126F Freshman Projects (1 Credit Hour)

Pre-requisites: PHYS 125 Under the guidance of a faculty member students carry out research in the area of mechanics, waves or thermodynamics

Department Consent Required The project must involve submission of a proposal, building of a setup, carrying out related theoretical calculation followed by experimentation. Outcome: Students should get a deeper understanding of the material covered in PHYS 125 (mechanics, waves and thermodynamics) and also learn about research methods employed by physicists.

This course satisfies the Engaged Learning requirement.

PHYS 126L General Physics Laboratory II (1 Credit Hour)

Co-requisite: PHYS 126 Laboratories cover selected topics in electrical circuits and optics, including DC circuits, resonance in AC circuits, ray optics, and prism and grating spectrometers. Includes a freshmen project. Outcome: Experience and familiarity with DC power supplies, digital multimeters, function generators, oscilloscopes, mirrors, lenses, and spectrometers. Ability to correlate simple electronic schematic diagrams with actual circuits. Understand the connection between theory and experiment for selected topics in elementary electrical circuits and optics.

Interdisciplinary Option: Forensic Science

PHYS 130 Introduction to Computational Physics (3 Credit Hours)

This is an introductory computational physics course. The course will cover basic computational skills using Python and common scientific Python packages. We will solve a set of programming exercises that enhances both the understanding of introductory physics (Newton's laws, work, energy, momentum) and physics problem solving skills. Pre-requisite: C- or better in PHYS 125; Restricted to PHYS, TPAM, and BPHY majors Co-requisite: PHYS 126

Outcomes:

Students should be able to write a Python program to perform numerical calculations in physics and gain computational skills that would be utilized in upper division physics coursework and research

PHYS 235 Modern Physics (3 Credit Hours)

This course covers the Special Theory of Relativity and Introductory Quantum Mechanics. Outcome: Understand the relative nature of space and time; the duality of waves and particles; the microscopic structure of matter and its macroscopic consequences.

PHYS 235L Modern Physics Laboratory (1 Credit Hour)

Co-requisite: PHYS 235 Modern physics experiments including electromagnetic waves (microwaves), interferometry, spectroscopy, electron and quantum physics, and solid state physics. Outcome: Students will gain hands on experience and familiarity with experiments from early modern physics, the ability to use spreadsheets and symbolic algebraic software for problem solving and data interpretation, and experience documenting and reporting results including historical background searches.

PHYS 266 Digital Electronics Lab (3 Credit Hours)

Pre-requisites: PHYS 126 and MATH 162 Combinatorial and sequential logic devices, oscillators and timers, microprocessor components, CPU operation, computer architecture and digital/analog conversion

Description: Outcome: Students will gain a working knowledge of digital electronics design and its application to computers, an understanding of CPU design and operation and the ability to document and report experimental results.

Course equivalencies: X-PHYS266/COMP266

PHYS 301 Mathematical Methods in Physics (3 Credit Hours)

Pre-requisite: PHYS 235 Co-requisite: MATH 264 Lecture and computer laboratory. Mathematical and computer methods in physics and engineering. Topics include vector calculus, functions of a complex variable, phasors, Fourier analysis, linear transformations, matrices, first and second order differential equations, special functions, numerical and symbolic computer applications.

Course equivalencies: X-PHYS301/PHYS271/MATH355

PHYS 303 Electronics I (3 Credit Hours)

Pre-requisites: PHYS 126 Co-requisite: PHYS 301 and PHYS 303L Study of analog electronics, including direct and alternating circuit analysis, resonant circuits, diodes, transistors, amplifiers, operational amplifiers, noise, feedback and oscillators. Outcome: Students will understand and manipulate equations and concepts, and gain experience with electronics equipment, plotting and interpretation of data, synthesizing and writing laboratory results, and the formal verbal presentation of results.

PHYS 303L Electronics Laboratory (1 Credit Hour)

Pre-requisites: PHYS 126 or its equivalent, Co-requisite PHYS 303

Students will learn to use various electronic components, instruments, techniques, and applications. This course complements PHYS 303, which is a co-requisite or a prerequisite. Outcome: Students should get a deeper understanding of the material covered in PHYS 303 (Analog and digital electronics) by experimentally verifying many of the concepts covered in that course. Students will also learn to recognize various components and develop confidence in using them.

PHYS 310 Optics (3 Credit Hours)

Pre-requisites: PHYS 126 & PHYS 301 Co-requisite: PHYS 310L

Electromagnetic nature of light, geometrical optics, polarization, Fresnel relations, interference, Fraunhofer and Fresnel diffraction, Fourier optics, lasers, and holography. Outcome: Students will gain knowledge of the principles of classical and modern optics, the roll of optics in the development of quantum mechanics and its applications to modern technology.

PHYS 310L Optics Lab (1 Credit Hour)

Pre-requisites: PHYS 126 or its equivalent, Co-requisite PHYS 310

Students will learn to use various optical components, instruments, techniques, and applications. This course complements PHYS 310, which is a co-requisite or a prerequisite. Outcome: Students should get a deeper understanding of the material covered in PHYS 310 (Geometrical and wave optics) by experimentally verifying many of the concepts covered in that course. Students will also learn to recognize various components and develop confidence in using them.

PHYS 314 Theoretical Mechanics I (3 Credit Hours)

Newtonian particle dynamics, conservation theorems, oscillations, gravitation, generalized coordinates, Lagrange and Hamilton formalisms.

Outcome: Students will gain understanding of analytical and numerical methods of mechanics, understanding of principles in dynamics, and experience in applying formalisms of Lagrange and Hamilton to mechanics in preparation for other areas of physics and engineering.

PHYS 315 Theoretical Mechanics II (3 Credit Hours)

Pre-requisites: PHYS 314 This course is a continuation of Physics 314 and covers dynamics of system of particles, moving coordinates, rigid body dynamics, systems of oscillators, motion in a central force field, relativity

Outcome: Students will gain understanding of analytical and numerical methods of mechanics, and of the laws of dynamics and their applications.

PHYS 328 Thermal Phys & Stat Mechanics (3 Credit Hours)

Pre-requisites: PHYS 235 and PHYS 301 This course examines the fundamental concepts of temperature, entropy, and thermodynamic equilibrium, the first and second law, engines, the third law, and Boltzmann, Fermi-Dirac, and Bose-Einstein statistics

Outcome: Students will learn to compare thermodynamical versus statistical characterizations of macroscopic systems with applications ranging from analyzing Fermi gases and black body radiation to information theory.

PHYS 338 Advanced Physics Laboratory (2 Credit Hours)

Lab course with advanced experiments in mechanics, biophysics, electromagnetism, quantum mechanics, solid state, and particle physics. Students will receive training in data analysis methods, data acquisition systems, signal processing, and 3D fabrication. Students will work in teams on a final independent project. Pre-requisites: PHYS 301 and PHYS 314. Restricted to PHYS, TPAM, PCSC, and BPHY majors

Outcomes:

Students will gain an understanding of experiment design, data analysis, and error estimation in the context of investigating physical principles and using different instrumentation

PHYS 351 Electricity and Magnetism I (3 Credit Hours)

Pre-requisites: PHYS 235, 301 & MATH 264 Electrostatics and magnetostatics in a vacuum as well as in linear media, and an introduction to electrodynamics

Outcome: Students will gain an understanding of mathematical methods of electrodynamics, of static electricity and magnetism including Coulomb's, Gauss', Ampere's, and Faraday's laws and their applications, and of solutions of Laplace's and Maxwell's equations.

PHYS 352 Electricity and Magnetism II (3 Credit Hours)

Pre-requisites: PHYS 351

Introduction to electrodynamics and the special theory of relativity.

Outcome: Students will gain an understanding of electromagnetic field energy and momentum, Maxwell's equations and their applications including electromagnetic radiation and emission, involving retarded potentials and Lorentz covariance.

PHYS 361 Quantum Mechanics I (3 Credit Hours)

Pre-requisites: PHYS 235 & PHYS 301 Non-relativistic quantum mechanics

Outcome: Students will understand and use separation of variables, finite polynomials, and matrix algebra to solve the Schroedinger equation, explain microscopic structure of matter, and describe philosophical interpretations of quantum mechanics.

PHYS 371 Biophysics (3 Credit Hours)

An upper-level course in biological physics focused on a quantitative description of the physical processes driving molecular and cellular processes with an emphasis on experiment design and analysis.

Pre-requisites: For Biology and Molecular Biology majors: BIOL 251; PHYS 112 or 122; and MATH 132 or 162. For all other majors: PHYS 235 and BIOL 101.

Outcomes:

Students will understand how to apply physical principles and probabilistic analysis toward the study of biological phenomena at molecular and cellular levels

PHYS 380 Special Topics in Physics (1-3 Credit Hours)

Pre-requisites: Instructor's permission

This variable (1-3) credit enrichment course introduces students to a topic not generally covered in other courses. This course can be repeated. Outcome: Students will understand the material of the course and develop an ability to apply the knowledge gained to other contexts.

PHYS 381 Special Topics in Physics (1-3 Credit Hours)

Pre-requisites: Instructor's permission

This variable (1-3) credit enrichment course introduces students to a topic not generally covered in other courses. This course can be repeated. Outcome: Students understand the material of the course and develop an ability to apply the knowledge gained to other contexts.

PHYS 391 Research (1-12 Credit Hours)

Co-requisite: PHYS 126 Research in physics or an associated field. This is a variable credit course and can be repeated. Outcome: Under the guidance of a faculty member, students study and understand research methods employed by physicists and gain a deeper understanding of a particular area of physics.

This course satisfies the Engaged Learning requirement.

Course equivalencies: PHYS391 / PHYS385 / PHYS386

PHYS 394 Argonne Lab Research (3 Credit Hours)

Pre-requisites: Chairperson's permission and acceptance by appropriate program

Study and research at the Argonne National Laboratory. Only those students who are accepted into the Argonne National Laboratory's student program (or similar programs elsewhere) are eligible. No tuition is charged. Outcome: Students will work with a research group at Argonne or other laboratory to understand research methods employed by physicists and get a deeper understanding of a particular area of physics.

PHYS 395 Argonne Lab Research (3 Credit Hours)

Pre-requisites: Chairperson's permission and acceptance by appropriate program

Study and research at the Argonne National Laboratory. Only those students who are accepted into the Argonne National Laboratory's student program (or similar programs elsewhere) are eligible. No tuition is charged. Outcome: Students will work with a research group at Argonne or other laboratory to understand research methods employed by physicists and get a deeper understanding of a particular area of physics.

PHYS 473 Energy and Sustainability (4 Credit Hours)

A course that investigates the role of energy in physical systems such as thermosphere and also various sources of energy. Outcome: Ability to apply laws of thermodynamics to physical systems and apply material to high school science class.

PHYS 495 AP Physics Workshop (3 Credit Hours)

This graduate level course offers pedagogical content knowledge training for in-service high school teachers preparing to teach AP Physics.

Physiology (PIOL)

Discover, search, courses!

PIOL 301 Func of the Human Body (5 Credit Hours)

This course explores major organ systems in an integrative fashion covering all aspects from physiology to metabolic biochemistry. Emphasis is placed on understanding key concepts of normal physiological and biochemical systems in healthy humans.

PIOL 401 Physiology (4 Credit Hours)

This course integrates the contents of two sections of the medical school (M1) course Function of the Human Body course (PIOL301); with additional meetings to present discuss papers at graduate level (2 paper presentations per graduate student). In the Fall semester, students will review cell physiology and autonomic neuroscience, and will learn cardiovascular and renal physiology in depth. The course topics will include introductory cell & neurophysiology, skeletal and smooth muscle, cardiac electrophysiology, EKG, cardiac muscle mechanics, circulation, special circulations, and renal physiology. In the Spring semester, students will learn pulmonary, acid-base balance, gastrointestinal, endocrine, and reproductive physiology. Instructor Consent Required Emphasis will be placed on understanding key concepts of normal physiological and biochemical systems in healthy humans. Selected aspects of pathophysiological processes will be discussed to illustrate how an understanding of normal function can be applied to clinical medicine.

Outcomes:

Students familiar with introductory physiology are expected to learn and understand cardiovascular, reproductive and endocrine systems in an integrative fashion in this course

PIOL 410 Intro to Research (1-3 Credit Hours)

This course provides an introduction to a wide variety of commonly used techniques in cell and molecular physiology research, with concomitant laboratory rotations to learn those techniques.

PIOL 412 Research (1-6 Credit Hours)

Independent research for thesis or dissertation under the supervision of a faculty research advisor. Credit varies based upon assigned effort and time spent in the laboratory. Students receive a letter grade from their research advisor.

PIOL 414 Graduate Colloquy (1-8 Credit Hours)

Special advanced topics course with variable credit. Paper discussion and instructor-led presentations.

PIOL 416 Research Seminar (1 Credit Hour)

Seminar presentation on PhD candidate's dissertation topics advance.

PIOL 417 Cellular Physiology (3 Credit Hours)

Pre-requisites: Restricted to Master of Physiology Program students

The major goal of the Cellular Physiology course is to define the molecular and cellular basis of systems Physiology and Pathophysiology. The course consists in distinct sessions of teaching, problem solving, and reviews. - Understand membrane structure and function. - Understand distinct metabolic and signaling pathways.

Outcomes:

- Understand the relationships among molecular, cellular and systems physiology

PIOL 420 Meth/Tech in Physiol Research (2 Credit Hours)

This course is intended for students seeking advanced knowledge of cutting-edge experimental approaches currently used in cardiovascular, metabolic, and neuroscience research. These topics will be discussed in both a technical/methodological sense, and in the context of the current scientific literature.

PIOL 421 Function of the Human Body I (4 Credit Hours)

This course will present the basic concepts and principles of human physiology. The course topics will include: introductory cell & neurophysiology, skeletal and smooth muscle, cardiac electrophysiology, EKG, cardiac muscle mechanics, circulation, special circulations and pulmonary physiology. The format will be lectures, simulations, small group problem sessions and scheduled reviews. Small group problem sessions will be held after each subject area and will focus on clinical application and integration of conceptual information presented in lectures. Small group sessions and reviews also will provide the student with the opportunity to obtain clarification from instructors of any outstanding questions and are designed to encourage active learning, as well as develop critical thinking and problem solving skills. Students will be evaluated by multiple choice and essay exams given after each of the 5 major topic areas. Course material will be geared toward non-thesis Masters students. Given that physiology is the basis of medicine, this course will prepare students with the basic science knowledge to successfully continue their professional development in future biomedical programs.

Outcomes:

Students will be able to describe the cellular mechanisms responsible for cardiac, skeletal and smooth muscle contraction and the factors that regulate their activity

PIOL 422 Function of the Human Body II (4 Credit Hours)

Enrollment limited to Masters of Science in Physiology students. This course presents the basic concepts and principles of human physiology. The course will be presented over one semester and the topics include: renal, acid-base balance, gastrointestinal, endocrine, and reproductive physiology. The format will be lectures, small group problem sessions and scheduled reviews.

Outcomes:

Students will be able to explain the cellular mechanisms responsible for normal renal, acid-base, endocrine, gastrointestinal and reproductive physiology

PIOL 423 Biochemical Physiology (3 Credit Hours)

Biochemical Physiology will give students knowledge of foundational processes that dictate cellular physiologic processes. Topics include the structure and properties of nucleic acids, amino acids, protein structure and folding, enzyme kinetics, metabolic pathways and intracellular signal transduction. The course will present the biochemical p

Outcomes:

Student completing this course should - Understand the biochemical mechanisms which underlie physiological processes - Understand protein structure dynamics and how these structures are dictated by second

PIOL 430 Basic Human Anatomy (2 Credit Hours)

Enrollment limited to Masters of Science in Physiology students. This course will provide students with the basic concepts and facts of human gross anatomy as they related to physiology and function. Specific sections include the musculo-skeletal components of the extremities, trunk and head, the peripheral nervous system to include both the somatic and autonomic systems, the cardiovascular system, respiratory system, digestive system, urinary system and reproductive system. Each system will integrate embryology, radiology and basic clinical applications.

Outcomes:

Students will be able to describe and integrate basic human anatomy of the major organ systems to physiology and clinical medicine

PIOL 446 Cardiovasc Jour Club (1 Credit Hour)

Presentation and discussion of original research papers with focus on cardiovascular physiology topics.

PIOL 450 Fundamentals Of Neurophysiology (4 Credit Hours)

This course imparts the basic concepts and fundamentals of Neurophysiology, with emphasis on concepts relevant to human neuroscience. Students will learn Neurophysiology fundamentals at the cellular, structural and physiological levels of various complex systems in the brain, with specific discussion of clinical correlates of Pathophysiological conditions.

Outcomes:

Students successfully completing this course will be able to understand and explain neurophysiological mechanisms relevant to normal and abnormal conditions

PIOL 461 Introduction to Human Pathophysiology (5 Credit Hours)

Restricted to students in the Masters of Science in Physiology program This course presents the basic concepts and principles of human pathophysiology. The course will be presented over one semester and the topics include: clinical evaluation of cardiac structure and function followed by a review of the major disorders of cardiovascular function.

Outcomes:

Students will be able to critically evaluate basic pathophysiological mechanisms underlying the most common forms of adult human cardiovascular disease

PIOL 468 Neurophysiology Jour Club (1 Credit Hour)

Presentation and discussion of original research papers with focus on neurophysiology topics.

PIOL 470 Excitability & Ion Transport (1-4 Credit Hours)

The course focuses on basic concepts of the physical movement of ions during activation of voltage- and ligand- gated ion channels.

PIOL 472 Structure/Function Membrane Proteins (3 Credit Hours)

The course explores basic and advanced concepts of membrane proteins structure, cell biology and function.

PIOL 500 Professional Development I (3 Credit Hours)

Must be enrolled in the MSP program. Professional Development will meet once/month throughout the one-year MSP program. Students will receive information about the options available for a career in the health sciences and will enhance their professional portfolio by participating in a variety of workshops designed to better equip them for a health science career.

Outcomes:

Students will be able to understand the curriculum and admission requirements of the various professional health programs and gain an understanding of the interview process

PIOL 501 Professional Development II (1 Credit Hour)

Pre-requisites: PIOL 500 Outcomes: Following successful completion of this course, the MSMP student will: 1) Demonstrate enhanced ability for self-awareness and analysis regarding their medical school application; 2) Demonstrate self-reflection in the selection of target medical schools, discussing their fit in terms of each medical school's mission statement; 3) Continue working with their academic advisor to prepare a well-written personal statement appropriately tailored to the professional program of choice; 4) Demonstrate understating of the application process and preparation of application forms

Professional Development will meet and have self-directed study time throughout the spring semester of the MSMP program. Students will receive bi-weekly, specific individualized one-on-one mentoring from their academic advisors and also meet with the course director for specific lectures on their AMCAS and AACOMAS applications for medical and DO schools. Students will continue to enhance their knowledge of the admissions process by having general lectures and individual sessions discussing their motivation, enhancing their self-awareness, writing their personal statements, their selection of appropriate medical schools, selection of activities (community and medical volunteering, health care exposure (shadowing, scribing, etc.), research for their application, overall discussions on writing their secondary statements, choice of letters of recommendation, etc.

PIOL 595 Thesis Supervision (0 Credit Hours)

Supervised research and writing leading to the completion of the masters of science thesis and degree.

PIOL 600 Dissertation Supervision (0 Credit Hours)

Supervised research and writing leading to the completion of the Ph.D. dissertation and degree.

Course equivalencies: BMSC600/MIIM600/PIOL600

PIOL 605 Physiology Study (0 Credit Hours)

Must be enrolled during fall semester of MS program in Physiology. Holding course to keep the student active in the program while completing MS degree requirements.

Polish (POLS)

Discover, search, courses!

POLS 101 Polish I (3 Credit Hours)

This course focuses on introducing the student to the basics of Polish, through conversation, pronunciation and grammar. Primary emphasis is on enabling the student to speak and understand basic Polish.

Interdisciplinary Option: Polish Studies

Outcomes:

Students will be able to use correctly and understand the basic grammatical forms of the verbs, nouns and adjectives of Polish as an inflected language; They will be appropriately prepared to complete the full view of Polish structures in Polish

POLS 102 Polish II (3 Credit Hours)

This course focuses on introducing the student to the basics of Polish, through conversation, pronunciation and grammar. Primary emphasis is on enabling the student to speak and understand basic Polish.

Interdisciplinary Option: Polish Studies

Outcomes:

Students will be able to use correctly and understand the basic grammatical forms of the verbs, nouns and adjectives of Polish as an inflected language; They will be appropriately prepared to complete the full view of Polish structures in Polish

POLS 103 Polish III (3 Credit Hours)

Pre-requisites: POLS 102 This course is designed to further develop and improve student's ability to speak and read Polish, by introducing advanced grammar, vocabulary, idioms, phraseology and syntax structures

No course description is available

Interdisciplinary Option: Polish Studies

Outcomes:

Students will be able to use correctly and understand various grammatical forms of verbs, nouns, adjectives, adverbs and numbers; They will be appropriately prepared to use Polish grammatical and stylistic structures required in Polish 104

POLS 104 Polish IV (3 Credit Hours)

Pre-requisites: POLS 103 This course focuses on improving the student's ability to communicate in Polish both oral and written

Primary emphasis is on speaking and basic writing in Polish using proper grammatical and stylistic structures.

Interdisciplinary Option: Polish Studies

Outcomes:

Students will be able to express themselves in spoken and written Polish with the level of fluency appropriate for Polish 250

POLS 201 Polish Medical Terminology (3 Credit Hours)

Pre-requisites: POLS 104 or equivalent

This course is designed to prepare students for medical and healthcare related professions, future physicians and nurses, healthcare administrators and health insurance specialists. We will study Polish vocabulary for anatomy and physiology, and introduced Polish terms for medical procedures and tests. We will use phraseology common for taking medical history. Students will practice using medical terminology in patient interviews, reading articles from healthcare publications as well as understanding and formulating medical instructions. In this course we will also talk about cultural issues in practicing medicine, including the cultural differences between Polish and American approach. There will be strong emphasis on speaking, listening, and reading Polish.

Outcomes:

Students will expand their Polish vocabulary, including body parts and functions, diseases and their manifestations; They will practice taking a medical history in dialogues between medical professionals and their clients as well as use medical names and description

POLS 202 Polish for Healthcare (3 Credit Hours)

Pre-requisites: POLS 104 or equivalent Outcomes: Students will learn medical vocabulary, including body parts and organs, physiology and functions of various systems; They will practice taking medical history in dialogues between medical professionals and their patients, and they will write descriptions of medical conditions

This course is designed to prepare students for medical professions, future physicians, dentists, and nurses. We will practice vocabulary for anatomy and physiology, Polish terms for medical procedure and test as well as phraseology used in every day in doctor-patient communication. This course will cover medical specializations such as: pediatrician, nutritionist, internist, immunologist, neurologist, psychiatrist and surgeon. We will also talk about cultural issues in practicing medicine. There will be strong emphasis on speaking, listening, and reading Polish and using more advanced aspects of Polish grammar.

POLS 250 Composition & Conversation I (3 Credit Hours)

Pre-requisites: POLS 104 This course focuses on improving and further developing student's ability to converse and write in literary Polish language

Primary emphasis is on proper grammatical and stylistic expression in Polish with extended vocabulary and phraseology.

Interdisciplinary Option: Polish Studies

Outcomes:

Students will be able to express themselves in spoken and written Polish by making oral presentations and writing short compositions; They will be appropriately prepared for Polish 251

POLS 251 Composition & Conversation II (3 Credit Hours)

Pre-requisites: POLS 250 This course focuses on enhancing and polishing student's ability to converse and write in contemporary Polish language

Primary emphasis is on standard, literary Polish with its grammatical, orthographical and stylistic level expected of an educated Polish speaker.

Interdisciplinary Option: Polish Studies

Outcomes:

Students will be able to speak fluently, make oral presentations and write essays in standard literary Polish language with fluency of an educated Polish speaker

POLS 270 Contemporary Polish Culture in the Original Language (3 Credit Hours)

Pre-requisites: POLS 104 or equivalent

We will discuss the key elements of Polish culture as it is evolving in the fast changing social, technological, and economic circumstances after the political transformation of Central Europe. Students will explore the cultural traditions and values of the pre-WWII generation and the Soviet era generation, which led many to emigrate from Poland.

Interdisciplinary Option: Polish Studies

Polish Studies (POST)

Discover, search, courses!

POST 199 Topics in Polish Studies: Introductory (1-6 Credit Hours)

Introduction to a specific theme in Polish Studies, e.g. Polish immigration, emergent Poland after World War II, etc.

Interdisciplinary Option: Polish Studies

Outcomes:

To gain a basic knowledge of Poland through its art, history, politics, religion, philosophy, or cinema

POST 299 Topics in Polish Studies: Intermediate Topics (1-6 Credit Hours)

Exploration of important themes in Polish Studies, such as Polish immigration, emergent Poland after World War II, etc.

Interdisciplinary Option: Polish Studies

Outcomes:

To enhance knowledge of Polish Studies through different disciplines: art, history, politics, religion, philosophy, or cinema

POST 395 Polish Studies Capstone (3 Credit Hours)

Capstone course to the POST Minor program. This is a tutorial course with a service learning component that serves an integrative purpose.

In the tutorial students will focus on a specific issue or theme in POST.

The syllabus will reflect the research interests of the faculty member who administers the course.

Interdisciplinary Option: Polish Studies

This course satisfies the Engaged Learning requirement.

Outcomes:

Students will be able to integrate their coursework in the POST minor with their major concentration

POST 399 Topics in Polish Studies: Advanced (1-6 Credit Hours)

Intensive study of a specific theme or themes in the broad field of Polish Studies: language, art, literature & film, politics, music, and history.

Interdisciplinary Option: Polish Studies

Outcomes:

To provide an in-depth knowledge of Polish Studies

Political Science (PLSC)

Discover, search, courses!

PLSC 100 Political Theory (3 Credit Hours)

Requirement: PHIL 130 for students admitted to Loyola University for Fall 2012 or later. No requirement for students admitted to Loyola prior to Fall 2012 or those with a declared major or minor in the Department of Philosophy or Department of Political Science. An introduction to political theory, covering the principal ideas, controversies and institutions of political society.

Knowledge Area: Tier 2 Philosophical Knowledge

Course equivalencies: ACPOL 200 / PLSC 100

Outcomes:

Students will be able to demonstrate an understanding of major approaches to the normative study of politics; to identify the assumptions underlying philosophical arguments; and to critically assess different theories of political justice

PLSC 101 American Politics (3 Credit Hours)

Requirement: ANTH 100, PLSC 102, PSYC 100 or SOCL 101 for students admitted to Loyola University for Fall 2012 or later. No requirement for students admitted to Loyola prior to Fall 2012 or those with a declared major or minor in the Department of Anthropology, Department of Criminal Justice, Department of Economics, Department of Psychology, Department of Political Science, the Department of Sociology, Human Services or the School of Nursing. American national government and politics, including institutions, group and electoral processes, and public policy. Outcome: Students will be able to demonstrate an understanding of the American political system, the patterns of political participation and behavior of diverse individuals and groups in American society, and evaluate the roles and processes of U.S. political institutions.

Knowledge Area: Tier 2 Societal Knowledge

Course equivalencies: ACPOL 101 / PLSC 101

PLSC 102 International Relations in an Age of Globalization (3 Credit Hours)

Competing perspectives on international politics and global issues such as North-South relations, human rights, war and peace, population growth, and environmentalism. Outcome: Students will be able to demonstrate an understanding of the main approaches to the study of international politics and to analyze and assess such major substantive issues as interstate war, terrorism, arms control, international political economy and sustainable development.

Knowledge Area: Foundational Societal Knowledge

Interdisciplinary Option: African Studies and the African Diaspora, Black World Studies, Global Studies, Peace Studies

Course equivalencies: PLSC/PAX/ACPOL102/AFR110/INTS2

PLSC 103 Comparative Politics (3 Credit Hours)

A cross-national comparison of political institutions and political behavior.

Knowledge Area: Tier 2 Societal Knowledge

Interdisciplinary Option: Global Studies, Global Studies

Outcomes:

Students will learn why political systems differ and how different political systems function and change

PLSC 123 Speak Up Democracy (3 Credit Hours)

"Speak Up Democracy" is a course on perennial questions about the workings of democracies. Participating students will investigate the connection between speech and political power, ruminating on whose voices are heard (and silenced) in a democracy. This summer program is animated by a central question: how should we speak to one another in a democracy? The course is open to high school students participating in the summer program.

PLSC 195 Law and Civil Rights (3 Credit Hours)

The course focuses on the political processes surrounding laws and civil rights.

PLSC 202 Mock Trial (3 Credit Hours)

Students will study the trial as a process for finding truth and administering justice by learning the dynamics of the trial, by developing trial strategy, by learning how to conduct and respond to direct and cross examination and by delivering effective opening and closing arguments.

Mock trial is an engaged learning course. Prior Permission is required.

They call upon students to employ their problem-solving and public-speaking skills, and students gain knowledge of legal practices and procedures.

This course satisfies the Engaged Learning requirement.

Outcomes:

Mock trials are an activity that promotes critical thinking and reasoning

PLSC 203 Moot Court (3 Credit Hours)

Students will study the appeal as a process for finding truth and administering justice by learning the dynamics of appellate advocacy, by developing oral argument strategies, by learning how to respond to questions posed by judges in competition, and by delivering effective summations and rebuttal arguments. Moot court is an engaged learning course. They will enhance their ability-to-think- on-their-feet skills, their legal research skills, and their public-speaking skills. Students gain knowledge of legal argumentation and constitutional law.

This course satisfies the Engaged Learning requirement.

Outcomes:

Moot court competitions are an activity that promotes critical thinking and reasoning

PLSC 204 Conflict Management (3 Credit Hours)

This course considers a variety of different approaches to international conflict management: direct bargaining, mediation, military intervention, economic sanctions, arbitration, adjudication, and peacekeeping. In addition to learning about the differences among these various conflict resolution techniques. Doing so requires scientific investigation.

Interdisciplinary Option: Global Studies

Outcomes:

This course will treat state conflict as a natural phenomenon that must be understood before it can be mitigated

PLSC 208 Representation in the United States (3 Credit Hours)

Considers what "political representation" means and how scholars study how well representation works in the contemporary United States.

Outcomes:

Understanding of concept of political representation and tools scholars use to study representation

PLSC 213 International Human Rights (3 Credit Hours)

This course focuses on the theoretical foundations of such international human rights as well as their practical implications. It discusses the roles of states, intergovernmental organizations, and nongovernmental organizations in shaping human rights norms and practices. They will also understand practical causes and consequences of human rights policies.

Outcomes:

Students will be able to identify assumptions of arguments and critically assess different theories of international human rights

PLSC 215 Politics of Marginalized Groups (3 Credit Hours)

This course focuses on the role that race, ethnicity, and marginalized status plays in American politics and public policy. It will provide a general overview of several groups, including Blacks, Latinxs, Asian and Muslim Americans, Women, LGBTQ, immigrants and refugees, indigenous peoples and other groups.

Outcomes:

Students will acquire an understanding of the historical exclusion of various groups from the political system and the resulting political participation and behavior patterns of minoritized groups in American society

PLSC 216 Political Numbers (3 Credit Hours)

This course will train participants to be critical consumers of political arguments that cite quantitative evidence. The course will take a hands-on approach where students learn how to conduct, interpret, and critique quantitative analysis using common statistical software packages. They will also learn how to conduct and present quantitative analysis.

Outcomes:

Students will learn to critically engage with the numbers-based claims they encounter in the political arena and beyond

PLSC 218 African-American Politics (3 Credit Hours)

The political goals, behavior, voting patterns, group structures, values, and attitudes of various segments of the African-American population, and how these affect the political system.

Interdisciplinary Option: African Studies and the African Diaspora, Black World Studies, Human Services, Race and Ethnicity

Course equivalencies: X-PLSC218/BWS 218

Outcomes:

Students will be able to demonstrate an understanding of the patterns of political participation and behavior of African-American individuals and groups in American society

PLSC 224 Chicago Politics (3 Credit Hours)

The course focuses on the local politics in the city of Chicago.

Interdisciplinary Option: Urban Studies

Course equivalencies: PLSC391 / PLSC224

PLSC 232 Politics of the United Kingdom (3 Credit Hours)

This course offers an introduction to politics in the United Kingdom (officially known as the United Kingdom of Great Britain and Northern Ireland, and unofficially referred to as Britain).

Interdisciplinary Option: European Studies, Global Studies

Outcomes:

Students will be able to demonstrate an understanding of the structure and operation of the United Kingdom's domestic political system, as well as its relations with the rest of the world, especially the European Union

PLSC 236 Political Communication (3 Credit Hours)

The purpose of this course is to explore and examine how elected officials and institutions communicate to the public - and the role journalists and PR professionals play in the process--through readings, seminar, and practicum. The class will challenge students to grapple with questions like - What is the meaning of the "truth" in today's media environment?

Outcomes:

Students will understand how and why journalists cover what they cover, and the roles PR professionals/spin doctors attempt to shape the media narrative

PLSC 238 Political Advocacy (3 Credit Hours)

Policy-making and implementation in the United States is a complicated process. In any given year laws are passed by elected officials, decisions that guide our implementation of the law are made by government agencies, and rulings handed down by the courts shape our interpretation of those laws.

Outcomes:

Students will understand their place in the policy-making ecosystem, and the efficacy of those efforts

PLSC 251 Women in American Politics (3 Credit Hours)

This course focuses on Women and Politics in the United States. It looks at women's movements both historical and current, how women and men in the United States act differently in politics in terms of voting behavior, as political candidates, and as elected leaders. Students will gain a better understanding of the U.S. political system and how and when women are treated equally and unequally when compared with men.

Interdisciplinary Option: Women & Gender Studies

PLSC 252 Capitalism and Its Discontents (3 Credit Hours)

This course analyzes the intersection of capitalist economics and politics from a critical perspective. Capitalism and Marxism will be reviewed, followed by a critical examination of how capitalism has played out in economic/political practice in the world today. Includes discussions of many economic topics recently in the news, and the potential for change in a variety of directions. Students will learn to critically analyze the ways in which modern economics leads to less than optimal solutions, including economic inequality. They will also learn to identify other options that may lead to greater equality and economic success.

Interdisciplinary Option: Global Studies

PLSC 300 Contemporary Political Issues (3 Credit Hours)

Variable titles. Investigation of selected topics or methods in politics. This course may apply to any of the four areas of the department, and may be repeated depending on subject matter. Outcome: Students will gain an in-depth knowledge of a unique topic in contemporary politics.

PLSC 300A Contemporary Political Issues: American Politics (3 Credit Hours)

Investigation of selected topics or methods in American Politics. This course may be repeated depending on subject matter.

PLSC 300AP AP Credit PLSC - 4/5 (0 Credit Hours)

AP Credit PLSC - 4/5

PLSC 300B Contemporary Political Issues: Political Theory (3 Credit Hours)

Investigation of selected topics or methods in Political Theory. This course may be repeated depending on subject matter.

PLSC 300C Contemporary Political Issues: Comparative Politics (3 Credit Hours)

Investigation of selected topics or methods in Comparative Politics. This course may be repeated depending on subject matter.

PLSC 300D Contemporary Political issues in International Relations (3 Credit Hours)

Investigation of selected topics or methods in International Relations. This course may be repeated depending on subject matter.

PLSC 301 Political Justice (3 Credit Hours)

A study of alternative conceptions of political justice and the attempts to institutionalize them in various political systems. Outcome: Students will be required to demonstrate a mastery of competing theories about how various goods should be distributed fairly, and apply the just-war doctrine to various real-world cases. This course will help students to analyze and appraise social practices and policies that claim to be consistent with principles of justice.

PLSC 302 American Political Thought (3 Credit Hours)

Major political themes from the founding era to the present. Outcome: Students will learn to interpret and evaluate the assumptions and principles guiding the writings of major American political theorists, and to reflect on their significance in the evolution of American politics and society.

PLSC 303 Conservatism (3 Credit Hours)

A survey of modern conservative thought. Attention will be devoted to the theoretical and political cleavages within the Right. Outcome: Students will learn to interpret and evaluate the assumptions and principles guiding the writings of influential conservative political theorists and their critics, and to reflect on the significance of conservative political theory in promoting a more just society.

PLSC 304 Ancient Political Thought (3 Credit Hours)

(CLST 305) A study of major political theorists from Plato to the fall of the Roman republic. Outcome: Students will learn to interpret and evaluate the assumptions and principles guiding the writings of major Ancient Greek and early Roman political theorists.

PLSC 306 Modern Political Thought (3 Credit Hours)

A study of major political theorists from Machiavelli to the French Revolution. Outcome: Students will learn to interpret and evaluate the assumptions and principles guiding the writings of the major political theorists from Machiavelli to Rousseau.

Interdisciplinary Option: European Studies

PLSC 307 Democratic Theory (3 Credit Hours)

This course examines normative arguments for and against popular rule. Outcome: Students will be able to explain and assess critically arguments for and against democratic government.

PLSC 308 Contemporary Political Thought (3 Credit Hours)

A study of major political theorists from the nineteenth century to the present. Outcome: Students will learn to interpret and evaluate the assumptions and guiding principles of the writings of major political theorists from the nineteenth century to the present.

Interdisciplinary Option: German Studies

PLSC 309 Socialism (3 Credit Hours)

A survey of Marxist and post-Marxist socialist thought. Outcome: Students will learn to interpret and evaluate the assumptions and principles guiding the writings of major socialist political theorists and their critics, and to reflect on the significance of socialist political theory in promoting a more just society.

Interdisciplinary Option: Polish Studies

PLSC 310B Catholic Political Thought (3 Credit Hours)

A survey of classic and contemporary political thinkers in the Roman Catholic tradition. The problems examined include religious pluralism, moral decay, natural law, distributive justice, political obligation, war, and peace.

PLSC 312 Feminist Theory (3 Credit Hours)

(WOST 318) A survey of classical and contemporary feminist political theory. Outcome: Students will learn to interpret and evaluate the assumptions and principles guiding the writings of influential feminist political theorists and their critics, and to reflect on the significance of feminist political theory in promoting a more just society.

Interdisciplinary Option: Women & Gender Studies

Course equivalencies: X-PLSC312/WOST318/WSGS318

PLSC 313 Resistance and Obligation (3 Credit Hours)

This course examines normative arguments about the source of political obligation and the right to resist government through various means, both violent and nonviolent. Outcome: Students will be able to explain and assess critically various arguments about the duty to obey and the right to disobey government.

PLSC 314 Liberalism (3 Credit Hours)

A survey of classical and contemporary political theorists in the liberal tradition. Outcome: Students will learn to interpret and evaluate the assumptions and principles guiding the writings of major liberal political theorists and their critics, and to reflect on the significance of liberal political theory in promoting a more just society.

PLSC 316 Politics of Genocide (3 Credit Hours)

This course analyzes the politics surrounding genocide, war crimes and crimes against humanity in contemporary times. The primary focus is on occurrences since the end of the Cold War, including the former Yugoslavia, Rwanda, Sudan and the Democratic Republic of the Congo.

Interdisciplinary Option: African Studies and the African Diaspora, Global Studies, Race and Ethnicity

Outcomes:

Students will be able to demonstrate an understanding of genocide and other massive human rights violations, along with the role of the international community in preventing future atrocities

PLSC 317 Politics of International Health (3 Credit Hours)

This course discusses political issues in the field of international health, including comparing health care systems in the industrialized world, and treatment of diseases in the developing world, particularly Africa (HIV/AIDs, TB, Malaria, etc). Students will be able to demonstrate an understanding of international health and comparative health systems.

Interdisciplinary Option: African Studies and the African Diaspora, Global Studies

PLSC 318 Politics & the Economy (3 Credit Hours)

This course examines how and why the U.S. government influences the economy. The government is the single most important actor in the economy, both as a consumer and as an entity seeking to manage important aspects of the economy. Provide explanations of the development of both historical and contemporary economic policies. Explain the underlying bases of contemporary economic issues and competing views on appropriate policy actions to address them. Be able to access available public sources to conduct research on economic problems and policies.

Outcomes:

At the end of the course, students should be able to demonstrate knowledge about the key public and private institutions involved in economic policy and politics

PLSC 319 Women, Law & Public Policy (3 Credit Hours)

The legal arrangements and public policies that structure the relationships of women and men in American society. Outcome: Students will be able to analyze and appraise the impact of judicial decisions and public policies on women in the United States.

Interdisciplinary Option: Human Services, Women & Gender Studies

Course equivalencies: X-PLSC319/WOST319/WSGS319

PLSC 320 Con Law-Due Process (3 Credit Hours)

The Supreme Court's role in defining substantive and procedural due process issues such as criminal procedure, individual autonomy, and economic regulation. Outcome: Students will be able to demonstrate an understanding of the meaning and application of due process in American law and its impact in safeguarding individual freedoms and civil rights.

Interdisciplinary Option: Sociolegal Studies

PLSC 321 Const Law-Powers of Government (3 Credit Hours)

The Supreme Court's role in allocating power among the three branches of the national government and between the state and federal governments. Outcome: Students will be able to demonstrate an understanding of alternative judicial approaches to the separation of governmental powers.

Interdisciplinary Option: Sociolegal Studies

PLSC 322 Const Law-Rights and Liberties (3 Credit Hours)

The Supreme Court's role in defining constitutional guarantees of equal protection and individual freedom. Outcome: Students will be able to demonstrate an understanding of the meaning, protection and boundaries of civil rights and individual liberties in American law.

Interdisciplinary Option: Sociolegal Studies

PLSC 323 Children, Law & Public Policy (3 Credit Hours)

The constitutional rights of children in the home, the classroom, and the courtroom, and such policy areas as public welfare assistance, child abuse and neglect, and child support enforcement. Outcome: Students will be able to analyze and assess the impact of judicial decisions and public policies on children and families in the United States.

Interdisciplinary Option: Human Services

PLSC 324 Civil-Military Relations (3 Credit Hours)

An exploration of the nature of military professionalism and the relationship between the military and the civil society whose task it is to defend. Outcome: Students will understand the role of the military in a free society, and the complex interactions between democratic norms and military organization.

PLSC 325 American Foreign Policy (3 Credit Hours)

(INTS 375) Origins and development of American foreign policies; the method of their formulation and conduct. Outcome: Students will be able to demonstrate an understanding of the formulation, adoption and implementation of American foreign policy and its impact on domestic and international affairs.

Interdisciplinary Option: Global Studies

Course equivalencies: X-PLSC325/INTS375

PLSC 326 American National Security (3 Credit Hours)

American national security policy, including the role of major political actors, the defense budgetary process, and the capability and effectiveness of the military. Outcome: Students will be able to analyze and assess the formation, adoption and implementation of national security policies in the United States and their impact on domestic and international affairs.

Interdisciplinary Option: Peace Studies

Course equivalencies: X-PLSC326/PAX 327

PLSC 327 Political Psychology (3 Credit Hours)

Political attitudes from a social psychological perspective with emphasis on cognitive development models. Outcome: Students will be able to understand the psychological sources of political decision making.

PLSC 328 Political Behavior (3 Credit Hours)

This course covers a range of topics pertaining to political behavior in the United States. Topics will include research on the factors that shape public attitudes about political matters, and work that examines who participates in politics and why.

PLSC 329 Interest Group Politics (3 Credit Hours)

A study of the role of interest groups in American politics and policy. Outcome: Students will be able to analyze and assess the patterns of political participation and behavior of diverse interest groups and their impact on the American political system.

PLSC 330 Global Justice (3 Credit Hours)

This course explores debates about global justice such as immigration, climate change, free trade, and humanitarian interventions. Rooted in political theory, the course also includes readings from sociology, philosophy, and economics.

Interdisciplinary Option: Peace Studies, Peace Studies

Course equivalencies: X-PLSC330/PAX 330

Outcomes:

Students will learn to critically assess different theories of political justice and learn how to evaluate the moral and political justifications of international practices and policies

PLSC 331 Islamic Political Thought (3 Credit Hours)

An introduction to Islamic political thought, covering main ideas, questions, debates of the Islamic religio-political society, from the Qur'an to the present. Among the authors studied include al-Farabi, al-Mawardi, Ibn Khaldun, Islamic feminists, Islamic modernists, and Islamists.

Outcomes:

Students will be able to identify assumptions of arguments, critically assess different theories, and, having been familiarized with the inherent entanglement of religion and politics, will be able to identify what is specific to Islamic governance and what may be universalized

PLSC 332 Politics of Amer Bureaucracies (3 Credit Hours)

The political and social aspects of American bureaucracies at the local, state and national levels with emphasis on the roles of administrators and administrative institutions in the political system and policy process. Outcome: Students will be able understand the role of the federal bureaucracy in the formulation, adoption and implementation of public policies, and their impact on the everyday lives of citizens.

PLSC 333 Crossing Borders: The Politics of Immigration (3 Credit Hours)

This course explores immigration policies and practices around the world. The primary goal is to gain a better understanding of the choices both countries and would-be immigrants face, as well as the consequences of the laws and policies enacted to regulate the movement of people across borders.

Interdisciplinary Option: Human Services, Human Services

Outcomes:

Understand the range of motivations that cause people to migrate, the laws and policies to regulate this movement, the consequences of migration, and contribute to societal debates about migration

PLSC 334 Urban Policies and Problems (3 Credit Hours)

An analysis of selected problems confronting governments in urban America as well as the range of public policies that address urban problems. (May be repeated with different issues.)

Interdisciplinary Option: Human Services, Race and Ethnicity, Urban Studies

Outcomes:

Students will obtain in-depth knowledge of a unique topic in the area of urban policy-making

PLSC 335 Urban Semester Seminar (3 Credit Hours)

See course description for SOCL 335. Outcome: See outcome for SOCL 335.

Interdisciplinary Option: Urban Studies

This course satisfies the Engaged Learning requirement.

Course equivalencies: X-SOCL335/PLSC335

PLSC 336 Politics in Contemporary China (3 Credit Hours)

This course primarily focuses on domestic politics in post-1978 China. It introduces and examines China's key political institutions and players, various forms of political participation by political elites and ordinary citizens, and issues on governance and political reforms.

Interdisciplinary Option: Asian Studies, Global & International Studies, Global Studies, Peace Studies, Asian Studies, Global & International Studies, Global Studies, Peace Studies

Course equivalencies: X-COMM304/PLSC/PAX336/INTS310

Outcomes:

Students will be able to make informed use of China as a case in more general arguments and have a solid footing from which to pursue more in-depth study of particular topics in China

PLSC 337 Terrorism (3 Credit Hours)

An analysis of different types of terrorist insurgencies across the globe and of the efforts by governments to combat terrorism Outcome:

Students will be able to explain what motives the turn to terror as a method of struggle and to assess the morality and effectiveness of the counterterrorism tactics adopted by various governments.

Interdisciplinary Option: Global Studies

Course equivalencies: X-PLSC337/INTS337

PLSC 338 Comparative Public Policy: Policies in Western Democracies (3 Credit Hours)

The course will provide an overview of the policy process and consider the role of cultural, political, and institutional influences on policymaking in western democracies. The course will provide key concepts and strategies for evaluation of policy outcomes. Outcome: Students will acquire knowledge for objective and comprehensive policy analysis and recommendations.

Interdisciplinary Option: Global Studies

Course equivalencies: X-PLSC338/INTS338C

PLSC 339 Political Ideologies (3 Credit Hours)

(INTS 369) A comparative analysis of important modern political ideologies and the functions they serve in the political system. Attention will be devoted to the ideologies of non-Western regimes and movements. Outcome: Students will be able to analyze and assess the role and impact of political ideologies in the foundation, development, and justification of various political regimes.

Interdisciplinary Option: Global Studies

Course equivalencies: X-PLSC339/INTS339

PLSC 340 Internatl Reltns of Africa (3 Credit Hours)

(BWS 340) (INTS 340) An introduction to the international relations of the countries that comprise the African continent. The primary focus is the evolution of African international relations during the post-colonial period (c. 1960-present). Outcome: Students will be able to demonstrate an understanding of the nature and evolution of African international relations with the major northern industrialized democracies and various regions of the developing world.

Interdisciplinary Option: African Studies and the African Diaspora, Black World Studies, Global Studies, Islamic World Studies

Course equivalencies: X-PLSC340/BWS 340/INTS340

PLSC 342 African Politics (3 Credit Hours)

(BWS 342) (INTS 342) Forces shaping political societies south of the Sahara: the heritage of colonialism, the sociology of modernization, race related stresses, economic factors, and political movements. Outcome: Students will be able to demonstrate an understanding of the formation and structure of African political systems, the patterns of political participation and behavior of diverse individuals, groups, and governments in African societies, and evaluate the roles and processes of African political institutions.

Interdisciplinary Option: African Studies and the African Diaspora, Black World Studies, Global Studies, Islamic World Studies

Course equivalencies: PLSC342/BWS 342/INTS342/IWS342

PLSC 343 Latin American Politics (3 Credit Hours)

(INTS 343) (LASP 343) Historical, cultural, economic and political forces in the governments of Latin America and the Caribbean. Outcome: Students will be able to demonstrate an understanding of the formation and structure of Latin American and Caribbean political systems, the patterns of political participation and behavior of diverse individuals, groups, and governments in Latin American and Caribbean societies, and evaluate the roles and processes of Latin American and Caribbean political institutions.

Interdisciplinary Option: Global Studies, Latin American Studies

Course equivalencies: X-PLSC343/INTS343/LASP343

PLSC 344 Contemp Issues in Latin Amer (3 Credit Hours)

(INTS 344) (LASP 344) A study of political forces and processes relating to population movement, land use, and urbanization in Latin America and the Caribbean. Outcome: Students will obtain in-depth knowledge of a unique topic in Latin American and Caribbean politics.

Interdisciplinary Option: Global Studies, Latin American Studies

Course equivalencies: X-PLSC344/INTS344/LASP344

PLSC 345 South & Southeast Asian Politics (3 Credit Hours)

(ASIA 343) (INTS 345) Political forces and developments of the Asian cultures. Outcome: Students will be able to demonstrate an understanding of the formation and structure of South and Southeast Asian political systems, the patterns of political participation and behavior of diverse individuals and groups in South and Southeast Asian societies, and evaluate the roles and processes of South and Southeast Asian political institutions.

Interdisciplinary Option: Asian Studies, Global Studies

Course equivalencies: X-PLSC345/ASIA343/INTS345

PLSC 346 East Asian Politics (3 Credit Hours)

(ASIA 342) (INTS 346) The social forces and structure of politics and government of East Asia. Outcome: Students will be able to demonstrate an understanding of the formation and structure of East Asian political systems, the patterns of political participation and behavior of diverse individuals and groups in East Asian societies, and evaluate the roles and processes of East Asian political institutions.

Interdisciplinary Option: Asian Studies, Global Studies

Course equivalencies: X-PLSC346/ASIA342/INTS346

PLSC 347 The European Union (3 Credit Hours)

(INTS 381) An introduction to the European Union, a regional organization linking the nations of Europe. Outcome: Students will be able to demonstrate an understanding of the formation and structure of the European Union, the patterns of political participation and behavior of diverse individuals, groups, and governments in the European Union, and evaluate the roles and processes of the European Union's political institutions.

Interdisciplinary Option: European Studies, Global Studies, Polish Studies

Course equivalencies: X-PLSC347/INTS381

PLSC 348 Soviet & Post-Soviet Politics (3 Credit Hours)

(INTS 382) An examination of the institutions, processes, and policies of the former Soviet Union and its successor states. Outcome: Students will be able to demonstrate an understanding of the formation and structure of the former Soviet Union, the patterns of political participation and behavior of diverse individuals and groups in the former Soviet Union, and evaluate the roles and processes of the former Soviet Union's political institutions. Students will also be able to understand the collapse of the former Soviet Union and the formation and structure of its successor states.

Interdisciplinary Option: European Studies, Global Studies, Polish Studies

Course equivalencies: X-PLSC348/INTS382

PLSC 349 Eastern European Politics (3 Credit Hours)

(INTS 382) An examination of the institutions, processes, and policies of the former Soviet Union and its successor states. Outcome: Students will be able to demonstrate an understanding of the formation and structure of the former Soviet Union, the patterns of political participation and behavior of diverse individuals and groups in the former Soviet Union, and evaluate the roles and processes of the former Soviet Union's political institutions. Students will also be able to understand the collapse of the former Soviet Union and the formation and structure of its successor states.

Interdisciplinary Option: European Studies, Global Studies, Polish Studies

Course equivalencies: X-PLSC349/INTS349

PLSC 350 Pol of Internatl Econ Relatns (3 Credit Hours)

(INTS 350) An examination of international political-economic relations with an emphasis on the post-World War II period. Outcome: Students will be able to demonstrate an understanding of the interrelationship between the international economic and political systems.

Interdisciplinary Option: Global Studies

Course equivalencies: X-PLSC350/INTS350

PLSC 351 Latin Amer International System (3 Credit Hours)

(INTS 395) (LASP 341) An introduction to the international relations of the countries of Latin America and the Caribbean. The primary focus is the evolution of Latin American and Caribbean international relations during the Cold War period Outcome: Students will be able to demonstrate an understanding of the interrelationship between the international system and the foreign policies of the countries of Latin America and the Caribbean. Students will gain an in-depth knowledge of how U.S. influence, revolutionary insurgencies, trade, the illicit narcotics traffic, human rights concerns, and international organizations have positively and negatively affected the region.

Interdisciplinary Option: Global Studies, Latin American Studies

Course equivalencies: X-PLSC351/INTS395/LASP341

PLSC 352 Canadian Politics (3 Credit Hours)

(INTS 320) The Canadian system of government, focusing on the Parliament, the Prime Minister and permanent government, the judiciary, political actors such as organized interests, political parties, mass media, and public opinion. Outcome: Students will be able to demonstrate an understanding of the Canadian political system, the patterns of political participation and behavior of diverse individuals and groups in Canadian society, and evaluate the roles and processes of Canadian political institutions.

Interdisciplinary Option: Global Studies

Course equivalencies: X-PLSC352/INTS320

PLSC 353 International Law (3 Credit Hours)

(INTS 353) (PAX 353) Introduction to legal principles and procedures of recognized international law. Outcome: Students will be able to demonstrate an understanding of the role and impact of law and legal principles and institutions in international relations.

Interdisciplinary Option: Global Studies, Peace Studies, Sociolegal Studies

Course equivalencies: X-PLSC353/INTS353/PAX 353

PLSC 354 Global Environmental Politics (3 Credit Hours)

(ESP 354) (INTS 354) (PAX 354) Examines the linkages between the world's natural environment and the global political system. Outcome: Students will be able to demonstrate an understanding of the role of various private, national and international actors in the formulation, adoption and implementation of environmental public policies.

Interdisciplinary Option: Environmental Studies, Global Studies, Peace Studies

Course equivalencies: X-PLSC/ESP/INTS/PAX 354

PLSC 355C Women and Politics: A Cross-National Perspective (3 Credit Hours)

This course offers a cross-national perspective of women's status in the political world, as voters, activists, and officeholders. It examines women's participation in the developed and developing world. Students will acquire knowledge of the role of women as political actors in a multitude of nations in the world.

Interdisciplinary Option: Global Studies, Women & Gender Studies

Course equivalencies: PLSC355C/WSGS355C/INTS361C

PLSC 356 Intervent in World Politics (3 Credit Hours)

(INTS 356) (PAX 356) Examines the purposeful use of political, economic, and military instruments by one country to influence the domestic or the foreign policies of another country. Outcome: Students will obtain an in-depth knowledge of the historical evolution, potential constraints, and case studies of U.S. intervention in the post World-War II era.

Interdisciplinary Option: Global Studies, Peace Studies

Course equivalencies: X-PLSC356/INTS356/PAX 356

PLSC 357 Hollywood and Law (3 Credit Hours)

This course analyzes films that focus on justice, the law, and the legal system, to see what they tell us about political and legal culture, and what messages (if any) they have for contemporary politics.

Interdisciplinary Option: Global & International Studies, Global & International Studies

Course equivalencies: X-PLSC357/INTS357

Outcomes:

Student will analyze how Hollywood portrays law, policy, and major trials and court decisions as well as be able to locate and ask questions about how the depiction of law, politics, and civic responsibility have changed across time

PLSC 358 War, Peace and Politics (3 Credit Hours)

(PAX 358) The historical evolution of war, the nature of wars in the 20th century and into the 21st century, the nature of threats, sources of conflict, and procedures for peaceful resolution of disputes. Outcome: Students will be able to demonstrate an understanding of the principal causes of wars, the means and ends of warfare, and the process and prospects of reestablishing peace.

Interdisciplinary Option: Global Studies, Peace Studies

Course equivalencies: X-PLSC358/INTS358/PAX 358

PLSC 358D The Scientific Study of War (3 Credit Hours)

This course provides an introduction to & overview of the concepts & approaches related to the causes of war, conflict, and peace in the international system. The main topics of the course are: (1) an introduction to understanding war as a social science topic, (2) the origins of the demands and disputes that can lead to war, (3) the escalation of these, (4) the expansion of war, (5) the consequences of war, and (6) the possibility of peace.

Interdisciplinary Option: Global Studies, Peace Studies

PLSC 359 Revolutions (3 Credit Hours)

(INTS 368) A critical examination of different empirical theories of revolution. Case studies will be drawn from Europe, Asia, Africa, and the Americas. Outcome: Students will be able to analyze and assess the causes, development, and consequences of modern revolutionary movements and revolutions.

Interdisciplinary Option: Global Studies

Course equivalencies: X-PLSC359/INTS384

PLSC 360 Western European Politics (3 Credit Hours)

(INTS 360) Comparative study of the structures, processes, and functions of the parties and governments of the western powers with emphasis on the United Kingdom, France and the German Federal Republic. Outcome: Students will be able to demonstrate an understanding of the formation and structure of West European political systems, the patterns of political participation and behavior of diverse individuals and groups in West European societies, and evaluate the roles and processes of West European political institutions.

Interdisciplinary Option: European Studies, Global Studies

Course equivalencies: PLSC360/INTS360

PLSC 362 Politics Developing Societies (3 Credit Hours)

(INTS 362) Social, economic, and ideological factors influencing political developments in emerging nations. Outcome: Students will be able to demonstrate an understanding of the foundation and structure of emerging nations, the patterns of political participation and behavior of diverse individuals, groups, and governments in developing societies, and evaluate the roles and processes of political institutions in developing societies.

Interdisciplinary Option: Global Studies

Course equivalencies: X-PLSC362/INTS362

PLSC 363 International Politics (3 Credit Hours)

This course is intended to serve as an advanced exploration of the field of international politics. Students will explore the most recent developments in international relations theory and select political developments within the international system, including the evolution of these developments in various regions of the world. Outcome: Students will hone their ability to assess/critique cutting edge theories and developments within the field of international politics.

PLSC 364 UN & International Organization (3 Credit Hours)

(INTS 364) (PAX 364) An examination of the purposes, organization, background, and operations of existing international organizations. Outcome: Students will be able to demonstrate an understanding of the formation and structure of various International Organizations, especially the United Nations, the patterns of political participation and behavior of individuals, private and public groups, and governments in International Organizations, and evaluate the roles and processes of International Organizations.

Interdisciplinary Option: Global Studies, Peace Studies

Course equivalencies: X-PLSC364/INTS364/PAX 364

PLSC 365 Italian Politics & Government (3 Credit Hours)

(INTS 365) (ROST 365) An examination of the institutions, processes, and practices of Italian political life. Major concern is with post-1945 Italian politics. Outcome: Students will be able to demonstrate an understanding of the formation and structure of Italy's contemporary political system, the patterns of political participation and behavior of diverse individuals and groups in Italian society, and evaluate the roles and processes of Italian political institutions.

Interdisciplinary Option: European Studies, Global Studies, Italian Studies

Course equivalencies: X-PLSC365/INTS365/ROST365

PLSC 366 Dictatorship (3 Credit Hours)

This comparative politics course examines the origins, dynamics, and contradictions of various nondemocratic forms of government, including military and party dictatorships. Outcome: Students will be able to explain why authoritarian systems rise and fall and how politics in these systems compares to the political process in democratic states.

Interdisciplinary Option: Global Studies

Course equivalencies: X-PLSC366/INTS366

PLSC 367 Model United Nations (3 Credit Hours)

Introduction to the operations and practices of United Nations, including training for student participation in the Model U.N. program. Students taking PLSC 367 Model UN class and act as leaders of the team that represents Loyola at the New York conference. Prior permission required to enroll. Understanding is enhanced by the practical experience gained by participating in Loyola's Model U.N. program.

Interdisciplinary Option: Global Studies, Global Studies, Peace Studies, Peace Studies, Global Studies, Global Studies, Peace Studies, Peace Studies

Course equivalencies: X-PLSC367/INTS367/PAX 367

Outcomes:

Students will demonstrate an understanding of the formation and structure of the United Nations

PLSC 368 Politics of the Middle East (3 Credit Hours)

This course will draw upon the theoretical insights of comparative politics to examine politics in the Middle East and North Africa. The seminar focuses on issues that are important for understanding the contemporary politics of the region, from the persistence of authoritarianism, petropolitics, political Islam, Arab-Israeli conflict, and the rise of ISIS to ethnic divisions, gender relations, and social movements.

Interdisciplinary Option: Arabic Language and Culture, Global Studies, Islamic World Studies

Course equivalencies: X-PLSC368/INTS391/IWS368

PLSC 369 Politics of Energy (3 Credit Hours)

The course will discuss how the challenges of climate change, energy security, and poverty alleviation are being tackled by politicians and the public. It will also assess the degree to which changes in energy resources bring changes in economic, political, and social power.

Interdisciplinary Option: Global & International Studies, Islamic World Studies, Peace Studies, Global & International Studies, Islamic World Studies, Peace Studies

Course equivalencies: PLSC369/INTS386/PAX386/IWS369

Outcomes:

Students will gain a firm understanding of the various global and regional trends that are shaping 21st Century foreign policy behavior generally, and energy diplomacy specifically

PLSC 370 Fieldwork in Plsc-Internship (1-6 Credit Hours)

Practical experience in political and governmental agencies and organizations in Chicago and Washington, D.C. Outcome: Students learn about different forms of public service and the ethical responsibilities of civic engagement. Working in a professional office for fifteen weeks allows students to experience the world of public service first-hand. Students will be able to demonstrate an understanding of models of leadership and public service by working with supervisors who are normally leaders in their fields.

Interdisciplinary Option: Human Services

This course satisfies the Engaged Learning requirement.

PLSC 371 Roman Law (3 Credit Hours)

(CLST 362) An introduction to the general principles and basic concepts of Roman civil law with emphasis upon the Late Republican-Early Imperial period. Outcome: Students will be able to demonstrate an understanding of the assumptions and principles guiding the formulation and implementation of Roman civil law.

Interdisciplinary Option: European Studies, Rome Studies

Course equivalencies: X-CLST362/PLSC371/ROST362

PLSC 372 Crime, Race & Violence (3 Credit Hours)

This course discusses the political aspects that affect crime and violence in the United States, with a special focus on questions of race.

Interdisciplinary Option: African Studies and the African Diaspora, Human Services, Peace Studies, Psychology of Crime and Justice, Sociolegal Studies, Urban Studies

Course equivalencies: X-CJC/BWS/AFR/PLSC372/PAX373

PLSC 373 Politics and Literature (3 Credit Hours)

Literature as a medium of political analysis and political criticism. The literary tradition examined may vary, and the course may be repeated for credit, depending on the subject matter. Outcome: Students will learn to interpret and evaluate the political assumptions and principles underlying the writings of major literary figures, and to reflect on the role and significance of literature in promoting a more just society.

PLSC 374 Democracy (3 Credit Hours)

A critical examination of the theory and practice of democratic government. The subfield to which this course belongs varies depending on its content. Outcome: Students will be able to analyze and assess the theoretical arguments for and against democracy, and to demonstrate an understanding of the various institutional arrangements of democratic government.

PLSC 376 Political Behavior and Public Opinion (3 Credit Hours)

This course will cover a range of topics pertaining to public opinion and political behavior in the United States. Topics will include how public opinion is measured, research on the factors that shape public attitudes about political matters, and work that examines who participates in politics and why.

Outcomes:

Students will learn about substantive scholarly findings on these topics, as well as the methodologies researchers use to answer questions about public opinion and political participation

PLSC 377 American Public Policies (3 Credit Hours)

Public policy-making at the national and state government levels; includes social, economic, fiscal, judicial, and moral policies. Outcome: Students will obtain in-depth knowledge of a unique topic in the area of American public policy adoption and implementation.

Course equivalencies: PLSC377 / PLSC205

PLSC 378 Intro to Political Economy (3 Credit Hours)

The relationships between political and economic systems with an emphasis on revenues and expenditures, and the consequences of fiscal and monetary policies on economic activity. Outcome: Students will be able to analyze the role of the economy and economic actors in the adoption of public policies, especially in the formulation and implementation of the budget, and their impact on the economic lives of citizens.

Course equivalencies: PLSC378 / PLSC207

PLSC 379 The Legislative Process (3 Credit Hours)

Legislative campaigns and elections, the formal procedures of law making, the influence of political parties and interest groups, and the interaction with the president, the judiciary, and the bureaucracy. Outcome: Students will be able to analyze and assess the role and processes of the U.S. Congress in the deliberation and formulation of domestic policies and their impact on the everyday lives of citizens.

Course equivalencies: PLSC379 / PLSC210

PLSC 380 Public Policy Analysis (3 Credit Hours)

The course offers a broad approach to the study of public policy.

PLSC 381 The American Presidency (3 Credit Hours)

The powers, roles, and responsibilities of the presidential office with special attention to political leadership, the bureaucracy, and political parties. Outcome: Students will be able to analyze and assess the role and impact of the U.S. presidency on domestic policy and foreign affairs.

Course equivalencies: PLSC381 / PLSC211

PLSC 384 The Judicial Process (3 Credit Hours)

The judicial process in the American court system from the Supreme Court to local trial courts, civil and criminal procedure, appellate court decision-making, and the impact of judicial policies on American politics and society. Outcome: Students will be able analyze and assess the role and impact of the U.S. court system on the protection of individual freedoms and civil rights.

Interdisciplinary Option: Sociolegal Studies

Course equivalencies: PLSC384 / PLSC212

PLSC 385 Introduction to Law (3 Credit Hours)

The nature of law in society, including the constitutional origins and institutional structure of legal systems, the practices of the legal profession, and the substance of selected areas of case law. Outcome: Students will be able to understand the role of law and the legal system in American politics and its impact on the everyday lives of citizens.

Interdisciplinary Option: Sociolegal Studies

Course equivalencies: CRMJ375/PLSC385/PLSC214

PLSC 386 Campaigns and Elections (3 Credit Hours)

The organization, functions, and behavior of political parties and elections in the United States. Outcome: Students will be able to analyze and evaluate the role and impact of political parties and elections on the American political system.

Course equivalencies: PLSC386 / PLSC217

PLSC 387 Politics and the Press (3 Credit Hours)

A study of the dynamics between politics and the press, including its impact on campaigns, elections, and public policy. Outcome: Students will be able to analyze and assess the role and impact of the press on the American politics.

Course equivalencies: X-PLSC387/CMUN340

PLSC 388 The Morality and Legality of War (3 Credit Hours)

Competing perspectives on the moral, legal, and practical challenges of military force as a tool of foreign policy, especially focused on the complexity of using force to pursue humanitarian goals.

Outcomes:

Students will be able to demonstrate an understanding of just war theory, international humanitarian law, and major theories of humanitarianism, to analyze the stakes and trade-offs involved in decisions about war and peace, and to critically engage with contemporary foreign policy events

PLSC 389 State Politics (3 Credit Hours)

A comparative study of the composition and powers of state governments. Outcome: Students will be able to demonstrate an understanding of state governments, the patterns of political participation and behavior of diverse individuals and groups in state politics, and evaluate the roles and processes of state political institutions.

Course equivalencies: PLSC389 / PLSC221

PLSC 390 Urban Politics (3 Credit Hours)

Political processes in cities and other local governments, Examination of mayors, city councils, bureaucrats, and their interaction with local citizens and interest groups.

Interdisciplinary Option: Human Services, Race and Ethnicity, Urban Studies

Course equivalencies: PLSC390 / PLSC222

Outcomes:

Students will be able to demonstrate an understanding of urban governments, the patterns of political participation and behavior of diverse individuals and groups in urban politics, and evaluate the roles and processes of urban political institutions

PLSC 391 Chicago Politics (3 Credit Hours)

The political groups in Chicago, their political power and impact on city politics and policy. Attention will be given to the powers and roles of city council and the mayor's office. Outcome: Students will be able to demonstrate an understanding of Chicago government, the patterns of political participation and behavior of diverse individuals and groups in Chicago politics, and evaluate the roles and processes of Chicago's political institutions.

Interdisciplinary Option: Human Services, Italian American Studies

Course equivalencies: PLSC391 / PLSC224

PLSC 392 Environmental Politics (3 Credit Hours)

The issues, significant actors, and public policies relating to the environment. (ESP 235) (PAX 235) Outcome: Students will be able to analyze and assess the role of various actors in the formulation, adoption and implementation of environmental public policies, and their impact on the everyday lives of citizens

Interdisciplinary Option: Environmental Studies, Peace Studies, Urban Studies

Course equivalencies: PLSC392/PLSC/ESP/PAX235

PLSC 393 Black Politics (3 Credit Hours)

This course will present a general overview of black politics in America, including the major black political ideologies and their theoretical underpinnings and the role of race in urban politics in the late twentieth and early twenty-first centuries. Outcome: Students will gain an understanding of how the circumstances of Reconstruction shaped black political ideologies; how blacks came into political power in major urban centers; and what the contours of debate are in the black community over provocative issues such as the criminal justice system, affirmative action, reparations, and education.

Interdisciplinary Option: African Studies and the African Diaspora

Course equivalencies: X-HIST374/PLSC393/BWS374

PLSC 395 PLSC Honors Seminar (3 Credit Hours)

Variable titles. Investigation of selected topics or methods in Political Science. Outcome: Students will gain an in-depth knowledge of a unique topic or method in Political Science.

PLSC 396 Directed Readings (1-3 Credit Hours)

Opportunity for an unusually accomplished student to pursue a discrete area of knowledge in political studies in a format designed to stimulate highly productive effort. Outcome: Students will hone research and writing skills in close collaboration with a faculty sponsor.

PLSC 397 Urban Studies Research (3 Credit Hours)

The course allows students to engage in research-related projects related to urban studies.

Interdisciplinary Option: Urban Studies

Course equivalencies: X-PLSC397/URB397

PLSC 398 Washington DC Internship Seminar (3 Credit Hours)

This course requires you to combine your academic interests and your internship, allowing you to reflect on and think deeply about the relationship between your internship, experience and academic learning. This course will also explore political Washington.

Outcomes:

This course will clarify students' career goals, and demonstrate how these goals can be enhanced by their academic work

PLSC 399 Tunisia On-Site: Arab Spring, Democratic Change, Islam (3 Credit Hours)

A combination of site visits, lectures, and group discussions throughout Tunisia provides a unique experiential understanding of the relationship between the Arab spring, democratic change, Islam, gender relations, and U.S. foreign policy amidst the historical inheritances of the Carthaginian, Roman, Islamic, and French empires in North Africa. Outcome: Experientially based knowledge of the politics, society, culture, history, and international relations of a country (Tunisia) in a region (North Africa) at the intersection of Africa and the Middle East.

Interdisciplinary Option: African Studies and the African Diaspora, Arabic Language and Culture, Global Studies, Islamic World Studies, Peace Studies, Women & Gender Studies

Course equivalencies: X-PLSC 399/HIST 313T

PLSC 400 Scope and Methods of Pol Sci (3 Credit Hours)

This is a broad course that lays out the main approaches to political science.

PLSC 401 Intro to Research Design & Method (3 Credit Hours)

This course is an introduction to principles of research design in political science. The main objective of this course is to familiarize students with the social scientific approach to studying politics.

Outcomes:

Students will learn how to ask empirical questions about the political world, how to develop theories and generate testable hypotheses, how to collect appropriate types of evidence, how to answer research questions scientifically using such evidence, and how to clearly convey their evidence and argument to others

PLSC 402 Seminar on Empirical Analysis (3 Credit Hours)

The course allows students to develop additional methods to empirical analysis.

PLSC 404 Selected Problems in American Politics (3 Credit Hours)

This course focuses on selected problems in the study of American politics and the American Political system. Outcome: Gain an in-depth understanding of selected problems in American politics and the American Political system.

PLSC 405 American Executive Branch (3 Credit Hours)

This course relies on historical and contemporary scholarly literature on the American presidency to analyze the development and scope of rhetorical and party leadership, legislative relations, the commander-in-chief and diplomatic roles as well as the growth of the institutionalized presidency. Outcome: Students will master the key literature on the American presidency as well as conduct research on a particular aspect of the US presidency.

PLSC 406 American Legislative Branch (3 Credit Hours)

This course focuses on the organization of and decision-making in the US legislative branch. Outcome: Students will fully understand how the US Congress is structured and legislates, as well as its interactions with other US institutions and with American society.

PLSC 407 Pub Pol-Making & Implementation (3 Credit Hours)

This course examines the process and dynamics of US policy-making systems. Outcome: Students will understand the development of the public sector agenda, the policy formation and legitimization processes, and the role of implementation functions, as these relate to substantive issues or policy arenas.

PLSC 409 Organizational Theory (3 Credit Hours)

The course offers a broad approach to the various theoretical and practical approaches to the study of organizations.

PLSC 410 Urban Politics (3 Credit Hours)

This course addresses the major theories, studies and issues of urban politics. Outcome: Students will understand "political machines", parties, interest groups, voting, protests, minority and ethnic groups, city councils, mayors, bureaucrats and community power structures.

PLSC 411 Amer Pol Parties/Elect Process (3 Credit Hours)

This course analyzes the roles and functions of the party system and voting behavior in the United States. Outcome: Students will understand the role of mass communication and issues in elections, the impact of party identification, and the impact of the electoral system on behavior of party and voter

PLSC 412 Constitutional Politics (3 Credit Hours)

This course examines constitutional policy-making in the United States. Outcome: Students will understand the political role of the Supreme Court, judicial values in constitutional adjudication, and the impact of court decisions.

PLSC 417 The American Legal System (3 Credit Hours)

This course examines the structure, functions, interrelationships, dynamics, and decision-making processes of the US legal system. Outcome: Students will understand the major components of the American legal system - legislatures, administrative agencies, and courts.

PLSC 418 Political Psyc & Socialization (3 Credit Hours)

This course examines psychological, social and environmental influences on political attitudes and behavior. Outcome: Students will understand the psychodynamics of political development and socialization as they interact with opinion formation and political participation.

PLSC 419 Managing Urban Government (3 Credit Hours)

This course studies the politics of urban government management. Outcome: Students will understand the environments in which the urban manager functions.

PLSC 420 Compar Political Systems (3 Credit Hours)

This course examines political institutions and political behavior in various political systems. Outcome: Students will master the literature on comparative politics, including the methodology of comparative analysis. *Course equivalencies:* X-INTA 420/PLSC 420

PLSC 421 Democratic Political Systems (3 Credit Hours)

This course examines selected democratic political systems.

Outcomes:

Students will understand how selected democratic systems operate, focusing on their similarities and differences

PLSC 422 Authoritarian Political Systems (3 Credit Hours)

This is a graduate-level seminar on authoritarian political systems. The course explores theoretical perspectives on authoritarianism, political institutions in non-democracies, and paths to democratization.

Outcomes:

Students will become familiar with concepts and theories of authoritarianism, gain knowledge about different types of authoritarian rule, and learn about how authoritarian governments work and perpetuate power

PLSC 423 Soviet & Post-Soviet Politics (3 Credit Hours)

This course analyzes the development of Soviet and post-Soviet politics since 1917.

Outcomes:

Students will understand the emergence and development of Soviet politics, as well as its decline in the mid-1980s

PLSC 424 Politics of Developing Areas (3 Credit Hours)

This course examines the politics of the "developing world."

Outcomes:

Students will understand the methods used to analyze politics in the developing and underdeveloped nation-states

PLSC 425 Sub-Saharan Africa (3 Credit Hours)

This course examines politics in Africa from the pre-colonial period to the present.

Outcomes:

Students will understand issues relating to decolonization, ethnicity, class, political economy, democratization, and regime transition in Sub-Saharan Africa

PLSC 426 Latin American Politics (3 Credit Hours)

This course examines important themes in the study of politics in Latin America.

Outcomes:

Students will understand the current scholarship and methodologies in the study of Latin American politics

PLSC 427 Politics of the Middle East (3 Credit Hours)

Enrollment Conditions: Permission of the instructor required. This course offers a historical and thematic approach to study the society and politics of the contemporary Middle East. Two central aims of the course are to cultivate critical perceptions regarding widespread images and descriptions of the region and to bolster students' historical, socioeconomic and political knowledge of the region.

Outcomes:

Students will master important political science literature on the Middle East and be well positioned to pursue original research

PLSC 428 Political Violence (3 Credit Hours)

This course offers a thematic approach to the study of political violence with a particular focus on armed conflicts involving non-state actors (i.e., civil wars). It addresses a wide variety of questions informed by the cutting-edge research in political science and other disciplines.

Outcomes:

Students will develop an understanding of the causes of different forms of violence in different parts of the world, motivations of people who participate in violence, and solutions to armed conflicts

PLSC 429 Comparative Pol Selected Probs (3 Credit Hours)

This course examines selected issues in comparative politics.

Outcomes:

Students will master the literature or conduct research in a particular area of comparative politics

PLSC 430 Theories of Internatl Politics (3 Credit Hours)

This course analyzes theories and major issues of international politics.

Course equivalencies: X-INTA 430/PLSC 430

Outcomes:

Students will master the literature in major research areas and theoretical frameworks in international relations

PLSC 431 Formulation US Foreign Policy (3 Credit Hours)

This course examines how US foreign policy is made.

Outcomes:

Students will understand the decision-making institutions and their interaction in the formulation and execution of political, military and economic foreign policy

PLSC 432 Comp Foreign Policy Analysis (3 Credit Hours)

This course examines contemporary policy positions of major blocs of nations as well as specific nations.

Outcomes:

Students will understand how foreign policy is made in countries other than the United States, as well as the policy of blocs of nations

PLSC 433 International Organization (3 Credit Hours)

This course examines the development and role of international organizations.

Outcomes:

Students will understand the political and administrative principles and problems of various types of international organizations, including the United Nations, the World Trade Organization, the World Bank, the International Monetary Fund and other key global and regional organizations

PLSC 435 International Political Econ (3 Credit Hours)

This course examines global economic systems.

Outcomes:

Students will understand global political-economic relations in the post-WWII period, including international monetary relations, international trade, regional integration, direct investment, debt, and development assistance

PLSC 436 International Conflict (3 Credit Hours)

This course focuses on concepts and approaches related to the causes of war, conflict and peace in the international system.

PLSC 437 Sel Problems International Law (3 Credit Hours)

This course examines selected issues or problems in international law.

Outcomes:

Students will understand contemporary theories of international law and the relationships among the various traditional and contemporary areas of international law

PLSC 439 Selected Problems in International Politics (3 Credit Hours)

This course examines important themes and theories in international politics.

Outcomes:

Students will master a specific body of literature or conduct research in a particular area of international relations

PLSC 440 Ancient Political Thought (3 Credit Hours)

This course examines the major works of the most important theorists within the classical tradition.

Outcomes:

Students will master key writings of Thucydides, Plato, Aristotle, and other theorists

PLSC 442 Modern Political Thought (3 Credit Hours)

This course examines major modern political thinkers.

Outcomes:

Students will master key works of from the Italian Renaissance to the French Revolution

PLSC 444 Great Authors (3 Credit Hours)

This course focuses on the works of political theorists in the western tradition.

Outcomes:

Students will master key works of theorists in the western tradition

PLSC 446 Political Ethics (3 Credit Hours)

This course surveys classic debates on ethics - such as utilitarianism and deontological ethics - to provide students with analytical tools to answer the deceptively simple question "What is the right thing to do?" The course draws on classical readings of political philosophy, while seeking to make those abstract problems tangible by applying them to real world cases and examples.

PLSC 447 Am Pol Thght to Civil War (3 Credit Hours)

This course examines pre-Civil War US political thought.

Outcomes:

Students will master the works of key thinkers from the American founding to the Civil War

PLSC 449 19th Cent Pol Thought (3 Credit Hours)

This course examines key theorists in the nineteenth century.

Outcomes:

Student will master the works of key theorists beginning with the French Revolution and through the nineteenth century

PLSC 470 Fieldwork in PLSC-Internship (1-3 Credit Hours)

This is a graduate level course that allows students to get experience through internships. Restricted to Graduate School students.

Course equivalencies: X-PLSC 470/INTA 470

Outcomes:

Students will be able to demonstrate an understanding of models of leadership and public service by working with supervisors who are normally leaders in their fields

PLSC 475 Political Analysis I (3 Credit Hours)

This course provides an introduction to the use of inferential statistics in political science.

Course equivalencies: X-INTA 475/PLSC 475

Outcomes:

Students will master the basic statistical techniques used in political science

PLSC 476 Political Analysis II (3 Credit Hours)

This is an intermediate course in data analysis methods in political science.

Outcomes:

Students will master intermediate research and quantitative methods in political science

PLSC 499 Directed Readings (3-6 Credit Hours)

This course involves specialized study under the supervision of a faculty member.

Outcomes:

Students will master a particular segment of academic literature or conduct in-depth research on a specific topic

PLSC 502 Seminar in Political Behavior (3 Credit Hours)

This course examines selected topics in the development and shaping of political behavior.

Outcomes:

Students will master the political behavior literature and conduct research in specific areas of the discipline

PLSC 503 Sem:Law & Political Behavior (3 Credit Hours)

This course analyzes selected topics concerning the relationship between legal processes, policies, and politics.

Outcomes:

Students will understand a particular topic in law and political behavior

PLSC 504 Sem: American Public Policy (3 Credit Hours)

This seminar analyzes the American public policy.

Outcomes:

Students will understand the formation, implementation, and evaluation of public policies in the United States

PLSC 505 Seminar in Urban Problems (3 Credit Hours)

This course analyzes selected policies in urban and state politics.

Outcomes:

Students will understand the politics of specific urban and state policies

PLSC 506 Sem State & Urban Policy Anal (3 Credit Hours)

This course examines current perspectives and techniques in the analysis of state and urban policies.

Outcomes:

Students will understand contemporary policy analysis perspective and techniques as well as methods in policy analysis

PLSC 515 Seminar-Public Administration (3 Credit Hours)

This is an upper-level seminar on complex questions related to public administration.

PLSC 520 Seminar: Comparative Politics (3 Credit Hours)

This course examines an important, contemporary area of research in comparative politics.

Outcomes:

Students will master a specific body of literature and conduct research in a specific area in comparative politics

PLSC 521 Sem Western European Politics (3 Credit Hours)

This course examines contemporary politics in Western European countries.

Outcomes:

Students will understand political and policy developments in Western Europe, as well as the structures of the European Union and the North Atlantic Treaty Organization

PLSC 531 Sem: International Politics (3 Credit Hours)

This course examines various research topics in international politics.

Outcomes:

Students will master a particular body of work or conduct research in a specific area of international politics

PLSC 532 Soviet/Post-Soviet Foreign Pol (3 Credit Hours)

This course examines the foreign policies of the Soviet Union and the post-Soviet states.

Outcomes:

Students will understand the formulation and application Soviet and post-Soviet foreign policies

PLSC 533 U.S. National Security (3 Credit Hours)

This course examines the U.S. security establishment and the national security process.

Outcomes:

Students will understand how US security policy is made, including the defense budget, US force structure, intelligence, covert operations, and the role of Congress

PLSC 543 Liberalism (3 Credit Hours)

This course analyzes liberal political thought.

Outcomes:

Students will master key works and theorists focusing on equality, liberty, natural rights, utilitarianism, and idealistic bases of modern liberal society

PLSC 546 Polit Philosophy Sel Prblms (3 Credit Hours)

This course examines a selected theoretical issue in the history of political thought.

Outcomes:

Students will master the writings and theories in a particular theme of political theory

PLSC 595 Thesis Supervision (0 Credit Hours)

This is the first course in a two-course sequence for researching a thesis towards earning a Master's degree.

PLSC 596 Thesis Research (3 Credit Hours)

This is the second course in a two-course sequence for researching a thesis towards earning a Master's degree.

PLSC 597 Dissertation Research (3-6 Credit Hours)

The course is for students researching a thesis topic towards writing a dissertation prospectus.

PLSC 598 Teaching Internship (3 Credit Hours)

The course allows students to complete an internship focused on teaching.

PLSC 600 Dissertation Supervision (0 Credit Hours)

The course is for students researching a dissertation towards earning a PhD.

PLSC 605 Master's Study (0 Credit Hours)

The course is for students researching a thesis towards earning a Master's degree.

PLSC 610 Doctoral Study (0 Credit Hours)

The course is for students researching a dissertation towards earning a PhD.

Political Science and Current World Events (CEPC)

Discover, search, courses!

CEPC 82 After Daley: New Era of Chicago Politics. (0 Credit Hours)

This is a course analyzing the future of Chicago politics based on the role of the new mayor 2011.

Portuguese (PORT)

Discover, search, courses!

PORT 101 Portuguese I (3 Credit Hours)

This course is an introduction to the basic elements of Portuguese that will enable the student to develop communicative language skills and fundamental cultural knowledge. This course is designed for students with no previous experience in Portuguese.

Outcomes:

Students will be able to understand simple messages and short narratives, respond to basic inquiries and provide personal information orally and in writing, as well as understand basic written texts and cultural contexts

PORT 102 Elementary Portuguese II (3 Credit Hours)

Pre-requisites: Portuguese 101 or equivalent

This course is a continuation of the introduction to the basic elements of Portuguese that will enable the student to develop communicative language skills and cultural knowledge.

Outcomes:

Students will continue to develop their basic comprehension, speaking, reading and writing skills and cultural knowledge in the Portuguese language

Professional Development (CEPD)

Discover, search, courses!

CEPD 75 Yoga Teaching Methodology (0 Credit Hours)

This course is designed to give students the tools they need to be an effective yoga teacher. We examine how to relate to the student, how to sequence poses in various styles, and how to demonstrate adjust and assist student in their practice. How to set up and maintain a yoga business is also explored.

CEPD 76 Subtle Anatomy and Yoga (0 Credit Hours)

This course is a continuation of the Anatomy and Yoga course, but goes beyond the gross physical as it examines the body's innate intelligence through its subtle anatomy. Chakras, Nadis and meridians are explored as well and techniques for locating them.

CEPD 77 The Bhagavad Gita (0 Credit Hours)

The Bhagavad Gita is considered by some to be the supreme scripture on Yoga. Through examination of this classic text, students gain insights the foundations of yoga through reading, studying and committing certain verses to memory.

CEPD 87 Yoga and Anatomy (0 Credit Hours)

An introduction to anatomy as applied to the study of yoga.

ProLaw (PLAW)

Discover, search, courses!

PLAW 101 Comparative and Ethical Lawyering for the Rule of Law (3 Credit Hours)

This course will develop the students' knowledge and skills required to provide advice and assistance in a country with a culture and a legal tradition different from the culture and legal system in which they received their education. The course will examine and compare the main elements of particular relevance to rule of law assistance work in major world legal traditions: common law, civil law, Islamic law, customary law and mixed legal traditions. It will also explore how the force of their normativity is effectively applied and how institutional frameworks deal with overlaps. Finally, the course will encourage students to consider the ethical dimension of cross-systems rule of law advising.

PLAW 102 History, Theory and Practice of Law for Development (3 Credit Hours)

This course provides an overview of the main intellectual foundations supporting the view that law and development are linked. While this connection may appear obvious, the course seeks to show that the relationship may not be as straightforward as first impressions might lead one to believe. Indeed, proponents of the presumed relation between law and development must confront two important distinctions well known to social scientists: causation versus correlation. Evidence that societies, which have achieved high levels of development, typically have good legal systems is incontrovertible. What is less clear is how they got where they are and in what sequence. Put differently, do good laws and institutions generate good development outcomes or does development lead to good laws and institutions? The course applies interdisciplinary and comparative research in history, economics, sociology, political science, regulatory theory, and philosophy to questions of law and the development of legal institutions and does not assume any prior knowledge in any field outside of law.

PLAW 103 Theory and Practice of Assessments in Rule of Law Advising (2 Credit Hours)

This course will provide students with the knowledge and skills required to undertake assessments, the crucial lynchpin which supports the design of specific policies, legal and regulatory reforms and administrative actions. The course demonstrates how developing a clear understanding of problems facing a society is fundamental to good governance and the rule of law. The course assumes that such understanding can be facilitated through professionally prepared assessments which identify the root causes of problems facing a country in a given area and put forward options for remedial action. Students will learn how to use the rich body of documented experience and guidance available on structuring and preparing assessments by learning how to plan and carry out assessments linked, for instance, to justice sector reform, access to justice, the improvement of the legal framework for investment and sustainable business and the control of human trafficking.

PLAW 104 International Development Architecture (3 Credit Hours)

This course covers the rule of law and governance dimensions to international development assistance. It examines both the institutional frameworks and legal mechanisms by which international development assistance is distributed for rule of law and state-building activities and the legal and regulatory structures that apply to development assistance. The course begins by considering the reasons that donors provide aid generally and for rule of law, followed by the examination of the normative frameworks and standards that shape the manner in which aid is distributed, institutions and actors, mechanisms by which aid is programmed and actual use of aid by recipients. The overall approach begins at the global level and follows the chain of development aid through its various elements down to the national level. A key theme of the course is that the approach to international development assistance is broadening. Historically, financing for development was understood primarily in terms of public sector resources. As a result of a confluence of factors, development institutions have been seeking to gather resources from the private sector to supplement official development aid.

PLAW 105 Sustainable Development through International Commerce and Investment (2 Credit Hours)

International commercial transactions and investments can serve as the vehicles for sustainable development that respects economic, social, environmental, and other important values of the parties involved. Modern-day corporations have enormous resources and, when properly deployed, significant capabilities to promote sustainable development. This course explains the life cycle and range of international transactions and investment $\hat{\imath}$ from procurement of goods and services and licensing of technology to large infrastructure and public-private partnership projects. It sets out how properly structured transactions can promote prudent and sustainable development in developing and emerging economies. It describes how private companies, investors, regulators, financiers, governments, NGOs, and other stakeholders can work for the mutual benefit of the communities and countries involved as well as responsible long-term goals.

PLAW 106 Design of Rule of Law Programs and Proposal Preparation (2 Credit Hours)

This course will build the understanding and skills of students in project design and the preparation of written proposals related to rule of law assistance, which can be carried out either in the context of an internationally financed assistance arrangement or as a nationally-driven and self-financed initiative. Building on the needs assessments PROLAW course, the course will position project design as it fits into the overall project lifecycle, as well as its relationship with results-based management. The course will allow the student to understand the theory behind and the methods for conducting problem, stakeholder and risk analyses, designing a logical intervention including project objectives, outcomes, outputs and activities, setting a budget, performance indicators, and means of measuring project progress, and applying theory of change and other logical framework tools. In the second half of the course students will put their newly acquired knowledge and skills to use by preparing a full written project proposal. The course will examine donor thinking behind requirements and how to respond to them, examine current thinking concerning the effectiveness of the project approach to rule of law reform and consider the meaning of innovation, such as problem-driven iterative approaches.

PLAW 107 Rule of Law in Conflict Prevention and Peacebuilding (2 Credit Hours)

This course explores the relationship between rule of law, conflict prevention, mitigation and peacebuilding for development. Drawing from ongoing case studies and international practice, the course examines the drivers of conflict, the dynamics and changes in the social fabric during conflict and how rule of law addresses those challenges. Focus is on justice as foundational to establishing the security and institutional legitimacy necessary for human development. The course will examine how unaccountable and ineffective law enforcement and governance institutions contribute to conflict. Given an understanding of the context, course discussions will seek to identify practical modalities for strengthening rule of law and justice reform, including transitional justice. Course materials include case studies, evidence-based analyses and commentary. Students will be called upon to apply the course learning to a specific conflict affected context. Drawing on other courses in the program such as assessment, program design, implementation and oversight, students will identify opportunities for rule of law engagement in conflict contexts and propose relevant strategies and adaptive programming.

PLAW 108 Legal Systems and Methods (3 Credit Hours)

This course aims at providing those PROLAW students with first degrees in other than law with a framework for understanding the central features, branches, functions and notions of law and the evolution of legal systems and their influence on systems of governance. After a general introduction on legal methods and the sources of law in the main legal traditions, the course will examine the interaction between norms, policies and societal values in different branches of the law. Students will learn key law-related skills such as legal reasoning, analysis, planning and problem solving and how law influences advising, negotiating and mediation.

PLAW 110 Principles of International Economic Law (3 Credit Hours)

Principles of International Economic Law is a required PROLAW course covering selected topics in the law governing international business transaction, international trade law, alternative dispute resolution, and international litigation. It is an asynchronous online course with two modules per week of recorded video lectures, required readings, and follow up assignments with feedback from the instructors. The course is also available as an elective for JD and other LLM students with permission of instructor.

PLAW 250 Research and Writing on the Rule of Law (3 Credit Hours)

This course is designed to assist lawyers and other professionals working with the law in developing the techniques of researching and writing in relation to rule of law development. The primary objective of this course is to enable students to apply research skills, which will be instrumental for conducting in depth studies on rule of law development topics for major papers during the PROLAW Program and for the final capstone project. With a focus on development issues, substantial emphasis is given to socio-legal and empirical legal research methodologies. A secondary objective is that students will acquire writing skills that can be used in various practice settings involving legal and policy analysis, policymaking, and implementation of rule of law development research studies. Students will also gain expertise on how to research and analyze issues from other disciplines that contribute to the processes and dynamics of legal and institutional reform. This knowledge is foundational for developing theories of change and is critical to formulating strategies, plans, and analyses of rule of law advocacy and reform programs.

PLAW 251 Rule of Law Thesis Supervision and Completion (3 Credit Hours)

Open to LLM students only by permission provided by Program Director.

PLAW 252 PROLAW Completion (0 Credit Hours)

Open to: Students within the LLM and MJ programs in Rule of Law for Development (PROLAW program). Students who do not complete their capstone project or thesis paper within the requisite period of time set by the PROLAW Program must register for this course. Permission to register is required.

PLAW 253 Rule of Law Capstone Project (2-3 Credit Hours)

The Rule of Law Capstone Project is the culmination of the student's academic and personal experiences in the PROLAW program. In carrying out the Capstone Project, students will have the opportunity to consolidate everything they have learned in the PROLAW curriculum and reinforce their practical experience in applying this knowledge and skills through a final multi-faceted exercise. The final outcome of this course will enable each student to demonstrate in relation to a specific real-world law and governance reform process that he or she is capable of using what was learned in PROLAW to produce useful and professional documentation and communicate this content to clients and stakeholders effectively. In some cases, students may develop or have a preexisting relationship with an external organization, which provides an opportunity for the student to work on their particular topic. Students may alternatively decide to conduct research and determine the need and feasibility of a possible initiative to address the problem they identify. Likewise, students can also choose to develop a project to implement an existing agenda or initiative at the national or international levels. Each student will be supervised by a Capstone Project advisor.

PLAW 907 Rule of Law Project Management, Monitoring & Evaluation (3 Credit Hours)

This course will analyze the main principles, tasks and tools commonly used to manage a rule of law project, particularly in comparison to other types of project management. Topics will include the control of the timing of various steps in implementation (start up, work planning, activities, monitoring and evaluation, reporting, and close out), human resource management, stakeholder management, procurement, inventory, and budgeting. The course will also address common challenges including managing a project with weak design or insufficient budget, managing conflicts, dealing with emergencies and mid-course corrections, and the key requirements for successful project management & teamwork, accountability, leadership, substantive knowledge and skills, and cultural literacy. Students will have an opportunity to apply their knowledge and skills by working through a model project in teams and producing a sample deliverable & on time, on budget, and according to specifications.&

Psychology (PSYC)

Discover, search, courses!

PSYC 100 Psychological Perspectives on the Experience of Globalization (3 Credit Hours)

Globalization from a psychological perspective. Applying core psychological concepts, research and theory to cross-cultural issues of behavior and development. Topics may include human rights of children, human trafficking, immigration, moral issues of international trade, parenting across cultures.

Knowledge Area: Foundational Societal Knowledge

Outcomes:

Students will learn basic concepts and theories and apply them to real-world globalization problems

PSYC 101 General Psychology (3 Credit Hours)

Requirement: ANTH 100, PLSC 102, PSYC 100 or SOCL 101 for students admitted to Loyola University for Fall 2012 or later. No requirement for students admitted to Loyola prior to Fall 2012 or those with a declared major or minor in the Department of Anthropology, Department of Criminal Justice, Department of Economics, Department of Psychology, Department of Political Science, the Department of Sociology, Human Services or the School of Nursing. Introduction to concepts, theories, and methods in psychology. Emphasis is given to the scientific study of consciousness and human behavior. Topics include: human development, learning, thinking, perception, personality, testing, mental illness and mental health, biological and social aspects of behavior.

Knowledge Area: Tier 2 Societal Knowledge

Interdisciplinary Option: Human Services, Psychology of Crime and Justice

Course equivalencies: ACPSY 201 / PSYC 101

Outcomes:

Students will master basic concepts and key theories and learn to apply them to real-world situations

PSYC 201 Psychology Advising and Career Development (1 Credit Hour)

Pre-requisites: PSYC 101, PSYC-BS major *Outcomes:* Students will learn about career options in psychology and plan their psychology major to support and develop their career interests

Overview of the psychology major at Loyola and career options in psychology. Introduces students to psychology career development resources. Students will also prepare for opportunities in independent research and internships and plan for a career including creating a resume and CV.

PSYC 225 Psychology of Peace (3 Credit Hours)

Application of psychological theories, concepts, and research to issues of peace and conflict. Areas covered include international conflicts and international peacebuilding (including war, terrorism, and global environmental issues) as well as interpersonal conflicts and conflict resolution (including crime, family violence, and conflict arising from prejudice and perceived threat). Classic theories of peace are also analyzed and connected to psychological theory and research.

Interdisciplinary Option: Peace Studies

Course equivalencies: PSYC 225/PAX225

PSYC 235 Psychology of Human Sexuality (3 Credit Hours)

Pre-requisites: PSYC 101 Sexuality as an important aspect of human functioning and its integration into the total person will be emphasized. Topics include sexual anatomy and physiology, gender identity and roles, attraction and love, sexual orientation, human reproduction, sexual development, sexual dysfunction.

Interdisciplinary Option: Bioethics, Human Services, Women & Gender Studies

Outcomes:

Students will demonstrate an understanding of the biological, psychological and socio-cultural aspects of human sexuality, along with sexual dysfunction, and sex roles

PSYC 237 Cross-Cultural Psychology (3 Credit Hours)

Pre-requisites: PSYC 101 *Outcomes:* Students will demonstrate an understanding of concepts and research methodologies in cross-cultural psychology; Students will develop critical thinking skills, as well as increased cultural awareness and sensitivity towards others. Students will learn about cultural factors that influence cognition, perception, emotion, behavior, motivation, and mental health. Similarities and difference in both explicit and implicit cultural factors will be emphasized. Students will explore their identities, values, and biases. Students will engage in reflection to increase cultural awareness and sensitivity towards others.

This course satisfies the Engaged Learning requirement.

PSYC 238 Gender & Sex Diff & Similar (3 Credit Hours)

Requirement: ANTH 100, PLSC 102, PSYC 100 or SOCL 101 for students admitted to Loyola University for Fall 2012 or later. No requirement for students admitted to Loyola prior to Fall 2012 or those with a declared major or minor in the Department of Anthropology, Department of Criminal Justice, Department of Economics, Department of Psychology, Department of Political Science, the Department of Sociology, Human Services or the School of Nursing. Overview of psychological research and theory concerning differences and similarities between genders. included..

Knowledge Area: Tier 2 Societal Knowledge

Interdisciplinary Option: Bioethics, Human Services, Women & Gender Studies

Course equivalencies: PSYC238/WOST238/WSGS238

Outcomes:

Students will understand similarities and differences between genders, comprehend the diversity of ideas about gender and how ideas of gender are determined by societies and cultures

PSYC 239 Understanding Bias and Inclusivity (3 Credit Hours)

Using an intersectional lens, students learn about how privilege, power, and oppression shape ourselves, perceptions of others, and our social world. They consider how ourselves and others are shaped by and operate within the larger social system. Students explore their identities, values, and biases. Students engage in self-reflection to increase self-awareness. Articulate how personal power can be used to create change.

Interdisciplinary Option: Race and Ethnicity, Women & Gender Studies

Course equivalencies: X - PSYC 239/ SOCL 239

Outcomes:

Identify feelings about course topics; Demonstrate self-awareness of identities and values, including the value of difference; Engage in intergroup dialogue

PSYC 240 Psych-Biol of Perception (3 Credit Hours)

Pre-requisites: PSYC 101; For Biology majors: BIOL 102, BIOL 112, and PSYC 101 Introduction to the study of sensory systems, especially vision and audition, emphasizing historical development of the field, multi-disciplinary scientific approaches; recent research and theory on the mechanisms of seeing and hearing; and applications of research to real-world problems

PSYC 240 is cross-listed with BIOL 240.

Interdisciplinary Option: Neuroscience

Course equivalencies: X-PSYC240/BIOL240

Outcomes:

Students will understand and be able to explain how knowledge of the functioning of sensory systems is obtained using a variety of experimental methods, how stimulus energy is translated into neural signals, how the brain processes sensory information, and how these processes determine conscious perception

PSYC 250 Cognitive Psychology (3 Credit Hours)

Pre-requisites: PSYC 101 Outcomes: Students will understand and be able to explain how knowledge about mental events is obtained using a variety of experimental methods, discuss current empirical research and theories of cognition, understand well established cognitive theories about attention, memory, language processing, reasoning and decision-making

Overview of cognitive psychology. Topics include: human information processing, object recognition, memory, attention, language production and comprehension, reasoning and problem solving.

PSYC 251 Learning and Memory (3 Credit Hours)

Pre-requisites: Grade of C- or better in PSYC 101 and (NEUR 101 or PSYC/BIOL 240)

This course surveys the field of learning and memory, including working, episodic, and semantic memory, nonassociative learning, classical and operant conditioning, skill learning, and neuroplasticity. Behavioral, neuroscientific, and clinical perspectives will be considered.

Interdisciplinary Option: Neuroscience

PSYC 273 Developmental Psychology (3 Credit Hours)

Pre-requisites: PSYC 101 Survey of theory and research relevant to human growth and development with emphasis on physical, cognitive, and social development from infancy through adolescence

No course description is available

Interdisciplinary Option: Human Services

Course equivalencies: X-CPSY273/PSYC273

Outcomes:

Students will demonstrate understanding of basic theory and research in human development, and will develop skills in critical examination of psychological research as applied to current issues in human development

PSYC 274 Lifespan Development (3 Credit Hours)

Pre-requisites: PSYC 101 Outcomes: Students will demonstrate an understanding of theory and research in development across the lifespan; Students will develop critical thinking skills, applying research to contemporary issues in lifespan development

This course provides a survey of current theory, research, and applications on development (physical, cognitive, and social/emotional development) that are present at each stage of the lifespan. Normal development is emphasized; however, special human circumstances are also explored.

PSYC 275 Social Psychology (3 Credit Hours)

Introduction to the field of social psychology; including topics such as social cognition, impression formation, social influence, attitude formation and change, stereotyping and prejudice, aggression, pro-social behavior, and group behavior.

Knowledge Area: Tier 2 Societal Knowledge

Interdisciplinary Option: Human Services, Psychology of Crime and Justice

Course equivalencies: ACPSY 275 / PSYC 275

Outcomes:

Students will demonstrate the ability to think critically about fundamental theoretical approaches within social psychology, scientific methods of hypothesis testing, and potential applications of social psychology that address real-world problems

PSYC 276 Philosophy of Mind (3 Credit Hours)

Pre-requisites: PHIL 130 Students will be able to demonstrate understanding of the various philosophical views and problems regarding the mind and its relation to matter

This course is a study of the different philosophical views regarding the nature and the existence of the mind and its relation to material bodies.

Course equivalencies: X-PSYC 276/ PHIL 276/PHIL 176

PSYC 277 Environmental Psychology (3 Credit Hours)

Human behavior is at the root of environmental degradation. This course examines how psychological processes influence behaviors that help or hurt the environment and how psychology can promote conservation.

The course identifies theory-based interventions and evaluates their effectiveness. Class activities allow students to practice applying psychology to promote environmental sustainability.

Outcomes:

Students will be able to identify the psychological bases of environmental problems; Students will be introduced to theories and practical strategies to change behavior as it relates to environmental issues

PSYC 280 Psychology of Judgment and Decision-Making (3 Credit Hours)

Pre-requisites: PHIL 130 Outcomes: Students will learn fundamental principles and theories - including various biases and decision-making errors, and learn to apply the course to improve thinking, problem-solving, and decisions

This course examines the forces that shape decision-making, from the individual and day-to-day to the shaping of public policy. Psychological research on cognitive biases, economic models, and philosophical perspectives on deductive reasoning and what makes a good decision will be discussed. Students can only take one course from PHIL 279, PSYC 279, PSYC 280.

Knowledge Area: Tier 2 Philosophical Knowledge

PSYC 302 History & Systems in Psyc (3 Credit Hours)

Pre-requisites: PSYC 101 A systematic treatment of the historical roots and foundation of psychology

Special emphasis is placed on relating past trends to current developments in the field.

Outcomes:

Students will demonstrate knowledge of the foundations of psychology as a science, including major schools and theoretical frameworks, and make connections between past trends and current approaches

PSYC 304 Statistics (3 Credit Hours)

Pre-requisites: PSYC 101 This course is an introduction to fundamentals of statistical analysis in psychology

. Outcome: Students will demonstrate the ability to analyze data, interpret the results of research using basic statistical methods, and understand the conceptual foundation, appropriate use, and limitations of these statistical methods.

Interdisciplinary Option: Human Services

PSYC 306 Research Methods in Psyc (3 Credit Hours)*Pre-requisites:* PSYC 304

Logic and theory of the scientific method. Basic principles of scientific research methodologies employed in approaching major problem areas in psychology. This class is writing intensive.

Interdisciplinary Option: Human Services, Urban Studies*Outcomes:*

Students will demonstrate knowledge and skills necessary to formulate research questions and hypotheses, develop research designs, operationalize variables and gather data in an ethical manner, choose appropriate statistical methods for analyzing data, interpret results of statistical analyses, write a scientific paper in APA style, and critically evaluate research

PSYC 307 Psychology of Language (3 Credit Hours)

Pre-requisites: PSYC 101 Analysis of language as symbol-behavior specific to humans, language structure and competence, language performance, and the neurophysiological basis of language Methods for investigating language processing, acquisition, bilingualism, and language disorders will be considered.

Outcomes:

Students will demonstrate understanding of major theories, research methodologies, and empirical knowledge in the study of language

PSYC 310 Lab in Program Evaluation (3 Credit Hours)*Pre-requisites:* PSYC 306

PSYC 275 is also recommended. Special attention is given to the fundamental skills needed to evaluate human service programs including research methodology and research diplomacy. The strengths and weaknesses of several evaluation strategies will be discussed in terms of scientific validity, ethical constraints, and political acceptability.

Outcomes:

Students apply their developing evaluation skills in a class project and present the data in a written report

PSYC 311 Lab in Psychobiology (3 Credit Hours)

(BIOL/STAT 335 or PSYC 304) and (NEUR 101, PSYC/BIOL 240, or PSYC 382/BIOL 284); OR for PSYC-BS and Cognitive/Behavioral Neuroscience majors: PSYC 306 and (NEUR 101, PSYC/BIOL 240, or PSYC 382/BIOL 284) Minimum grades of C- Introduction to the structures and functions of vertebrate nervous systems, how these systems compute and process information; laboratory experience with concepts and methods in the neurophysiological study of the bases of perception and other behaviors. Hearing is used as an example. PSYC 311 is cross-listed with BIOL 313.

Interdisciplinary Option: Neuroscience*Course equivalencies:* X-PSYC311/BIOL313*Outcomes:*

Students will learn the concepts of basic neurophysiology and the theory of signal detectability, and have experience applying the logic and formulation of neurophysiological theories of perception

PSYC 312 Lab in Cognitive Neuroscience (3 Credit Hours)

Pre-requisites: PSYC 306 and PSYC 382 Outcomes: Students will develop scientific research skills as they relate to the field of cognitive neuroscience, including experimental design, physiological methods of data collection, statistical analysis and interpretation, and reporting findings

This course is a laboratory practicum in the techniques of cognitive neuroscience, with an emphasis on electrophysiological and hemodynamic methods of measuring nervous system function during cognitive and behavioral tasks and the effects of noninvasive brain stimulation.

Interdisciplinary Option: Neuroscience**PSYC 313 Lab in Behavioral Neuroscience (3 Credit Hours)***Pre-requisites:* PSYC 306 and either PSYC 251 or PSYC 382 Outcomes:

Develop a breadth of neuroscientific knowledge and skills involving critical thinking, research ethics, experimental design, animal behavior, data collection and analysis, and dissemination of scientific findings in different formats

Provides an understanding of the structure and function of the brain as it relates to behavior through empirical data collection and analyses.

Course objectives will be met through demonstrations, hands-on laboratory experience with different behavioral assays, histology, an evaluation of scientific literature, and scientific communication via poster presentations.

PSYC 314 Lab in Exper Psych: Cognition (3 Credit Hours)

Pre-requisites: PSYC 306 (C-) and (C- in PSYC 250, PSYC 251, PSYC 307, or PSYC 382) Outcomes: Students gain skills and experience in experimental design, measurement, statistical analyses, and report writing as they relate to research on human cognition Laboratory demonstrations, experiments, and microcomputer applications in the area of human cognition. Topics vary, but include learning, memory, thinking and language processing.

Interdisciplinary Option: Neuroscience**PSYC 315 Lab:Tests & Measurements (3 Credit Hours)***Pre-requisites:* PSYC 306; PSYC 331 or 338 is recommended

Topics include: theory of psychological testing and assessment; historical context and related legal and ethical considerations; basics of test construction and evaluation, including reliability, validity, and standardization; and common measures of personality, attitudes, and ability and their psychometric properties.

Outcomes:

Students will learn to demonstrate proficiency with psychological testing terminology and concepts

PSYC 316 Lab in Exper Psych:Sens & Perc (3 Credit Hours)

Pre-requisites: PSYC 306, NEUR 101 (formerly PSYC/BIOL 202) or PSYC 240 Laboratory demonstrations, experiments, and microcomputer applications to the psychophysical and physiological study of sensory systems

The course stresses the research methods and quantitative measures that are used in characterizing sensory processes, especially visual and auditory systems.

Interdisciplinary Option: Neuroscience*Outcomes:*

Students gain skills and experience in experimental design, measurement, statistical analyses, and report writing as they relate to research in sensory processes

PSYC 318 Lab in Developmental Psych (3 Credit Hours)*Pre-requisites:* PSYC 273 and 306

Lecture and laboratory on empirical studies of developmental processes in humans. Focus is on research in particular content areas within developmental stages (e.g., infancy, childhood, adolescence, adulthood) and research on changes in behavior across time.

Outcomes:

Students will demonstrate skills and knowledge of developmental methodology, designing, conducting, and analyzing and interpreting the results of a research project, and writing a research paper in APA format

PSYC 321 Laboratory-Social Psychology (3 Credit Hours)

Pre-requisites: PSYC 275 and 306

Lectures, demonstrations, readings, and individual or group research projects illustrating various methods, such as observation, interviewing, archives, standardized tests, and experimentation, are used to learn about topics such as group influences on the individual, attitudes, prosocial and antisocial behavior, and perception of self and others.

Outcomes:

Students will demonstrate skills and knowledge of methodology in social psychological research; designing, conducting, and analyzing and interpreting the results of a research project, and writing a research paper in APA format

PSYC 327 Lab on Body Image (3 Credit Hours)

Lab on Body Image is a new course that can be used by Psychology students to fulfill the B lab requirement. It will focus on the scholarly study of body image and eating disorders, as well as how research is conducted in the field. Students will complete smaller labs and a larger research project in the field. *Pre-requisites:* PSYC 101, 304, 306. Learn about the scholarly study of body image and eating disorders; 2. Learn general research methods in Psychology and specific ones pertaining to the topic; 3. Learn about computer packages, including SPSS to analyze data.

Outcomes:

1

PSYC 331 Psychopathology (3 Credit Hours)

Pre-requisites: PSYC 101 Nature and causes of maladjustment and mental disorders

History of mental illness, diagnosis, research, and treatment of mental disorders.

Interdisciplinary Option: Human Services, Psychology of Crime and Justice

Course equivalencies: X-CPSY333/PSYC331/ACPSY280

Outcomes:

Students will demonstrate understanding of current approaches to researching maladaptive behavior, current views of maladaptive behavior, major categories of "mental disorders", factors contributing to development of problems, different types of intervention strategies, and appreciation of social, ethical, and legal issues

PSYC 332 Affective Neuroscience (3 Credit Hours)

Pre-requisites: PSYC 101 or NEUR 101 (formerly PSYC/Biol 202)

Affective experiences promote human adaptability and survival, and healthy emotion function is critical to promoting physical and psychological well being. The course will provide an overview of fundamental neurobiological correlates associated with emotion function and processing affective stimuli.

Interdisciplinary Option: Neuroscience

Outcomes:

Students will understand theories regarding brain mechanisms associated with emotion processing and the techniques used for studying these mechanisms

PSYC 338 Psychology of Personality (3 Credit Hours)

Pre-requisites: PSYC 101 Facts and principles of personality study

Nature of personality, its structure, development, expression, and measurement. Exposition and evaluation of personality study methods with critical review of traditional and modern theories of personality.

Interdisciplinary Option: Psychology of Crime and Justice

Course equivalencies: X-CPSY338/PSYC338

Outcomes:

Students will acquire an understanding of different personality theories, critically evaluate these theories, and apply what they have learned

PSYC 340 Psychology of Women (3 Credit Hours)

Pre-requisites: PSYC 101 Review of psychological aspects of women's experiences

Topics include psychological aspects of biological events such as menarche, pregnancy, menopause; aspects of women's work and family roles; and mental health issues relevant to women.

Interdisciplinary Option: Human Services, Women & Gender Studies

Course equivalencies: PSYC340/WOST340/WSGS340

Outcomes:

Students will demonstrate knowledge of critical contemporary issues impacting women and girls, and critically evaluate/analyze academic theory, social institutions, and media

PSYC 346 Psychopathology of Childhood (3 Credit Hours)

Pre-requisites: PSYC 273 Consideration of the nature and causes of maladjustment, emotional disorders, and learning disabilities in children in conjunction with approaches to prevention and remediation

No course description is available

Interdisciplinary Option: Human Services, Psychology of Crime and Justice

Outcomes:

Students will demonstrate knowledge of the major categories of childhood psychopathology and methods of diagnosis, theories of causes of maladjustment and mental illness in children and adolescents, and types of intervention strategies

PSYC 348 Psychology of Adolescence (3 Credit Hours)

Pre-requisites: PSYC 273

In-depth study of adolescence using an interdisciplinary approach.

Integration of cultural, social, psychological, and biological perspectives.

Interdisciplinary Option: Human Services, Psychology of Crime and Justice

Outcomes:

Students will appreciate the various factors leading to similarities and differences in the experience of adolescence in America and in other cultures, and will demonstrate understanding of major theories, research methodologies, and empirical knowledge in the study of adolescence

PSYC 350 Developmental Cognitive Neuroscience (3 Credit Hours)

Pre-requisites: PSYC 101, NEUR 101 (formerly PSYC/Biol 202) *Outcomes:*

Students will gain knowledge of basic theory and research in the field of developmental cognitive neuroscience and will acquire understanding of brain and behavior relationships in a developmental context

An overview of theory and research relevant to the study of the developing child through the use of neuroscience methods; topics may include: brain plasticity and maturation, sensorimotor systems, attention, memory, executive function, language, social cognition, and typical and atypical development.

Interdisciplinary Option: Neuroscience

PSYC 352 Neuropsychology (3 Credit Hours)

Pre-requisites: PSYC 101 and NEUR 101 *Outcomes:* Successful

completion of this course leads to mastery of CNS function and structure; The ability to integrate this information will allow students to develop and test hypotheses about brain-behavior relationships

Neuropsychology is the interdisciplinary study of the relation between human brain function and behavior. This course is an undergraduate survey of topics related to neuropsychology, including neuroanatomy, psychophysiology, and cognitive neuroscience. A primary goal of the course is to introduce undergraduate students to neuropsychological concepts in research and applied settings.

Interdisciplinary Option: Neuroscience

PSYC 353 Applied Social Psychology (3 Credit Hours)*Pre-requisites:* PSYC 275

Applications of principles and methods of social psychology to social issues and problems in such areas as: law and justice, health and health care, education, natural and built environments, population, work, life and intergroup relations.

Outcomes:

Students will demonstrate the ability to apply knowledge of major theories, research methodologies, and empirical knowledge in social psychology to real-world issues and problems

PSYC 355 Neuroethics (3 Credit Hours)*Pre-requisites:* students must have taken at least two philosophy courses

This course focuses on ethical considerations emerging from contemporary research in neuroscience, as well as neuroscientific techniques for studying ethical questions. Students will be able to demonstrate understanding of the ways in which the study of ethics and neuroscience inform each other

Interdisciplinary Option: Bioethics*Course equivalencies:* X - PSYC355/PHIL355**PSYC 356 Consumer Psychology (3 Credit Hours)**

Pre-requisites: PSYC 101 Introduction to the field of consumer psychology; including topics such as consumer attitude formation and change, persuasive communication and consumer behavior, the psychology of advertising, consumer decision making, personality and consumer behavior, identity and consumer behavior, and culture and consumer behavior

No course description is available

Outcomes:

Students will understand and apply theoretical approaches within consumer psychology and the psychology of advertising

PSYC 360 Understanding Prejudice (3 Credit Hours)

Prejudice from a psychological perspective. Applying psychological concepts, research, and theory to understand the origins and consequences of prejudice as well as potential remedies. *Pre-requisites:* PSYC 101

Interdisciplinary Option: African Studies and the African Diaspora, Black World Studies, Psychology of Crime and Justice, Race and Ethnicity, Women & Gender Studies*Course equivalencies:* BWS360/WSGS360*Outcomes:*

Students will learn the origins of stereotypes and prejudice, the nature of prejudice against different social groups, how people are affected by prejudice and cope with prejudice, and the processes that may change stereotypes, reduce prejudice, and improve intergroup relations

PSYC 362 Industrial/Organizational Psychology (3 Credit Hours)

Pre-requisites: PSYC 101 Study of human behavior in work settings
Topics include principles of employee selection, job analysis, motivation and morale, managerial behavior, organization development and socialization, leadership, conflict management, work design and group process.

Course equivalencies: PSYC362 / PSYC364*Outcomes:*

Students will demonstrate understanding and ability to think critically about how the science of behavior is applied to work environments

PSYC 368 Counseling (3 Credit Hours)*Pre-requisites:* PSYC 101; PSYC 331 or 338 is also recommended

Introduction to the theory, techniques, and research behind major helping interventions, focusing on individual psychotherapy with adults.

Interdisciplinary Option: Human Services*Outcomes:*

Students will critically evaluate different approaches to intervention in terms of their theoretical underpinnings, applications, goals and effectiveness, and will develop the ability to utilize some basic counseling skills

PSYC 369 Psychology Honors Readings (3 Credit Hours)*Pre-requisites:* Membership in the Psychology Honors award program and approval of the Department Honors Advisor

Directed readings and development of a formal research proposal on a topic of interest to the student and the faculty member with whom he/she has chosen to work. Students are not restricted to working with the faculty member whose name is listed in the schedule of classes.

Outcomes:

Students will write a literature review and research proposal for the honors thesis

PSYC 370 Psychology Honors Research (3 Credit Hours)*Pre-requisites:* PSYC 369

Students carry out the research proposed in PSYC 369 and prepare a formal report constituting the honors thesis. Approval of the thesis by the honors committee earns the psychology honors award. PSYC 370 is a capstone course.

This course satisfies the Engaged Learning requirement.

Course equivalencies: PSYC370H / PSYC370*Outcomes:*

Students will conduct research, analyze and interpret data, and write a thesis

PSYC 371 Psychology of Political Behavior (3 Credit Hours)

Examination of the determinants of political judgments and decision; including topics such as voting preference, stereotypes and political thinking, racism and political behavior, ideology and public opinion, the effect of the media on political thought.

Outcomes:

Understanding of core theoretical and methodological approaches commonly applied to the study of political psychology

PSYC 372 Psychology & Law (3 Credit Hours)*Pre-requisites:* PSYC 101 Introduction to the areas of overlap between psychology and the law

Topics include roles of psychologists in legal settings, accuracy of eyewitness testimony, jury processes, accuracy of polygraph examinations, and issues surrounding the insanity defense.

Interdisciplinary Option: Psychology of Crime and Justice, Sociolegal Studies*Course equivalencies:* X- CJC 377 / PSYC 372*Outcomes:*

Students will learn to analyze biases in the U.S. jury system, elucidate the weaknesses of eyewitness testimony, outline the issues in the insanity defense, understand the issues in Rape Trauma Syndrome and Battered Spouse Syndrome, understand the methods and effects of scientific jury selection, understand the complex issues surrounding confessions, and view the US justice system in a social justice context

PSYC 373 Health Psychology (3 Credit Hours)

Pre-requisites: PSYC 101 Survey of psychological and behavioral influences on how people stay healthy, why they become ill, and how they respond when they do become ill

Topics include: health behavior and primary prevention, stress and coping, patient-physician interaction, and management of chronic illness.

Interdisciplinary Option: Bioethics, Human Services

Outcomes:

Students will demonstrate an understanding of the complex interaction of an individual's psychology and physical health, as well as understanding of different intervention and prevention programs, the structure of the health care system, and the various roles psychologists play in this system

PSYC 374 Community Psychology (3 Credit Hours)

Pre-requisites: PSYC 101 Understanding of the methods of community psychology; effects of societal, cultural, and environmental influences on psychological and community well-being

Prevention of mental disorder and promotion of well-being, primarily through creating more mentally healthy environments, but also by enhancing individual resilience. Recognizing the toxicity of psychosocial stressors such as inequality, poverty, alienation, and discrimination, community psychologists also fight for social justice through empowerment of oppressed groups and policy advocacy.

Interdisciplinary Option: Human Services, Neuroscience

PSYC 375 Psych of Addiction (3 Credit Hours)

Pre-requisites: PSYC 101 Survey of historical, demographical, and statistical aspects of substance abuse

Abuse of alcohol and drugs, as well as eating disorders, may be considered. A variety of theoretical models and interventions are discussed.

Interdisciplinary Option: Psychology of Crime and Justice

Outcomes:

Students will demonstrate understanding of the psychopharmacological effects of various substances, major research findings in the area of substance abuse, and prevention and intervention techniques

PSYC 376 Psychology of Religion (3 Credit Hours)

Introduction to the major issues, theories and empirical approaches in the psychology of religion; effect of religion on beliefs, motivations, emotions and behaviors., adjustment, prejudice, and prosocial behavior.)

Outcomes:

Understanding of the relationship between religion and psychological variables (e.g

PSYC 377 Psychology of Music (3 Credit Hours)

Pre-requisites: PSYC 101 Outcomes: Students will understand theories regarding brain mechanisms associated with emotion processing and the techniques used for studying these mechanisms

Engagement in musical activities is common across all human cultures. This course will introduce students to the interdisciplinary field of psychology of music and will focus on how humans perceive and are affected by music, how we create music, and how music is integrated into human life.

PSYC 378 Drugs and Behavior (3 Credit Hours)

Pre-requisites: NEUR 101 Outcomes: Knowledge of the mechanisms of action of drugs, including illicit drugs and drugs used to treat psychiatric disorders

This course will introduce students to neuropsychopharmacology.

Acute and long term effects of addictive drugs and drugs used to treat psychiatric disorders on neural function and behavior are discussed by integrating human and preclinical animal studies. Major types of drugs of abuse, antidepressants, antipsychotics, and anxiolytics will be discussed.

PSYC 381 Adv Stat Anls-Computer:Soc Sci (3 Credit Hours)

Pre-requisites: PSYC 304 or SOCL 301 Expanded treatment of topics covered in PSYC 304 with emphasis on using standard computer analysis packages (SPSS)

No course description is available

Outcomes:

Students will demonstrate the ability to discuss theoretical assumptions of various statistical techniques, choose the appropriate statistical test in a variety of situations, use SPSS to enter data and perform a statistical analysis, and interpret the results of statistical analyses

PSYC 382 Behavioral and Cognitive Neuroscience (3 Credit Hours)

Pre-requisites: NEUR 101 (formerly PSYC 202 /BIOL 202) Overview of topics and methodologies used in behavioral and cognitive neuroscience including: attention, learning and memory, language, reasoning, decision making, intelligence, emotions, social cognition, and consciousness BIOL 284 is cross-listed with PSYC 382.

Interdisciplinary Option: Neuroscience

Course equivalencies: X-PSYC 382/BIOL 284

Outcomes:

Students will understand theories regarding brain mechanisms, underlying mental events and the technologies used for studying these mechanisms

PSYC 385 Practicum in Peace Activism (3 Credit Hours)

Students will learn how to recognize and navigate the psychological pitfalls that accompany work as a peace activist. Topics include building programs, recruiting volunteers, managing media messages, avoiding burnout, handling conflict within organizations, and securing funding for peace activities. Psychological constructs and theories such as group dynamics, perceived control, learned helplessness, attitude change, and altruism will be used to increase understanding of processes related to peace activism. .

Interdisciplinary Option: Peace Studies

Course equivalencies: PSYC385/PAX385

PSYC 386 Psychology Seminar:Selected Topics (3 Credit Hours)

Pre-requisites: PSYC 101 An upper-level, intensive seminar on selected aspects of psychology

No course description is available

Outcomes:

Students will demonstrate understanding of major theories, research methodologies, and empirical knowledge in the selected topic

PSYC 387 Seminar in Behavioral and Cognitive Neurosciences (3 Credit Hours)

Pre-requisites: NEUR 101 (formerly PSYC/BIOL 202); PSYC 382/BIOL 284, limited to NRCB-BS seniors

Lecture/discussions will focus on issues central to behavioral neuroscience, emphasizing human and animal mental processes and neural information processing mechanisms. Students will read primary research papers and practice analytical skills in class discussion and presentations. Presentations and exams will promote critical thinking and a general understanding of current issues in behavioral and cognitive neurosciences.

Interdisciplinary Option: Neuroscience

Outcomes:

Students will become familiar with principles of cognitive and behavioral approaches to the study of the neural bases of behavior; Students will also learn how to critically read primary research papers and present these papers to the class

PSYC 388 Laboratory in Neuroscience I (4 Credit Hours)

Pre-requisites: NEUR 101, BIOL 251; and students must be either a Molecular/Cellular Neuroscience Major, a Cognitive/Behavioral Neuroscience major, or a Neuroscience Minor

Students will be trained in various anatomical, physiological, behavioral, and neurobiological modeling techniques used to study the nervous system and the brain in the laboratory. This course is cross-listed as NEUR 301 & PSYC 388.

Interdisciplinary Option: Neuroscience

Course equivalencies: X-NEUR301/PSYC388/BIOL373

Outcomes:

Students will demonstrate understanding of several research designs and methodologies of use in neuroscience research and will gain experience with basic neuroscience laboratory techniques

PSYC 390 Internship in Psychology (3 Credit Hours)

Pre-requisites: PSYC 304 and approval via an internship application due on the 5th Friday of the previous semester

Capstone service-learning experience for psychology majors, involving application and development of psychological knowledge and skills through an internship (100 hours) in a human service organization or applied research setting, combined with regular class meetings, reading and writing assignments. Students arrange placements and complete a project on site. Application details may be found here: <https://luc.edu/psychology/undergraduate/internshipinpsychology>. Practical, pre-professional job skills, critical analysis and connection between theory and practice, on topics of: human service agency operation; effective working relationships; professional communication; cultural competence; values and ethics.

This course satisfies the Engaged Learning requirement.

PSYC 397 Independent Research (3 Credit Hours)

Pre-requisites: PSYC 306 and approval of internship coordinator
Limited to psychology majors with senior standing. Capstone opportunity to conduct research under the guidance of a psychology faculty member. Only one of PSYC 397 and 399 may count toward the psychology major.

Interdisciplinary Option: Neuroscience

This course satisfies the Engaged Learning requirement.

Outcomes:

Students will gain experience in all aspects of psychological research, including literature review, formulating hypotheses, designing and conducting research, analyzing data and interpreting results, communicating the results of research in written reports

PSYC 399 Special Studies in Psychology (1-3 Credit Hours)

Pre-requisites: permission of instructor and department
Opportunity for individual reading or research in a specialized area not otherwise covered by the Department's course offerings. Only one of PSYC 397 and 399 may count toward the psychology major., integrating research results from various sources, conducting research) working directly with a faculty member on a current topic in psychology. This course satisfies the Engaged Learning requirement.

Outcomes:

Students will gain experience (e.g

PSYC 401 History & Systems of Psyc (3 Credit Hours)

Description: History and systems is a survey course that covers past events and persons that directly influenced the formation of contemporary psychology in the United States.

Outcomes:

Students will become familiar with the history of psychology and influential theoretical systems in the field of psychology; The course is partly designed to aid in preparation for the EPPP licensing exam for those students intending to seek professional licensure

PSYC 412 Introduction to the Profession of Clinical Psychology (3 Credit Hours)

Required course for PhD program in Clinical Psychology-an introduction to our field. This course provides an introduction to the profession of Clinical Psychology by focusing on basic research and clinical skills necessary for a career as a clinical scientist and practitioner.

Outcomes:

Students will develop skills such as establishing rapport, empathic and reflective listening, gathering information, and making intervention decisions via supervised interview experiences

PSYC 420 Research Methods in Psychology (3 Credit Hours)

An intensive coverage of classical and current psychological research methodology and a review and implementation of various strategies for proposing research, collecting and analyzing data, and writing scholarly articles.

Outcomes:

Students will learn multiple methods for conducting psychological research, how to critique published research, and how to write research proposals and reports

PSYC 432 Intell & Personality Assessment (3 Credit Hours)

Description: This course covers the psychometric properties, administration procedures, and applications of the most common adult psychological measures. Students will gain an understanding of psychometric theory.

Outcomes:

Students will be able to administer and become familiar with how to interpret a WAIS-III, the MMPI-2, the Sentence Completion Test, and the TAT

PSYC 435 Seminar in Cognitive Neuroscience (3 Credit Hours)

The way that information is represented and processed in the brain is central to a broad range of topics in psychological science. In this course we will consider how the methods of cognitive neuroscience including brain imaging (e.g., EEG/ERP, fMRI) and dissociation-based techniques such as neuropsychology and TMS, have revolutionized the exploration of these topics. We will pay particular attention to how these techniques can be used to understand higher-level cognition during development and in questions related to social psychology and psychopathology. Class participants will be introduced to these techniques, read, critique and present results from the primary literature, and also have an opportunity to develop ideas using these methods relating to their own research interests.

PSYC 436 Psychopharmacology (3 Credit Hours)

Description: The types and mechanisms of medications used in the treatment of mental disorder are reviewed. Emphasis is given to behavioral effects and treatment effectiveness of drugs. Psychopharmacological research design and literature are reviewed.

Outcomes:

Students will learn basics of neurotransmission and be informed about medications including antidepressants, mood stabilizers, anti-psychotics, and substance abuse

PSYC 438 Prin of Psyc Assmt Chld & Adlt (3 Credit Hours)

Description: This course is designed to expose students to a variety of assessment tools and tests available for children ranging from 1 month to 18 years of age.

Outcomes:

Students will develop competence in the administration and write-up of basic intelligence, achievement, and visual motor tests for children presenting with, for example, learning disabilities, mental retardation, social/communication disorders

PSYC 440 Th & Res in Psych of Lang (3 Credit Hours)

This course provides an overview of theory and research on the psychology of language.

PSYC 446 Psychopathology (3 Credit Hours)

Description: This course reviews concepts, research, and theory (historical and current) in psychopathology and emphasizes diagnosis and etiology.

Outcomes:

Students will gain an appreciation for the major issues in the area of psychopathology, the ability to think clearly and scientifically about these issues, and an understanding of major mental disorders

PSYC 451 Psychopath of Childhd & Adol (3 Credit Hours)

Description: This course provides an overview of theory and research on adjustment problems during childhood and adolescence using an ecological-developmental perspective.

Outcomes:

By gaining insight into the factors that enhance or interfere with positive developmental processes, students learn how to apply research and theory to improve the services they will offer to children and families in their professional careers

PSYC 452 Clin Treat of Children & Adol (3 Credit Hours)

Description: This course provides an overview of theory and research on empirically-supported interventions for children and families.

Outcomes:

Students learn how to select and evaluate needed prevention programs and interventions for children and families to achieve therapeutic goals

PSYC 455 Developmental Psychology (3 Credit Hours)

This course provides an overview of theory and research on developmental psychology.

PSYC 460 Social Psychological Theory (3 Credit Hours)

Survey of basic concepts, theories, and research in social psychology. Contents include foundations of social psychology; broad theoretical orientations (e.g., evolutionary, behavioral, cognitive, affective, individual, societal, cultural); specific theories at the intrapersonal, interpersonal, intra-group, and inter-group levels of analysis.

Outcomes:

Knowledge and skills in theory construction and criticism; understanding relation between theory and research methods; applying theories to social problems

PSYC 461 Attitude and Attitude Change (3 Credit Hours)

Survey of attitude formation and change literature. Topics include the nature and measurement of attitudes, explicit versus implicit attitudes, effects of attitudes on cognition and behavior.

Outcomes:

Knowledge and skills that enable the integration of multiple theories to conceptualize attitudinal phenomena, critical evaluation of research, written and oral expression about attitude topics, application of attitude theories to practical problems

PSYC 462 Cognitive Social Psychology (3 Credit Hours)

In depth examination of the human cognition within its social context; including topics such as impression formation, attribution, stereotyping, prejudice, social information processing, mental control, affect and social information processing, unconscious social cognition.

Outcomes:

An understanding of basic theoretical approaches and scientific methods of hypothesis testing within social cognition; Development of skills needed to perform research within social cognition

PSYC 464 Practicum in Psychotherapy I (3 Credit Hours)

Description: This two semester practicum course provides applied experience conducting psychotherapy at Loyola University Chicago's Wellness Center.

Outcomes:

For client populations seeking psychotherapy, practicum students will be able to develop a treatment plan, articulate treatment goals, develop a working therapeutic alliance, and execute elementary psychotherapeutic techniques

PSYC 472 Organizational Psychology (3 Credit Hours)

Covers theory, research, and methods associated with behavior in organizational settings. Learning outcomes include knowledge of theory and methods of personnel selection, performance measurement and appraisal, knowledge and skills training; theory and research on leadership, motivation, group behavior, etc.

PSYC 473 Social Development (3 Credit Hours)

Description: This course is designed to provide an advanced level introduction and discussion of critical issues essential to the study of social development. The contribution of multiple contexts (e.g., family, peers, culture) to social development is a major focus of this class.

Outcome: Students will become familiar with the several theoretical accounts as well as major empirical findings in the core areas of social development.

PSYC 474 Research in Group Dynamics (3 Credit Hours)

Covers theory, methods, and research on behavior in and by groups from a social psychological perspective. Learning outcomes include knowledge of theory and research on group structure, group performance, group decision making, negotiation, and intergroup behavior; ability to design research about group behavior and to analyze data from group research.

PSYC 475 Cognitive Development (3 Credit Hours)

This course is designed to provide an advanced level introduction to critical issues in the study of cognitive development from infancy through childhood.

Outcomes:

Students will be expected to draw connections between the major theoretical accounts of cognitive development and the empirical literature in core areas of children's cognition

PSYC 477 The Self and Self-esteem (3 Credit Hours)

Pre-requisites: Graduate Standing Outcomes: Knowledge of psychological theory and research on the self and self-esteem

Graduate seminar focusing on psychological theory and research on the self and self-esteem. Course will focus on where self knowledge comes from and how it affects human behavior.

PSYC 479 Cognition and Emotion (3 Credit Hours)

Pre-requisites: Graduate Standing Outcomes: Knowledge of psychological theory and research on cognition and emotion

Graduate seminar focusing on psychological theory and research on the role that emotion plays in cognitive activity and behavior. Course will focus on how emotion affects cognition and how different emotions have different effects.

PSYC 482 Advanced Statistics (3 Credit Hours)

Covers analysis of factorial designs and other multifactor data sets.

Outcomes:

Learning outcomes include theory and assumptions underlying analysis of variance and multiple regression; ability to use SPSS to analyze data from factorial designs and other multifactor research endeavors

PSYC 484 Prejudice and Intergroup Relations (3 Credit Hours)

Pre-requisites: Graduate Standing Outcomes: Knowledge of psychological theory and research on intergroup relations and prejudice

Graduate seminar focusing on psychological theory and research on intergroup relations, stereotyping and prejudice. Course will focus on the perceptions, cognitions and behaviors toward members of our own group and members of outgroups.

PSYC 485 Psychology and Law (3 Credit Hours)

Application of social psychological theory and research to criminal behavior and the criminal justice system. Specific topics include crime causation, mass media effects, jury selection, eyewitness accuracy, and crime prevention.

Outcomes:

An understanding of core theoretical and methodological approaches to criminal justice research, development of skills needed to perform psychologically oriented criminal justice research

PSYC 486 Methods of Program Evaluation (3 Credit Hours)

Overview of program evaluation methods, politics, ethics, and applications; including topics such as quasi-experimental design, statistical analysis issues, ethical guidelines, implementation strategies, and presentation styles.

Outcomes:

An understanding of the methods, strategies, ethical issues, and implementation obstacles of evaluation research; Development of skills needed to perform high quality evaluation research in a variety of applied settings

PSYC 489 Political Cognition (3 Credit Hours)

Examination of the cognitive determinants of political judgments and decision; including topics such as political information processing, voting preference, political stereotyping, racism, ideology and public opinion, and media effects.

Outcomes:

An understanding of core theoretical approaches within political psychology, scientific methods of hypothesis testing within political psychology, and the development of skills needed to perform research within political psychology

PSYC 491 Multivariate Analysis (3 Credit Hours)

Description: An introduction to the theory and application of multivariate statistical techniques in psychology.

Outcomes:

Students will learn the conceptual underpinnings (including matrix algebra) and will also learn to conduct analyses for the following procedures: multiple and logistic regression, MANOVA, loglinear analysis, canonical correlation, factor analysis, and cluster analysis

PSYC 493 Structural Equation Modeling (3 Credit Hours)

An introduction to structural equation modeling as a multivariate statistical tool, including confirmatory factor analysis, path analysis, causal modeling, diagramming structural models, assessing model fit, model development and identification, multi-sample analysis, and longitudinal analysis.

Outcomes:

An understanding of the logic and mechanics of structural equation modeling, and the skills necessary to use LISREL 8 software to conduct structural analyses

PSYC 509 Seminar on Teaching Psychology (0 Credit Hours)

This course provides an introduction to the psychology teaching and learning.

PSYC 510 Ethics & Professional Practice (3 Credit Hours)

Description: The ethical standards and practice of psychologists, including basic principles of ethics, application of ethics to professional practice and to research, and professional problems and practices are reviewed.

Outcomes:

Students will learn to manage complex ethical problems encountered in psychological practice, research, and education

PSYC 513 Adolescence (3 Credit Hours)

Description: This course offers an in-depth study of adolescence from a psychological as well as cultural and historical perspective, with a focus on biological, cognitive, psychological, and social changes.

Outcomes:

Students will learn important components of psychological health and maladaptation during the adolescent developmental period and how family, peer, and school contexts affect adolescent development

PSYC 514 Research in Developmental Psych (3 Credit Hours)

The goal of this course is to survey important methods, issues, research designs, and other topics specific to research in developmental psychology and cultivate students' scientific skills like critical thought and evaluation of research.

Outcomes:

Students will be able to demonstrate understanding of developmental methodology, design, ethical concerns, and other issues relevant to developmental science

PSYC 515 Infancy (3 Credit Hours)

The goal of this course is to survey important topics in the field of infancy, the period of development from birth through approximately 3 years.

Outcomes:

Students will demonstrate understanding of infant developmental science in particular content areas and the processes underlying change

PSYC 518 Seminar Selected Topics-Clinical Psychology (3 Credit Hours)

This course provides an overview of selected topics in clinical psychology.

PSYC 525 Seminar in Social Psychology (3 Credit Hours)

This course provides an overview of theory and research on social psychology.

PSYC 535 Internship in Applied Social Psychology (0 Credit Hours)

Students complete an applied social psychology internship during this course.

PSYC 540 Psych of Lang Development (3 Credit Hours)

This course provides an overview of theory and research on the psychology of language development.

PSYC 545 Sel Tp in Developmental Psych: (3 Credit Hours)

This course provides an overview of selected topics in developmental psychology.

PSYC 548 Risk and Opportunity in Childhood and Adolescence (3 Credit Hours)

This course provides an overview of theory and research on risk and opportunity in childhood and adolescence.

PSYC 552 Neuropsychology (3 Credit Hours)

Neuropsychology involves the interdisciplinary study of the relations between human brain function and behavior.

PSYC 553 Neuropsychological Assessment (3 Credit Hours)

Description: This course covers the major areas of neuropsychological assessment, including major assessment techniques, interviewing, report writing, and psychometric issues., attention, language, memory, visual perception, motor functioning, executive functioning, and emotional functioning).

Outcomes:

Students will learn major issues and topic areas in neuropsychological assessment (e.g

PSYC 555 Social Psychology Research and Professional Development (8 Credit Hours)

Course will involve research presentations and other forms of professional development. Graduate student standing in Social Psychology.

Interdisciplinary Option: Women & Gender Studies

PSYC 560 Human Diversity (3 Credit Hours)

This course provides a foundation in human diversity as it relates to the practice of clinical psychology. The course will examine theoretical perspectives and research findings related to human diversity. The goal of this course is to challenge students to think critically about the influence of human diversity on their psychological practice, research, and teaching.

PSYC 568 Evidence-Based Practice in Clinical Psychology (3 Credit Hours)

Pre-requisites: Psychology 412, or approval of instructor This course provides a theoretical and skills-based overview of evidence-based practice (EBP) in clinical psychology, and surveys the theoretical and applied aspects of various evidence-based intervention approaches in psychology, including Motivational Interviewing (MI), Interpersonal Therapy (IPT), Cognitive Behavior Therapy (CBT), and Dialectical Behavior Therapy (DBT)

Students will demonstrate an understanding of current theories and methods in evidence-based psychotherapy.

PSYC 595 Thesis Supervision (3 Credit Hours)

Enrollment is Restricted to Psychology graduate students. Students will make supervised progress towards completion of their theses.

PSYC 596 Internship in Clin Psychology (0 Credit Hours)

Students complete a full time APA approved clinical internship during this course.

PSYC 597 Integrative Readings in Psych (3 Credit Hours)

Students complete integrated readings under the supervision of a faculty member.

PSYC 598 Research (3-6 Credit Hours)

Students complete research under supervision of a faculty member.

PSYC 599 Directed Readings (3-6 Credit Hours)

Students complete directed readings under the supervision of a faculty member.

PSYC 600 Dissertation Supervision (0 Credit Hours)

Students complete dissertation research under the supervision of a faculty member.

PSYC 605 Master's Study (0 Credit Hours)

Students complete master's thesis readings and research under the supervision of a faculty member.

PSYC 610 Doctoral Study (0 Credit Hours)

Students complete dissertation readings and research under the supervision of a faculty member.

Psychology of Crime and Justice (PSCJ)

Discover, search, courses!

PSCJ 399 Independent Study (3 Credit Hours)

This course provides students with the opportunity to work under the direction of a faculty member on a particular area of interest that is not part of the Psychology of Crime and Justice minor's usual curriculum. Program permission required.

Interdisciplinary Option: Psychology of Crime and Justice

Outcomes:

Gain supervised research experience in a specific area of psychology and law

Public Health (PUBH)

Discover, search, courses!

PUBH 300 Introduction to Public Health (3 Credit Hours)

Public health is the science of preventing disease and protecting and promoting the health of populations and communities. Through interactive exercises and application of concepts, this course considers its history; ethical principles; scientific foundation and tools; biomedical bases; socioeconomic and behavioral factors; environmental issues; and relationship to medical care. Define health disparities and explain how they are produced; Synthesize public health information and communicate it effectively.

Course equivalencies: X -PUBH 300/ ENVS 300

Outcomes:

Describe the history, core concepts, functions, and methods of public health

PUBH 301 Health and the Environment (3 Credit Hours)

This course is designed as an introduction to the field of environmental health, including regulations, research, disease prevention, and advocacy.

Course equivalencies: X-ENVS301/PUBH301/MBPH401

Outcomes:

Students will be able to outline approaches for assessing and controlling environmental hazards that affect community health and discuss major local, national, and global health challenges

PUBH 303 Introduction to Epidemiology (3 Credit Hours)

Epidemiology is the study of the distribution and determinants of disease in populations and remains the basic science of public health. The objective of this course is to familiarize students with the range of tools used to conduct epidemiologic analysis, including study design and measures of association.

Course equivalencies: X- PUBH 303/ENVS 303/MPBH 403

Outcomes:

Apply epidemiological methods to public health problems; select appropriate quantitative data collection, study designs, and analytical methods; apply adjustment techniques; and calculate measures of association; and interpret and communicate results

PUBH 304 Health Behavior and Health Promotion (3 Credit Hours)

This introductory course is designed to provide students with a foundation in behavioral theory as applied to public health practice, including health education and health promotion. Health education strategies will be examined from the perspective of health literacy, cultural competency, and adult learning behaviors among other dynamics.

Outcomes:

Describe a range of health behavior theories and frameworks commonly incorporated into public health interventions on the individual, interpersonal, and community level

PUBH 305 Public Health Communication (3 Credit Hours)

This course will teach students effective use of health literacy and health communication tools, including the use of mass media, online social media, and health professions' communication with patients in clinical settings.

Outcomes:

Students will be able to develop communication tools such as infographics and brief web-based videos and evaluate public health information

PUBH 306 Critical Thinking in Public Health (3 Credit Hours)

This course is designed to prepare students to make reasoned, intelligent decisions about public health matters by learning about and practicing how to think, read, write, and speak critically.

Outcomes:

Be able to evaluate the credibility of sources of information, scrutinize arguments, recognize biases in oneself and in others, and take a stand on public health issues and support it

PUBH 307 Foundations of Public Health Policy (3 Credit Hours)

Provides students with theoretical frameworks to understand public health policy issues, introduces public policy making processes, and enables students to analyze position papers on policy topics. Drawing from law, economics, political science, ethics and epidemiology, the course provides students with the knowledge and skills to understand policy-making processes.

Course equivalencies: PUBH 307/MPBH 407

Outcomes:

Explain how federal, state, and local health policy is formulated, implemented and evaluated; Assess the balance between the public good and individual rights in the policy process in public health

PUBH 310 Public Health Internship (3 Credit Hours)

This practical internship course will integrate theory, where students will unpack the complexities of Public Health and gain an understanding of the roles and responsibilities of professionals. Careers in Public Health are multidimensional, students will integrate real world experience reflecting on experiences of leadership, health equity, community engagement, and professional development.

This course satisfies the Engaged Learning requirement.

Outcomes:

Integrate academic internship experience with course curriculum academic content through critical reflection of leadership theory and development; assess leadership identity, leadership behavior, and civic role in a public health framework

PUBH 314 Global Public Health (3 Credit Hours)

This course is an introduction to global public health and focuses on health disparities on the international level. The course addresses the determinants, consequences and trends of infectious and non-communicable disease, maternal and child health, and refugee and migrant health in low-and-middle-income countries.

Course equivalencies: X-HSM210/PUBH314/ENVS385

Outcomes:

Students will be able to discuss major current global public health issues, identify effective and ineffective aspects of international public health programs, and create context-specific health promotion materials

PUBH 399 Public Health Capstone Experience (3 Credit Hours)

This course is a cumulative, integrative and scholarly or applied experience or inquiry project. It may include internships, service-learning projects, senior seminars, portfolio projects, or research paper. The project provides the opportunity for students to demonstrate proficiency in effective communication skills through a written report and oral presentation.

This course satisfies the Engaged Learning requirement.

Outcomes:

Demonstrate in written report and oral presentation the knowledge and skills acquired during the undergraduate program through selected projects which translate gained information into public health practice, including research

Public Service Leadership (PSLD)

Discover, search, courses!

PSLD 400 Introduction to Public Service (3 Credit Hours)

Introduces students to organizational theories and practices useful to public service managers. Teaches students how to use structural, human resource, political and symbolic perspectives to rethink public service organizations. Provides an introduction to managerial issues including workforce diversity, decision making, and leadership; stresses critical thinking skills. Open to students admitted into the MA in Public Service Leadership program (PSLD-MA).

Outcomes:

Knowledge of ethics, values, and skills for organizational leadership in human service and public service agencies; Knowledge of theory, organizational functions and structures, leadership styles, and value-driven leadership

PSLD 401 Ethical Leadership in Public Service (3 Credit Hours)

Provides students with the framework for personal and professional ethical decision making applied in the context of diverse workplaces and international organizations. Through lectures, case studies in applied ethics, and specific assignments, students clarify their personal-professional values, assess their moral intelligence, and develop their ethical leadership integrity. Open to students admitted into the MA in Public Service Leadership program (PSLD-MA).

Outcomes:

Knowledge of ethics, values, and applied ethics for organizational leadership in human services and public service agencies; Development of ethical and value-driven leadership skills

PSLD 402 Foundations of Global Strategic Communication (3 Credit Hours)

Globalization challenges almost every aspect of communication from creating and delivering messages to spreading ideas that cross language, time, and cultural barriers. The course focuses on using strategies communication planning and management to guide communication activities in organizations. Open to students admitted into the MA in Public Service Leadership program (PSLD-MA).

Outcomes:

Knowledge of critical communication skills and values; Understand the interplay between communication, technology, and culture

PSLD 403 Program Management and Development (3 Credit Hours)

There is an increasing demand for public service workers who can work with diverse communities through program management and development using strengths and empowerment perspectives and social and economic justice principles. This course builds on the ecological systems perspective that views program development as an arena for social change. Open to students admitted into the MA in Public Service Leadership program (PSLD-MA).

Outcomes:

Knowledge and skills needed for planning new or adapting existing programs within the context of diverse communities; Develop skill set for program development and quality improvement

PSLD 404 Data, Visualization and Evaluation (3 Credit Hours)

Using Microsoft Excel, this course introduces students to the use of quantitative data in policy, public management, and non-profit decision making. Topics include causal inference, descriptive statistics, data visualization, probability, statistical inference, and regression analysis. Open to students admitted into the MA in Public Service Leadership program (PSLD-MA).

Outcomes:

Hands-on knowledge and experience managing and analyzing data sets; Best practices for presenting data to diverse stakeholders

PSLD 405 Design Thinking in Mitigating Complex Social Problems (3 Credit Hours)

Design thinking is a way of working with user-centered innovation to address problems where not all knowledge is available at the outset, i.e. the problem itself is unknown (wicked problems). Design thinking rests on principles such as user involvement, problem framing, experimentation, visualization, and diversity. Open to students admitted into the MA in Public Service Leadership program (PSLD-MA).

Outcomes:

Develop critical skills for management and innovation; Develop creative potential of individuals and enable them to deal with wicked problems

PSLD 420 Disaster Operations and Management (3 Credit Hours)

Pre-requisites: Only open to students admitted into the MA in Public Service Leadership(PSLD-MA); DMEP-PSLD Sub-Plan Outcomes: Knowledge of theory, organizational functions and structures, phases of emergency management, resource management, ethics, politics, and threats and hazards; Develops ability to solve complex problems and engaged with a wide variety of organizations that support emergency management

Introduction to emergency management theories and practices that are critical in the emergency management profession. Covers the phases of emergency management, human and political aspects, the importance of effective resource management, environmental concerns, and the threats and hazard identification and risk assessment process that is important to emergency management organizations. Introduces participants to issues related to managing personnel, including volunteers, workforce diversity, decision-making, leadership, and stresses critical thinking skills.

PSLD 421 Emergency Planning and Implementation (3 Credit Hours)

Pre-requisites: Only open to students admitted into the MA in Public Service Leadership (PSLD-MA); DMEP-PSLD Sub-Plan Outcomes: Identify how to gather useful information to reach the best outcomes possible; Learn to identify risk and the methods to address situations with incomplete information; Develop an Intelligence Cycle, regardless of the situation, to address and mitigate current and future risk Incomplete data, mission information, or rapidly changing scenarios requires a pragmatic approach to reach an optimal solution. This course will introduce students to a decision-making process usable in any scenario. Students will learn to identify, gather, analyze, and process available information for use in a set, yet flexible process to identify and reduce risk, protect people and property, and maintain optimal business operations.

PSLD 422 Disasters and Vulnerable Populations (3 Credit Hours)

Pre-requisites: Only open to students admitted into the MA in Public Service Leadership (PSLD-MA); DMEP-PSLD Sub-Plan Disasters create lasting impacts for communities large and small. This course introduces students to emergency management concepts that ensure the needs are being met for citizens with access and functional needs, those living in areas with high social vulnerability, and other vulnerable populations throughout the community. Teaches students to include vulnerable populations in all phases of emergency management and provides students with the opportunity to learn critical communication and problem-solving skills.

Outcomes:

Understand the make-up of the community being served, ensure plans, processes, and disaster response includes vulnerable populations within the community; Knowledge of tools and resources available to assist in preparedness activities to ensure they involve the community in its entirety

PSLD 423 Integrated Social-Medical Issues in Emergency Management (3 Credit Hours)

Pre-requisites: Only open to students admitted into the MA in Public Service Leadership (PSLD-MA); DMEP-PSLD Sub-Plan Outcomes: Identify social and medical issues in EM practices; Apply the concepts of EM within a social-medical context; Describe EM social and medical organizations and structures and their relation to public service; Apply concepts of leadership to public service, EM, and other sectors This course builds on existing leadership and public service knowledge with the application of emergency management principles under the shared perspectives of social-medical outlooks. It analyzes current trends and issues within emergency management through a social-medical paradigm and their impact on the public service models and leadership outcomes, including leadership challenges, ineffective communication and processes, and emergency response software, and their impact on medical and social infrastructure,

PSLD 430 Understanding and Mitigating Poverty (3 Credit Hours)

Pre-requisites: Only open to students admitted into the MA in Public Service Leadership (PSLD-MA); ISDV-PSLD Sub-Plan Outcomes: Understand key issues regarding causes and consequences of poverty; Describe approaches to understanding and providing solutions to poverty; Explore the dynamics of commitment to social change and anti-poverty initiatives through grantmaking This course examines the nature, extent, and causes of poverty and inequality in the US while relying on literature from sociology, political science, economics, psychology and other disciplines. It analyzes the anti-poverty initiatives and policies launched over the past five decades and examines the role of culture, discrimination and classism as well as policy issues.

PSLD 431 Foundations of Social and Sustainable Development (3 Credit Hours)

Pre-requisites: Only open to students admitted into the MA in Public Service Leadership (PSLD-MA); ISDV-PSLD Sub-Plan Outcomes: Identify challenges in social and sustainable development especially in transition to renewable resource use in specific populations; Assess the complex overlap of current science, economics, and geopolitics underlying the overuse of resources, impact on population, and considerations of economic growth

Addresses global design for economic and social development via the UN adoption of Sustainable Development Goals and targets. Examines policies and programs that aim to achieve inclusive, people-centered and sustainable development. Covers the basics of narrative policy analysis, measures and outcomes. Explores environmental, social, and economic concerns and their impact at local, national and global levels.

PSLD 432 Gender Diversity & Sustainable Social Development (3 Credit Hours)

This course uses the UNWomen's approach to gender diversity and sustainable development to encompass the issues that hinder and those that contribute to the progress of women and gender diversity within sustainable development. The course reviews the environmental, social, and economic relevance and impact on gender. The specific topics will include, the intersectionality of gender and sustainability in the context of agriculture, forestry, water, health, investment and corporate social responsibility and each topic will highlight a specific region or nation.

The course will provide an overview of the underlying intersectionalities of class, age, region within Asia, Latin America, and Africa. Restricted to students admitted into the MA in Public Service Leadership (PSLD-MA); ISDV-PSLD Sub-Plan

Outcomes:

Describe sustainability and the significance of its interaction with gender; Critically review the history of global development agenda from a gendered perspective; Utilize interdisciplinary frameworks of gender inequity and sustainability; Assess variations in women's contributions to social development - historically, culturally, and politically; and Analyze women and gender within issues of Agriculture, Forestry, Water, Health and Investment in sustainable development

PSLD 433 Social Analysis Inequality Poverty and Development (3 Credit Hours)

This course will introduce students to some of these key concepts and debates to enable critical evaluation of how well sociological understandings of development inform the social analysis of exclusion, poverty and inequality, as well as what implications this might have for development policy especially when focusing on underserved communities. Restricted to students admitted into the MA in Public Service Leadership (PSLD-MA); ISDV-PSLD Sub-Plan.

Outcomes:

Describe the key concepts and debates surrounding poverty and inequality; Evaluate sociological understanding that inform the social analysis of exclusion; and Assess implications for policy regarding underserved communities

Public Service Leadership (PUSL)

Discover, search, courses!

PUSL 400 Data Visualization and Evaluation (3 Credit Hours)

Using Microsoft Excel and Tableau, this course introduces students to the use of quantitative data in policy, public management, and non-profit decision making. Topics include casual inference, descriptive statistics, data visualization, probability, statistical inference, and regression analysis. Restricted to students admitted into the MA in Public Service Leadership program.

Outcomes:

Hands-on knowledge and experience managing and analyzing large data sets and critically reviewing quantitative research conducted by others; Best practices for presenting data to diverse stakeholders

Religion and Philosophy (CERP)

Discover, search, courses!

CERP 85 The Path of the Spiritual Warrior (0 Credit Hours)

This course will examine religious writings and how they help us grow spiritually. Students will study eight core concepts and principles that, when understood and developed, can help to turn each of us into a "spiritual warrior": openness, introspection, discipline, courage, creativity, stamina, restraint, and perseverance.

Research Methods (RMTD)

Discover, search, courses!

RMTD 380 Statistical Methods (3 Credit Hours)

This undergraduate course provides an introduction to descriptive and inferential statistical methods used in education, psychology and the health professions.

Course equivalencies: RMTD380 / CPSY380

Outcomes:

Students will be able to analyze quantitative data using a statistical computing package, to interpret and communicate the results of a statistical analysis in written and oral presentations, and to understand the assumptions and limitations of using statistical methods for analysis

RMTD 400 Introduction to Research Methodology (3 Credit Hours)

This course provides an introduction to research methods used in education and the social sciences including qualitative and quantitative research designs.

Course equivalencies: RMTD400 / CIEP495

Outcomes:

Students will be able to critique the argument and methods used in a primary research study, to integrate in a written literature review the results of studies in order to present an argument, and to understand the ethical issues involved in research with human subjects

RMTD 401 Discourse Analysis and Documentary Research (3 Credit Hours)

This research methods course will examine a number of different discourse analysis techniques. It will also prepare students to conduct historical documentary research, all with a special emphasis on how these methods can be applied to educational research and policy analysis projects.

Course equivalencies: RMTD401 / ELPS401

Outcomes:

Students in the course will be able to critically evaluate the diverse range of approaches used to analyze discourse and conduct educational research using documentary sources

RMTD 402 Comparative Analysis (3 Credit Hours)

No course description is available

Course equivalencies: RMTD402 / ELPS402

RMTD 403 Survey Research (3 Credit Hours)

This course provides an introduction to the design and analysis of survey research, and the psychological foundations of questionnaire design.

Course equivalencies: RMTD403 / CIEP494

Outcomes:

Students will be able to develop a survey or questionnaire, design a study using a survey or questionnaire, gather and record data from a survey or questionnaire, analyze the resulting data from a survey or questionnaire, and present and interpret the results in oral and written form

RMTD 404 Introduction to Educational Statistics (3 Credit Hours)

This graduate course provides an introduction to descriptive and inferential statistical methods used in education, psychology and the health professions.

Outcomes:

Students will be able to analyze quantitative data using a statistical computing package, to interpret and communicate the results of a statistical analysis in written and oral presentations, and to understand the assumptions and limitations of using statistical methods for analysis

RMTD 405 Qualitative Research (3 Credit Hours)

This course explores the discipline and practice of qualitative research through the examination of various theories, genres and components of this form of inquiry.

Course equivalencies: RMTD405 / ELPS403

Outcomes:

Students will be able to recognize and discuss theories and components of qualitative research, to analyze various qualitative studies in terms of design, validity and meaning orally and in written critiques, to conceptualize, design and write a proposal for a small qualitative study, to collect, code and analyze data appropriate to a qualitative study, and to write up a small qualitative study including conceptual framework, research question, methods and collected data

RMTD 406 Educational Evaluation (3 Credit Hours)

The course will focus on the theories, models, strategies and practices that are germane to educational evaluation, including the history of evaluation studies in the social sciences, the various roles of the evaluator in the development and assessment of programs, evaluation theory and social policy.

Course equivalencies: RMTD406 / CIEP496

Outcomes:

Students will be able to state the purposes, benefits and importance of evaluation research, describe the history and culture associated with evaluation in the US, to read and critique a range of evaluation proposals and reports, to compare and contrast different approaches to evaluation, to develop a proposal for a program evaluation including writing measurable program objectives, planning data collection methods and presenting results to consumers

RMTD 407 Introduction to Evaluation Theory (3 Credit Hours)

This course introduces students to program evaluation theory in the social sciences, including various conceptualizations of evaluation, historical development of the field, purposes of evaluation, and social and political contexts of evaluation practice.

Outcomes:

Students will engage major theoretical concepts of the field - methods, use, values, and practice - from the perspectives of various evaluation theorists; Throughout course readings, discussion and assignments, students will have the opportunity to critically reflect on understandings of social justice, implicitly and explicitly, evident in the evaluation theories

RMTD 408 Evaluation and Evidence in Cross Cultural Contexts (3 Credit Hours)

M.Ed. IEPE Cohort: Develop students ability to communicate quantitative, qualitative and mixed method data to a range of stakeholders. Emphasis placed on multicultural contexts and the development of sophisticated understandings of the politics of evaluation and evidence. Enrollment Restrictions: M. ED. Online Cohort IEPE

Outcomes:

This course focuses on the writing, presentation and publication dimensions of evaluative work; Develop students ability to communicate quantitative, qualitative and mixed method data to a range of stakeholders; Emphasis placed on multicultural contexts and the development of sophisticated understandings of the politics of evaluation and evidence

RMTD 410 Communicating Research Findings (3 Credit Hours)

This course will expose students to strategies for developing clear arguments in engaging, relevant, content-rich papers and presentations. This course will familiarize students with conventions of written research that improve acceptance and publication rates. It will also explore alternative forms of representing research findings.

Outcomes:

Students will have enhanced skills in communicating research findings to diverse audiences, both verbally and in writing

RMTD 411 Introduction to Human Performance Technology (3 Credit Hours)

This course introduces students to the models, practices and competencies associated with field of Human performance improvement.

Outcomes:

Students will be able to apply the practices associated with the roles of an HPT professional; Students will conduct an analysis of an organizational problem and plan an appropriate intervention and change management strategy

RMTD 412 Needs Assessment (3 Credit Hours)

In this course, students will learn the principles of needs assessment to improve programs and organizations. Needs assessments are a systematic set of procedures to identify within an organization a set of priorities to improve programs and/or organizations.

Outcomes:

Students will plan a needs assessment, develop data collection tools and conduct a practice assessment

RMTD 415 Practicum in Organizational Evaluation (3 Credit Hours)

This practicum course is intended to help candidates integrate theoretical and research coursework with the practice of organizational evaluation and to reflect on their own development as professionals in the service of social justice. The practicum project involves the planning, conducting and reporting results of an evaluation, human performance improvement, or needs assessment project.

Outcomes:

During the course of the practicum candidates are expected to complete a practicum project

RMTD 420 Educational Research I: Building a Body of Evidence With Qualitative Methods (3 Credit Hours)*Pre-requisites:* RMTD 400 or equivalent

This course explores the discipline and practice of qualitative research, introducing students to the discipline of qualitative research through examination of various theories, traditions, genres, and components of this form of inquiry.

Outcomes:

Students will be able to discuss the meanings of research and of research traditions within the social sciences, to recognize and discuss various epistemologies, traditions, designs, theories, ethical issues and components of qualitative research, to analyze qualitative studies in terms of design, methodology, validity, findings, ethics and conclusions in oral and written critiques, to conceptualize, design, and implement a small-scale qualitative study, and to interpret and present research study findings

RMTD 421 Educational Research II: Building a Body of Evidence With Quantitative Methods (3 Credit Hours)

This course introduces students to the theories, traditions and components of quantitative research in the social sciences, integrating basic design principles of quantitative research with commonly used statistical methods for analyzing data from these designs.

Outcomes:

Students will be able to recognize and discuss various epistemologies, designs, theories and ethical issues in quantitative research, to critique quantitative studies in terms of design, methodology, validity, statistical analysis, results, ethics and conclusions in oral and written critiques, to apply statistical methods to quantitative data using a statistical analysis computer program, to understand and discuss the theoretical basis and underlying assumptions of various statistical methods in the context of common quantitative study designs, and to analyze, interpret and present the findings of a data analysis

RMTD 422 Single Subject Design (3 Credit Hours)

Pre-requisites: RMTD 400 This course will introduce students to single-case experimental designs as they apply to research and practice in special education and other educational settings
Methods for single-case experiments are applicable to monitoring response to intervention as well as research on low-incidence conditions. Students will learn to critique single-subject experimental research studies and to design studies to monitor treatment interventions in educational settings.

RMTD 430 Psychological Measurement (3 Credit Hours)

This course introduces the assumptions underlying measurement in psychology and education including types of measurements, test development, and theoretical, quantitative and practical issues of reliability, validity and scoring. Outcome: Students will be able to critique studies of the development, reliability and validity of measurement instruments, and to design and plan a study of the reliability and validity of a measurement instrument.

Course equivalencies: RMTD430 / CPSY430**RMTD 432 Item Response Theory (3 Credit Hours)**

No course description is available

Course equivalencies: RMTD432 / CPSY488**RMTD 440 Mixed Methods Research (3 Credit Hours)**

Pre-requisites: RMTD 420 and RMTD 421 The course addresses the theory and practice of mixing inquiry methodologies in educational and social inquiry

Enrollment is restricted to Graduate Education Students. The course covers selected roots of the contemporary interest in mixing methods, various conceptualizations of mixed methods design and analysis, and challenges of mixed methods practice. Students will develop a historical understanding of mixed methods and various frameworks for mixed methods, as well as basic competencies in mixed methods practice.

RMTD 470 Case Study Research (3 Credit Hours)

Pre-requisites: RMTD 420 This course in an in-depth study of a qualitative research methodology: case study

This course allows students to carry out a case study, as well as engage issues common across qualitative research methodologies, such as the flexibility in research design, the ethical dimensions of qualitative research, and qualitative data analysis. Course content is applicable to research and evaluation contexts in education as well as other social and human service practices.

RMTD 481 Advanced Educational Statistics (3 Credit Hours)

This course covers statistical inference, hypothesis testing, estimation of power, factorial analysis of variance, multiple regression and selected non-parametric statistical techniques.

Course equivalencies: RMTD481 / CPSY490*Outcomes:*

Students will be able to identify and justify the use of particular statistical techniques for a given research question, to analyze quantitative data using a statistical computing package, to interpret and communicate the results of a statistical analysis in written and oral presentations, and to critique the assumptions and limitations of statistical techniques in a given analysis

RMTD 482 Introduction to Linear Models (3 Credit Hours)

Description: This course covers simple/multiple regression, one- and two-way analysis of variance (ANOVA) followed by multiple comparisons, and analysis of covariance (ANCOVA). Knowledge of basic algebra is required; knowledge of calculus is not required.

Course equivalencies: RMTD482 / CPSY493*Outcomes:*

Students will be able to identify and justify the use of particular univariate statistical techniques for a given research question, to analyze quantitative data using SPSS, and to interpret the results of a statistical analysis in written and oral presentations

RMTD 483 Multivariate Statistics (3 Credit Hours)

Pre-requisites: RMTD 421 (B or Better) Outcomes: This course equips students with knowledge and hands-on experience for conducting valid quantitative research focusing on multivariate statistics; Students will be able to identify and justify the use of particular multivariate statistical techniques for a given research question, to analyze multivariate data using SPSS, and to interpret and communicate the results of a statistical analysis in written and oral presentations

This course covers multiple regression, multivariate analysis of variance (MANOVA), multivariate analysis of covariance (MANCOVA), repeated MANOVA, discriminant analysis, canonical correlation and possibly principal components/factors analysis. Knowledge of basic algebra and univariate inferential statistical techniques is required; knowledge of calculus is not required.

Course equivalencies: RMTD483 / CPSY492

RMTD 484 Hierarchical Linear Models (3 Credit Hours)

This course examines the conceptual, substantive, and methodological issues in analyzing multilevel data (i.e., on individuals in organizational settings such as schools, corporations, hospitals, communities) using methods for hierarchical linear models.

Course equivalencies: RMTD484 / CPSY491

Outcomes:

Students will be able to identify and justify the use of hierarchical linear models for a given research question, to analyze multilevel data using a statistical computing package, to interpret and communicate the results of a hierarchical linear model in written and oral presentations, and to critique the assumptions and limitations of the use of hierarchical linear models in a given analysis

RMTD 487 Factor Analysis (3 Credit Hours)

No course description is available

RMTD 488 Meta-Analysis (3 Credit Hours)

This course introduces statistical methods in the design and analysis of quantitative research syntheses.

Outcomes:

Students will be able to design and plan a small-scale research review, to locate and evaluate the studies for a review, to code and organize the studies for a review, to analyze the effect sizes from a review, and to produce a comprehensive written synthesis of the study results

RMTD 520 Research Seminar I (3 Credit Hours)

This course will provide doctoral students with an intro to their PhD/EdD program as well as an intro to the dissertation process. The course will focus on methods and processes involved in developing a prospectus and review of literature for a dissertation.

Outcomes:

Students will develop a plan of study for their degree as well as prospectus for their dissertation

RMTD 530 Seminar in Tests & Measurements (3 Credit Hours)

Educational and psychological tests are commonly used to measure latent traits (e.g., knowledge, aptitude, achievement, attitude, and personality), often with the goal of making inferences on individuals or groups of individuals. Item response theory (IRT) measurement models are useful tools in examining the quality of the data that arises from the administration of such tests, which in turn allows us to make judgements about the validity of the test scores (or latent trait estimates) and the quality of the tests (are the items confusing and/or are they biased).

This course will introduce students to commonly used IRT models for analyzing dichotomous (e.g., 0=incorrect and 1=correct) and polytomous (0=never, 1=sometimes, 2=always) test data. While much of the course will be application oriented, some technical details that facilitate the understanding of the IRT and highlight the advantages of it over classical test theory (CTT) will be provided. Knowledge of basic algebra, linear modeling, and CTT is required.

Course equivalencies: RMTD530 / CPSY590

RMTD 580 Selected Topics (3 Credit Hours)

What is the role of qualitative critical research when the need for social justice has never been greater? (p. 1) ask Denzin and Lincoln (2017). In this course, we will begin by reviewing systems of inquiry within research in general explore as a basis for our deep dive into the importance of qualitative critical inquiry. We will focus on the meaning and discourses around critical qualitative research by exploring four methodologies: counter-storytelling, PhotoVoice, Youth Participatory Action Research, and Portraiture. Guest scholars who specialize in such methods will describe 2 their purpose and process with qualitative critical research. Students will reflect on readings, write an article critique, and collaboratively present on a methodology and conceptual framework. Students will leave this course able to speak the language of qualitative research in new, robust, and meaningful ways coupled with a better understanding of who they are as researchers and the possibilities of social transformation through qualitative design.

RMTD 590 Seminar:Advanced Mixed Methods (3 Credit Hours)

Pre-requisites: RMTD 420, 421 This course explores the theory and practice of mixed methods research in program evaluation and applied social science research

No course description is available

Course equivalencies: RMTD590 / CPSY580

Outcomes:

Students will become familiar with selected roots of the contemporary interest in mixed methods research and evaluation, as well as various approaches to mixing research paradigms, purposes, designs, analyses, methods, and so on; Students will develop knowledge for identifying and critiquing mixed method research; They will also be able to develop a mixed methods study

Rome Studies (ROST)

Discover, search, courses!

ROST 199 Topics in Rome Studies: Introductory (1-3 Credit Hours)

Variable topics in Rome Studies at the elementary level.

Interdisciplinary Option: Rome Studies

ROST 299 Topics in Rome Studies: Intermediate (1-3 Credit Hours)

Variable topics in Rome Studies at the intermediate level.

Interdisciplinary Option: Rome Studies

ROST 370 International Internship - Rome Focus (3-6 Credit Hours)

Enrollment is limited to Rome Center Students Only. This course offers students at the John Felice Rome Center an opportunity to gain valuable professional experience as an intern in Italian and international organizations and companies, essentially making the city of Rome their classroom.

Interdisciplinary Option: Italian American Studies, Rome Studies

This course satisfies the Engaged Learning requirement.

Outcomes:

Students will obtain in-depth knowledge and practical experience in an international professional work setting relevant to the student's future career

ROST 382 Human Rights: View from Rome (3 Credit Hours)

Enrollment is restricted to Rome Center Students Only. Theory, actuality and application of select human rights issues in the Mediterranean region as viewed from the perspective of Rome. This course includes 24 hours of required practical engagement with the local community which will result in unique first-hand experience of the actualities of Roman human rights.

Interdisciplinary Option: Catholic Studies, Italian American Studies, Italian Studies

This course satisfies the Engaged Learning requirement.

Outcomes:

Students will demonstrate knowledge of contemporary principles of moral philosophy and current social issues within Italy and the Mediterranean region affecting human rights; Students will also demonstrate self-reflection, anchored in the service-learning experience

Russian (RUSS)

RUSS 101 Russian I (3 Credit Hours)

Russian 101: Elementary Russian I This course is an introduction to the basic elements of the Russian language and to Russian culture.

Outcomes:

Students will develop communicative skills and a fundamental knowledge of the Russian people, language and culture

RUSS 102 Russian II (3 Credit Hours)

Pre-requisites: RUSS 101 This course continues the study of the Russian language and culture

No course description is available

Outcomes:

Students will continue developing communicative skills and further their knowledge of the Russian people, language and culture

RUSS 103 Russian III (3 Credit Hours)

Pre-requisites: RUSS 102 Description: This course is an intensive review of speaking, listening, reading, and writing Russian

Outcome: Students will develop audio-lingual facility in communication and the ability to read simple texts in Russian.

RUSS 104 Russian IV (3 Credit Hours)

Pre-requisites: RUSS 103 Description: This course continues the intensive review of speaking, listening, reading, and writing Russian

No course description is available

Outcomes:

Students will develop audio-lingual facility in communication and the ability to read short literary and cultural texts in Russian

RUSS 290 Russia and Russians in the World (3 Credit Hours)

Russian 290 is a service learning course focusing on leadership through service learning and the study of the Russian language and history. This course satisfies the Engaged Learning requirement.

Outcomes:

1) Students will develop Russian language skills (speaking, listening, reading, writing) and expand their knowledge of Russian history and culture; 2) Student will develop civic engagement leadership skills through practical service work and reflection

Science and Technology (CEST)

CEST 93 Tour: Fermilab (0 Credit Hours)

Tour: Fermilab, National Accelerator Lab to discuss physics and the labs use in research.

Social Work (SOWK)

Discover, search, courses!

SOWK 200 Introduction to Social Work (3 Credit Hours)

This course is an introduction to the social work profession through the identification of some of the human problems in society and the role of both society and social services in response to the problems. Students have the opportunity to observe several social service agencies and to evaluate current ways in which agencies interpret social problems and administer services Students will be able to evaluate current ways in which agencies interpret social problems and administer services.

This course satisfies the Engaged Learning requirement.

SOWK 205 Children and Youth: Systems and Services (3 Credit Hours)

Survey of the field of child welfare with consideration of various social services. Particular focus on abused and neglected children, foster care, adoption, and institutionalization.

Interdisciplinary Option: Human Services

Outcomes:

Students will be able to assess and analyze child welfare services within current political and social constraints

SOWK 301 Practice Skills with Individuals and Families (3 Credit Hours)

Pre-requisites: Undergraduate Social Work majors

This introductory micro practice course begins by focusing on the development of core skills for social workers in their encounters with individuals and families. Senior Standing; SOWK 200, SOWK 370, SOWK 305, (SOWK 201 or SOWK 307), SOWK 350. Co-Requisite: SOWK 380 or SOWK 501

This course satisfies the Engaged Learning requirement.

Course equivalencies: SOWK 301/SOWK 503

Outcomes:

1) Understand core social work skills relevant to engaging with and working with individuals and families, 2) apply core skills to diverse client situations

SOWK 302 Integrated Micro/Mezzo/Macro Theory and Practice (3 Credit Hours)

Pre-requisites: Undergraduate Social Work majors

This course extends theoretical knowledge and practical skills in mezzo and macro social work practice that support anti-racist and anti-oppressive, community engaged practices. While integrating theories of sociology, political science, anthropology, public health, and urban studies; as well as practice knowledge; the class examines relationships between social, economic, political, and cultural structures, collective action, and individual attitudes and behaviors. Senior standing, SOWK 200, SOWK 370, SOWK 305, (SOWK 201 or SOWK 307), SOWK 350

Outcomes:

1) Understand integrated practice models that apply across micro, mezzo, and macro domains, 2) appraise the quality and utility of empirical research related to the key theories, topics, and problems examined

SOWK 303 Group Work Practice in SW: Micro/Mezzo/Macro (3 Credit Hours)

Pre-requisites: Undergraduate Social Work majors

This course presents theoretical and practical approaches to social work with groups, with a focus on group development, dynamics, and processes. Senior standing, SOWK 200, (SOWK 370 or 502), (SOWK 305 or 500), (SOWK 201 or SOWK 307), SOWK 350, and Pre- or Co-requisite SOWK 301.

Course equivalencies: SOWK 303/SOWK 505

Outcomes:

- 1) Understand the role of group work as a key social work methodology, and how group work is practiced within agency and community settings,
- 2) gain awareness of themselves as group members and facilitators

SOWK 305 Life Span Development, Human Behavior, Trauma, & Theory (3 Credit Hours)

Pre-requisites: Restricted to Undergraduate Social Work majors, Social Work minors, and Human Services majors

This course will consider bio-psycho-social-spiritual theories across the life-course, with a focus on trauma and resilience and an understanding of the role of neuroscience in development. Junior standing, SOWK 200 as pre- or co-requisite, SOWK 370 as pre- or co-requisite, and PSYC 101.

Interdisciplinary Option: Human Services

Course equivalencies: SOWK 305/SOWK 500

Outcomes:

- 1) Understand the critical impact of the bio-psycho-social-spiritual perspective on the social work profession, 2) identify the role trauma and resilience have in human development and behavior

SOWK 307 Social Work Policy and Community Intervention (3 Credit Hours)

Pre-requisites: Restricted to Undergraduate Social Work majors, Social Work minors, and Human Services majors

Drawing from social work theory, research, and practice, Social Work Policy and Community Interventions examines the roles of social workers in policy practice as well as change agents within community and organizational contexts. Junior standing, SOWK 200 as pre- or co-requisite and SOWK 370 as pre- or co-requisite.

Course equivalencies: X- SOWK 509/IPS 635

Outcomes:

- 1) Examine social workers in policy practice & as change agents within communities and organizations, 2) understand the history and current structures of social policies and services; the role of policy in service delivery; and the role of practice in policy development

SOWK 330 Field I and Simulated Experience (3.5 Credit Hours)

Pre-requisites: Undergraduate Social Work majors, Senior standing, SOWK 200, SOWK 370, SOWK 305, (SOWK 201 or SOWK 307), SOWK 350

Co-requisites: SOWK 362 or SWFI 530S

The goal of the field education program is to provide an integrative experience that brings classroom theory to the field of practice. The field education program will challenge the student to integrate professional values and personal perspectives.

Interdisciplinary Option: Human Services

This course satisfies the Engaged Learning requirement.

Outcomes:

- 1) Understand the professional purpose, values, and ethical implications of social work practice, 2) develop knowledge of the multiple frames of reference that reflect the organization and diversity of the profession

SOWK 340 Field II and Simulated Experience (3.5 Credit Hours)

Pre-requisites: Undergraduate Social Work majors, Senior standing, SOWK 200, SOWK 370, SOWK 305, (SOWK 201 or SOWK 307), SOWK 350, and SOWK 330 as pre- or co-requisite

The goal of the field education program is to provide an integrative experience that brings classroom theory to the field of practice. The field education program will challenge the student to integrate professional values and personal perspectives.

This course satisfies the Engaged Learning requirement.

Outcomes:

- 1) Understand the professional purpose, values, and ethical implications of social work practice, 2) develop knowledge of the multiple frames of reference that reflect the organization and diversity of the profession

SOWK 350 Prep for Practice (3 Credit Hours)

Pre-requisites: Undergraduate Social Work majors

Junior Standing. SOWK 200 and SOWK 370. Students will strengthen professional identification and to facilitate the transfer from social work education to professional practice or graduate studies.

SOWK 360 Independent Study (1-3 Credit Hours)

Pre-requisites: junior standing

A course designed for individuals or small groups to focus on selected issues and problems in social work practice beyond course offerings.

SOWK 361 Special Topics: (3 Credit Hours)

Pre-requisites: sophomore standing

A survey course on a particular topic, such as aging, alcoholism and drug dependency, family process, group process, African-American men, gender, race, and culture. Students will understand how these issues affect social work practice.

SOWK 362 Field Seminar Foundation Level (1 Credit Hour)

This course is the first of two seminars that serve to enrich students' field experience. The focus of this course is upon experiences and progress of the student in the first semester of field and the relationship of the field experience to specific foundation/generalist practice class content.

Course equivalencies: SOWK 362/SWFI 530S

SOWK 370 Power, Oppression, Privilege, and Social Justice (3 Credit Hours)

Pre-requisites: Sophomore standing *Outcomes:* 1) Examine students' engagement in a deep exploration of self-awareness of their identities, values, and biases in several areas 2) recognize their knowledge and awareness of cultures and identities outside their own

This course is designed to assist social work students with understanding the concepts of power, privilege, oppression, and social justice in their work with historically marginalized and oppressed populations.

Interdisciplinary Option: African Studies and the African Diaspora, Asian Studies, Black World Studies, Human Services, Urban Studies

Course equivalencies: ASIA/SOWK/URB370/AFR369/SOWK50

SOWK 380 Assessment of Client Concerns in Context (3 Credit Hours)

Course will teach students to conduct a strengths-based and contextual assessment of client concerns. Students will learn to conduct a culturally informed bio-psycho-social-spiritual assessment in which they gather information about presenting concerns from the perspective of clients and collateral sources.

Course equivalencies: SOWK 380/SOWK 501

Outcomes:

- 1) Describe the elements of strength-based and contextual assessments,
- 2) explain process of culturally informed assessment, 3) apply knowledge by assessing client and community situations

SOWK 390 Research and Evaluation in Social Work Practice (3 Credit Hours)

Pre-requisites: Undergraduate Social Work majors, Social work minors, or Human Services majors

This course introduces the methods of social work research, including problem formulation, research ethics, research designs, measurement, data collection, sampling, and data analysis through a social justice/anti-racist/global perspective. Senior standing. SOWK 200, SOWK 370, (SOWK 201 or 307), and SOWK 305

Interdisciplinary Option: Human Services, Urban Studies

Course equivalencies: SOWK 390/SOWK 506

Outcomes:

- 1) Identify research literacy and research skills in order to be accountable, and to evaluate their own practice, programs, and service delivery in the field, 2) understand the methods of social work research

SOWK 500 Life Span Development, Human Behavior, Trauma, & Theory (3 Credit Hours)

This course will consider bio-psycho-social-spiritual theories across the life-course, with a focus on trauma and resilience and an understanding of the role of neuroscience in development.

Course equivalencies: SOWK 305/SOWK 500

Outcomes:

- 1) Understand the critical impact of the bio-psycho-social-spiritual perspective on the social work profession, 2) identify the role trauma and resilience have in human development and behavior

SOWK 501 Assessment of Client Concerns in Context (3 Credit Hours)

Course will teach students to conduct a strengths-based and contextual assessment of client concerns. Students will learn to conduct a culturally informed bio-psycho-social-spiritual assessment in which they gather information about presenting concerns from the perspective of clients and collateral sources.

Course equivalencies: SOWK 380/SOWK 501

Outcomes:

- 1) Describe the elements of strength-based and contextual assessments, 2) explain process of culturally informed assessment, 3) apply knowledge by assessing client and community situations

SOWK 502 Power, Oppression, Privilege, and Social Justice (3 Credit Hours)

This course is designed to assist social work students with understanding the concepts of power, privilege, oppression, and social justice in their work with historically marginalized and oppressed populations.

Course equivalencies: ASIA/SOWK/URB370/AFR369/SOWK50

Outcomes:

- 1) Examine students' engagement in a deep exploration of self-awareness of their identities, values, and biases in several areas 2) recognize their knowledge and awareness of cultures and identities outside their own

SOWK 503 Practice Skills with Individuals and Families (3 Credit Hours)

Pre-requisites: Corequisite is SOWK 501

This introductory micro practice course begins by focusing on the development of core skills for social workers in their encounters with individuals and families. Restricted to Graduate Social Work students.

Course equivalencies: SOWK 301/SOWK 503

Outcomes:

- 1) Understand core social work skills relevant to engaging with and working with individuals and families, 2) apply core skills to diverse client situations

SOWK 504 Integrated Micro/Mezzo/Macro Theory and Practice (3 Credit Hours)

This course extends theoretical knowledge and practical skills in mezzo and macro social work practice that support anti-racist and anti-oppressive, community engaged practices. While integrating theories of sociology, political science, anthropology, public health, and urban studies, as well as practice knowledge, the class examines relationships between social, economic, political, and cultural structures, collective action, and individual attitudes and behaviors.

Outcomes:

- 1) Understand integrated practice models that apply across micro, mezzo, and macro domains, 2) appraise the quality and utility of empirical research related to the key theories, topics, and problems examined

SOWK 505 Group Work Practice in SW: Micro/Mezzo/Macro (3 Credit Hours)

This course presents theoretical and practical approaches to social work with groups, with a focus on group development, dynamics, and processes.

Course equivalencies: SOWK 303/SOWK 505

Outcomes:

- 1) Understand the role of group work as a key social work methodology, and how group work is practiced within agency and community settings, 2) gain awareness of themselves as group members and facilitators

SOWK 506 Research and Evaluation in Social Work Practice (3 Credit Hours)

This course introduces the methods of social work research, including problem formulation, research ethics, research designs, measurement, data collection, sampling, and data analysis through a social justice/anti-racist/global perspective.

Course equivalencies: SOWK 390/SOWK 506

Outcomes:

- 1) Identify research literacy and research skills in order to be accountable, and to evaluate their own practice, programs, and service delivery in the field, 2) understand the methods of social work research

SOWK 509 Social Work Policy and Community Intervention (3 Credit Hours)

Drawing from social work theory, research, and practice, Social Work Policy and Community Interventions examines the roles of social workers in policy practice as well as change agents within community and organizational contexts.

Course equivalencies: X- SOWK 509/IPS 635

Outcomes:

- 1) Examine social workers in policy practice & as change agents within communities and organizations, 2) understand the history and current structures of social policies and services; the role of policy in service delivery; and the role of practice in policy development

SOWK 600 Dissertation Supervision (0 Credit Hours)

Students register for this course once they have finished their core curriculum, passed their comps, and have an approved dissertation proposal.

SOWK 602 Health and Behavioral Health Policy and Systems (3 Credit Hours)

Pre-requisites: SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504, SOWK 505, SWFI 530, and SWFI 530S; or Advanced Standing Students or 5-Year Social Work Students

This course provides students with frameworks for understanding the interrelationship between developments in health and behavioral health policy, delivery systems, and social work practice on micro, mezzo, and macro levels. Practice issues associated with organizational structure, patient-centered care, team and interdisciplinary relations, as well as collaboration and conflict, are considered.

SOWK 603 Seminar in Brief Treatment (3 Credit Hours)

Pre-requisites: Grade of C or better in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 505, and SWFI 530s, AND completion of SWFI 530 (P/F course); Or Advanced Standing Students or 5-Year Social Work Students
This seminar builds on the student's knowledge of short-term treatment, expanding this knowledge and skill toward understanding, and the practice of brief treatment as a modality of social work intervention. It examines the essential components of brief treatment (task-centered, crisis intervention, brief psychotherapy) with individual clients.

SOWK 604 Advanced Clinical Social Work Practice with Groups (3 Credit Hours)

Pre-requisites: Grade of C or better in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 505, and SWFI 530s, AND completion of SWFI 530 (P/F course); Or Advanced Standing Students or 5-Year Social Work Students
The course focuses on multiple theoretical approaches in group work practice with diverse and at-risk populations with an emphasis on social and economic justice. Although the focus is on treatment groups, content will include the structure, function and techniques of intervention with all types of groups, emphasizing the conscious use of self. The method of instruction is interactive, collaborative, and experientially based.

SOWK 605 Human Sexuality and Sexual Dysfunction (3 Credit Hours)

Pre-requisites: Grade of C or better in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 505, and SWFI 530s, AND completion of SWFI 530 (P/F course); Or Advanced Standing Students or 5-Year Social Work Students
This course provides basic knowledge about the physiology and psychology of human sexuality as well as consideration of some areas of sexual dysfunction. Attention is also focused on cultural, societal, and personal attitudes which may affect the student's response to this area of practice.

SOWK 606 Practicum in Research & Evaluation (3 Credit Hours)

Pre-requisites: SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504, SOWK 505, SWFI 530, and SWFI 530S; or Advanced Standing Students or 5-Year Social Work Students

This course is designed to introduce MSW students to a range of philosophies, methods, and techniques that are useful for evaluating human service programs and practice interventions. The course is intended to help you become more aware of the range of evaluation activities conducted in health care and human service agencies and to prepare you to conduct your own small and mid-range evaluations of programs and practice.

SOWK 609A School Social Work Policy and Practice I (3 Credit Hours)

Pre-requisites: SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504, SOWK 505, SWFI 530, SWFI 530S, and SWFI 531; or Advanced Standing Students or 5-Year Social Work Students

This course is the first of a two-semester course sequence for school social work candidates, which aims to integrate an analytic understanding of the role of school social workers, and appreciation of school social workers' current and historical contributions to K-12 education.

SOWK 609B School Social Work Policy and Practice II (3 Credit Hours)

Pre-requisites: SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 505, SWFI 530 and SWFI 530S; or Advanced Standing Students, Post-Masters PEL students, or 5-Year Social Work Students

This course is the second of a two-semester course sequence for school social work candidates, which aims to integrate an analytic understanding of the role of school social workers, and appreciation of school social workers' current and historical contributions to K-12 education. Build specific skills in assessment and intervention strategies; 2. Apply skills to individuals, groups, and schools; 3. Integrate trauma-informed care.

Outcomes:

1

SOWK 611 Social Work Practice with Couples (3 Credit Hours)

This course explores clinical models and techniques for the treatment of couples with relationship problems. Primary attention is given to the integration of systemic and analytical theories. Specific strategies and techniques are presented and demonstrated. Attention is given to the range of symptomatology and challenges including sexual dysfunction.

SOWK 612 Family Assessment and Intervention (3 Credit Hours)

Pre-requisites: Grade of C or better in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 505, and SWFI 530s, AND completion of SWFI 530 (P/F course); Or Advanced Standing Students or 5-Year Social Work Students
The course examines different theoretical approaches to assessment and intervention with families. The focus will be on interpersonal interaction patterns and on systems rather than on individual feelings and behaviors, although those aspects of working with family members are not excluded. Different models of family therapy will be described, applied to case problems, compared with other models and/or theories, and evaluated for their effectiveness.

SOWK 613 Advanced Family Treatment (3 Credit Hours)

This course deepens students clinical practice competence in family therapy. Through discussion and experiential exercises, use of case vignettes and films, it will refine understanding of the therapeutic process and the development of treatment skills. Students will advance their understanding of the relationship between treatment goals and treatment techniques.

SOWK 614 Clinical Social Work Practice in Health Care (3 Credit Hours)

Pre-requisites: Grade of C or better in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 505, and SWFI 530s, AND completion of SWFI 530 (P/F course); Or Advanced Standing Students or 5-Year Social Work Students
This course will view the practice of social work in health care as the integration of physical and mental health. We will explore in depth the biopsychosocial concomitants of physical and mental disorders. The integration of both health and mental health has implications for assessment and intervention and relies upon a person-centered/relationship-centered framework.

SOWK 615 Adolescent Client: Diagnosis and Treatment (3 Credit Hours)

Pre-requisites: Grade of C or better in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 505, and SWFI 530s, AND completion of SWFI 530 (P/F course); Or Advanced Standing Students or 5-Year Social Work Students
Social workers encounter adolescents in a variety of settings, including schools, mental health, child welfare, medical, juvenile justice, and substance abuse treatment. This course seeks to prepare students for direct intervention with adolescents and their families in these settings and within young people's own social contexts.

SOWK 616 Psychotherapy with Adults (3 Credit Hours)

Pre-requisites: Grade of C or better in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 505, and SWFI 530s, AND completion of SWFI 530 (P/F course); Or Advanced Standing Students or 5-Year Social Work Students
This practice course focuses on the content and processes of psychotherapy and the strategic use of therapeutic communications with adults. The focus will include psychotherapy informed by psychodynamic and developmental frameworks.

SOWK 618 The Role of Religion and Spirituality in Psychotherapy (3 Credit Hours)

Pre-requisites: Grade of C or better in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 505, and SWFI 530s, AND completion of SWFI 530 (P/F course); Or Advanced Standing Students or 5-Year Social Work Students
This course examines the predominant practice theories regarding religion and spirituality for the "person-in-the-situation". Included in the course material are relevant neurological, psychological, philosophical, theological, and sociocultural understandings of the interface between social work practice and religion and spirituality.

SOWK 619 Issues in Treatment of Women (3 Credit Hours)

Pre-requisites: Grade of C or better in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 505, and SWFI 530s, AND completion of SWFI 530 (P/F course); Or Advanced Standing Students or 5-Year Social Work Students
The focus of the course is the identification and application of clinical social work assessment and intervention relevant to practice with women. The circumstances of women are directly relevant to the studies of children and families, as well as health and mental health since they generally are the primary caregivers for others in our society.

SOWK 620 Clinical Social Work Practice with Children (3 Credit Hours)

This course focuses on learning about clinical social work with children through helping students deeply understand a clinical relationship that children find meaningful in advancing their self-determination. In keeping with the present and future of clinical social work, this course includes a multicultural and global focus.

SOWK 621 Clinical Practice in Addiction (3 Credit Hours)

Pre-requisites: Grade of C or better in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 505, and SWFI 530s, AND completion of SWFI 530 (P/F course); Or Advanced Standing Students or 5-Year Social Work Students
This advanced-level course is associated with counseling clients affected by Substance Use Disorders (SUD). The core Functions and skills examined include: screening, intake, orientation, assessment, treatment planning, counseling (individual, family and group), case management, crisis intervention, client education, referral, reports and recordkeeping, consultation with other professionals and intervention.

SOWK 622 Substance Abuse Treatment in Groups (3 Credit Hours)

Pre-requisites: Grade of C or better in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 505, and SWFI 530s, AND completion of SWFI 530 (P/F course); Or Advanced Standing Students or 5-Year Social Work Students
This course will focus on the many applications of group work to serve substance use disorder (SUD) affected clients. Through a combination of assigned readings, attendance at group meetings, and hands-on participation in small groups within the class, students will gain a working knowledge of how groups function to assist those recovering from SUDs.

SOWK 626 Social Work with Severely Mentally Ill (3 Credit Hours)

Pre-requisites: Grade of C or better in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 505, and SWFI 530s, AND completion of SWFI 530 (P/F course); Or Advanced Standing Students or 5-Year Social Work Students
This course offers students the chance to learn about leading-edge social work approaches providing humane care for severely mentally ill clients, especially those clients with concomitant substance abuse, developmental disabilities, and severe socioeconomic disadvantage. Working with the client's environment, collaboration with other systems, advocacy and program development are considered.

SOWK 631 Clinical Social Work Practice with Family Violence (3 Credit Hours)

Pre-requisites: SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504, SOWK 505, SWFI 530, and SWFI 530S; or Advanced Standing Students or 5-Year Social Work Students
This course will focus primarily on interpersonal and family violence between partners and the impact of violence on the family. It will examine the various epistemological conceptualizations of violence, and the treatment of violence as it is experienced by and from various family members within an ecological framework with consideration of micro, mezzo, and macro areas of practice.

SOWK 632 Clinical Social Work with Older Adults (3 Credit Hours)

Pre-requisites: SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504, SOWK 505, SWFI 530, and SWFI 530S; or Advanced Standing Students or 5-Year Social Work Students
This course includes a review of the basic concepts of gerontology/geriatric practice, mental health issues, and interventions. The content of the course is intended to challenge students to move beyond basic levels of knowledge. It is intended to help students adapt social work theory (person-in-environment), practice principles, standards, and values to practice with older adults.

SOWK 634 Special Topics: (1-3 Credit Hours)

Topics for these courses are diverse. The purpose of having these courses is to expand the curriculum content and expose students to new and innovative subject matter. The topic of the course will be included in the class notes.

SOWK 637 Neurodevelopment and Trauma (3 Credit Hours)

Pre-requisites: Grade of C or better in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 505, and SWFI 530s, AND completion of SWFI 530 (P/F course); Or Advanced Standing Students or 5-Year Social Work Students

Outcomes: Students will be taught to recognize which interventions involve specific brain regions in order to assist them in choosing those most likely to promote growth in areas of the brain impacted by trauma. This course is an advanced concentration year practice elective focused on assessing the neurodevelopmental impact of trauma and selecting interventions consistent with this assessment. Students will learn to identify major regions of the brain, appreciate the sequential nature of brain development, and determine which areas of the brain have likely been affected by developmental trauma. Consistent with a neurosequential understanding of development, students will be taught to recognize which interventions involve specific brain regions in order to assist them in choosing those most likely to promote growth in areas of the brain impacted by trauma. This assessment and intervention process occurs within the frameworks of systems and attachment theories, which recognize that the relational environments and communities in which clients live must be adequately safe and supportive for any intervention to be effective. This course is a hybrid course, incorporating recorded material supplied by The Child Trauma Academy. By the end of the course, students will have completed the majority of the requirements for Phase I Certification in the Neurosequential Model of Therapeutics. Because of this, the reading and out-of-class workload for this course is heavier than usual.

SOWK 645 Crisis Intervention (3 Credit Hours)

Pre-requisites: Grade of C or better in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 505, and SWFI 530s, AND completion of SWFI 530 (P/F course); Or Advanced Standing Students or 5-Year Social Work Students

This course provides students with the theoretical bases and practical skills for working with clients in crisis. This course focuses on general crisis theories, assessment models, and treatment/ intervention strategies. Students will concentrate on the application of these theories, models, and strategies in various practice settings.

SOWK 650 Leadership & Supervision in Service Organizations (3 Credit Hours)

Pre-requisites: Grade of C or better in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504, SOWK 505, and SWFI 530s, AND completion of SWFI 530 (P/F course); Or Advanced Standing Students or 5-Year Social Work Students

Course content focuses on providing knowledge, values, ethics, and skills in guiding the work of others within social service organizations. Content areas include but are not limited to staff management, administrative supervision principles, models and styles, staff development, clinical supervision, teamwork, staff selection, legal and ethical issues, evaluation and termination, mediation, and conflict resolution.

SOWK 652 Organizations, Program Development, and Evaluation (3 Credit Hours)

Pre-requisites: Grade of C or better in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504, SOWK 505, and SWFI 530s, AND completion of SWFI 530 (P/F course); Or Advanced Standing Students or 5-Year Social Work Students

This course explores interdisciplinary theories relating to processes of social change, representation, and power. Students will learn how to facilitate social change processes through community organization, advocacy, and policy practice by learning skills including participatory planning, identifying social issues, influencing decision-makers, assessing power dynamics, securing resources, building collaborations, and using traditional and social media.

SOWK 653 Community Organizing and Policy Practice (3 Credit Hours)

Pre-requisites: Grade of C or better in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504, SOWK 505, and SWFI 530s, AND completion of SWFI 530 (P/F course); Or Advanced Standing Students or 5-Year Social Work Students

This course focuses on the practice of community and political organizing designed to bring about social, economic, and racial justice. It explores interdisciplinary theories relating to processes of social change, representation, and power.

SOWK 654 Global Social Work: Reflective Practice for Justice and Peace (3 Credit Hours)

Pre-requisites: Grade of C or better in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 505, and SWFI 530s, AND completion of SWFI 530 (P/F course); Or Advanced Standing Students or 5-Year Social Work Students

This course provides an introduction to social work practice in an international context. The emphasis is on understanding cross-cultural peace-building practices using clinical skills and community action activities that build civil society structures and promote peaceful resolution of socially traumatized experiences. This course includes video conferencing.

SOWK 656 Social Work Practice with LGBTQ Populations (3 Credit Hours)

Pre-requisites: Grade of C or better in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 505, and SWFI 530s, AND completion of SWFI 530 (P/F course); Or Advanced Standing Students or 5-Year Social Work Students

This course is designed to provide students with an in-depth and critical understanding of social work practice issues related to individuals who are lesbian, gay, bisexual, transgender, and queer (+) (LGBTQ+), which includes intersex, two-spirit, demisexual, asexual, pansexual, omnisexual, their families, and the communities in which they live.

SOWK 662 Professional Development (3 Credit Hours)

This course focuses on the student's development as a social work professional and as a potential leader within the field, and the opportunities and strategies for personal professional impact. It is designed for the student who wants to develop a vision for advancing within the profession.

SOWK 663 Women in a Global Context (3 Credit Hours)

Pre-requisites: Grade of C or better in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 505, and SWFI 530s, AND completion of SWFI 530 (P/F course); Or Advanced Standing Students or 5-Year Social Work Students

This course covers understanding women in a global context, social development institutions, and women's representation within them and in related media and social media. It builds the knowledge of relevance to students of social work, women's studies, international studies, migration, and communication.

Interdisciplinary Option: Women & Gender Studies

SOWK 670 Bridging Psychodynamic Theory and Cognitive Behavioral Practice (3 Credit Hours)

Pre-requisites: Grade of C or better in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 505, and SWFI 530s, AND completion of SWFI 530 (P/F course); Or Advanced Standing Students or 5-Year Social Work Students

Outcomes: Students will learn to apply critical thinking to inform and communicate professional judgments using oral and written communication as appropriate to the practice setting. Psychodynamic theory and cognitive-behavioral theory are each associated with methods of intervention that have consistently been found to have therapeutic value for clients with a variety of psychosocial problems.

SOWK 680 Advanced Micro-Level Practice (3 Credit Hours)

Pre-requisites: Successful completion with grade of C or higher in SOWK 500, 501, 502, 503, 504, 505, and SWFI 530S; a P in SWFI 530; OR Advanced Standing Students or 5-Year Social Work Students Outcomes: Demonstrate professional use of self, reflecting knowledge of personal professional strengths, limitations, challenges, and cooperatively resolving interpersonal conflicts

Micro Practice extends foundation knowledge of generalist practice and requires critical understanding of diverse theories and their related evidence-informed practice models. Critical analysis examines these models from an anti-racist and strengths perspective in order to intervene effectively using a variety of systems perspectives in situations of increased complexity. Demonstrate understanding of discrimination patterns in society and how macro, mezzo, and micro-level oppression impacts micro-level social work practice.

SOWK 681 Advanced Mezzo & Macro Practice (3 Credit Hours)

Pre-requisites: SOWK 500, 501, 502, 503, 505, & SWFI 530, 530S; Or Advanced Standing Students or 5-Year Social Work Students Outcomes: Demonstrate self-awareness and professional behavior in engaging with individuals, teams, community groups and organizations; Understand and demonstrate effective group and team facilitation and mediation process skills that facilitate engagement and collaboration

This course will focus on integrated practice approaches that span the micro (e.g., individuals/families/groups), mezzo (e.g., communities), and macro (e.g., systems, societal) frameworks. Numerous theories and models will be examined throughout the semester. The course also explores the role of the social work profession in creating social and organizational change, as well as interprofessional and interdisciplinary efforts.

SOWK 689 Arts-based and Experiential Approaches to Social Work (3 Credit Hours)

Pre-requisites: Grade of C or better in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 505, and SWFI 530s, AND completion of SWFI 530 (P/F course); Or Advanced Standing Students or 5-Year Social Work Students Students learn about arts-based and experiential approaches in social work practice, the theories that drive and support their use, and the evidence that supports their use throughout all levels of social work practice, including the micro, mezzo, and macro levels.

SOWK 690 Independent Study (1-3 Credit Hours)

Independent studies generally consist of research, activities, and papers. Dependent on a student's needs, the course can be either 1, 2 or 3 credit hours and the requirements are adjusted accordingly. Students need to find a full-time faculty member willing to teach this course, obtain approval from the faculty member, as well as the Program Director to register for this course.

SOWK 709 Social Work and Law (3 Credit Hours)

This course focuses on of the relationship between the disciplines of social work and law. Students acquire a framework for comprehending and analyzing laws, learn to critically examine the function of law in society and examine criminal and juvenile justice; child welfare; domestic violence; and confidentiality.

SOWK 714 Philanthropy, Public Policy, and Community Change (3 Credit Hours)

Pre-requisites: Graduate Social Work; Or Advanced Standing Students or 5-Year Social Work Students

This course examines the roles that philanthropy and foundations play in advancing, influencing, and preventing social and community change. It explores relationships between public policy and philanthropic giving. Patterns of giving, policy intervention strategies, structural issues, and programmatic opportunities and constraints will be illuminated.

Course equivalencies: PHPY402/SOWK714

SOWK 722 Introduction to Alcohol and Other Drug Disorders (3 Credit Hours)

This course will inform students about the prevalence of substance use disorders. These disorders are a part of the broad spectrum of social work practice. An assumption of the course is that SUD manifests in a variety of social work practice settings, therefore all social workers must have basic skills to identify, intervene with and refer to SUD-involved clients.

SOWK 730 Immigration Dynamics and U.S. Social Policy (3 Credit Hours)

This course also offers an exploration into some of the social policy and social welfare concerns associated with contemporary migration. This examination considers the social, political, environmental, and economic causes and consequences of migration; public policy regarding migration and the rights of immigrants; and the roles of governmental and nongovernmental local, national, and international organizations. Social justice themes related to migration are also explored.

SOWK 731 Social Work Practice with Refugees and Immigrants (3 Credit Hours)

This course focuses on identification and application of clinical social work assessment and intervention with major migrant groups. It considers immigrant and refugee individuals and families currently living in the U.S., helping students build a knowledge base for effective work, especially with those experiencing violence and trauma.

SOWK 732 Migration, Social Justice, and Human Rights (3 Credit Hours)

This course offers an exploration into some of the human rights and social justice concerns associated with global migration. It addresses distinct perspectives and practices of justice as they relate to concrete ethical and justice dilemmas posed by contemporary migration, immigration policies, and the social, political, and environmental factors that contribute to voluntary and forced migration.

SOWK 733 North American Migration Dynamics, Challenges & Opportunity (1-3 Credit Hours)

This course is offered in Mexico in collaboration with IberoAmericana an opportunity for Loyola students to come together with Mexican students to study migration related issues affecting our respective countries and shared continent. Specifically, the course will focus on central themes concerning the opportunities as well as challenges to fundamental social institutions and migration dynamics of policies for North America.

SOWK 734 Social Policy and Older Adults (3 Credit Hours)

This course will focus on services issues related to geriatric case management, home care and the continuum of community based services as well as the relationship between informal and formal support. In addition to exploring direct services and programs for older adults, there will be consideration of the needs and services for family caregivers.

Outcomes:

Students in this class will demonstrate the capacity to engage in critical thinking, apply knowledge of human behavior and the social environment, engage in policy practice to advance social and economic well-being and to deliver effective social work services; and respond to contexts that shape practice

SOWK 735 Loss, Grief, and Dying (3 Credit Hours)

Losses, followed by grief reactions are present in nearly every clinical situation that Social Workers encounter. This course will help students acquire skills in helping clients (and themselves) transition through grief in response to non-death and death experiences. The course builds on knowledge of direct practice, human behavior theory, life span development, and cultural diversity.

SOWK 780 Integrative Seminar I Advanced School Mental Health Program (1 Credit Hour)

Enrollment Conditions: Students must be enrolled in the Advanced School Mental Health Certificate program. This is the first semester of a two semester first level integrative seminar for students in the Advanced School Mental Health Certificate Program. Students will have the opportunity to apply material covered in certificate program classes and receive guidance and feedback during the course of the seminar.

SOWK 781 Integrative Seminar II Advanced School Mental Health Program (2 Credit Hours)

Enrollment Conditions: Students must be enrolled in the Advanced School Mental Health Certificate program. They must have completed SOWK 780 prior to taking this course. This is the second semester of a two semester first level integrative seminar for students in the Advanced School Mental Health Certificate Program.

Outcomes:

Students will have the opportunity to apply material covered in certificate program classes and receive guidance and feedback during the course of the seminar

SOWK 782 Integrative Seminar III Advanced School Mental Health Prog (1 Credit Hour)

This is the first semester of a two semester second level integrative seminar for students in the Advanced School Mental Health Certificate Program. Students must be enrolled in the Advanced School Mental Health Certificate program.

Outcomes:

Students will have the opportunity to expand their application of material covered in certificate program classes and receive guidance and feedback during the course of the seminar

SOWK 783 Integrative Seminar IV Advanced School Mental Health Prog (2 Credit Hours)

Students must be enrolled in the Advanced School Mental Health Certificate program. They must have completed SOWK 782. This is the second semester of a two semester second level integrative seminar for students in the Advanced School Mental Health Certificate Program.

Outcomes:

Students will have the opportunity to expand their application of material covered in certificate program classes and receive guidance and feedback during the course of the seminar

SOWK 784 Evidence Based Practice in Schools (3 Credit Hours)

Students must be enrolled in the Advanced School Mental Health Certificate program. This course focuses on increasing understanding and the utilization of evidence based practice techniques in the school setting.

Outcomes:

Students will have an increased ability to apply EBP interventions in educational settings

SOWK 785 Solution-Focused Brief Therapy Techniques (3 Credit Hours)

Students must be enrolled in the Advanced School Mental Health Certificate program. This course focuses on increasing understanding and the utilization of solution-focused brief therapy techniques in school settings.

Outcomes:

Students will have an increased ability to apply solution-focused brief therapy techniques in educational settings

SOWK 786 Special Topics in School Social Work (3 Credit Hours)

Students must be enrolled in the Advanced School Mental Health Certificate program. This course will focus on different critical issues related to social work interventions in school settings.

Outcomes:

Students will gain expertise in various interventions of importance to effective social work in school settings

SOWK 787 Special Topics in School Social Work - Immersion Weekend (1 Credit Hour)

This is a one credit course that compliments SOWK 786 and provides an immersion experience related to the special topic course for that year. Students must be enrolled in the Advanced School Mental Health Certificate program. They must have completed or be concurrently enrolled in SOWK 786.

Outcomes:

Students will gain additional expertise in various interventions of importance to effective social work in school settings

SOWK 788 SMHAPP Independent Study (2 Credit Hours)

Independent study for students admitted into the SMHAPP certificate program. Restricted to SMHAPP certificate program.

SOWK 800 Statistics (3 Credit Hours)

This course is the first in a two-semester sequence of statistics courses required of all social work doctoral students. The course covers basic statistical concepts of probability, sampling distributions, confidence intervals, and statistical inference. The focus for the course is the applied use of statistical methods for the analysis of social science data using SPSS and manual calculations. In addition to covering applied statistical concepts and their application to data, the course will also critically examine the question of causality. Restricted to Social Work PhD students.

SOWK 801 Historical & Contemporary Issues in SOWK Practice (3 Credit Hours)

The course will provide a critical review and analysis of the historical development of social work practice and identify and explore contemporary issues that impact the current delivery of social work practice services. Students will read from the professional literature ranging from the early 1900s to the present; critically evaluate the development of social work practice theory, knowledge, and skills as the profession sought to define what constitutes social work practice; examine the broader social, cultural, political, economic, and other contextual forces that shaped (and were shaped by) the development of social work practice and the provision of services to individuals, families, groups, and communities. Restricted to Social Work PhD students.

SOWK 802 Grand Theories & Perspectives in SOWK Knowledge (3 Credit Hours)

This course focuses on grand theories and perspectives which guide social work practice, research, and policy. Students in this course will critically examine the grand theories and perspectives which have influenced social work in the past, currently influence social work, and will likely shape the profession of social work in the future. Through examining and critiquing the grand theories and perspectives, students will be challenged to think about how these theories do and do not address social and economic justice while also acquiring more knowledge regarding how these theories and perspectives help students better understand their substantive areas. Restricted to Social Work PhD students.

SOWK 803 Advanced Statistics (3 Credit Hours)

This is the second in a two-semester sequence of statistics courses required of all social work doctoral students. The course covers various multivariate statistical analysis techniques to test hypotheses that are most relevant to issues of social, economic, racial, and environmental justice. Restricted to Social Work PhD students.

SOWK 804 Qualitative Research (3 Credit Hours)

This course provides an overview of the fundamentals of qualitative research. It provides a detailed consideration of knowledge and skills in qualitative inquiry. The science and paradigms for qualitative inquiry in social work are examined as well as principles for qualitative inquiry design including data collection, analysis, and writing. Restricted to Social Work PhD students.

Outcomes:

Students will be able to design and implement a qualitative research project with understanding of the various methods; ability to understand and apply various methods of data analysis; identify and apply criteria for rigor and trustworthiness

SOWK 805 Research Practicum I (3 Credit Hours)

This is a two-semester course emphasizing research methodology, development, and acquisition of measurement tools if applicable, quantitative and qualitative analysis, ethical considerations, and dissemination of research. Students will carry out team-based projects using both methods across both semesters working together with the instructors of the courses. The first semester will emphasize methodology, data analysis, and developing findings, while the second semester will focus on study write-up, revisions, and preparing manuscripts for submission to peer-reviewed journals. Restricted to Social Work PhD students.

SOWK 806 Research Practicum II (3 Credit Hours)

This is a two-semester course emphasizing research methodology, development, and acquisition of measurement tools if applicable, quantitative and qualitative analysis, ethical considerations, and dissemination of research. Students will carry out team-based projects using both methods across both semesters working together with the instructors of the courses. The first semester will emphasize methodology, data analysis, and developing findings, while the second semester will focus on study write-up, revisions, and preparing manuscripts for submission to peer-reviewed journals. Restricted to Social Work PhD students.

SOWK 808 Integration of Research, Practice, & Theory in SW Scholarship (3 Credit Hours)

This course focuses on the examination of research, practice, and theory as well as the integration of these focal areas in doctoral students' substantive areas. Students will examine the research, theories, and practices that have been used in their substantive areas to gain further knowledge of the current state of their substantive areas and address key research questions. Restricted to Social Work PhD students.

SOWK 817 The Nature of Social Work Knowledge (3 Credit Hours)

Pre-requisites: PhD Social Work student

This course aims to help students understand the variety of contemporary understandings of science in the social and behavioral sciences and foundational aspects of designing research to develop conceptual frameworks for social work practice. Emphasis will be on science as a problem-solving process, with scientific knowledge development being a major link for the social worker between the roles of practitioner and researcher.

SOWK 818 Social Work Research Methodology: Overview of the Fundamentals (3 Credit Hours)

Pre-requisites: PhD Social Work student

This course presents an overview and critical analysis of the research methods commonly used in social work and other related disciplines. The course will involve reading about these research methods, critically analyzing a variety of research reports, and applying research methods to an area relevant to the advancement of knowledge about social work selected by each student.

SOWK 820 Social Theory & Social Change (3 Credit Hours)

Pre-requisites: PhD Social Work student

This course will explore the evolution and development of macro practice in the United States with a focus on theory and methods that undergird community practice and policy practice. Course content will include a conceptual history of macro practice within social work, including the unique role of macro practice methods in carrying out the mission of the social work profession. The role of different forms of power, at the institutional and social level, as well as values and ethical dilemmas associated with macro practice and their relation to social work, will also inform the course.

SOWK 822 Organizational Analysis (3 Credit Hours)

This course explores the ways in which an organizational lens can be usefully applied in the context of social welfare-related research. The course will provide an overview of the ways in which scholars have approached the study of organizations and highlight theoretical traditions useful for understanding the work of human service organizations.

SOWK 827 Doctoral Study (0 Credit Hours)

Students register for this course during the semester they are taking their comprehensive exams and any semesters they do not yet have an approved proposal.

SOWK 828 Teaching Seminar and Practicum I (3 Credit Hours)

This course is designed to provide doctoral students with a thorough overview of teaching within a university setting from social justice and anti-racist perspective and the practical experience of preparing and teaching a course. This course focuses on theories of learning, the application of these theories to the teaching process, and the teaching process itself. SOWK 829 is a continuation of this content. Restricted to Social Work PhD students.

SOWK 829 Teaching Seminar & Practicum II (3 Credit Hours)

This second course on teaching includes a supervised learning experience with a teaching mentor and regular seminars on instructional methodologies, facilitating discussion and active learning in the classroom, strategies for evaluating student performance, and discussions on managing sensitive and/or challenging issues in the classroom, specifically issues related to social identities, diversity, oppression, and social justice. Restricted to Social Work PhD students.

Social Work Field Instruction (SWFI)

Discover, search, courses!

SWFI 530 Internship I & Simulated Experience (0.5 Credit Hours)

The goal of the internship education program is to provide an integrative experience that brings classroom theory to practice. The internship education program will challenge the student to integrate professional values and personal perspectives.

Outcomes:

1) Understand the professional purpose, values, and ethical implications of social work practice; 2) develop knowledge of the multiple frames of reference that reflect the organization and diversity of the profession

SWFI 530S Integrative Seminar (1 Credit Hour)

This course is the first of two seminars that serve to enrich students' internship experience. The focus of this course is upon experiences and progress of the student in the first semester of advanced internship and the relationship of the internship experience to specific advanced practice class content.

Course equivalencies: SOWK 362/SWFI 530S

Outcomes:

1) Integrate classroom knowledge and skills into the practice setting; 2) reflect on internship learning experiences and growth of professional sense of self

SWFI 531 Internship II & Simulated Experience (0.5 Credit Hours)

The goal of the internship education program is to provide an integrative experience that brings classroom theory to practice. The internship education program will challenge the student to integrate professional values and personal perspectives.

Outcomes:

1) Understand the professional purpose, values, and ethical implications of social work practice; 2) develop knowledge of the multiple frames of reference that reflect the organization and diversity of the profession

SWFI 630 Field Instruction III & Simulated Experience (1 Credit Hour)

The goal of the field education program is to provide an integrative experience that brings classroom theory to the field of practice. The field education program will challenge the student to integrate professional values and personal perspectives.

Outcomes:

1) Understand the professional purpose, values, and ethical implications of social work practice; 2) develop knowledge of the multiple frames of reference that reflect the organization and diversity of the profession

SWFI 630S Integrative Seminar (2 Credit Hours)

This course is the second of two seminars that serve to enrich students' field experience. The focus of this course is upon experiences and progress of the student in the first semester of advanced field and the relationship of the field experience to specific advanced practice class content.

Outcomes:

1) Integrate classroom knowledge and skills into the field setting; 2) reflect on field learning experiences and growth of professional sense of self

SWFI 631 Field Instruction IV & Simulated Experience (1 Credit Hour)

The goal of the field education program is to provide an integrative experience that brings classroom theory to the field of practice. The field education program will challenge the student to integrate professional values and personal perspectives.

Outcomes:

1) Understand the professional purpose, values, and ethical implications of social work practice; 2) develop knowledge of the multiple frames of reference that reflect the organization and diversity of the profession

SWFI 632 Internship Instruction III & Simulated Experiences (0.5 Credit Hours)

The goal of the internship education program is to provide an integrative experience that brings classroom theory to practice. The internship education program will challenge the student to integrate professional values and personal perspectives.

Outcomes:

1) Understand the professional purpose, values, and ethical implications of social work practice; 2) develop knowledge of the multiple frames of reference that reflect the organization and diversity of the profession

SWFI 632S Integrative Seminar (1 Credit Hour)

This course is the second of two seminars that serve to enrich students' internship experience. The focus of this course is upon experiences and progress of the student in the first semester of advanced internship and the relationship of the internship experience to specific advanced practice class content.

Outcomes:

1) Integrate classroom knowledge and skills into the practice setting; 2) reflect on internship learning experiences and growth of professional sense of self

SWFI 633 Internship Instruction IV & Simulated Experiences (0.5 Credit Hours)

The goal of the internship education program is to provide an integrative experience that brings classroom theory to practice. The internship education program will challenge the student to integrate professional values and personal perspectives.

Outcomes:

1) Understand the professional purpose, values, and ethical implications of social work practice; 2) develop knowledge of the multiple frames of reference that reflect the organization and diversity of the profession

SWFI 640 Post Masters Field Inst I (0 Credit Hours)

Students' externship experience is the signature pedagogy of the social work profession. This course is designed to enhance the integration of core components of social work knowledge (e.g., social-work informed developmental theory and practice theory) with students' practical experience in their externships in a public school setting. The goal of the externship program is to provide an integrative experience that brings classroom theory to the field of practice. The externship program will challenge the student to integrate professional values and personal perspectives to enhance their understanding of the true meaning of social work. Students that are in the Post-MSW PEL preparation program participate in an academic year of externship in a public school setting. In accordance with the CSWE (Council on Social Work Education) accreditation standards, students take courses that focus on understanding professional purpose, values, and ethical implications of social work practice; developing knowledge of the multiple frames of reference that reflect the organization and diversity of the profession; developing specialist advanced-level skill in the practice of social work with individuals, families, groups, organizations, and communities; and fostering an appreciation of the role of research for evaluating practice, programs, and service delivery, while obtaining practical experience in the school setting.

SWFI 640S Post Masters Field Seminar I (2 Credit Hours)

On-line filed seminar to support students concurrently enrolled in SWFI 640 as part of the Post Masters PEL program. Restricted to students in the Post Masters PEL program.

SWFI 641 Post Masters Field Instruction II (0 Credit Hours)

Students' externship experience is the signature pedagogy of the social work profession. This course is designed to enhance the integration of core components of social work knowledge (e.g., social-work informed developmental theory and practice theory) with students' practical experience in their externships in a public school setting. The goal of the externship program is to provide an integrative experience that brings classroom theory to the field of practice. The externship program will challenge the student to integrate professional values and personal perspectives to enhance their understanding of the true meaning of social work. Students that are in the Post-MSW PEL preparation program participate in an academic year of externship in a public school setting. In accordance with the CSWE (Council on Social Work Education) accreditation standards, students take courses that focus on understanding professional purpose, values, and ethical implications of social work practice; developing knowledge of the multiple frames of reference that reflect the organization and diversity of the profession; developing specialist advanced-level skill in the practice of social work with individuals, families, groups, organizations, and communities; and fostering an appreciation of the role of research for evaluating practice, programs, and service delivery, while obtaining practical experience in the school setting.

SWFI 641S Post Masters Field Seminar II (2 Credit Hours)

Online field seminar to support students concurrently enrolled in SWFI 641 as part of the Post Masters PEL program. Restricted to students in the Post Masters PEL program.

SWFI 730 Specialized Field Internship (1 Credit Hour)

Pre-requisites: Restricted to students in the post masters CADP program. Specialized field internship to fulfill the requirements for a School of Social Work certificate program.

Sociolegal Studies (SLGL)

Discover, search, courses!

SLGL 200 Introduction to Sociolegal Studies (3 Credit Hours)

The course will introduce students to several complementary perspectives from the interdisciplinary "Law and Society" movement: the sociology of law; the psychology of justice; the anthropology of disputing; the economics of rulemaking; and the institutional politics of courts and legislatures.

Interdisciplinary Option: Sociolegal Studies

Outcomes:

Compare & critique different social science theories of law; understand the role of law in society and the intersection of law, politics, economics, and culture

SLGL 399 Independent Study (3 Credit Hours)

This course provides students with the opportunity to work under the direction of a faculty member on a particular area of interest that is not part of the Sociolegal Studies minor's usual curriculum. Program permission required. Students will gain an understanding of a specific area of sociolegal studies through the close reading of selected texts or through directed research.

Interdisciplinary Option: Sociolegal Studies

Sociology (SOCL)

Discover, search, courses!

SOCL 100 Urban Field Studies: Changing Chicago (3 Credit Hours)

Fieldwork-based course exploring how communities are shaped by social, economic, and political forces. Particular emphasis is placed on how grass-roots activism and community-based organizations affect social change. Taught in cooperation with Loyola's Center for Urban Research and Learning (CURL), students visit with community leaders, politicians, advocates religious leaders and others working for positive change in the city and suburbs.

SOCL 101 Society in a Global Age (3 Credit Hours)

This is a foundational course in the social sciences which explores the effect of globalization on everyday life in the United States and elsewhere, using the basic perspectives and methodologies of sociology.

Knowledge Area: Foundational Societal Knowledge

Interdisciplinary Option: African Studies and the African Diaspora, Black World Studies

SOCL 121 Social Problems (3 Credit Hours)

Requirement: ANTH 100, PLSC 102, PSYC 100 or SOCL 101 for students admitted to Loyola University for Fall 2012 or later. No requirement for students admitted to Loyola prior to Fall 2012 or those with a declared major or minor in the Department of Anthropology, Department of Criminal Justice, Department of Economics, Department of Psychology, Department of Political Science, the Department of Sociology, Human Services or the School of Nursing. This course is an opportunity to examine major issues facing society. In addition to analyzing the roots of social problems, the course addresses social policy concerns and explores solutions.

Knowledge Area: Tier 2 Societal Knowledge

Interdisciplinary Option: Human Services, Peace Studies

Course equivalencies: SOCL121/PAX 121

Outcomes:

Students will be able to critically examine the impact of a social problem and its possible solutions, to integrate knowledge gleaned from a variety of disciplines, to find and utilize relevant data and research in defining issues and solutions, and to view social problems from macro and micro perspectives as a means of applying workable solutions for the issues facing society

SOCL 122 Race and Ethnic Relations (3 Credit Hours)

Requirement: ANTH 100, PLSC 102, PSYC 100 or SOCL 101 for students admitted to Loyola University for Fall 2012 or later. No requirement for students admitted to Loyola prior to Fall 2012 or those with a declared major or minor in the Department of Anthropology, Department of Criminal Justice, Department of Economics, Department of Psychology, Department of Political Science, the Department of Sociology, Human Services or the School of Nursing. This course examines the development of cultural, society, and self-understanding by exploring the social construction of race in the United States. The course explores how social constructions of race affect interpersonal relations, laws, policies, and practices in various racial and ethnic communities.

Knowledge Area: Tier 2 Societal Knowledge

Interdisciplinary Option: African Studies and the African Diaspora, Asian Studies, Black World Studies, Human Services, Italian American Studies, Peace Studies, Race and Ethnicity

Course equivalencies: X-SOCL122/ASIA122/BWS 122/PAX

Outcomes:

Students will be able to demonstrate understanding of the conditions which have worsened racial tensions as well as how social movements have been successful at eradicating racially oppressive laws and working towards a just society

SOCL 123 Mass Media and Popular Culture (3 Credit Hours)

Requirement: ANTH 100, PLSC 102, PSYC 100 or SOCL 101 for students admitted to Loyola University for Fall 2012 or later. No requirement for students admitted to Loyola prior to Fall 2012 or those with a declared major or minor in the Department of Anthropology, Department of Criminal Justice, Department of Economics, Department of Psychology, Department of Political Science, the Department of Sociology, Human Services or the School of Nursing. This course examines the connections between the media of mass communication and multiple forms of popular art and culture. Topics considered include the social, political and cultural organization of mass communication and its impact on values, expectations, and life styles of contemporary society.

Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies, Women & Gender Studies

Course equivalencies: SOCL123/WSGS123/IFMS123

Outcomes:

Students will be able to demonstrate understanding of the social relationships between mass media and the general population

SOCL 125 Chicago: Urban Metropolis (3 Credit Hours)

Requirement: ANTH 100, PLSC 102, PSYC 100 or SOCL 101 for students admitted to Loyola University for Fall 2012 or later. No requirement for students admitted to Loyola prior to Fall 2012 or those with a declared major or minor in the Department of Anthropology, Department of Criminal Justice, Department of Economics, Department of Psychology, Department of Political Science, the Department of Sociology, Human Services or the School of Nursing. This course explores the development of Chicago metropolitan region from the 1830's to the present day. Students will explore the urban area not only through texts, but also through fieldwork.

Knowledge Area: Tier 2 Societal Knowledge

Interdisciplinary Option: African Studies and the African Diaspora, Black World Studies, Urban Studies

Course equivalencies: SOCL125/URB125

Outcomes:

Students will be able to demonstrate understanding of the geography, history and people of the Chicago metropolitan region

SOCL 127 Social Analysis and Social Action (3 Credit Hours)

This course helps students who are volunteering at local congregations and agencies better understand the communities and issues they will encounter in Chicago. It emphasizes the analysis of "social solutions" to social problems as well as personal reflection and action.

Interdisciplinary Option: Peace Studies

This course satisfies the Engaged Learning requirement.

Course equivalencies: X-SOCL127/PAX127

Outcomes:

Analyzing and acting on social issues

SOCL 145 Religion & Society (3 Credit Hours)

Requirement: ANTH 100, PLSC 102, PSYC 100 or SOCL 101 for students admitted to Loyola University for Fall 2012 or later. No requirement for students admitted to Loyola prior to Fall 2012 or those with a declared major or minor in the Department of Anthropology, Department of Criminal Justice, Department of Economics, Department of Psychology, Department of Political Science, the Department of Sociology, Human Services or the School of Nursing. This course examines how religion and society interact.

Knowledge Area: Tier 2 Societal Knowledge

Interdisciplinary Option: Catholic Studies, Interreligious and Interfaith Studies

Outcomes:

Students will be able to demonstrate understanding of how individual behavior, organizations, and society as a whole are affected by religious ideas and institutions, and how religion is itself changed by its encounter with changing social circumstances

SOCL 171 Sociology of Sex and Gender (3 Credit Hours)

Requirement: ANTH 100, PLSC 102, PSYC 100 or SOCL 101 for students admitted to Loyola University for Fall 2012 or later. No requirement for students admitted to Loyola prior to Fall 2012 or those with a declared major or minor in the Department of Anthropology, Department of Criminal Justice, Department of Economics, Department of Psychology, Department of Political Science, the Department of Sociology, Human Services or the School of Nursing. This course explores the social organization of sex and gender.

Knowledge Area: Tier 2 Societal Knowledge

Interdisciplinary Option: Human Services, Women & Gender Studies

Course equivalencies: X-SOCL271/WOST271/WSGS271

Outcomes:

Students will be able to situate their pre-conceived experiences of the naturalness of gender in a particular historical and cultural context

SOCL 205 Sociological Thought (3 Credit Hours)

This course examines classical and contemporary sociological theories and uses them as frameworks for understanding modern society. Such social theories attempt to explain and understand the world, as well as inspire further research and theory.

Interdisciplinary Option: German Studies

Outcomes:

The class provides students with theoretical foundations for understanding social organizations as well as the social processes that transform societies

SOCL 206 Principles of Social Research (3 Credit Hours)

This course is an introduction to the basic research methodologies of sociology. A variety of methods used in sociological analysis and data generation will be considered. Students learn how to select and use methodologies appropriate for various research projects. They will be able to critically evaluate existing research and select appropriate techniques to undertake original research.

Interdisciplinary Option: Human Services, Urban Studies

Outcomes:

Students will learn how social science research is conducted

SOCL 210 Gender and Work (3 Credit Hours)

This course looks at the nature of work through the lens of gender. It considers how male and female labor force participation has changed over time. It examines the ways working families are transformed when women combine employment with domestic responsibilities and child care, or when men's jobs no longer provide a family wage.

Interdisciplinary Option: Women & Gender Studies

Course equivalencies: X-SOCL210/WOST210/WSGS210

Outcomes:

Students learn how gender has been and remains a fundamental organizational principle in the workplace and the labor force

SOCL 212 Patterns of Criminal Activity (3 Credit Hours)

Students are taught to examine the relevance of criminological theories to patterns of criminal activity, to efforts to control criminals, and to prevent crime.

Outcomes:

Students learn how to analyze neighborhoods to identify environments of increased crime risk and relative safety

SOCL 215 Law & Society (3 Credit Hours)

This course trains students to examine the law as a sociological concept and to look at the relationship between the legal system and society. A critical concern is whether changes in the legal system reflect societal change or do changes in the legal system stimulate change in society.

Interdisciplinary Option: Sociolegal Studies

Outcomes:

Students learn to recognize the close linkage between the law and social structure; They also gain experience examining legal texts and decisions

SOCL 216 The Sociology of Violence (3 Credit Hours)

The threat of violence is a significant concern for individuals in many societies. In this course, violence will be studied as a social phenomenon. Topics of particular concern include: family violence, gang violence and terrorism.

Interdisciplinary Option: Peace Studies, Urban Studies

Course equivalencies: X-SOCL216/PAX 291

Outcomes:

Students learn to examine the causes of violence from a sociological perspective; They also learn methods to reduce violence and the harm it causes

SOCL 220 Topics in the Life Cycle (3 Credit Hours)

An examination of the stages of the life cycle (childhood, young adulthood, parenthood, later adulthood, etc) and how such stages are defined and interpreted by social and institutional forces.

Outcomes:

Students will gain understanding of the role that individual's societies and institutions play in the definition of the life cycle and the implications it has for society

SOCL 221 Sociology and Culture of the Life Course (3 Credit Hours)

Life course studies emerged in response to the sociological need to understand how social change intersects with the aging process. Social and cultural contexts, individual experience and agency, and historical time and place are elements in the construction of a life and the social relationships that make it up. Learn about programs and policies pertinent to an aging society.

Interdisciplinary Option: Human Services

Course equivalencies: X-ANTH221/SOCL221

Outcomes:

Students learn sociological concepts and theories relevant to the life course and how they help us understand local and global changes

SOCL 222 Poverty & Welfare in America (3 Credit Hours)

In this course, students learn to think critically about the character, causes and responses to poverty in American society, using both historical and contemporary evidence.

Outcomes:

Students will understand the strengths and limitations of American welfare policy in relation to poverty

SOCL 225 Sociology of Health Care (3 Credit Hours)

This course examines the sociology of health care with particular attention to: social and psychological factors; health care professionals; inter-personal relations in health care; the organization and use of health services; and the relationship between aging and health.

Interdisciplinary Option: Bioethics

Course equivalencies: X-SOCL225/BIET225

Outcomes:

Students will understand the role that social forces play in the health and wellness of individuals, the community and society

SOCL 226 Science, Technology, & Society (3 Credit Hours)

This course serves as a broad introduction to the social study and analysis of science and technology in society. It examines how scientific knowledge and technologies are created and constructed and how they influence and are influenced by society.

Outcomes:

Students will be able to understand how scientific knowledge and technologies are developed in particular historical and cultural contexts and analyze their impact on our daily lives

SOCL 228 Sociology of the African-American Experience (3 Credit Hours)

A sociological inquiry into the historical and contemporary experience of African-Americans. Social movements and social change, urban and institutional processes, social values and collective behavior, and African-Americans and public policy are among the topics explored.

Interdisciplinary Option: African Studies and the African Diaspora, Black World Studies, Race and Ethnicity

Course equivalencies: X-SOCL228/BWS 228

Outcomes:

Students will gain a deeper understanding of the experiences that African-Americans have in American society and of the social, political and institutional forces that have contributed to the historical and contemporary experience of African-Americans

SOCL 230 Self & Society (3 Credit Hours)

This course examines the relationships between the self as a social product and the larger society in which that self is socialized, develops and expresses itself. Various theories of selfhood are explored.

Outcomes:

Students will come to appreciate how selfhood, their own and others, is a product of historical factors as well as social contexts such as class, gender, race and ethnicity

SOCL 231 Childhood and Society (3 Credit Hours)

This course looks at the social construction of childhood, the impact of parents, the media, peer groups, and educational institutions as well as changing social attitudes about the place of children in society.

Interdisciplinary Option: Human Services

Outcomes:

Students will gain a better understanding of the historical and social manner in which childhood is constructed and the impacts of various social institutions, family, religion, media, education on childhood development

SOCL 234 City, Suburbs & Beyond (3 Credit Hours)

This course studies the historical emergence of cities, focusing on the ecological, demographic, and organizational processes involved in the continuing growth and change of metropolitan areas and in the relationship of a metropolitan area to the surrounding region.

Interdisciplinary Option: Human Services, Race and Ethnicity, Urban Studies

Course equivalencies: X-SOCL234/URB234

Outcomes:

Students will understand fundamental facts and theories about the character and development of cities and urban regions

SOCL 235 Communities in a Global Age (3 Credit Hours)

This course examines communities sociologically, both as a concept and as they exist in society. The course covers urban, racial/ethnic, religious, territorial, utopian, ideological and web-based communities, and their strengths and limitations in a rapidly changing global world.

Interdisciplinary Option: Urban Studies

Outcomes:

Students will identify, describe and analyze communities using sociological concepts and be able to assess the mechanisms by which old and new communities are being formed as well as their consequences for social life

SOCL 236 Population Studies (3 Credit Hours)

This course introduces the study of demography by examining trends of fertility, work, marriage, migration and mortality.

Interdisciplinary Option: Human Services

Course equivalencies: SOCL236 / SOCL285

Outcomes:

Students will gain an understanding of how the size, composition and dynamics of a population influence the social, economic and political structure of individual nations and the world

SOCL 237 Professions and Society (3 Credit Hours)

Work involving high levels of expertise—medical, legal, technical, and much else— is a critical component of modern society. This course examines how professional work is structured, the way professionals are trained and organized, the privileges and responsibilities of professional work, and the role of conflicts over expertise in modern society.

Outcomes:

Students will gain an understanding of how work based on knowledge and expertise is organized and on the social and economic factors that contribute to the position of professionals in society

SOCL 239 Understanding Bias and Inclusivity (3 Credit Hours)

Using an intersectional lens, students learn about how privilege, power, and oppression shape ourselves, perceptions of others, and our social world. They consider how ourselves and others are shaped by and operate within the larger social system. Students explore their identities, values, and biases. Students engage in self-reflection to increase self-awareness. Demonstrate self-awareness of identities and values, including the value of difference; Engage in intergroup dialogue; Articulate how personal power can be used to create change.

Interdisciplinary Option: Women & Gender Studies

Course equivalencies: X - PSYC 239/ SOCL 239

Outcomes:

Identify feelings about course topics

SOCL 240 Families (3 Credit Hours)

Contemporary family structures encompass a variety of living arrangements and social relationships. This course considers differences and similarities among the various family types and explores the social, cultural and economic forces structuring family life.

Interdisciplinary Option: Human Services, Women & Gender Studies

Course equivalencies: X-SOCL240/WOST242/WSGS242

Outcomes:

Students will develop an expanded understanding of the varieties of family arrangements and the connections between family life and the wider social, political economic environment

SOCL 245 Sociology of Education (3 Credit Hours)

This course is a rigorous introduction into the scholarly traditions and contemporary research developments in the sociology of education. Topics include: educational stratification and inequality, how educational institutions function and with what policy implications, and social psychology/human development.

Interdisciplinary Option: Race and Ethnicity

Outcomes:

Identify areas of research interest; trace connections to studies in the field; analyze and evaluate policy effectiveness; evaluate the capacity and potential for institutions to support efforts at social justice

SOCL 247 Sociology of Culture (3 Credit Hours)

This course examines the social production, consumption, and use of culture and cultural objects, especially in the fields of literature, art, music, mass media and religion.

Outcomes:

Students will learn sociological methods of analyzing culture and cultural objects, and will understand the social organization of cultural production and consumption

SOCL 250 Inequality in Society (3 Credit Hours)

This course examines the manner in which contemporary society is divided by race, ethnicity, class, sexuality and gender, and the impact of social institutions on these divisions. An emphasis will be placed on income/wealth differences, status differences, class conflict and social conflict over time.

Knowledge Area: Tier 2 Societal Knowledge

Interdisciplinary Option: African Studies and the African Diaspora, Asian Studies, Black World Studies, Human Services, Peace Studies, Race and Ethnicity, Women & Gender Studies

Course equivalencies: ASIA/AFR/SOCL/WSGS 250

Outcomes:

Students will acquire a better understanding of social inequality and what can be done to make society more just

SOCL 251 Peoples of China: Their Cultures and Customs (3 Credit Hours)

This class introduces China's cultural diversity and unity as a whole. It provides a general overview of cultural mappings in China, and a detailed study of significant ethnic minorities.

Knowledge Area: Tier 2 Societal Knowledge

Interdisciplinary Option: Asian Studies, Chinese Language & Culture, Global Studies

Course equivalencies: SOCL251/ASIA252/INTS251

Outcomes:

Students will gain the ability to perceive cultural phenomena in a comparative framework and understand cultural differences more deeply

SOCL 252 Global Inequalities (3 Credit Hours)

This course examines inequality on a global scale, focusing on the impact of globalization processes on race, class and gender inequalities here and abroad.

Interdisciplinary Option: Global Studies, Human Services, Race and Ethnicity

Outcomes:

Students will analyze how race, class and gender inequalities influence each other across national boundaries, and will recognize global causes and consequences of inequality

SOCL 255 Deviance and Social Control (3 Credit Hours)

This course is a socio-historical look at definitions of deviant behavior and individuals, an examination of techniques of social control, and an analysis of specific forms of deviant behavior such as crime and mental illness.

Interdisciplinary Option: Human Services

Outcomes:

Students learn to analyze how history, science, and philosophy combine to define the nature of deviant behavior and to identify deviant individuals

SOCL 258 Confronting Homelessness: Local to Global (3 Credit Hours)

Pre-requisites: SOCL 101 or PSYC 100 or PLS 102 or ANTH 100 The student will be able to discuss framings of the causes of homelessness and evaluate different policy approaches for addressing it while contributing work to a local agency

Who are homeless people in the United States and beyond? Why are they homeless? What is being done to address the issues of homelessness?

This course addresses these questions from a variety of disciplinary perspectives. As an "engaged learning" course, students will also learn by assisting at various agencies.

Interdisciplinary Option: Urban Studies

SOCL 260 Power in Society (3 Credit Hours)

This course focuses on sociological theories and case studies of power, authority, and social change. It explores the ways in which power relations perpetuate social inequality and the ways in which social conflicts and power struggles transforms society.

Outcomes:

Students learn about the structures of power in economic systems, political systems, and organizations; the cultural and ideological underpinnings of power relationships; and political struggles for social change

SOCL 261 Social Movements & Soc Change (3 Credit Hours)

This course examines the dynamics of collective behavior and movements promoting social change.

Interdisciplinary Option: Peace Studies, Sociolegal Studies

Outcomes:

Students will demonstrate understanding of competing explanations of social movements and social change, and will be able to test various theories by analyzing historical movements for change

SOCL 262 Mvmts for Soc Justice: 60s & Beyond (3 Credit Hours)

This course focuses on movements for social justice and human rights from the 1960s to the present.

Interdisciplinary Option: Human Services, Women & Gender Studies

Outcomes:

Students gain an understanding of how and why such movements emerged and developed the effectiveness of various strategies, and the impact of movements on American society

SOCL 263 Political and Social Movements in China (3 Credit Hours)

This course examines historical and contemporary movements pursuing political, economic and social reforms in China. It studies both state-sponsored and voluntary movements.

Interdisciplinary Option: Global Studies

Course equivalencies: SOCL263/INTS263

Outcomes:

Students will gain a deeper understanding of China's ongoing transformation, and will learn how to develop their own scholarly analysis of such social change

SOCL 265 Globalization & Society (3 Credit Hours)

This course examines the nature of contemporary globalization and considers how it influences communities, nations and the world.

The course examines the positive and negative consequences of globalization and the global justice movements that have emerged seeking more equality, tolerance and environmental stewardship.

Interdisciplinary Option: Global Studies, Urban Studies

This course satisfies the Engaged Learning requirement.

Outcomes:

Students learn how economic, political and cultural aspect of globalization impact society in an increasingly interconnected world

SOCL 266 Development and Social Change in Modern China (3 Credit Hours)

This course examines change and development in modern China from the late Qing period to the present, focusing on the movement from a planned economy to a market-based economy. Outcome: Students will gain knowledge of China's economic development path, and will apply gender and/or class-based analysis to patterns of social change.

Interdisciplinary Option: Asian Studies, Global Studies, Women & Gender Studies

SOCL 267 Italy Today (3 Credit Hours)

Pre-requisites: One Tier I Foundational Social and Cultural Knowledge Core course: SOCL 101, ANTH 100, PLSC 102, or PSYC 100 Italy Today traces the nation's extraordinary transformation from the ashes of World War II to the leading economic and cultural power it is today and analyses a broad range of issues in contemporary Italy, such as Catholicism, gender, family, emigration and immigration, regional identities, media and material culture

No course description is available

Interdisciplinary Option: Global Studies, Italian American Studies, Italian Studies

Outcomes:

Understand the transformation of Italy since WWII Think critically about issues such as stereotypes, regional identities, and diversity

SOCL 270 Sociology of Science (3 Credit Hours)

This course examines science as a distinctive form of knowledge and social organization.

Outcomes:

Students will be able to understand science as a human, social enterprise and its relationship to society

SOCL 272 Environmental Sociology (3 Credit Hours)

This course examines the distinctively social aspect of the relationship of people to their environments, both built and natural.

Interdisciplinary Option: Bioethics, Environmental Studies, Human Services, Peace Studies, Urban Studies

Course equivalencies: X-SOCL272/ESP272PAX 272BIET272

Outcomes:

Students will recognize the role that both social and physical factors play in the environmental problems facing the world; Students will also develop critical thinking skills needed to evaluate statements and policy proposal to improve environmental quality

SOCL 275 The Sociology of Consumption (3 Credit Hours)

This course examines the profound ways society and individuals have been transformed by the abundance of consumer goods and mass media that encourage buying these good.

Interdisciplinary Option: Urban Studies

Outcomes:

Student will gain a deeper understanding of the nature and origins of contemporary consumer society and the ways in which consumerism impacts society and individuals

SOCL 276 The Sociology and Politics of Food (3 Credit Hours)

Explores the impact of globalized economic, political, and social relationships through the prism of food. Considers the cultural and ideological dimensions of food, the structure of food production and consumption, and responses to the global food system.

Interdisciplinary Option: Urban Studies

Outcomes:

Students will gain awareness of themselves as consumers of food and food products

SOCL 278 Global Health (3 Credit Hours)

This course addresses the underlying social, economic, political, and cultural mechanisms driving some of the leading issues in global health today; including the rise of non-communicable diseases in low and middle income countries, neglected infectious diseases, human resources for health, and access to global pharmaceuticals.

Interdisciplinary Option: Bioethics

Outcomes:

Students will become familiar with evaluating the global health policy process, and debating possible routes to achieving health equity

SOCL 280 Topics in Contemporary Soc (3 Credit Hours)

The course examines selected contemporary sociological issues. Topics addressed represent specialized or newly developing areas of sociological inquiry. Topics will vary from semester to semester.

Interdisciplinary Option: Urban Studies

Outcomes:

Students gain insights into contemporary social issues and learn how to use the concepts, theory and methods of sociology to examine them

SOCL 281 Current Issues in Medical Education (1 Credit Hour)

Pre-requisites: Sophomore Standing or Above/Instructor Permission

This class is an opportunity to examine selected reform and innovation movements facing health professional education and training. Sophomore standing or above is required.

Outcomes:

Students will demonstrate critical analysis of selected reforms and innovations in health professional education and training

SOCL 301 Statistics for Social Research (3 Credit Hours)

Pre-requisites: SOCL 206 The course is a comprehensive introduction to statistical analysis in social research

Topics include: univariate, bivariate, and multivariate analysis, computer statistical applications and interpretation of results

Interdisciplinary Option: Human Services

Outcomes:

Students will demonstrate understanding of statistical thinking and data analysis techniques and be able to use them to evaluate existing research and conduct original research

SOCL 302 Qualitative Research (3 Credit Hours)

An introduction to the major qualitative methods of social inquiry.

Participant observation, interviewing, historical analysis, and content analysis, as well as ethical issues of field research are studied.

Outcomes:

Students will gain understanding of important methods of data collection and analysis common in social science research; Students will gain experience using these techniques to conduct research and evaluate the research of others

SOCL 304 Global Civil Society and Social Movements (3 Credit Hours)

This course focuses on global civil society groups (both advocacy groups or apolitical) and on social movements that seek to fight injustices.

We discuss a variety of examples of civil society projects ranging from monitoring government corruption and promoting micro-credit to organizing transnational protest campaigns.

Interdisciplinary Option: Global Studies

Course equivalencies: X-GLST 304/SOCL 304

Outcomes:

Students will demonstrate a comprehension of the dynamics of global civil society and social movements, both for cases discussed in class and to material from outside class

SOCL 306 International Development (3 Credit Hours)

This course provides an interdisciplinary overview of the international development system and issues related to development in those countries variously referred to as third world, developing, underdeveloped, or peripheral countries.

Interdisciplinary Option: Global Studies

Course equivalencies: X-GLST 306/SOCL 306

Outcomes:

Students will develop a fundamental knowledge of the various factors that are considered to help or hinder development

SOCL 335 Urban Semester Seminar (3 Credit Hours)

Pre-requisites: Junior or senior standing

Students explore how cities work through texts, field trips, and guest speakers, and help find solutions to pressing urban issues. They fulfill civic engagement core value requirement.

Interdisciplinary Option: Urban Studies

This course satisfies the Engaged Learning requirement.

Course equivalencies: X-SOCL335/PLSC335

Outcomes:

Students will understand and address inequities in urban communities, and identify avenues of leadership and civic engagement in contemporary cities

SOCL 365 Social Theory & Social Research (3 Credit Hours)

Pre-requisites: SOCL 205, 206, 301, and senior standing, or permission of instructor or chair

In this capstone course, each student designs and conducts an empirical research project resulting in a senior research paper.

Outcomes:

Student demonstrate mastery of sociological theory and methods by writing a research paper bringing a full complement of sociological skills to bear on an issue of substantial theoretical and/or practical importance

SOCL 370 Undergrad Seminar-Spec Topics (3 Credit Hours)

Using a seminar format, the course undertakes an in-depth study of selected contemporary sociological issues in depth. Topics addressed represent specialized or newly emerging areas of sociological inquiry and will vary from semester to semester.

Outcomes:

Students have opportunity to examine contemporary social issues in a seminar environment and learn how to use the concepts, theory and methods of sociology to examine them

SOCL 372 Directed Readings (3 Credit Hours)

Pre-requisites: Permission of instructor or chair

Independent study of a selected body of sociological literature on a topic defined by the student in collaboration with a faculty advisor.

Outcomes:

Student gains in-depth knowledge of a selected sub-field of sociology

SOCL 380 Internship (3-6 Credit Hours)

Pre-requisites: Permission of instructor or chair

Supervised field experience for students working in a selected community organization, government agency, social agency, or business.

Interdisciplinary Option: Human Services

This course satisfies the Engaged Learning requirement.

Outcomes:

Students have opportunity to apply the skills and analysis of sociology to a concrete situation

SOCL 380I Internship: Interreligious & Interfaith Studies Focus (3 Credit Hours)

An internship in an interreligious or multireligious setting. The student will also write an analysis of the ways diverse religious traditions interact in practical settings. Restricted to IRIF minors.

Interdisciplinary Option: Interreligious and Interfaith Studies

Course equivalencies: X-IRIF 380/SOCL 380I

Outcomes:

This capstone experience is intended to give students an opportunity to experience and reflect on developing interreligious cooperation in the contemporary world

SOCL 397 Independent Study Projects (3 Credit Hours)

Independent study of a topic delineated by the student in collaboration with an individual faculty member.

Outcomes:

Student gains experience and expertise in defining and conducting independent scholarly work

SOCL 398 Independent Study Projects (1-6 Credit Hours)

Independent research done in collaboration with a faculty member on a sociological topic defined by the student in consultation with a faculty member.

Outcomes:

Student gains experience and expertise conducting independent research

SOCL 399 Independent Study Projects (3 Credit Hours)

Advanced independent research in collaboration with a faculty member on a sociological topic relevant to the student. Limited to senior Sociology majors.

Outcomes:

Student gains experience and expertise conducting independent research

SOCL 403 Sociological Perspectives I (3 Credit Hours)

Important theoretical and methodological concerns will be discussed with particular attention paid to how these concerns affect substantive areas in sociology.

Outcomes:

Students will gain familiarity with major themes that will shape their graduate education in sociology

SOCL 404 Sociological Perspectives II (3 Credit Hours)

Faculty will discuss their intellectual biographies and work that is of current interest to them.

Outcomes:

Students will gain familiarity with the range of substantive, theoretical and methodical concerns of the department's faculty

SOCL 405 History Sociological Thought (3 Credit Hours)

This course looks at the intellectual roots and expressions of the foundations of sociological theory in the 19th and early 20th century.

Outcomes:

Students will gain familiarity with the classical texts in sociological theory that established some of the basic perspectives, issues and debates that inform contemporary social theory and research

SOCL 406 Modern Sociological Theory (3 Credit Hours)

This course examines some of the dominant perspectives and trends of modern social theory.

Outcomes:

Students will develop familiarity with the primary sources that represent current trends in modern and postmodern theories

SOCL 410 Logic of Sociological Inquiry (3 Credit Hours)

This course explores the structures of sociological research, analyses, and explanations. Several major types of data collection will be examined and evaluated.

Outcomes:

Students will be able to formulate sociological problems, understand the relationship between problem formulation and data collection, measurement and analyses and develop the capacity to utilize different social scientific methods

SOCL 412 Qual Meth in Social Research (3 Credit Hours)

This course is an introduction to the major qualitative methods of social inquiry and the ethical issues raised by qualitative research.

Outcomes:

Students learn the skills of participant observation, interviewing, historical analysis, building theory from qualitative data, coding and content analysis

SOCL 413 Sociological Practicum (3 Credit Hours)

The class examines theoretical issues and past research relating to a particular social topic and then designs and completes a collective research project. Topics vary.

Outcomes:

Students gain facility with research design and group research practices

SOCL 414 Statistical Methods Analysis I (3 Credit Hours)

After a review of bivariate regression and cross-tabular analysis, the course provides an extended treatment of the general linear model. Topics include model construction, interpretation of results, partitioning of variance, tests of statistical significance and interactions.

Outcomes:

Students will be able to employ general linear models in original research and critically evaluate existing empirical research

SOCL 415 Statis Methods of Analysis II (3 Credit Hours)

The course extends the applications of the general linear model to topics including path analysis, logistic regression, factor analysis and spatial and cluster analysis.

Outcomes:

Student will: understand the techniques with enough clarity to recognize when they are appropriate research tools; gain sufficient expertise to apply the techniques to moderately complex research problems; be able critically review the relevant literature

SOCL 418 Demography (3 Credit Hours)

This course examines the basic techniques used to assemble, analyze, and present demographic information. It also examines U.S. and world demographic trends and the causes and consequences of such demographic change.

Outcomes:

Students will gain an in-depth knowledge of demographic trends and an understanding of the sources, limitations, and advantages of various types of demographic data

SOCL 421 Theories Social Change (3 Credit Hours)

The course will critically appraise major theories of social change and examine different methodologies on both the macro- and micro-sociological levels.

Outcomes:

Students will gain a working knowledge of the major theoretical and methodological issues in the field

SOCL 423 Social Movements (3 Credit Hours)

This course will use case studies of contemporary social movements to examine collective efforts to promote social or cultural change. They will gain an understanding of the recursive relationship between empirical research and theory development.

Outcomes:

Students will be able to apply major theoretical perspectives on social movements to a variety of historical cases

SOCL 425 Inequality and Society (3 Credit Hours)

This is an empirical and theoretical inquiry into the causes, consequences, and dynamics of social inequality in modern societies.

Outcomes:

Student will be able to explain the distribution of economic, political, and social resources in society; the processes of class formation and the role of race and gender

SOCL 426 Sociology of Gender (3 Credit Hours)

This course surveys sociological and related scholarship on women and gender relations.

Outcomes:

Students will come to understand the social construction of gender and its centrality to studies of identity and sexuality, the division of labor, families and reproduction, violence, poverty, race, class and globalization

SOCL 427 Political Sociology (3 Credit Hours)

The course examines major theories of political action and change. Particular attention is paid to policy development.

Outcomes:

Students will develop an empirical and theoretical knowledge of the working of political systems and to be able to apply that knowledge to the development of social policy

SOCL 428 Poverty and Social Welfare (3 Credit Hours)

This course examines the development of poverty and social welfare efforts over time in the United States, with some comparisons to other industrial societies.

Outcomes:

Students will understand the character and consequences of poverty and social welfare policies in the United States, emphasizing current conditions and possibilities for the future

SOCL 431 Social Structure and Personality (3 Credit Hours)

This course examines the relationships between the individual and larger social structure and social trends.

Outcomes:

Students will gain familiarity with current research and theory concerning the relationship of self identity and personal narratives to socialization and structural factors, and the ways in which social class, work, race and nation construct age, gender and sub-cultural forms of subjectivity

SOCL 432 Socialization Thru Life Cycle (3 Credit Hours)

This course traces the nature of socialization and development of the individual through the life cycle.

Outcomes:

Students will become familiar with research and theory concerning the processes by which persons are socialized into sexual, racial, religious, occupational, marital, and parental social roles, identities and patterns of interactions at various stages of life

SOCL 435 Adult Development and Aging (3 Credit Hours)

The older adult population and adult development is examined from social and cultural perspectives.

Outcomes:

Studies will develop a knowledge of gerontological theories and research which pertain to the family, the community, political life, the economy, work and retirement, religious life, and other social institutions

SOCL 438 The Family (3 Credit Hours)

This course explores families, their changing internal structures, and their roles in contemporary societies.

Outcomes:

Students will develop an understanding of the household division of labor, mothering, the shifting character of marriage, the paid and unpaid work of care, dual career families, single parent households, racial/ethnic families, adoption, blended families, welfare policies, families in the class structure, and global issues

SOCL 439 Community Change (3 Credit Hours)

Contemporary communities are examined from a sociological perspective. Both geographic communities and communities of interest are studied.

Outcomes:

Students gain an understanding of how research can be used to facilitate social change in community settings; and an awareness of how community organizations, informal networks, and broader social forces shape the character and sustainability of particular communities

SOCL 440 Organizations & Org Change (3 Credit Hours)

This course examines the structures and processes that typify contemporary organizations, with particular attention to how organizations change.

Outcomes:

Students will be able to apply sociological methods to analyze organizations, and will develop an understanding of bureaucracy and alternative structures; the effect of organizational structure on administrators, workers, and clients; and how organizations are affected by their social environment

SOCL 441 Sociology of Religion (3 Credit Hours)

This course studies the relationship between religion and society, and explores central topics in the sociology of religion.

Outcomes:

Students will learn to define and explain religious organizations, beliefs, and practices as distinctly social phenomena, and understand how social processes both shape the form and content of religious life and in turn are shaped by them

SOCL 442 Religious Conflict & Change (3 Credit Hours)

This course will explore the complex reciprocal relationship between religion and historical processes of social change. They will gain an understanding of how religion both affects and is affected by historical, political, and social change.

Outcomes:

Students will be able to analyze historical instances of religious conflict and change in the U.S. and other regions of the world

SOCL 446 Knowledge, Power & Expertise (3 Credit Hours)

This course focuses on the relationship between knowledge, expertise and power in societies and how this relationship has consequences for the structure of knowledge and the organization of society.

Outcomes:

Students will be able to demonstrate a sociological understanding of the construction of knowledge and the organization of authority and expertise

SOCL 447 Sociology of Culture (3 Credit Hours)

This course will examine the relationship between social phenomena and cultural expressions, and the various ways sociologists have conceived of those relationships.

Outcomes:

Students will learn to apply sociological theories and methods to an analysis of cultural fields and understand the diversity of contemporary cultural objects and expressions, and how they are produced and used in social action

SOCL 448 Technology & Material Culture (3 Credit Hours)

This course will serve as an introduction to the sociology of things, most notably the sociology of technology, design and the built environment.

Outcomes:

Students will develop an understanding of both cultural, constructivist and political-economic approaches to the construction of technology and artifacts, and of a variety of theoretical approaches to the study of their impact and audience-response

SOCL 452 Complex Organizations (3 Credit Hours)

Formal organizations treated comparatively and systematically as major components of modern social organization are featured.

Outcomes:

Students will develop an understanding of leading theoretical traditions, historical and cross-national variation, organization-environment relations, and selected internal processes in the field of complex organizations

SOCL 453 Occupations and Professions (3 Credit Hours)

This course focuses on the structure of paid work in modern society, and its relationship to unpaid work and to self-employment. Special attention is given to the role of skills and knowledge in the structuring of work.

Outcomes:

Students will develop an understanding of how both macro and micro factors structure work; from capitalism, industrialism, gender, race and globalization to workplace interaction and culture

SOCL 461 Race & Ethnicity (3 Credit Hours)

This course explores the construction, meaning, uses and consequences of racial and ethnic identity in American society over time.

Outcomes:

Students will understand the role of migration and immigration on the construction of identity; analyze prejudice, discrimination, and inter-group conflict; and explore how social movements have and are changing these group relationships

SOCL 462 The Urban Metropolis (3 Credit Hours)

This course examines urbanization and its consequences through social theory and empirical studies emphasizing the modern European and American experience.

Outcomes:

Students will understand ecological and political economy perspectives on metropolitan development; changing regional patterns of population, housing, and employment; and urban governance, planning, and policies for the future

SOCL 463 Soc & Natural Environment (3 Credit Hours)

This course examines the relationship between social life and the natural environment.

Outcomes:

Students will be able to demonstrate a sociological understanding of the relationship of humans to the natural environment and draw connections between basic ecological understandings of nature and the human impact on the natural world

SOCL 471 Soc of Deviance & Control (3 Credit Hours)

This course is a socio-historical look at definitions of forms of deviant behavior and the identification of individuals as deviant. They will develop a sociological imagination to perceive the meaning of deviance beyond the superficialities of today's headlines.

Outcomes:

The student will learn how history and philosophy shape the definitions of deviant behavior and the methods used to control it

SOCL 473 Criminology (3 Credit Hours)

This course examines modern and traditional theories of criminology and their implications for social control, with emphasis on current work in criminology theory, social planning, and evaluation research.

Outcomes:

The student will acquire knowledge of the relationship between the various explanations of crime patterns and how these theories work to reduce or fail to reduce the level of criminal behavior

SOCL 481 Medical Sociology (3 Credit Hours)

This course will examine critical factors affecting mortality and morbidity; mental health; health services; community health; cross-cultural differences; aging and the strategy and conduct of socio-medical research.

Outcomes:

The student will be able to critically analyze the social components of illness and of health and to integrate theory and research in the study of health care institutions globally

SOCL 490 Workshop:Applied Soc (1 Credit Hour)

This focuses on special issues for methods used by applied sociologists, and topics vary from semester to semester. Most workshops involve presentations by faculty or applied sociologists from outside the university.

Outcomes:

Students will develop expertise in, for example: survey research, evaluation research, use of population data in policy making, focus groups, and developing community leadership

SOCL 491 Sociological Discourse (3 Credit Hours)

The course examines the nature of sociological argumentation in existing scholarly and popular literature and in the students' own writing.

Outcomes:

Students will be able to formulate and present sociological arguments in both oral and written forms, and to demonstrate their understanding of the relationship between problem formulation, data collection and measurement and analysis in their own and others' work

SOCL 494 Internship (3 Credit Hours)

Placements are typically in non-academic settings, e.g., government agencies, community organizations, businesses, or labor organizations. Students are expected to work a minimum of 100 hours and write an internship report.

Outcomes:

Students will develop skills in applying sociological methods and theoretical perspectives to the understanding and ameliorating of social issues in real world settings

SOCL 497 Independent Research (3 Credit Hours)

Students registered for independent study will meet as a workshop, under the guidance of a faculty member, at least three times per semester. These skills are important for expeditious completion of proposals, theses, and dissertations.

Outcomes:

Students will develop the skills and dispositions necessary to be successful and productive in independent work

SOCL 498 Independent Research (3 Credit Hours)

Work on an individual research project under the supervision of a faculty member.

SOCL 499 Directed Study (3 Credit Hours)

Develop a reading list and paper under the supervision of a faculty member.

SOCL 500 Sem-Appl Sociol & Social Pol (3 Credit Hours)

This course examines the use of sociology in determining and selecting alternative social policies.

Outcomes:

Students will develop knowledge about the roles that applied sociologists play in society; the relationship between sociologists and clients or organizations; the social research process and how it affects the research product; and ethical considerations of applied sociologists

SOCL 505 Controv Current Social Thought (3 Credit Hours)

This is a seminar in which students and faculty will examine in detail particular controversies that are emerging in theoretical approaches to sociology. Topics will vary.

Outcomes:

Students will develop advanced skills in theoretical discourse

SOCL 510 Research Special Areas (3 Credit Hours)

Advanced methodology seminar in special topics.

Outcomes:

Students will develop advanced skills in the special area

SOCL 520 Topics in Contemporary Society (3 Credit Hours)

Various topics in the study of modern society

Interdisciplinary Option: Women & Gender Studies

Outcomes:

Students will develop advanced skills in the particular area

SOCL 525 Sem in Comparative Studies (3 Credit Hours)

The seminar will expose participants to comparative approaches in defining issues, topics or institutions, researched by comparative sociologists and cultural anthropologists. Specific topics for consideration will vary.

Outcomes:

Students will acquire knowledge of the utility of comparative approaches to cultural and social structures in developing greater definition and clarity, and a deeper understanding of a given topic

SOCL 540 Issues:Soc of Religion (3 Credit Hours)

Focused study on a variable topic in the sociology of religion.

SOCL 560 Sem-Iss in Commun & Urban Soc (3 Credit Hours)

This course explores current issues in cities and in the sociological study of cities.

Outcomes:

Students will become familiar with current debates in urban sociology and apply sociological theories and analysis to contemporary issues in cities

SOCL 580 Sem:Issues in Medical Soc (3 Credit Hours)

This course explores a specialized topic in the sociology of health and medicine. Restricted to Graduate Students.

Outcomes:

Ability to analyze individual, social and institutional effects on health and medicine

SOCL 595 Thesis Supervision (0 Credit Hours)

Write a thesis under the supervision of a faculty member.

SOCL 600 Dissertation Supervision (0 Credit Hours)

Write a dissertation under the supervision of a faculty member.

SOCL 605 Master's Study (0 Credit Hours)

Develop a reading list and paper for an MA project under faculty supervision.

SOCL 610 Doctoral Study (0 Credit Hours)

This course can only be taken two times during a doctoral student's career.

Spanish (SPAN)

Discover, search, courses!

SPAN 101 Spanish I (3 Credit Hours)

This course is an introduction to the basic elements of Spanish language and culture. It is designed for students with no previous experience in Spanish.

Outcomes:

Students will be able to understand simple messages and short narratives, respond to basic inquiries about themselves and others, formulate basic questions, as well as understand basic written texts

SPAN 102 Spanish II (3 Credit Hours)

Pre-requisites: SPAN 101 This course builds on 101, and introduces students to new topics and grammatical structures

No course description is available

Interdisciplinary Option: Latin American Studies

Outcomes:

Students will be able to produce sounds in Spanish more accurately, express appropriate reactions to ordinary situations, understand basic oral commands, read more complex texts, and write sentences in cohesive paragraphs

SPAN 103 Spanish III (3 Credit Hours)

Pre-requisites: SPAN 102 This course is the first semester of second-year Spanish

No course description is available

Outcomes:

Students will increase their knowledge of Spanish grammar and vocabulary, and their Spanish communication skills

SPAN 104 Spanish IV (3 Credit Hours)

Pre-requisites: SPAN 103 This course is the second semester of second-year Spanish

No course description is available

Outcomes:

Students will continue to perfect their knowledge of Spanish grammar and vocabulary, with greater stress on reading and speaking

SPAN 190 Spanish for Medical Professionals I (3 Credit Hours)

This course develops intermediate-level skills in comprehension and conversation for the health professions. It is for students who have completed at least Spanish 104 who have intermediate-level Spanish language skills. Students will understand essential information about the dialects and cultural characteristics of major Spanish speaking populations in Chicago.

Outcomes:

Students will be able to understand and use appropriate Spanish expressions in a variety of situations involving use of Medical Spanish

SPAN 195 Span for Med Interpretation (3 Credit Hours)

This course is part of an intermediate advanced sequence focusing on (mainly) advanced oral intercultural skills in Spanish language oriented to preparing students for the interaction with Spanish speaking patients with none or little English skills. Students will develop a strong cultural sensitivity to improve future patient-doctor communications, while reflecting on the role of medical interpreters in successful medical outcomes. An intensive speaking, translating and interpreting training will help to strengthen students' knowledge of language and their confidence in its use.

SPAN 250 Composition & Conversation I (3 Credit Hours)

Pre-requisites: SPAN 104 This course is the first in an intermediate-level sequence designed to develop greater fluency in speech and writing through diverse readings and activities and is taught in Spanish

No course description is available

Outcomes:

Students will be able to speak, read, write, and comprehend readings in Spanish at the intermediate level

SPAN 251 Composition & Conversation II (3 Credit Hours)

Pre-requisites: SPAN 250 Advanced conversation and composition course designed to develop greater fluency in speech and writing through diverse readings and activities

Taught in Spanish and required for Spanish majors.

Outcomes:

Students will be able to speak, read, write, and comprehend readings in Spanish at the advanced, third-year college level

SPAN 252 Comp & Conver.Native Speakers (3 Credit Hours)

Pre-requisites: fluency in Spanish This course is designed for Spanish-speaking students, and is an intensive study of grammar and composition

No course description is available

Outcomes:

Students will develop greater fluency in written Spanish

SPAN 253 Adv Comp & Conver.Native Speak (3 Credit Hours)

Pre-requisites: SPAN 252 or equivalent This course is a continuation of SPAN 252

No course description is available

Outcomes:

Students will develop greater fluency in written Spanish

SPAN 270 Introduction to Critical Analysis in Spanish (3 Credit Hours)

This course reviews and sharpens the essential skills and techniques necessary to critically read, interpret, and write and speak about all genres of Hispanic literature (narrative, poetry, drama, and essay) in Spanish. In so doing, students refine their linguistic skills, and gain awareness of the complexities of the Spanish-speaking world.

Interdisciplinary Option: European Studies

Outcomes:

Students will gain the necessary skills for critically reading, writing and discussing all genres of Hispanic literature

SPAN 271 Introduction to Iberian Literature and Culture (3 Credit Hours)

An introduction to Iberian literature, film, and cultural production, designed to provide students with an understanding of Iberian culture, history, and society, while also honing their linguistic and analytical skills.

Interdisciplinary Option: European Studies, Global Studies

Outcomes:

Students will gain a grounding in Iberian literary and cultural production, an understanding of various literary and cultural forms, and an awareness of their context of production

SPAN 272 Introduction to Spanish American Literature and Culture (3 Credit Hours)

An introduction to Spanish-speaking Latin American literature, film, and other forms of cultural production, designed to provide students with an understanding of the region's variety and complexity while also honing their linguistic and analytical skills.

Outcomes:

Students will obtain a grounding in Spanish-speaking Latin American literary and cultural production, an understanding of various literary and cultural forms, and an awareness of their context of production

SPAN 300 Tutorial for Credit (1-6 Credit Hours)

Pre-requisites: permission of chairperson

Course material will be agreed upon by the student and instructor.

Outcomes:

Students will explore an aspect of Spanish language, culture and civilization, or literature not present in the curriculum or not offered that semester

SPAN 302 Business Spanish (3 Credit Hours)

Introduction to the fundamentals of the Spanish language and Hispanic culture as it relates to business practices.

Outcomes:

Students will learn the language of commerce in Spanish

SPAN 305 Advanced Spanish Grammar (3 Credit Hours)

Pre-requisites: SPAN 251 and permission of chairperson

This course is an overview of the most important aspects of Spanish grammar: sentence components, verbal systems, pronominal system, sentence structure, and paragraph structure.

Outcomes:

Students will be able to analyze words, sentences, both simple and compound, and to properly use pertinent linguistic terminology

SPAN 308 Literary Criticism (3 Credit Hours)

Introduction to various theories and methods of literary criticism and textual analysis. Conducted in English.

Course equivalencies: X-FREN/GERM/ITAL/SPAN308

Outcomes:

Students will be able to demonstrate a comprehensive critical knowledge of major currents and themes in international literary criticism and theory

SPAN 311 Generation of 1898 (3 Credit Hours)

Pre-requisites: Permission of chairperson

This course studies the distinctive group of turn-of-the-century Spanish writers known as the 'Generation of 1898': Unamuno, Baroja, Valle-Inclán, Machado, etc.

Interdisciplinary Option: European Studies, Global Studies

Outcomes:

Students will be able to discern the similarities and differences among the writers of this generation, as well as their relationship to modernism

SPAN 314 Survey of Medieval Literature (3 Credit Hours)

This course is a survey of the more prominent works of the Spanish Middle Ages - El Cantar de Mio Cid, El libro del buen amor, El conde Lucanor, and La tragicomedia de Calisto y Melibea o La Celestina - which reflect the religious, spiritual, and intellectual currents of Medieval Spain. In the form of seminar discussions and independent study, students will examine the aesthetic, social, and political trends of the ninth through fifteenth centuries, as well as the most important themes writers developed in pre-modern Iberia: honor, authority, vice and virtue, pilgrimage, devotion, and humor. These themes will be explored in the major works (primary sources), which will be complemented by secondary source readings and each student's independent research. The writers and texts studied in this course will also be viewed in the context of the greater artistic production in Spain and Medieval Europe.

Interdisciplinary Option: European Studies, Medieval Studies

SPAN 319 Romanticism (3 Credit Hours)

Pre-requisites: permission of chairperson

Study of the principle philosophical and esthetic characteristics of romanticism through readings in the major Spanish and/or Latin American romantic authors.

Interdisciplinary Option: European Studies

Outcomes:

Students will be able to recognize the principle characteristics of romanticism, its foreign influences, and its historical development in a variety of genres, including drama, prose fiction, essay, and poetry

SPAN 321 20th Century Theatre (3 Credit Hours)

Pre-requisites: permission of chairperson

An examination of 20th Century Theater in Spain covering such dramatists as Valle-Inclán, J. Benavente, M. Mihura, García Lorca, Buero Vallejo, and others.

Interdisciplinary Option: Global Studies

Outcomes:

Students will gain an understanding of dramatic genres and the contribution of Spanish playwrights to contemporary discussions on political and aesthetic issues

SPAN 326 Theater of The Golden Age (3 Credit Hours)

Pre-requisites: permission of chairperson

A study of major Renaissance and Baroque plays by Calderón, Lope de Vega, Tirso de Molina, Mira de Amescua, Juan Ruiz de Alarcón, and others.

Interdisciplinary Option: European Studies

Outcomes:

Students will learn to recognize mythological and historical themes while discussing the ethics of tragedy, the evolution of comic characters, and social concerns in the era of absolutism

SPAN 330 Survey-Poetry Thry & Practice (3 Credit Hours)

The poetry of the 19th century in Spain and Latin America derives from two literary, artistic and cultural movements: romanticism and modernism.

SPAN 331 20th Century Poetry (3 Credit Hours)

Pre-requisites: Permission of chairperson

A study of the development of modern Spanish poetry from post-modernism to the present with a special emphasis on the Hispanic poets of the avant garde.

Interdisciplinary Option: European Studies, Global Studies

Outcomes:

Students will be able to recognize the major poetic trends, forms, themes, and movements in 20th century Spanish verse

SPAN 336 Poetry of The Golden Age (3 Credit Hours)

Pre-requisites: permission of chairperson

An exploration of the influence of the Italian Renaissance on the Spanish tradition: Garsilaso de la Vega, Herrera, San Juan de la Cruz, Fray Luis de León, Quevedo, Góngora and others.

Outcomes:

Students will learn to recognize classical themes and rhetorical techniques, and to trace the development of such genres as epic, satire, and the lyric

SPAN 339 19th Century Poetry (3 Credit Hours)

Pre-requisites: permission of chairperson

This course is a survey of 19th-century literature, with emphasis on Romanticism and Realism.

Outcomes:

Students will become acquainted with the rich literature of the nineteenth century and will improve their critical and analytical skills

SPAN 340 Survey Prose-Fictnl & Nonfictn (3 Credit Hours)

Pre-requisites: permission of chairperson

This course traces the development of Spanish prose from the Middle Ages to the present day. All prose genres are included.

Interdisciplinary Option: European Studies

Outcomes:

Students will come to appreciate and understand how peninsular prose has developed

SPAN 341 20th Century Spanish Lit (3 Credit Hours)

Pre-requisites: permission of chairperson

Beginning with the Generation of 1898 and concluding with post-modernism, this course studies the rich literature of modern Spain.

Interdisciplinary Option: European Studies, Global Studies

Outcomes:

Students will better understand and appreciate the complexities of modern Spanish literature, as well as improve their critical and analytical skills

SPAN 346 Prose of The Golden Age (3 Credit Hours)

Pre-requisites: permission of chairperson

An approach to the picaresque, the pastoral novel and the essay with their concern with power and submission in everyday life. A study of the growing role of individual experience in fictional modes.

Interdisciplinary Option: European Studies

Outcomes:

Students will recognize the confluence of different prose styles, and the creation of individual voices in fiction; They will also become familiar with emerging concerns with religious and scientific issues during the period

SPAN 347 Cervantes Don Quijote (3 Credit Hours)

Pre-requisites: permission of chairperson

This course reads Cervantes' masterpiece with an emphasis on critical approaches, and on the book's impact on the invention of the modern novel.

Interdisciplinary Option: European Studies

Outcomes:

Students will learn about Cervantes's contribution to the development of modern fiction; They will become familiar with the novel's connection to other literary genres, and the role of metafiction and textuality

SPAN 349 Realism and Naturalism (3 Credit Hours)

Pre-requisites: permission of chairperson

This course is primarily a study of the novel of Realism and Naturalism, as well as of the short story.

Interdisciplinary Option: European Studies, Global Studies

Outcomes:

Students will be able to understand the goals of the great Realists and Naturalists and see their relationship to the major European masters of the nineteenth century

SPAN 352 Masterpieces of Latin Amer Lit (3 Credit Hours)

Pre-requisites: permission of chairperson

This course is a survey of representative works from pre-Colombian times to the present day, and an introduction to literary genres and defining themes in Latin American literature. It is taught in Spanish.

Interdisciplinary Option: Latin American Studies

Course equivalencies: X-SPAN352/LASP372

Outcomes:

Students will be able to understand the principal works, movements, and genres in Latin American literature

SPAN 353 Literary Masterpieces of Spain (3 Credit Hours)

This course is a survey of representative works of Spanish literature from the Middle Ages to the present, that is, from the first texts in the Castilian Spanish language (eleventh century), to works of the Renaissance and Baroque, and beyond, to key works of modern and contemporary times.

Outcomes:

Students will obtain a firm grasp of Iberian literary production, and an awareness of their context of production

SPAN 360 Intro to Hispanic Linguistics (3 Credit Hours)

Pre-requisites: SPAN 271 or 272 Introducing the linguistic terminology and the basis for this science, helping the student analyze the grammatical structure and sounds of Spanish, and familiarizing the student with the different varieties of Spanish

Introduction to Hispanic Linguistics is an introductory course on the structure of Spanish and its use in the Spanish-speaking world.

SPAN 361 Hispanic Women Writers (3 Credit Hours)

Pre-requisites: SPAN 271 or SPAN 272 *Outcomes:* Students will be able to recognize the major concerns of 20th century Hispanic women's writing A comparative study of 20th century Spanish and Latin American women writers who practice a variety of genres: autobiography, memoir, novel, short story, poetry, and testimonio.

Interdisciplinary Option: Women & Gender Studies

SPAN 362 History of Hispanic Feminism (3 Credit Hours)

This course challenges the usual view of feminism in Hispanic societies - that it played a minimal role in the revolutionary movements of the 20th century - through the reading of a series of works from the colonial period to the present, that chart the Hispanic woman's struggle to achieve liberation and self-realization.

Interdisciplinary Option: Global Studies

Outcomes:

Students will be able to trace the true history of Hispanic feminism, beginning with Sor Juana Ines de la Cruz, and ending with such contemporary feminist writers as Rosario Ferre, Rosario Castellanos, Montserrat Roig, and Rosa Montero

SPAN 363 Borges (3 Credit Hours)

This course focuses on the poetry and prose of Jorge Luis Borges, one of the central figures in 20th century Latin American literature, and one of the major writers of modern times.

Interdisciplinary Option: Global Studies

Outcomes:

Students will be able to recognize the major themes and forms of Borges, as well as appreciate his seminal role in the creation of the so-called literature of the "boom" in Latin America

SPAN 364 Advanced Spanish Oral Expression (3 Credit Hours)

This advanced Spanish course will induce students to acquire more sophisticated tools for conversational management and oral expression, and in enlarging their vocabulary through structured practice.

Outcomes:

Students will gain more sophisticated skills and fluency in Spanish

SPAN 365 Latin American Cinema (3 Credit Hours)

This course will focus on Latin American cinema, from its early beginnings in silent cinema to the present. Instructor's consent required to enroll.

Interdisciplinary Option: Global Studies, Latin American Studies

Outcomes:

Students will gain an understanding of the formation of national film industries, the emergence of larger regional trends, and the cinematic treatment of social, political and economic aspects of various Latin American countries

SPAN 366 Spanish Cinema (3 Credit Hours)

Spanish film from early Surrealistic cinema to contemporary pastiche: Bunuel, Berlanga, Erice, Borau, Saura, Aranda, Almadovar, etc.

Interdisciplinary Option: European Studies, Global Studies

Outcomes:

Students will gain an understanding of the development of cinema in Spanish society, and how it incorporated old genres such as comedy or melodrama

SPAN 367 Spanish Sociolinguistics (3 Credit Hours)

This course is an introduction to sociolinguistics.

Outcomes:

Students will gain a rudimentary knowledge of the linguistic sciences (semantics, phonology, syntax, language acquisition) with a focus mainly on linguistic issues of great relevance in contemporary United States: Ebonics, Spanglish, language in the media, language and gender, and language in politics, and the 'English only' movement

SPAN 368 Baroque and Neobaroque (3 Credit Hours)

The course will examine XVII century literature, including poetry, drama and prose of the periods in Spain and Latin- America, and will study the works of Quevedo, Gongora, Maria de Zayas, Lope de Vega, Calderon, Sor Juana, Carpentier, Sarduy.

Interdisciplinary Option: European Studies

Outcomes:

Students will understand the aspects of XVII century literature that relate to visual and spatial contexts, and the transformation that literature into a new style

SPAN 370 Latin American Poetry (3 Credit Hours)

Pre-requisites: permission of chairperson

Panoramic view of Latin American poetry with special emphasis on modernism, the avant-garde, and the post-World War II period. Selected authors include Gabriela Mistral, Delmira Agustini, César Vallejo, Vicente Huidobro, Octavio Paz, Pablo Neruda, and Gio

Interdisciplinary Option: Global Studies, Latin American Studies

Course equivalencies: X-SPAN370/LASP370

Outcomes:

Students will understand the principle forms, trends, themes and movements in Latin American verse through the work of poets from Sor Juana Inés de la Cruz to Ernesto Cardenal

SPAN 371 Latin-American Poetesses (3 Credit Hours)

Pre-requisites: permission of chairperson

Survey of Latin American women's poetry from Sor Juana Inés de la Cruz to Gioconda Belli.

Interdisciplinary Option: Latin American Studies

Course equivalencies: X-SPAN371/LASP371

Outcomes:

Students will be able to discern a distinctive female voice in Latin American verse, while familiarizing themselves with the principle women poets from the colonial period to the present

SPAN 380 Latin American Prose Fiction (3 Credit Hours)

Pre-requisites: SPAN 270 or 271

Representative selection of Latin American fiction from first half of twentieth century. Taught in Spanish.

Interdisciplinary Option: Global Studies, Latin American Studies

Course equivalencies: X-SPAN380/LASP380

Outcomes:

Students will be able to comment knowledgeably on content, form, and context of selected Latin American works of fiction

SPAN 381 Contemporary Spanish-Amer Novl (3 Credit Hours)

Pre-requisites: SPAN 270 or 271

This course covers a representative selection of Latin American fiction from second half of twentieth century. Taught in Spanish.

Interdisciplinary Option: Global Studies, Latin American Studies

Course equivalencies: X-SPAN381/INTS383/LASP381

Outcomes:

Students will be able to identify and assess both the contextual and the formal features of modern Latin American fiction

SPAN 382 Latin American Theatre (3 Credit Hours)

An introduction to major playwrights from Argentina, Chile, Cuba, México, Venezuela and Colombia from the early baroque to the 20th Century.

Topics include realism, existentialism, meta-theatre, performance art, and female dramatists.

Interdisciplinary Option: Latin American Studies

Course equivalencies: X-SPAN382/LASP382

Outcomes:

Students will be able to discuss different schools of drama and their impact on the stage in South America; They will also become familiar with playwrights who have used theater to approach social problems and critique contemporary mores

SPAN 385 Caribbean Literature (3 Credit Hours)

The course covers novelists and/or poets from Cuba, the Dominican Republic and Puerto Rico: Cabrera Infante, Alejo Carpentier, Reinaldo Arenas, Luis Rafael Sánchez, Ana Lidia Vega, Zoe Valdés, Lezama Lima, Severo Sarduy and others.

Interdisciplinary Option: Global Studies, Latin American Studies

Course equivalencies: SPAN385/LASP385

Outcomes:

Students will explore the role of Afro-Caribbean mythology, and learn about the use of humor and music forms in fiction; They will recognize certain historical patterns (slavery, dictatorship) and how they shape the creation of extreme characters and situation

SPAN 389 Latin Amer Short Story (3 Credit Hours)

Survey of the Latin American short story from the middle of the 19th century to the present.

Interdisciplinary Option: Global Studies, Latin American Studies

Course equivalencies: X-SPAN389/LASP389

Outcomes:

Students will be able to contextualize short stories, to analyze them both formally and thematically, and to recognize the different types of short story written in Latin American: realist, fantastic, folkloric, indigenist, humorous, detective, metaphysical, social protest, feminist, etc

SPAN 390 Latin American Culture and Civilization (3 Credit Hours)

Pre-requisites: SPAN 270 or 271

This is a survey course of Latin American culture and civilization and examines the main cultural, intellectual and political currents that have taken shape in Latin America. Special attention is given to the art and literature that has come to from contemporary Latin American culture within the context of colonization and independence.

Interdisciplinary Option: Catholic Studies, Global Studies, Latin American Studies

Course equivalencies: X-SPAN390/INTS397/LASP390

Outcomes:

To gain knowledge, analyze and understand the main characteristics which define Latin American culture; This will be accomplished through the study of texts, art and film

SPAN 391 Spanish Culture and Civilization (3 Credit Hours)

Pre-requisites: SPAN 270 & SPAN 271

Outcomes: To gain knowledge, analyze and understand the main characteristics which define Latin Spanish culture; This will be accomplished through the study of primary texts, back-ground reading, art and film

This is a survey course of Spanish culture and civilization and examines the main cultural, intellectual and political currents that have taken shape in Iberia and Spain. Special attention is given to the art and literature that has come to from contemporary Spanish culture within the context of European history.

Interdisciplinary Option: Catholic Studies, Global Studies

SPAN 395 Internship (3 Credit Hours)

The internship will allow students to work in a variety of settings using Spanish - business, education, government, or social service agencies. This course satisfies the Engaged Learning requirement.

Outcomes:

Students will gain practical experience in speaking and writing Spanish

SPAN 396 Saints and Sinners of Spain (3 Credit Hours)

Pre-requisites: SPAN 270 and SPAN 271 or 272 To comprehend religious, spiritual and intellectual currents in Spanish culture, as reflected in literature and art

This course surveys prominent Spanish Golden Age authors whose writings reflect the religious, spiritual, and intellectual currents of early Modern Spain, with a concentration on the culture of the Counter-Reformation. Its primary focus is how Christian life is reflected in literature and art and the portrayal of virtue and vice.

Interdisciplinary Option: Catholic Studies

SPAN 397 Topics in Hispanic Literature (3 Credit Hours)

This revolving-topics course allows students to focus on a specific theme, such as Hispanic Feminism, Visions of America, or The Literature, Cinema and Music of 21st century Spain. It also provides for in-depth study of a single author, such as Federico Garcia Lorca, Miguel de Unamuno or Jorge Luis Borges.

Interdisciplinary Option: Latin American Studies

Course equivalencies: X-SPAN397/LASP397

SPAN 402 Methods of Teaching Spanish (3 Credit Hours)

This graduate course introduces an overview of major theories and current issues in second/foreign language acquisition in both classroom and natural/non-instructed settings while providing guidance and practice with their applications to teaching. Students will explore theoretical, investigative, and practical issues of communicative language teaching that will help them develop communicative classroom environments that blend listening, speaking, reading, and writing. The material in this course should encourage students to question assumptions and begin to formulate their own ideas about what goes on in their classrooms and in second language learning in general.

SPAN 403 Structure of Modern Spanish (3 Credit Hours)

An introduction to Spanish linguistics to provide a general understanding of phonology, morphology and syntax, as well as a history of Spanish grammar including variation and change.

Outcomes:

Students will understand the rules that govern sounds, word and sentence structure, and the dynamic interaction between Spanish and its neighboring languages

SPAN 405 Critical Methods (3 Credit Hours)

This course provides training in the application of contemporary critical methods with attention to the development of greater proficiency in literary analysis and written expression.

Outcomes:

Students will be able to discuss and write about knowledgeably works from the major literary genres: drama, prose fiction, essay, and poetry

SPAN 410 Genrl Linguistics & Romance Lng (3 Credit Hours)

This graduate course introduces an overview of major theories and current issues in heritage language acquisition in both classroom and natural/non-instructed settings while providing guidance and practice with their applications to teaching. The material in this course should encourage students to question assumptions and begin to formalize their own ideas about what goes on in their classrooms and in heritage language learning in general.

Course equivalencies: X-SPAN410/CLST410/FREN410

SPAN 415 Medieval Spanish Literature (3 Credit Hours)

This course studies the development of Spanish medieval literature from the jarchas through the Celestina.

Outcomes:

Along with increasing their knowledge of Spanish history in the medieval period, students will be able to appreciate how the literature reflects the culture of the period

SPAN 416 Golden Age of Spanish Literature (3 Credit Hours)

This course is a graduate seminar whose primary focus is the literary production of the Spanish Golden Age, which dates from the second half of the sixteenth century to the end of the seventeenth. Students will analyze works of various genres ¿ autobiography, prose, drama, poetry and the novel ¿ by the most prominent authors of the time, including Teresa of Ávila, John of the Cross, Miguel de Cervantes, Baltasar Gracián, Francisco de Quevedo, Luis de Góngora, Félix Lope de Vega, Pedro Calderón de la Barca, Tirso de Molina and María de Zayas. We will give special attention to the historical, social and cultural context of early modern Spain, and students will gain exposure to the major critical trends and interpretation of Golden Age literature. The authors to be studied confront readers with the complex social fabric of pre-modern Spain and immerse us in the religious and economic realities of the Iberian Peninsula, the Mediterranean world and Europe. Our close reading of the texts will allow us to explore how early modern Spanish writers reflect the spiritual, intellectual and political currents of their time, especially as they shed light upon the network of institutions, practices, and beliefs that constituted Spanish culture.

SPAN 419 Romanticism in Spanish Lit (3 Credit Hours)

This course is a survey of Romanticism as a literary movement including its influence upon nineteenth-century culture.

Outcomes:

Students will be able to understand the philosophical, artistic, and esthetic tenets of Romanticism and their representation in a series of Hispanic texts from prose fiction to poetry and drama

SPAN 420 Realism & Naturalism (3 Credit Hours)

This course focuses on the various political, ideological, and intellectual trends that have shaped nineteenth-century Spanish literature and emphasizes the aesthetic and cultural influences that made the Spanish literary universe unique. It also takes up the question of the ways in which the literature of nineteenth-century Spain might be compared to that of Latin America and of the Western world generally. It will provide an overview of the key topics, writers, and literary genres of nineteenth-century Spanish literature, with particular emphasis on novels, poetry, folletines, short stories and, to a lesser extent, visual art. We will discuss the complexities of Spanish modernity using current theoretical perspectives in addition to various historical approaches, while emphasizing the way in which these texts offer multiple views of Spanish national identity and the construction of different models of the modern self.

SPAN 421 Theatre of Twentieth Century (3 Credit Hours)

The evolution of theatrical modes in 20th Century Spain. Authors: M. Mihura, Benavente, Valle Inclán, Arniches, García Lorca, Buero Vallejo, etc.

Outcomes:

Students will be able to explain how theater has dealt with contemporary experiences such as the Spanish Civil War, civil war, the polarization of society, group thinking, dictatorship, the inception of new mores and the inevitability of change

SPAN 426 Theater of The Golden Age (3 Credit Hours)

This course is a graduate seminar with a primary focus on theatrical works written in the Spanish Golden Age, which began in the mid-sixteenth century with the dramatist Lope de Rueda and ended in the late seventeenth century with the death of Calderón de la Barca. It combines the study of shorter works, entremeses, and full-length plays, or comedias, written by the most renowned playwrights of early modern Spain, including Cervantes, Lope de Vega and Tirso de Molina. Through the reading of these authors, students will explore the themes and social factors which shaped the plays of the Golden Age and will become familiar with the theatrical tradition that impacted Spanish society at all levels. Attention will also be given to the role of gender, religion, and socio-economic status in pre-modern Spanish society. We will use these texts in order to understand the historical context and the main currents of thought in early modern Spain.

SPAN 431 Poetry of The 20th Century (3 Credit Hours)

This course traces developments in Spanish poetry through a study of the works of selected poets, with special emphasis on the writers of the Generation of 1927.

Outcomes:

Students will understand the relationship between modernism and the avant garde, as well as the turn toward free verse and social poetry in the post-war period

SPAN 436 Poetry of The Golden Age (3 Credit Hours)

This course covers poetic theory and practice from Garcilaso to Góngora. It presents the classic modes as they were imitated and transformed to create a new poetic language.

Outcomes:

Students will be able to recognize the distinct styles and forms of Golden Age poetry

SPAN 437 Golden Age-Spanish Mysticism (3 Credit Hours)

This course is a survey of the most prominent authors of the Spanish Golden Age mystics - Ignatius of Loyola, Teresa of Avila, and John of the Cross, whose writings reflect the religious, spiritual, and intellectual currents of Counter-Reformation Spain. In the form of an independent study, students will examine the ascetical, mystical, and Illuminist trends of the sixteenth and seventeenth centuries, as well as the most important themes these writers developed in early modern Iberia: conversion and authority, vice and virtue, penance and pilgrimage, devotion and humor. These themes will be explored in the majors works (primary sources) of these authors, which will be complemented by secondary source readings and each student's independent research. The writers studied in this course and their texts will also be viewed in the context of the greater literary and artistic production of the Spanish Golden Age.

SPAN 441 Prose of The 20th Century (3 Credit Hours)

This course studies the development of Spanish prose from the Generation of 1898/ Modernism through Post-modernism, with emphasis on the novel, short story, and essay.

Outcomes:

Students will better appreciate and understand the complex literature of modern Spain

SPAN 446 Prose of The Golden Age (3 Credit Hours)

The course studies representative selections from the pastoral and the picaresque novel, the short novel, and didactic works of the period (Gracián and Quevedo).

Outcomes:

Students will understand how these authors expressed colliding sensibilities, and incorporated traditional themes-love, knowledge, deception, violence-through parody and satire

SPAN 447 Don Quijote (3 Credit Hours)

This course is a graduate seminar and its primary focus is the literary masterpiece of Miguel de Cervantes, *El ingenioso hidalgo don Quijote de la Mancha* (1605, 1615). Students will analyze the work that has come to be known as the first modern novel of Europe, and, through a close reading of the text, study the novel in relation to the literary traditions of the Renaissance: novella, the pastoral romance, the romance of chivalry, the humanist dialogue, the picaresque novel, including poetry and the comedia. We will give special attention to the historical, social and cultural context of Cervantes' world, and students will gain exposure to the major critical trends and interpretations surrounding his novel. Cervantes confronts readers with the complex social fabric of early modern Spain, and immerses us in the religious and economic realities of the Iberian Peninsula and the Mediterranean world. Our close reading of *Don Quijote* will explore its links to the network of institutions, practices, and beliefs that constituted early modern Spanish culture.

SPAN 470 Hispanic-American Poetry (3 Credit Hours)

The course traces the development of Latin American poetry in such representative poets as Rubén Darío, Gabriela Mistral, and Octavio Paz.

Outcomes:

Students will recognize the major themes and forms of Latin American poetry with a special emphasis on the 19th and 20th centuries

SPAN 480 Hispanic-American Novel (3 Credit Hours)

Pre-requisites: graduate standing

Analyzes salient themes and formal features of twentieth-century novel. Taught in Spanish. Prerequisite: graduate standing.

Outcomes:

Students will identify stylistic and thematic contours of the modern Latin American novel and draw connections between works of literature and the broader culture

SPAN 487 La Novela De La Revolucion Mex (3 Credit Hours)

Pre-requisites: graduate standing

An analysis of representative works and themes of the Mexican Revolution, its mystique, critique, and legacy. Taught in Spanish.

Outcomes:

Students will comprehend main features of literature of the Revolution and draw relationships to contemporary Mexican cultural themes

SPAN 489 Cuento Hispano-Americano (3 Credit Hours)

The development of the Hispanic short story is studied in this course. Authors included are Quiroga, Cortázar, García Márquez, Castellanos, Valenzuela, and Ferré.

Outcomes:

Students will be able to contextualize the stories, analyze them both formally and thematically, and recognize the different types of short story written in Latin America: realist, fantastic, folkloric, indigenist, humorous, detective, metaphysical, social protest, feminist, etc

SPAN 490 Hispanic Culture & Civilization (3 Credit Hours)

Pre-requisites: graduate standing

Interdisciplinary seminar brings to bear perspectives of literary intellectuals, anthropologists, sociologists, educators, and theologians on the topic. Visions of America. Taught in Spanish.

Outcomes:

Students will understand significance and many facets of theme of cultural identity in Latin America as expressed in various disciplines

SPAN 499 Graduate Internship (1-6 Credit Hours)

A course designed to provide students with the opportunity to make a connection between Hispanic Studies and its praxis in a professional work environment.

SPAN 500 Directed Readings (3 Credit Hours)

The course is composed of special readings undertaken only by highly qualified students and supervised by a member of the department.

Outcomes:

Students will be able to work individually on a research project of their own selection

SPAN 501 Thesis Research (3 Credit Hours)

Pre-requisites: Completion of initial thesis forms appearing on the GS website; permission of thesis director

Designed for graduate students who wish to write an M.A. thesis, and therefore conduct—and receive credit for—thesis-related research under the direction of the thesis director.

Outcomes:

To advance the student's knowledge in the area of focus; to enhance research skills and allow the student to develop bibliographies and a research paper

SPAN 595 Thesis Supervision (0 Credit Hours)

This course provides ongoing guidance and supervision, with a view to project completion, for students writing their MA thesis.

SPAN 599 Directed Primary Research (3 Credit Hours)

Pre-requisites: Students must have the permission of the Instructor of Record to enroll in this course

This course will culminate in the completion and presentation of a well-polished article-length paper in modern languages, literatures and linguistics to faculty members in the form of an oral defense. This course fulfills the Masters Essay.

Outcomes:

To refine and articulate a specific article-length research project in Hispanic Studies, and to research, write and defend this successfully completed project

SPAN 605 Master's Study (0 Credit Hours)

This course provides ongoing guidance and supervision, with a view to project completion, for students writing their Masters' essay.

Sport Management (SPRT)

Discover, search, courses!

SPRT 130 The Business of Sports (3 Credit Hours)

An overview of the sport industry intended to increase student awareness of the structure and operations of sport organizations from a management and leadership perspective.

SPRT 320 Social Aspects of Sport Management (3 Credit Hours)

Pre-requisites: Junior Standing, minimum grade of "C-" in SPRT 130

This course provides an examination of the role and relevance of sport in modern American society; impact of sport on society and the influence which cultural institutions have on sport. Sport related issues and controversies in contemporary sport as framed from a sociological and ethical perspective will be discussed. *Prerequisites:* Junior Standing and C- or better in SPRT 130.

SPRT 330 Economics of Sport (3 Credit Hours)

Pre-requisites: Junior Standing, minimum grade of "C-" in SPRT 130, ECON 201 and ECON 202

Using the tools of economic analysis, this course will examine issues pertaining to professional and amateur sports. It will also address economic policy of various sport industry segments.

SPRT 335 Fundamentals of Sport Finance (3 Credit Hours)

Pre-requisites: Junior standing, minimum grade of "C-" in SPRT 130
No course description is available

SPRT 339 Sports Facility Management and Operations (3 Credit Hours)

Pre-requisites: Junior standing; minimum grade of "C-" in SPRT 130

This course examines the comprehensive planning for development and operations of new and existing sport and fitness facilities and the management of those events.

Course equivalencies: X-SPRT339/ISOM339

SPRT 345 Globalization of Sport Industry (3 Credit Hours)

Pre-requisites: Junior Standing, minimum grade of "C-" in SPRT 130

The course provides an analysis of the impact of the globalization of sport in relation to the organization and management of international sport, including the Olympic movement and the examination of U.S. professional sports. A comprehensive investigation of international governance, political, social, and economic issues which leagues and corporations must consider in conducting business in foreign markets. *Prerequisite:* Junior Standing and C- or better in SPRT 130

Interdisciplinary Option: International Business

SPRT 365 Fundamentals Sport Marketing (3 Credit Hours)

Pre-requisites: Junior Standing, minimum grade of "C-" in SPRT 130 and MARK 201

This course focuses on the application of marketing principles and practices to the sport industry. Consideration given to marketing sport both as a spectator and a participant.

Course equivalencies: X-SPRT365/MARK365

SPRT 375 Sport Media (3 Credit Hours)

Pre-requisites: Sophomore Standing, minimum grade of "C-" in SPRT 130
No course description is available

SPRT 380 Legal Aspects in Sport Management (3 Credit Hours)

Pre-requisites: Junior Standing, minimum grade of "C-" in SPRT 130

An examination of legal issues which arise in the sport industry, including both amateur and professional sports with a strong emphasis on ethical concerns.

SPRT 385 Sport Analytics (3 Credit Hours)

Pre-requisites: Junior standing, C- or better in SPRT 130 and BSAD 343

Outcomes: Obtain introductory knowledge and technical competence using statistical and analytical software; Determine and perform appropriate statistical analysis to think critically; reason, analyze and problem solve sport industry specific issues

This course examines the collection and analysis of data to enhance decision making within sport. The course reviews analytic usage across different sport management segments such as finance, marketing, sales and logistics. Additionally, data and analytics within sport performance, wearable technology, coaching and player management are investigated.

SPRT 395 Independent Study (1-3 Credit Hours)

This course will provide independent study opportunity in Sports Management.

SPRT 399 Special Topics in SPRT (1-3 Credit Hours)

Pre-requisites: Junior Standing & C- or better in SPRT 130

No course description is available

SPRT 532 Sport Law (3 Credit Hours)

This course examines and analyzes legal issues connected to amateur and professional sport associated with the fundamental concepts of law, sport business structure and legal authority and understanding the process of legal research. Students will comprehend the legal and court system, legal process, and the fundamental concepts of common, statutory, and constitutional law; perform and analyze sport law research; understand the elements of negligence; discuss recent court interpretations; and recommend a risk management standard of practice in the sport industry.

Statistics (STAT)

Discover, search, courses!

STAT 103 Fundamentals of Statistics (3 Credit Hours)

This course provides an introduction to statistical reasoning and techniques in descriptive and inferential statistics and their applications in economics, education, genetics, medicine, physics, political science, and psychology. Not open to students who have completed ISOM 241.

Knowledge Area: Quantitative Knowledge

Course equivalencies: ISOM/H/MGSC241/STAT103/ACST101

Outcomes:

Students will obtain a background in the fundamentals of descriptive and inferential statistics along with an understanding of their uses and misuses; This course satisfies the quantitative literacy requirement of the core curriculum

STAT 203 Introduction to Probability & Statistics (3 Credit Hours)

Pre-requisites: MATH 132 or MATH 162 or MATH 162A

This course is a Calculus-based rigorous introduction to basic topics in probability (distributions, expectations, variance, central limit theorem and the law of large numbers, moment generating functions, etc.) and statistics (estimation, hypothesis testing, regression, design of experiments) needed in engineering and science applications. MATH 162 may also be taken concurrently as a co-requisite. They will learn how to assess data and outcomes of experiments.

Outcomes:

The students will obtain required knowledge in probability and statistics useful in every area of engineering and science

STAT 303 SAS Programming & Applied Statistics (3 Credit Hours)

Pre-requisites: STAT 103 or 203 or 335 This course provides an introduction to SAS programming in the context of practical problems taken from applied statistics

No course description is available

Outcomes:

Students obtain extensive experience with data-set manipulations, SAS procedures, and their application in contexts such as t-tests, simple and multiple regression, ANOVA, and regression

STAT 304 Introduction to Probability (3 Credit Hours)

Pre-requisites: MATH 263 or MATH 263A *Outcomes:* Students obtain the theoretical background in probability needed for further study in probability and statistics

This course provides a calculus based introduction to probability theory, including topics such as combinatorial analysis, random walk, conditional probability, and a variety of statistical distributions.

Course equivalencies: X-MATH304/STAT304

STAT 305 Introduction to Mathematical Statistics (3 Credit Hours)

This course is a continuation of STAT 304 and applies the techniques of calculus and probability to the study of advanced topics in statistics.

Course equivalencies: X-MATH305/STAT305

Outcomes:

Students obtain the theoretical background in statistics needed for graduate level work in probability and statistics

STAT 306 Intro to Stochastic Processes (3 Credit Hours)

Pre-requisites: (STAT 203 or STAT 335) and (MATH 212 or MATH 266)

This course discusses topics such as finite-state Markov processes and Markov chains, classification of states, long-run behavior, continuous time processes, birth and death processes, random walks, and Brownian motion

No course description is available

Course equivalencies: X-MATH306/STAT306

Outcomes:

Students will obtain a background in stochastic processes that will allow them to apply them in areas like genetics, population growth, inventory, cash management, and gambling theory

STAT 307 Statistical Design & Analysis of Experiments (3 Credit Hours)

Pre-requisites: (STAT 203 or STAT 335 with a C- or better) and STAT 308 with a C- or better

This course discusses comparative experiments, analysis of variance, fixed and random effects models, and a variety of design models; packaged computer programs such as SPSS or SAS will be used extensively.

Outcomes:

Students will obtain the background in statistical design and analysis of experiments needed to apply them in their own areas of interest

STAT 308 Applied Regression Analysis (3 Credit Hours)

Pre-requisites: 203 or 335 This course discusses simple and multiple linear regression methods, multiple comparison estimation procedures, residual analysis, and other methods for studying the aptness of a proposed regression model; packaged computer programs such as SPSS and SAS will be used extensively *Outcomes:* Students will obtain an extensive background in the applications of regression analysis

No course description is available

STAT 310 Categorical Data Analysis (3 Credit Hours)

Pre-requisites: STAT 203 or STAT 335 with C- or better and STAT 303 or STAT 308 with C- or better An introduction to modern-day extensions of simple linear regression and ANOVA to the chi-square test including logistic regression and log-linear modelling techniques based on generalized linear models

Methods for matched-pair, small datasets, ordinal and multi-category data also discussed. This course focuses on applications using real-life data sets, and uses popular software packages.

STAT 311 Applied Survival Analysis (3 Credit Hours)

Pre-requisites: STAT 308 (Applied Regression Analysis) *Outcomes:* Derive survival and hazard functions from an underlying distribution, calculate survival probabilities and hazard rates, compare survival probabilities and hazard ratios between two or more cohorts

This course focuses on methods for analyzing time-to-event data.

The course will explore non-parametric methods for analyzing time-to-event data like Life tables, the Kaplan-Meier method, the Nelson-Aalen method and the log-rank test. This course will also explore semi-parametric models such as the Cox proportional hazards regression models and parametric models including exponential, Weibull and log-logistic regression model.

STAT 321 Computational Aspects of Modeling and Simulation (3 Credit Hours)

Pre-requisites: STAT 308 This course uses SAS and R languages to address statistical modelling and to conduct statistical simulations to assess linear, generalized linear, nonlinear and complex models and experimental designs

No course description is available

Course equivalencies: X-STAT356/COMP321/STAT321

Outcomes:

Students will gain practical experience and knowledge in real-world statistical situations for which underlying theory is cumbersome or intractable

STAT 335 Introduction to Biostatistics (3 Credit Hours)

Pre-requisites: BIOL 102, MATH 132 or MATH 162 (as pre-requisite or co-requisite) or MATH 162A

Students may take MATH 162 as a prerequisite for STAT/BIOL 335 or take it concurrently as a corequisite with STAT/BIOL 335. For Bioinformatics Majors only BIOL 101, MATH 132 or MATH 162 (as pre-requisite or co-requisite) or MATH 162A This course provides an introduction to the statistical methods used in designing biological experiments and in data analysis, including computer laboratory assignments with biological data.

Interdisciplinary Option: Bioinformatics, Forensic Science

Course equivalencies: X-BIOL335/STAT335

Outcomes:

Students interested in research in the life sciences will obtain a background in the appropriate use of statistical methods as an experimental tool

STAT 336 Advanced Biostatistics (3 Credit Hours)

Pre-requisites: STAT 203 or STAT 335 This course provides an overview of advanced topics in applied statistics with particular application in biology and medicine, including the interpretation of Minitab, SAS and S-Plus computer output

No course description is available

Course equivalencies: X-STAT336/BIOL336

Outcomes:

Students interested in applied statistical methods will obtain skill in experimental design, linear regression, categorical data analysis and logistic analysis, nonlinear regression, bioassay and drug synergy methods, as well as multivariate and survival statistical methods

STAT 337 Quantitative Methods in Bioinformatics (3 Credit Hours)

Pre-requisites: STAT 203 or 335 This course develops the mathematical and statistical methods necessary to analyze and interpret genomic and proteomic data, including signal analysis, sequence alignment methods, data-base search methods useful in bioinformatics and data mining

No course description is available

Interdisciplinary Option: Bioinformatics

Course equivalencies: XSTAT337/BIOL337/BIOL337

Outcomes:

Students will obtain the quantitative skills used in BLAST, including inference, stochastic processes and hidden Markov models, random walks, microarray analysis and biological sequence analysis

STAT 338 Predictive Analytics (3 Credit Hours)

Pre-requisites: STAT 308 *Outcomes:* Learn methods for predicting and classifying; Model Selection; Evaluate the effectiveness and accuracy of a model/prediction

Students will study methods for predicting future events and properly classifying data using both supervised and unsupervised statistical learning techniques.

STAT 351 Nonparametric Statistical Methods (3 Credit Hours)

Pre-requisites: STAT 203 or STAT 335 with C- or better Students should learn how to apply the nonparametric techniques in real datasets, interpret the results and draw conclusions

This course will cover the basic principles of nonparametric methods in statistics including: one, two and K sample location methods; tests of randomness; tests of goodness of fit; nonlinear correlation; histogram; density estimation; nonparametric regression.

STAT 370 Data Science Consulting (3 Credit Hours)

Pre-requisites: STAT 308 *Outcomes:* 1) Apply methods learned in classes to a address a real world problem; 2) Oral and Written presentation skills; 3) Collaboration skills

Students will work on a research project with a client acting as a consultant on the statistical and computational aspects of the project. Students are required to meet with a client, develop a strategy for addressing their problem, and present their results to the client (and their classmates).

This course satisfies the Engaged Learning requirement.

STAT 388 Topics : (1-3 Credit Hours)

Pre-requisites: STAT 203 or STAT 335 This course covers advanced topics in statistics, such as multivariate analysis, sampling theory, non-parametric methods, decision theory, and Bayesian analysis

No course description is available

Outcomes:

Students will obtain an understanding of an advanced topic in their major

STAT 390 Undergraduate Seminar (1 Credit Hour)

Pre-requisites: Senior Standing, including completion of Math 304/Stat 304 The seminar will cultivate students' presentation skills through participation in and critical discussion of brief lectures on familiar and unfamiliar topics; preparation and presentation of two brief lectures by the student (one on a familiar topic from the curriculum, one on a higher level material not customarily from the curriculum); and preparation of an extended abstract summarizing the advanced material presented

No course description is available

Outcomes:

Students will gain the ability to present material in Statistics, and their applications to a general audience

STAT 391 Internship in Actuarial Science (1-3 Credit Hours)

Pre-requisites: STAT 304 and 396; approval of the internship director This course offers an opportunity to obtain experience in actuarial science in a professional environment; placement requires approval of the internship coordinator and acceptance by an employer

No course description is available

This course satisfies the Engaged Learning requirement.

Outcomes:

Students will obtain first hand experience doing actuarial work in a real world environment

STAT 396 Actuarial Seminar I (1 Credit Hour)

Pre-requisites: MATH 263 The seminar provides a comprehensive review of the probability topics that most commonly appear on the Actuarial Exam P

Topics covered include: axiomatic probability, combinatorial probability, conditional probability and Bayes' Theorem, independence, random variables and their various distributions, joint distributions, marginal distributions, conditional distributions of two or more random variables.

Outcomes:

The purpose of the seminar is to prepare students for the Actuarial Exam P; The students will also learn test-taking strategies and will have the opportunity to take practice tests

STAT 397 Actuarial Seminar II (1 Credit Hour)

Pre-requisites: MATH 263 The seminar is a continuation of STAT 396. It provides a comprehensive review of topics in probability and risk management directed toward students preparing for the Actuarial Exam P. Additional topics may include order statistics, moment-generating functions, the Central Limit Theorem and risk analysis.

Outcomes:

The purpose of the seminar is to prepare students for the Actuarial Exam P; The students will also learn test-taking strategies and will have the opportunity to take practice tests

STAT 398 Independent Study (1-6 Credit Hours)

This course allows students to engage in independent study on selected topics in statistics under the supervision of a faculty member.

Outcomes:

Students will obtain an understanding of an advanced topic in their major

STAT 399H Honors Tutorial (1-3 Credit Hours)

This course allows students in the honors program to engage in independent study of selected topics in statistics for honors credit under the supervision of a faculty member.

Course equivalencies: STAT399H / STAT399

Outcomes:

Students will obtain an understanding of an advanced topic in their major

STAT 401 Introduction to Applied Statistics Using R (1 Credit Hour)

Pre-requisites: Limited to Graduate Students Only *Outcomes:* Upon completion of this course, it is expected that students will skillfully and accurately perform real-time data analysis using R and R/Studio. This course covers the basics of applied statistics including descriptive statistics and visualization (including graphing), univariate methods, inference, hypothesis testing and confidence intervals, two-sample and paired analyses, simple and multiple linear regression, ANOVA and logistic regression. The course introduces and uses the R freeware package.

STAT 403 SAS Program & Appl Stat (3 Credit Hours)

While simultaneously reviewing basic statistical methods (t tests, regression, ANOVA, interaction, etc.), this course introduces statistical modelling using the SAS program, involving the DATA step and various SAS procedures. Working on hands-on projects using real datasets, students present their final project results.

STAT 404 Probability & Statistics I (3 Credit Hours)

As the first part in a two-semester sequence, this course introduces basic principles of probability including combinatorial methods, probability and cumulative density and mass functions, moment generating functions and applications, expected values and variance and other moments, and order statistics. This course emphasizes related theorems and proofs.

Course equivalencies: X-MATH404/STAT404

STAT 405 Probability & Statistics II (3 Credit Hours)

As the second part in a two-semester sequence, this course thoroughly explores the central limit theorem and its variants and uses, estimation, hypothesis testing, sufficiency, efficiency, uniformly most powerful methods, information, and asymptotic methods. Time permitting, Bayesian topics may also be explored and discussed.

Course equivalencies: X-MATH405/STAT405

STAT 406 Stochastic Processes (3 Credit Hours)

This course addresses topics such as finite-state Markov processes and Markov chains, classification of states, long-run behavior, continuous time processes, birth and death processes, random walks, and Brownian motion.

Course equivalencies: X-MATH406/STAT406

STAT 407 Statistical Design (3 Credit Hours)

This course provides students with a thorough introduction to statistical experimental design and to the statistical methods used to analyze the resulting data. The concepts of comparative experiments, ANOVA and mean separation procedures will be reviewed; blocking (complete and incomplete) will be discussed, as will be factorial designs, fractional factorial designs, and confounding. The course will focus on biometric applications such as clinical trials, HIV studies, and environmental and agricultural research, but industrial and other examples will occasionally be provided to show the breadth of application of experimental design ideas.

STAT 408 Applied Regression Analysis (3 Credit Hours)

This course provides students with a thorough introduction to applied regression methodology. The concept of simple linear regression will be reviewed and discussed using matrices, and multiple linear regression, transformations, diagnostics, polynomial regression, indicator variables, model building and multicollinearity will be discussed, as will be nonlinear and generalized linear regression. The course will focus on applications such as those from biometry and biostatistics (clinical trials, HIV studies, etc.), sports, engineering, agriculture and environmental science.

STAT 410 Categorical Data Analysis (3 Credit Hours)

This course provides an introduction to modern-day extensions of simple linear regression and ANOVA to the chi-square test including logistic regression and log-linear modeling techniques based on generalized linear models. Specialized methods for ordinal data, small samples, multi-category data, and matched pairs will also be discussed. The focus throughout this course will be on applications and real-life data sets.

STAT 411 Appl. Survival Analysis (3 Credit Hours)

Modern statistical methods are covered to analyze data that is right, left and/or interval-censored. Nonparametric approaches such as the Kaplan-Meier estimation technique, log-rank test and proportional-hazards model are considered as are parametric methods such as those based on the Exponential and Weibull distribution. Accelerated failure time models and nonlinear models are also discussed.

STAT 421 Math Modeling & Simulation (3 Credit Hours)

This course uses SAS, R and high-level languages to perform statistical modelling by conducting statistical simulations to assess linear, generalized linear, nonlinear and complex models and experimental designs. Students will gain practical experience and knowledge in real-world statistical situations for which underlying theory is cumbersome or otherwise intractable.

Course equivalencies: X-COMP421/MATH421/STAT421

STAT 426 Advanced Statistical Inference (3 Credit Hours)

This course presents the role of likelihood methods in a whole range of statistical problems. The course reviews theoretical developments such as efficiency, completeness, and the Cramer-Rao lower bound, and shows how the likelihood approach is used to surpass these methods and to analyze regression problems, to deal with nuisance parameters by using marginal likelihood methods, and to deal with complex data structures such as censored and spatial data.

STAT 436 Topics in Biostatistics (3 Credit Hours)

This course covers experimental design (including interaction, analysis of covariance, and crossover designs) and the analysis of designed studies, simple and multiple linear regression, generalized linear and nonlinear regression, bioassay, relative potency and drug synergy, multivariate analysis (including MANOVA and multivariate regression), repeated measures (designs and analysis), and survival analysis (Cox proportional odds, log-rank tests, Kaplan-Meier estimation) of censored data. The emphasis of the course will be on applications instead of statistical theory, and students will be required to analyze real-life datasets using popular statistical packages.

STAT 437 Quantitative Bioinformatics (3 Credit Hours)

This course explores recently developed mathematical, probabilistic and statistical methods currently used in the fields of bioinformatics and DNA microarray and protein array data analysis. These include stochastic processes, (hidden and traditional) Markov chains, tree- and clustering techniques (including principal components analysis and biplots), discriminant analysis, experimental design strategies and ANOVA methods. Our focus in this course is on the application of these techniques and on meaningful interpretation of results.

STAT 438 Introduction to Predictive Analytics (3 Credit Hours)

Pre-requisites: Graduate students only *Outcomes:* Upon completion of this course, it is expected that students will master applied methods in predictive analytics (using R and/or Python) with applications to real data-sets

This course focuses on finding patterns, associations, and relationships in data. In examining real-world datasets, this course highlights, develops and applies methods in simple and multiple linear and logistic regression, classification and discriminant analysis, resampling methods, model selection, additive models and splines, tree-based methods, support vector machines, and unsupervised learning techniques such as clustering and PCA.

STAT 444 Longitudinal Data Analysis and Mixed Modeling (3 Credit Hours)

Pre-requisites: Graduate Students only *Outcomes:* Upon completion of this course, it is expected that students will master applied mixed-modelling methods (using R and/or SAS) with applications to real data-sets

This course focuses on repeated measures, longitudinal, hierarchical and mixed modeling data analysis with an eye to applications, model identification, software implementation, and interpretation of computer results.

STAT 451 Applied Nonparametric Methods (3 Credit Hours)

Pre-requisites: Graduate Students only *Outcomes:* Upon completion of this course, it is expected that students will master applied nonparametric statistical methods (using R and/or SAS) with applications to real data-sets

Many basic statistical techniques are based upon normal or binomial distributional assumptions which may not be appropriate in practice. This course introduces and illustrates rank-based methods, permutation tests, bootstrap methods, and curve smoothing useful to analyze data when normal and/or binomial assumptions are not valid.

STAT 465 Actuarial Theory I (0 Credit Hours)

This course provides an introduction to the models and methods used in actuarial mathematics and risk theory. Students are expected to gain a broad understanding of frequency and severity modelling, pricing, and accumulated risk. This course includes a blend of theory and applications.

Course equivalencies: X-MATH465/STAT465

STAT 466 Actuarial Theory II (0 Credit Hours)

With an introductory background in the field provided in STAT 465, this course thoroughly explores modelling and estimation techniques in actuarial mathematics and risk theory.

Course equivalencies: X-STAT466/MATH466

STAT 468 Risk Theory (0 Credit Hours)

With a focus on insurance, pensions and investments, this course provides an overview of the theory of risk, emphasizing the statistical challenges and assumptions inherent in models and methods.

Course equivalencies: X-STAT468/MATH468

STAT 488 Topics in Statistics (1-3 Credit Hours)

This topics course provides the means for new courses on current or 'hot' topics to be offered to students, with the topics being crafted to the given topic at hand. As such, the course may be taken repeatedly.

STAT 495 Statistical Consulting Capstone (2 Credit Hours)

Pre-requisites: Graduate Students only *Outcomes:* Upon completion of this course, it is expected that students will master the soft-skills of statistical consulting, communication, active listening, and real-time data analysis

Students enrolled in this course will be introduced to statistical consulting techniques useful for work with researchers and decision-makers in university, medical, financial and industrial settings; students will engage in actual hands-on statistical consulting with administrators, researchers, or students at one of Loyola's lakeside campuses or remotely.

STAT 498 Independent Study Statistics (1-6 Credit Hours)

Working with a statistics faculty member on a one-on-one or small group format, this course affords students the opportunity to thorough explore a statistical topic at greater depth. Generally, it involves a good deal of outside reading and/or programming, and weekly meetings with the professor.

Supply Chain Management (SCMG)

Discover, search, courses!

SCMG 232 Introduction to Supply Chain Management (3 Credit Hours)

Introduction to the concept of supply chain management, including a broad overview of main functional roles such as procurement, transportation, and inventory. Introduction to best practice methods for planning and managing supply chains, including how to do so efficiently, ethically, and sustainably. Methods include analytics and lean management.

Course equivalencies: SCMG332/332H/SCMG232/232H

Outcomes:

Understanding of fundamental activities in supply chain management, methodologies to support those activities, and how they impact a firm both in terms of its profit and its impact on society and the planet

SCMG 232H Introduction to Supply Chain Management-Honors (3 Credit Hours)

Introduction to the concept of supply chain management, including a broad overview of main functional roles such as procurement, transportation, and inventory. Introduction to best practice methods for planning and managing supply chains, including how to do so efficiently, ethically, and sustainably. Methods include analytics and lean management.

Course equivalencies: SCMG332/332H/SCMG232/232H

Outcomes:

Understanding of fundamental activities in supply chain management, methodologies to support those activities, and how they impact a firm both in terms of its profit and its impact on society and the planet

SCMG 332 Operations Management (3 Credit Hours)

Pre-requisites: Sophomore standing and minimum grade "C-" ISSCM 241 Introduction to concepts and methods for managing production and service operations

Topics include demand forecasting, aggregate and capacity planning, inventory management, facility layout and location, just-in-time, managing quality, project planning, resource allocation, and logistics.

Course equivalencies: SCMG332/332H/SCMG232/232H

Outcomes:

Understanding of basic issues and role of operations management in organizations, and of tools for problem-solving in operations management

SCMG 332H Operations Management - Honors (3 Credit Hours)

Pre-requisites: Sophomore Standing or above; minimum grade of "C-" in ISSCM 241 or ISSCM 241H; Restricted to SBA Honors Students Introduction to concepts and methods for managing production and service operations. Topics include demand forecasting, aggregate and capacity planning, inventory management, facility layout and location, just-in-time, managing quality, project planning, resource allocation, and logistics.

Course equivalencies: SCMG332/332H/SCMG232/232H

Outcomes:

Understanding of basic issues and role of operations management in organizations, and of tools for problem-solving in operations management

SCMG 337 Fundamentals of Lean Production (3 Credit Hours)

Pre-requisites: Junior Standing, minimum grade of "C-" in SCMG 332 or SCMG 332H or SCMG 232 or SCMG 232H

Methods for managing manufacturing and service operations based upon Toyota Production System. Topics include the principles of JIT and lean production, pull production, setup reduction, preventive maintenance, cellular manufacturing, employee empowerment, and supplier partnerships.

Course equivalencies: OPMG337 / MGSC337

Outcomes:

Understanding of concepts and tools for reducing waste and continuously improving operations based upon Toyota's success-proven approach

SCMG 338 Global Supply Chain Management I (3 Credit Hours)

Pre-requisites: Sophomore Standing; minimum grade of "C-" in SCMG 332 or SCMG 332H or SCMG 232 or SCMG 232H

This course examines how business partners like suppliers, manufacturers, distributors, and retailers work together to gain competitive advantage in moving products and services around the world to satisfy customers.

Interdisciplinary Option: International Business

Course equivalencies: OPMG338 / MGSC338

Outcomes:

Understanding best practices like vendor managed inventory and category management and the application of information technologies for sharing information

SCMG 340 Global Supply Chain Management II (3 Credit Hours)

Pre-requisites: Sophomore Standing; minimum grade of "C-" in SCMG 332 or SCMG 332H or SCMG 232 or SCMG 232H

An examination of the planning and management of global supply chain operations. Emphasis placed on the areas of sourcing and procurement. Each area analyzed in terms of key goals, operational processes, technology applications and performance control mechanisms. Focus on strategic issues that face a sourcing organization.

Outcomes:

Develop critical thinking skills concerning the supply and sourcing function

SCMG 341 Quality Management & Continuing Improvement (3 Credit Hours)

Pre-requisites: Junior Standing, minimum grade of "C-" in SCMG 332 or SCMG 332H or SCMG 232 or SCMG 232H

This course examines various philosophies, methods, and tools for quality management and continuous improvement of products, services, and processes. Topics include total quality, quality costs and measures, quality of design, quality awards and standards, statistical process control, Six Sigma and problem-solving techniques.

Course equivalencies: ISOM341 / MGSC341

Outcomes:

Basic understanding of total quality, quality costs, measures, statistical process control, Six Sigma, process improvement, and problem-solving techniques

SCMG 342 Supply Chain Modeling (3 Credit Hours)

Pre-requisites: Junior Standing, minimum grade of "C-" in SCMG 332 or SCMG 332H or SCMG 232 or SCMG 232H

This course studies various analytical methods and tools for making decisions that will lead to cost effective products, services and processes. Topics include developing decision-making optimization models and implementing those models in Excel. The course will highlight models used in supply chain management; including facility location, transportation network design and vehicle routing.

Outcomes:

Basic understanding of optimization modeling, implementing optimization models in Excel and problem-solving techniques

SCMG 346 Sustainable Supply Chain (3 Credit Hours)

Pre-requisites: Junior Standing, minimum grade of "C-" in SCMG 332 or SCMG 332H or SCMG 232 or SCMG 232H

Sustainability has emerged as a central issue in today's business world. Environmental issues such as global warming, increasing waste and pollution, depleting natural resources combined with societal issues such as health, safety, equality and development put an unprecedented pressure on companies to realign their businesses while remaining profitable and competitive.

Outcomes:

The course consists of three main modules: Eco-Efficiency; Eco-Effectiveness; and Sustainable Supply Chain

SCMG 383 Management of Service Operations (3 Credit Hours)

Pre-requisites: Junior Standing, minimum grade of "C-" in SCMG 332 or SCMG 332H or SCMG 232 or SCMG 232H

This course studies the management of service businesses in general, and how services are delivered to the customer in particular.

Course equivalencies: ISOM383 / MGSC383

Outcomes:

Understanding how services differ from manufactured goods, and how service management requires unique tools for managing customer expectations while simultaneously delivering services that exceed those expectations

SCMG 395 Independent Study in Operations Management (1-3 Credit Hours)

Independent study is in-depth research or reading, initiated by the student and jointly developed with a faculty member in a specialized area of Operations Management not otherwise covered by departmental course offerings. Variable Credit. May count for Operations Management major or minor. Permission of Assistant Dean required.

SCMG 396 Supply Chain Seminar (0 Credit Hours)

Professional speaker series for all students majoring in Supply Chain Management. Students will benefit from hearing professionals in the supply chain industry discuss current events, opportunities and challenges within the industry.

SCMG 399 Special Topics in Operations Management (1-3 Credit Hours)

Special topics are scheduled classes offered on an ad hoc basis. Specific titles, prerequisites and content will vary.

SCMG 480 Intro to Operations Mgmt (3 Credit Hours)

Introduction to concepts and methods for managing operations in manufacturing and service organizations. Topics typically include forecasting, capacity and aggregate planning, material requirements planning, scheduling, facility layout and location, inventory management, just-in-time, total quality management, project planning, and logistics.

Course equivalencies: ISOM480 / MGSC480

Outcomes:

Students will understand the basic issues and role of operations management in organizations and learn tools for problem-solving in operations management

SCMG 480B Operations Management (3 Credit Hours)

Pre-requisites: Restricted to MBA Baumhart Scholars students *Outcomes:*

Students will understand the basic issues and role of operations management in organizations and learn tools for problem-solving in operations management

This course explores concepts and methods for managing operations, including forecasting, capacity and aggregate planning, sustainable management, material requirements planning, scheduling, project planning, logistics, supply chain transparency, and supplier diversity.

SCMG 481 Performance Improvement in Business Processes (3 Credit Hours)

Focuses on process view of the organization and provides students with a formal approach to designing, monitoring and improving business processes. The course provides the tools, methods and practical examples to help managers learn how to think from a process standpoint and how to ensure critical processes are controlled and functioning efficiently and effectively in their organization. Outcome: Understanding of the quality management concepts, performance improvement frameworks (Six Sigma, ISO, Baldrige), and process improvement practices using a step-by-step problem solving methodology.

Course equivalencies: ISOM481 / MGSC481

SCMG 481E Performance Improvement in Business Processes (1.5 Credit Hours)

Enrollment is restricted to students in the Executive MBA Program. Focuses on teaching students how to successfully analyze a business process, research methods for improving a process, and adapt/integrate the improvement methods into the business process in a prioritized and actionable manner. The course accomplishes this through the concepts of benchmarking, best practices, and performance improvement principles.

Course equivalencies: OPMG 603E/OPMG 481E

SCMG 482 Lean Production Concepts and Practices (3 Credit Hours)

Methods for managing manufacturing and service operations based upon Toyota Production System. Topics include the principles of JIT and lean production, pull production, setup reduction, preventive maintenance, cellular manufacturing, standard operations, visual management, employee empowerment, and supplier partnerships.

Course equivalencies: ISOM482 / MGSC482

Outcomes:

Understanding of concepts and tools for reducing waste and continuously improving operations based upon Toyota's success-proven approach

SCMG 483 Mgmt of Service Operations (3 Credit Hours)

Pre-requisites: SCPMG/ISSCM 480 This course explores the application of operations management concepts and techniques in service-sector organizations, and, in particular, how services are delivered to the customer

Outcome: Understanding how service management requires unique tools for managing customer expectations while simultaneously delivering services that exceed those expectations.

Course equivalencies: OPMG483/CSIS483

SCMG 486 Global Logistics (3 Credit Hours)

Pre-requisites: Graduate School of Business student

This course examines how business partners along the supply chain can work together to gain competitive advantage in moving products and services around the world to satisfy customers.

Outcomes:

Understanding best practices like vendor-managed inventory and category management, and the application of information technologies for sharing information

SCMG 486E Global Supply Chain Management (1.5 Credit Hours)

Explores the current business revolution in global logistics and partnering by members of the supply chain to more effectively provide products and services to customers. Must be part of the Cohort of Executive MBA (EMBA) students to enroll.

SCMG 487 Purchasing Management (3 Credit Hours)

Pre-requisites: Graduate School of Business students

A study of organizational procurement processes and decision making framework. Topics include in-sourcing/out-sourcing decisions based on total cost of ownership; purchasing cycle and processes; developing material and technical specifications; supplier evaluation, selection and management; supplier quality management; purchasing capital goods and services; global sourcing and e-commerce; and purchasing tools and analytics.

Outcomes:

Students will have developed an understanding of fundamental and strategic issues in material planning and procurement, with the ability to source in a global marketplace

SCMG 488 Inventory Management (3 Credit Hours)

Pre-requisites: Graduate School of Business students

A study of the fundamental principles of effective management of inventory with emphasis on inventory costs, product stratification, performance measures, demand forecasting, periodic and continuous review, safety stock, material requirements planning, customer service and use of technology in inventory management. Issues related to storage and handling of inventory stock are also studied.

Outcomes:

Students will have developed an understanding of the issues involved in planning, managing and control of inventories and materials in a supply chain

SCMG 489 Supply Chain Analytics (3 Credit Hours)

Pre-requisites: Graduate School of Business students

A study of the design, development, and use of decision models for analysis of supply chain problems. This course provides an example-driven approach to learn about important supply chain models, problems, and solution methodologies. The objectives of this course are to develop valuable modeling skills that students can appreciate and use effectively.

Outcomes:

Students will have developed an understanding of the issues involved in the use of decision support tools for analysis of supply chain problems

SCMG 499 Indep Study-Product & Oper Mgmt (3 Credit Hours)

Independent study is in-depth research or reading, initiated by the student and jointly developed with a faculty member, into a specialized area of operations management not otherwise covered by department course offerings.

SCMG 589 Supply Chain Management Consulting (3 Credit Hours)

Pre-requisites: SCMG 480 Intro to Operations Mgmt; Graduate School of Business students

This course is the capstone of the Supply Chain Management Portfolio of the Master of Science in Supply Chain Management curriculum. As such, it is designed to integrate course topics covered in the foundation courses and engage students in discussions of critical supply chain leadership topics.

Outcomes:

Students will have developed an understanding of how to apply the concepts learned throughout the Supply Chain Management curriculum to a variety of full scale problems

SCMG 603E Performance Improvement in Business Processes (1.5 Credit Hours)

Restricted to Executive MBA students. This course focuses on the process view of the organization and provides students with a formal approach to designing, monitoring and improving business processes. The course provides tools, methods and practical examples to help managers learn how to think from a process standpoint and how to ensure critical processes are controlled and function efficiently and effectively.

Course equivalencies: OPMG 603E/OPMG 481E

Outcomes:

Understanding the quality management concepts, performance improvement frameworks (Six Sigma, ISO, Baldrige), and process improvement practices using a step-by-step problem solving methodology

SCMG 799 Special Topics in Supply Chain Management (3 Credit Hours)

Scheduled classes are offered on an ad hoc basis. Specific titles, prerequisites and content will vary.

Outcomes:

Students will be able to demonstrate understanding of specialized topics not otherwise covered by department regular course offerings

Teaching, Learning & Leading with Schls and Commun (TLSC)

Discover, search, courses!

TLSC M42 Special Education Methods (2 Credit Hours)

Pre-requisites: BSEd students only

In this context, methods to adapt the curriculum to individualize instruction to meet the needs of students with special needs will be discussed. Issues of differentiation student needs, long and short-term planning, technology-assisted learning, and social skills curriculum will be addressed. Students will also learn how to actively create learning environments which promote positive learning results in general and special curricula by modifying the learning environment, using direct motivational and instructional interventions.

TLSC 110 The Profession and Our Program (TLLSC) (1 Credit Hour)

This module (course) introduces teacher candidates (students) to the profession and our program (TLLSC) with a focus on collaborative relationships within and among schools, families, and communities. This module (course) will expose teacher candidates (students) to specific knowledge and skill indicators necessary for educators to embody the dispositions of the profession.

This course satisfies the Engaged Learning requirement.

Outcomes:

Teacher candidates (students) will reflect on the knowledge, skills, and dispositions of educators with regard to teaching diverse students, the mission of Professionalism in Service of Social Justice, and the connection between research and practice related to collaborative relationships

TLSC 120 Bringing Language, Learning & Dev Theory into Practice (2 Credit Hours)

In this module, students will observe and learn key principles and stages developmental and learning theories via clinical experiences in birth to grade 12 settings (including infant/toddler, preschool, elementary, middle, and high schools). The primary focus of these experiences is to explore the ways in which physical characteristics, communication skills, cognitive capacities, and social-emotional needs of children be used to understand theory and inform adult-child interaction and developmentally appropriate pedagogical practices in birth to grade 12 settings with both typically and atypically developing children.

This course satisfies the Engaged Learning requirement.

Outcomes:

Through guided observation, students will explore the ways in which social, cultural, and environmental contexts shape the development and cognitive processing at each age, and use this knowledge to inform recommendations for developmentally appropriate adult-child interaction and pedagogical practices with every age range from birth through grade 12

TLSC 130 Sequence One: 130 Community Immersion (1 Credit Hour)

This module (course) is designed to engage teacher candidates (students) in an authentic exploration of the inherent relationship between P-12 schools and the surrounding community. Teacher candidates (students) are introduced to the concepts of cultural and social capital as they work in small groups to explore a thematic component of these communities. Must be registered for TLSC 110 and TLSC 120 concurrently.

This course satisfies the Engaged Learning requirement.

Outcomes:

Teacher candidates (students) will complete a Community Map Project, which includes a map of community elements, concept map depicting the relationship between elements and resources, narrative analysis of findings, and personal reflection

TLSC 140 Teaching, Learning and Leading for Social Justice (1 Credit Hour)

Co-requisites: (TLSC 110, 120, and 130) OR CIEP 360

Prerequisites or Restricted to All SOE Undergraduate Majors This module (course) builds on candidates' initial explorations of diverse learning environments and continues to develop candidates' understanding of the School of Education's mission of professionalism in service of social justice and the core tenets of culturally responsive pedagogy. Candidates will complete a self-documentation project in which they explore their own identities and recognize how their thinking, behavior, and being are influenced by their own personal experiences, race/ethnicity, social class, language, religion, age, etc.

TLSC 150 Constructive Learning Environments For Diverse Students (1 Credit Hour)

Co-requisites: (TLSC 110, 120, and 130) OR CIEP 360

This module (course) deepens teacher candidates' introduction to learning and development through consideration of the importance of healthy learning environments. Candidates will complete a classroom management self-assessment and develop a related action plan for enhancing a constructive classroom environment. Prerequisites or Restricted to All SOE Undergraduate Majors

TLSC 160 Analyzing Culturally-Responsive Classroom Instruction (1 Credit Hour)

Co-requisites: (TLSC 110, 120, and 130) OR CIEP 360

This module (course) builds on candidates' initial explorations of learning and development and the core tenets of culturally responsive pedagogy as candidates are introduced to backward design and Universal Design for Learning. Candidates will conduct a lesson analysis to assess the effectiveness of a lesson based on established criteria for culturally responsive teaching. Prerequisites or Restricted to All SOE Undergraduate Majors

TLSC 210 Educational Policy For Diverse Students (2 Credit Hours)

Pre-requisites: TLSC 140, 150, and 160 with a minimum grade of "C" or better

Restricted to All SOE Undergraduate Majors This module (course) specifically engages teachers in looking at the policy related to diverse students in schools, particularly language policy (affecting ELLs and bilingual students) and special education policy (affecting students with special needs). Candidates will learn the policies, laws and court cases that impact classrooms, see how educational policies are enacted into classroom practice to support students, and make suggestions on continued ways to improve the achievement of students in urban classrooms and schools. Teacher candidates will explain the role of policy in educational practice, including the role of the teacher in advocating for change within the educational institution

TLSC 220 Individualized Assessment & Instruction for Diverse Students (4 Credit Hours)

This module is specifically designed for candidates to appreciate, discern and utilize the individual needs of students to plan instruction and support student achievement. In this module, student achievement is not only conceptualized as academic, but also social, emotional, behavioral, cultural and linguistic; in this way, candidates will explicitly focus on the multifaceted nature of planning for students with special needs and those who have been labeled as ELL. Through the use of case study research to collect individualized, authentic language and literacy assessment with one student, candidates will apply learning to the specific instructional context of a student who qualifies with at least one of the following labels: (a) student with special needs, (b) English language learner, or (c) struggling reader.

TLSC 221 Individualized Instruction and Assessment for Diverse Learners (2 Credit Hours)

Pre-requisites: TLSC 140, 150, and 160 with a minimum grade of "C" or better

Restricted to All SOE Undergraduate Majors Course Description: This module is designed for teacher candidates to appreciate, discern, and utilize the individual needs of students to plan instruction and support student achievement, particularly students with diverse learning and behavioral needs. Through the use of case study research to conduct individualized assessments with diverse learners, candidates will work with students with special needs or those at risk of this being identified as having a disability. Candidates will apply learning to the instructional context with academically, behaviorally, culturally, cognitively, and socially/emotionally diverse students.

Outcomes:

- Use research and evidence-based practices to design instruction that includes the alignment of goals, objectives, assessments and instructional strategies to meet the individual needs of students;
- Use data to drive instruction and assess teaching and learning effectiveness;
- Apply deep understanding of both content and pedagogy to provide developmentally appropriate instruction to all students;
- Hold high expectations and build on the assets of diverse students (including, but not limited to, race, ethnicity, culture, language, SES, immigration status, exceptionality, ability, sexual orientation, gender, gender identity);
- Explicitly integrate the teaching of reading, writing, communication and technology across content area;
- Create and support safe and healthy learning environments for all students

TLSC 222 Authentic Assessment and Instruction for Bilingual Learners (2 Credit Hours)

Pre-requisites: TLSC 140, 150, and 160 with a minimum grade of "C" or better

Restricted to All SOE Undergraduate Majors This module is designed for teacher candidates to appreciate, discern, and utilize the individual strengths and needs of students who speak a language other than English to plan instruction and support student achievement. Through the use of case study research, candidates conduct individualized, authentic assessments that focus on cultural backgrounds and language development of focal students. Candidates apply their learning with bilingual learners to support language and literacy development and acclimation to learning in the academic context

Outcomes:

Use research and evidence-based practices to design instruction that includes the alignment of goals, objectives, assessments and instructional strategies to meet the individual needs of students; Use data to drive instruction and assess the effectiveness of their teaching and students' learning; Apply deep understandings of both content and language pedagogy to provide developmentally appropriate instruction to students who are learning English as an added language, who may have interrupted schooling, and/or who may have experienced trauma as a result of their immigration experiences and/or dangerous issues in their home country; Hold high expectations and build on the assets of students from different cultural and linguistic backgrounds (including, but not limited to, ethnicity, culture, language, SES, immigration status); Integrate the teaching of language and literacy across all content areas and in ways that use a variety of media to do; and Create and support safe and supportive learning contexts for all students

TLSC 230 Teaching Written Communication in Elementary Grade Classrooms (2 Credit Hours)

This module introduces teacher candidate's (students) to instruction in written communication across the curriculum. Candidates will learn evidence based practices for teaching writing, responding to writing and integrating best practices in writing instruction across content area instruction. The role of audience and purpose across types of texts (i.e., opinion, expository, narrative and research) will be emphasized.

Outcomes:

Teacher candidates (students) will develop, teach, and reflect upon content area writing lessons that address the stages of the writing process, incorporate the use of technology and include support for writers with diverse skills throughout the writing process

TLSC 231 Integrated Teach/Learn Sci & Writing in Elem Grades (3 Credit Hours)

Pre-requisites: TLSC 210, TLSC 221, TLSC 222, Co-requisite TLSC 232

This course introduces candidates (students) to the discipline and culture of science; provides experiences that engage candidates in the teaching and learning of science across varied school and non-school contexts; develops knowledge and skills to teach science through an inquiry approach and integrate writing. Minimum grade of "C". Restricted to ELMS-BSED, SPED-BSED, BILI-BSED majors. Candidates complete an authentic personal inquiry project.

Outcomes:

Candidates will develop, implement, analyze, and reflect upon instructional and materials that ensure rigorous, relevant, inquiry-based science instruction is accessible to all students

TLSC 232 Integrated Teach/Learn SS & Writing in Elem Grades (3 Credit Hours)

Pre-requisites: TLSC 210, TLSC 221, TLSC 222, Corequisite TLSC 231

This introduces candidates (students) to the disciplines of the social studies; provides experiences engaging in the teaching and learning of elementary social studies across varied school and non-school contexts; develops knowledge and skills to teach social studies through an inquiry approach and integrate writing. Minimum grade of "C". Restricted to ELMS-BSED, SPED-BSED, BILI-BSED majors.

Outcomes:

Candidates will develop, implement, analyze, and reflect upon instruction that ensure rigorous, relevant, inquiry-based social studies instruction is accessible to all students; Candidates complete an authentic personal inquiry project

TLSC 235 Teaching Science and Writing in the Middle Grades Classroom (3 Credit Hours)

The content of this module focuses on the Framework for K-12 Science Education and the related Next Generation Science Standards (NGSS). A strong emphasis will be placed on disciplinary literacy within science, including reading comprehension strategies, facilitating scientific discussions, and integrating writing instruction that supports student learning. Students will engage with important science ideas, identify high quality resources, and undergo the process of planning cohesive storylines that could be implemented in middle grade classrooms. OUTCOMES: As a part of this module, candidates will understand that effective educators: - Maintain and utilize global perspectives and international-mindedness when engaging in teaching, learning and leading, including the awareness and application of the social, cultural, inter-cultural and linguistic facets of student achievement; - Use research and evidence-based practices to design instruction that includes the alignment of goals, objectives, assessments and instructional strategies to meet the individual needs of students; - Apply deep understanding of both content and pedagogy to provide developmentally appropriate instruction to all students; - Explicitly integrate the teaching of reading, writing, communication and technology across content areas.

TLSC 236 Teaching Social Studies and Writing in the Middle Grades Classroom (3 Credit Hours)

This sequence addresses social studies instruction with a specific focus on middle grade classrooms. Teacher candidates will be introduced to the field of social studies and the disciplines within it have experiences engaging in the teaching and learning in this field, and specifically work to integrate literacy in powerful and purposeful ways. Candidates will learn culturally responsive teaching practices, choose and use high quality texts and resources, and utilize reading comprehension and analysis strategies as students ask essential questions that explore the important connections between history and current events. The teacher candidate commits to appropriate professional and interpersonal behaviors in this module by: - demonstrating professionalism and reflective practice in collaborating with teachers, students, administrators, families, and communities to improve achievement for all students. (9N) (IB) (D4); - participating in ongoing professional development, reading, and research in order to deepen their knowledge and expand their repertoire of skills. (90) (IB) (D5); - valuing and utilizing the unique identities and backgrounds of all students, families and communities as essential assets in learning environments. (9L, 9N) (IB) (D7); - demonstrating that authentic literacy instruction is the responsibility of all teachers, across all disciplines and grade levels. (2H, 6A) (IB) (D9); - valuing and promoting curiosity, creativity, and life-long learning in students. (IB) (D15);

Outcomes:

Each sequence and module in the Teaching and Learning with Schools and Communities Program (TLLSC) focuses on specific professional dispositions and candidates are offered opportunities to receive feedback on their dispositional growth

TLSC 240 Language, Culture, and Pedagogy in Bilingual Classrooms (3 Credit Hours)

Pre-requisites: TLSC 210, TLSC 221, AND TLSC 222 (Grade "C" or better) Restricted to BILI-BSED, and BILI-MINR. This module deals with bilingual education, schools, classrooms, and learners, with an emphasis on building off of students' cultural and linguistic resources to utilize and maintain native language. In order to accomplish these important building blocks of bilingual education, teacher candidates will inquire into and analyze the school's approach to family and community involvement with a specific lens on L1 maintenance and bilingualism. Candidates will engage with parents, families, and communities to inform the analysis of the school and classroom's alignment to language use in homes and communities.

TLSC 241 Language, Culture, and Pedagogy in Spanish Language Classrooms (3 Credit Hours)

This module offers a cultural, linguistic, and pedagogical immersion in a school setting to prepare teachers who will use Spanish as a medium of instruction. Participants spend two weeks in Mexico City living in a homestay and pairing with an elementary school teacher for a classroom teaching experience. Teacher candidates surround themselves with the rich cultural heritage and linguistic resources of Mexico, gaining a better understanding of the largest group of linguistically diverse students in Chicago and the broader United States.

TLSC 250 Developmentally Appropriate Practice (DAP) with Infants/Toddlers and their Families (3 Credit Hours)

Pre-requisites: TLSC 210, TLSC 221, and TLSC 222 (Minimum of "C" grade)

Infants-Toddlers-EI 1 is the first of two clinically-based modules emphasizing specialized knowledge and skills for working with children from birth to age three in early intervention (EI) and EHS (Early Head Start) settings. This course explore current knowledge and research findings about high-quality, developmentally appropriate early childhood care and education in the context of programs for infants and toddlers (including those with special needs) and their families and is designed to prepare future teachers to fill the role of an effective early interventionist and infant/toddler specialist. Co-requisite: 251, 252, 253. Restricted to ECSE-BSED.

Outcomes:

As a result of this experience (which includes components related to assessment, intervention, work with families, and infant/toddler development), students will demonstrate proficiency at designing safe, supportive environments of nurturing care for infants and toddlers (including those with special needs) and their families by applying the principles of developmentally appropriate practice in curriculum design/delivery, assessment, and intervention

TLSC 251 Family-Centered Assessment and Intervention in Early Intervention (3 Credit Hours)

Pre-requisites: TLSC 210, TLSC 221, and TLSC 222 (Minimum of "C" grade)

Infants-Toddlers-EI 1 is the second of two clinically-based modules emphasizing specialized knowledge and skills for working with children from birth to age three in early intervention (EI) and EHS (Early Head Start) settings. This course includes intensive clinical experiences in EI with infants and toddlers with special needs and their families, and is designed to complement Infants-Toddlers-EI 1 (Developmentally Appropriate Practice (DAP) with Infants/Toddlers and their Families) in preparing future teachers to fill the role of an effective early interventionist and infant/toddler specialist. Co-requisite: 250, 252, 253. Restricted to ECSE-BSED.

Outcomes:

As a result of this experience which (like I-T-EI 1) includes components related to assessment, intervention, diverse families, and infant/toddler development, students will develop their skills in working directly with families in designing assessment systems and interventions for infants and toddlers with special needs that address family resources, priorities, and needs

TLSC 252 Fdns, Settings, and Stds of Effective Early Childhood Educ (1 Credit Hour)

Pre-requisites: TLSC 210, TLSC 221, and TLSC 222 (Minimum of "C" grade)

Co-requisite: TLSC 250, TLSC 251, TLSC 253. Restricted to ECSE-BSED. This field-based module provides an introduction to the diverse settings in which children birth-8 are served. Candidates will investigate the interlaced professions of early childhood education and early childhood special education. Outcome: Students will interpret and analyze trends in early care and education.

TLSC 253 Dev Approp Practice Assess & Int for Young Children Sp Needs (2 Credit Hours)

Pre-requisites: TLSC 210, TLSC 221, and TLSC 222 (Minimum of "C" grade)

Co-requisite: TLSC 250, TLSC 251, TLSC 252. Restricted to ECSE-BSED. This course frames sequence 4 in the TLLSC teacher preparation program. It addresses knowledge and skills in understanding the development of young children with special needs and the implications of that understanding for assessment and intervention in birth to five.

Outcomes:

Candidates will develop classroom environments, curriculum, and instructional strategies for working with infants, toddlers, and preschoolers, as well as demonstrating mastery of authentic assessments required for IL state credentialing

TLSC 260 Typical and A-Typical Development (2 Credit Hours)

This module (course) further develops and deepens candidates' (students) understanding and application typical and a-typical development of youth. Candidates use information about human development to develop individualized support plans for students with special needs.

Outcomes:

Teacher candidates (students) will reflect information related to the ways children develop a-typically and develop a mock individualized support plan for review

TLSC 261 Significant Disabilities and Life Planning (2 Credit Hours)

This module (course) further develops and deepens candidates' (students) understanding and application of the develop support for people with disabilities. Candidates use information regarding special needs to identify appropriate support and intervention models.

Outcomes:

Teacher candidates (students) will apply information related to students with significant support needs within individualize education plans

TLSC 262 Assistive and Adaptive Technology (2 Credit Hours)

This module (course) further develops and deepens candidates' (students) understanding of support for people with disabilities. Candidates use information regarding special needs to identify appropriate assistive and adaptive technology supports.

Outcomes:

Teacher candidates (students) will apply information related to students with significant support needs when identifying assistive and adaptive technology to be incorporated within individualize education plans

TLSC 263 Transition Planning (2 Credit Hours)

This module (course) further develops and deepens candidates' (students) understanding of support for people with disabilities. Candidates use information regarding special needs to develop transition support plans.

Outcomes:

Teacher candidates (students) will apply information related to students with significant support needs when supporting the development of the transition components of individualized education plans

TLSC 300A Professional Learning Communities (0 Credit Hours)

Professional learning communities (PLCs) provide the opportunity to engage in collaboration with a community of learners - discussing and making meaning of all learning and experiences in schools and communities. At the close of each semester, following the completion of the PLCs by specialty area and submission of the summative assessments for other sequences, teacher candidates will reflect upon their personal and professional learning during that semester. Teacher candidates will (a) share learning from various school-based experiences, (b) apply learning through completion of summative assessments, and (c) synthesize learning through reflection and discussion related to EUs and dispositions.

TLSC 300B Professional Learning Communities (1 Credit Hour)

Professional learning communities (PLCs) provide the opportunity to engage in collaboration with a community of learners - discussing and making meaning of all learning and experiences in schools and communities. At the close of each semester, following the completion of the PLCs by specialty area and submission of the summative assessments for other sequences, teacher candidates will reflect upon their personal and professional learning during that semester. Teacher candidates will (a) share learning from various school-based experiences, (b) apply learning through completion of summative assessments, and (c) synthesize learning through reflection and discussion related to EUs and dispositions.

TLSC 310 Language and Literacy for Diverse Students (2 Credit Hours)

This module (course) introduces teacher candidates (students) to essential foundations in teaching reading. Emphasized will be skills developmentally appropriate for the candidate's teaching endorsement level including phonological awareness, phonics, vocabulary, fluency and text comprehension. A balance of instructional practices appropriate for a variety of narrative and informational texts will be included.

Outcomes:

Teacher candidates (students) will learn to design and teach lessons, focusing on standards based reading skills to linguistically diverse students, through use of research based reading strategies

TLSC 320 Using Classroom Data in a Collaborative Environment to Advance Student Achievement (2 Credit Hours)

This module (course) develops candidates' ability to collect, represent, and analyze appropriate classroom data. Students will use this ability to determine the level of objective mastery and measure student growth. Reflection on the analysis will guide candidates' decisions regarding instructional adjustment and individual student needs

Outcomes:

Teacher candidates will be proficient in the use of data based decision making that informs instruction and guides students' academic and behavioral modifications

TLSC 325 Teaching Internship in Informal Education Settings (3 Credit Hours)

The internship experience builds on experiences teacher candidates have in the TLLSC program working with local museums. Candidates will complete internship hours on site at assigned museum, working directly with the museum's Ed department. In addition, they will participate in online seminar meetings designed to make sense of the internship experiences, digest the relevant literature and draw research to practice connections. Develop and assess personal learning objectives following Loyola Center for Experiential Learning protocols.

TLSC 326 Informal Science Education Seminar (3 Credit Hours)

This course examines current issues around teaching and learning in informal science education (ISE). Students will develop and apply an understanding of learning theories related to learning in informal science, collaborations between informal and formal science education, issues around access and equity, and research and evaluation related to informal science education. Course

Outcomes:

- Describe characteristics of teaching and learning in informal science settings; - Describe practices that support learning and development in informal science settings; - Summarize theories and frameworks relevant to understanding teaching, learning and development in informal science settings; - Explain the ways in which out-of-school science programs collaborate with and support in-school science teaching and learning; - Explain challenges and barriers to collaboration between in and out of school science teaching and learning; - Debate the strengths and challenges of particular programs and/or institutions in terms of promoting science interest, engagement, and learning; - Critique efforts to broaden participation in informal science and learning, including people with physical disabilities, diverse learning needs, and from minority backgrounds; - Summarize current and historical research and evaluation priorities, approaches and findings related to informal science education

TLSC 330 Discipline-Specific Literacy for Diverse Students (2 Credit Hours)

This module (course) supports teacher candidates (students) in developing their knowledge and skills in teaching and assessing literacy in discipline specific contexts. Emphasized will be the identification and use of culturally responsive texts, evidence based strategies, data based decision making skills and new literacies (technology and online resources) designed to target all students' literacy needs, including those with linguistically diverse backgrounds. They will be required to collect and utilize data to teach targeted standards based reading skills to linguistically diverse students and to utilize technology in their lesson delivery.

Outcomes:

Teacher candidates (students) will apply understanding of literacy lesson design, assessment and instruction in discipline specific contexts

TLSC 340 Teaching and Learning in an Area of Specialization (2 Credit Hours)

This module (course) further develops and deepens candidates' (students) understanding and application of designing instruction in an area of specialization. Candidates use data, select essential content, implement strategic pedagogy, and integrate technology to meet the needs of PreK-12

Outcomes:

Teacher candidates (students) will reflect on their implementation of the full instructional cycle and after analysis of the data generated from that instruction will identify research that informs instruction future teaching

TLSC 350 Teaching and Learning with a Global Framework (4 Credit Hours)

Teacher candidates (students) will work with PreK-12 teachers to develop and implement a transdisciplinary/interdisciplinary curriculum unit with a service component. This module's (course) experiences are specifically designed to prepare candidates (students) for teaching in schools that offer an International Baccalaureate program.

Outcomes:

Teacher candidates (students) assess their instruction using a global framework in this module (course) and develop an action plan to improve practice as they move into the final phase of the teacher preparation program

TLSC 360 Developing Rigorous and Relevant Instruct & Assess (3 Credit Hours)

This module (course) requires candidates, with increasing independence and more limited support from a mentor teacher, to develop rigorous and relevant instruction and assessment. Candidates will demonstrate their ability to use individual student data to plan appropriate and relevant instruction and assessment for all.

Outcomes:

Teacher candidates will obtain and analyze a variety of individual and whole class data and use this data to inform their development of differentiated and rigorous instruction and assessment

TLSC 370 Designing and Implementing Rigorous and Relevant Instr & Assess: Teaching Perform Assess Preparation (3 Credit Hours)

This module (course) requires candidates, with increasing independence and more limited support from a mentor teacher, to implement rigorous and relevant instruction and assessment. Candidates will, while delivering the instructional unit designed in Module 7.1, be required to use a variety of assessments, provide reflection and feedback on the results of assessment using assessment data and make adaptations in order to improve student achievement.

Outcomes:

Teacher candidates will explain how what they have learned from the assessment data will influence their planning and future instruction for students

TLSC 380 Teaching, Learning and Leading with Schools and Communities Internship: Student Teaching (12 Credit Hours)

This module (course) represents the candidates' full-time student teaching experience. Candidates will complete three of the edTPA tasks required for certification (edTPA: Designing Instruction Task; edTPA: Assessing Learning Task; and edTPA: The Culminating Teaching Experience Task) in order to document and demonstrate each candidate's ability to effectively teach his/her subject matter. Candidates will also engage in focused reflection on student teaching and their entire teacher preparation program. Candidates will complete the School of Education's Professional Practice Profile (PPP) essay at the end of the module. This course satisfies the Engaged Learning requirement.

TLSC 400A Professional Learning Communities (0 Credit Hours)

Professional learning communities (PLCs) provide the opportunity to engage in collaboration with a community of learners' discussing and making meaning of all learning and experiences in schools and communities.

Outcomes:

Teacher candidates will (a) share learning from various school-based experiences, (b) apply learning through completion of summative assessments, and (c) synthesize learning through reflection and discussion related to EUs and dispositions

TLSC 400B Professional Learning Communities (1 Credit Hour)

Professional learning communities (PLCs) provide the opportunity to engage in collaboration with a community of learners' discussing and making meaning of all learning and experiences in schools and communities.

Outcomes:

Teacher candidates will (a) share learning from various school-based experiences, (b) apply learning through completion of summative assessments, and (c) synthesize learning through reflection and discussion related to EUs and dispositions

TLSC 401 Language, Learning & Development Theories in Practice (2 Credit Hours)

Students will learn key principles and stages of language acquisition, developmental and learning theories through clinical experiences with children from birth to grade 12. Field experiences provide opportunities to explore ways in which physical characteristics, communication skills, cognitive capacities, and the social-emotional needs of children are used to understand theory and inform adult-child interaction and developmentally appropriate practice.

Outcomes:

Students will explore the ways in which social, cultural, and environmental contexts shape language, development and cognitive processing at each age, and use this knowledge to inform recommendations for developmentally appropriate adult-child interaction and pedagogical practices with every age range from birth through grade 12

TLSC 402 Community Immersion (1 Credit Hour)

This module is designed to engage teacher candidates in an authentic exploration of the inherent relationship between schools and the surrounding community. Teacher candidates are introduced to the concepts of cultural and social capital as they work in small groups to explore a thematic component of these communities.

Outcomes:

Teacher candidates will complete a Community Map Project, which includes a map of community elements, concept map depicting the relationship between elements and resources, narrative analysis of findings, and personal reflection

TLSC 403 Teaching for Social Justice and Equity (3 Credit Hours)

This module targets candidates' understandings of the School of Education's mission of professionalism in service of social justice, the core tenets of culturally responsive pedagogy, and the applications via backwards design and Universal Design for Learning. Candidates will explore their own identities as future teachers and consider how teachers' identities and experiences transfer into and influence instructional practice with students.

Outcomes:

Candidates will complete a self-documentation project in which they explore their own identities and recognize how their thinking, behavior, and being are influenced by their own personal experiences, race/ethnicity, social class, language, religion, age, etc

TLSC 404 Constructive Learning Environments for Diverse Students (3 Credit Hours)

This module is designed for candidates to discern and utilize students' needs and design classroom environment and instruction to support learning and development. In this module, candidates hone knowledge and skills for working with students with special needs, specifically taking the lens on social, emotional, and behavioral needs.

Outcomes:

Candidates will demonstrate learning through the completion of a functional behavioral analysis (FBA) of one student within the specific environmental and instructional classroom context

TLSC 405 Analyzing Culturally Responsive Classroom Instruction (3 Credit Hours)

This module builds on candidates' initial explorations of learning and development and the core tenets of culturally responsive pedagogy as candidates are introduced to backward design and Universal Design for Learning.

Outcomes:

Candidates will conduct a lesson analysis to assess the effectiveness of a lesson based on established criteria for culturally responsive teaching

TLSC 406 Educational Policy for Diverse Students (3 Credit Hours)

This module specifically engages teachers in looking at the policy related to diverse students in schools, particularly language policy (affecting ELLs and bilingual students) and special education policy (affecting students with special needs).

Outcomes:

Teacher candidates will explain the role of policy in educational practice, including the role of the teacher in advocating for change within the educational institution

TLSC 407 Individualized Assessment and Instruction for Diverse Students (3 Credit Hours)

This module is specifically designed for teacher candidates to appreciate, discern, and utilize the individual needs of students to plan instruction and support student achievement. In this module, student achievement is not only conceptualized as academic, but also social, emotional, behavioral, cultural, and linguistic. Through the use of case study research to conduct individualized assessments with diverse students, candidates will be able to apply learning to the instructional context with culturally, linguistically, and cognitively diverse students, specifically working with a labeled English language learner (ELL) and a student with special needs.

Outcomes:

Through the use of case study research to collect individualized, authentic language and literacy assessments, candidates will apply learning through work a labeled English learner

TLSC 410 Language, Culture and Pedagogy in Bilingual Classrooms (3 Credit Hours)

This module deals with bilingual education, schools, classrooms and learners with an emphasis on building off of students' cultural and linguistic resources to utilize and maintain native language. In order to accomplish these important building blocks of bilingual education, teacher candidates will inquire into and analyze the school's approach to family and community involvement with a specific lens on L1 maintenance and bilingualism.

Outcomes:

Candidates will engage with parents, families and communities to inform the analysis of the school and classroom's alignment to language use in homes and communities

TLSC 420 Teaching Mathematics in Elementary Grade Classrooms (2 Credit Hours)

This module introduces teacher candidates (students) to developmentally appropriate instruction in mathematics in the elementary grades and how to use assessment data to inform instruction.

Outcomes:

Teacher candidates will develop, teach, and reflect upon mathematics instruction that develops conceptual understanding, targets the use of Specialized Content Knowledge, guides student problem solving through extended response questions, builds mathematical knowledge, strategies and explanation

TLSC 421 Teaching Science in Elementary Grade Classrooms (2 Credit Hours)

Pre-requisites: Graduate Education Students Only Outcomes: Candidates will set and work towards professional development goals related to science content, science pedagogy, and science assessment; They will compile a portfolio of evidence to show they have worked towards their goals and reflect on how their understanding of science teaching and learning has shifted throughout the module

This module introduces candidates to the discipline of science, providing them experiences engaging in the teaching and learning of elementary science, and specifically works to help candidates integrate literacy into their science instruction. Candidates develop knowledge and skills needed to teach science through an inquiry approach and integrate literacy into their science teaching.

TLSC 422 Teaching Social Studies in Elementary Grade Classrooms (2 Credit Hours)

Pre-requisites: Graduate School of Education Student Only Outcomes: Teacher candidates will develop and implement an interdisciplinary social studies unit over the course of the module and will develop an essay of demonstrating their understanding of role social studies plays in the elementary school curriculum

This module introduces candidates to the disciplines of the social studies, providing them experience in the teaching and learning of elementary social studies, and specifically helps candidates integrate literacy into their social studies instruction. Candidates develop knowledge and skills needed to teach social studies through an inquiry approach and integrate literacy into their social studies teaching.

TLSC 423 Foundations of Teaching Literacy (2 Credit Hours)

The purpose of this graduate foundations course is to provide pre-service teacher candidates with a solid foundation for effective literacy instruction in elementary and middle grade classrooms. Special emphasis will be placed on the major five elements of reading: phonemic awareness, phonics, vocabulary, fluency, and comprehension.

Outcomes:

Teacher candidates will develop the knowledge and skills base required for effective core curriculum based literacy instruction

TLSC 425 Teaching Internship in Informal Education Settings (3 Credit Hours)

The internship experience builds on experiences teacher candidates have in the TLLSC program working with local museums. Candidates will complete internship hours on site at assigned museum, working directly with the museum's Ed department. In addition, they will participate in online seminar meetings designed to make sense of the internship experiences, digest the relevant literature and draw research to practice connections. Develop and assess personal learning objectives following Loyola Center for Experiential Learning protocols.

TLSC 426 Informal Science Education Seminar (3 Credit Hours)

This course examines current issues around teaching and learning in informal science education (ISE). Students will develop and apply an understanding of learning theories related to learning in informal science, collaborations between informal and formal science education, issues around access and equity, and research and evaluation related to informal science education.

Outcomes:

Describe characteristics of teaching and learning in informal science settings; Describe practices that support learning and development in informal science settings; Summarize theories and frameworks relevant to understanding teaching, learning and development in informal science settings; Explain the ways in which out-of-school science programs collaborate with and support in-school science teaching and learning; Explain challenges and barriers to collaboration between in and out of school science teaching and learning; Debate the strengths and challenges of particular programs and/or institutions in terms of promoting science interest, engagement, and learning; Critique efforts to broaden participation in informal science and learning, including people with physical disabilities, diverse learning needs, and from minority backgrounds; Summarize current and historical research and evaluation priorities, approaches and findings related to informal science education

TLSC 430 Typical and A-Typical Development (2 Credit Hours)

This module further develops and deepens candidates' understanding and application typical and a-typical development of youth. Candidates use information about human development to develop individualized support plans for students with special needs.

Outcomes:

Teacher candidates will reflect information related to the ways children develop a-typically and develop a mock individualized support plan for review

TLSC 431 Significant Disabilities and Life Planning (2 Credit Hours)

This module further develops and deepens candidates' understanding and application of the develop support for people with disabilities. Candidates use information regarding special needs to identify appropriate support and intervention models.

Outcomes:

Teacher candidates will apply information related to students with significant support needs within individualize education plans

TLSC 432 Assistive and Adaptive Technology (2 Credit Hours)

This module further develops and deepens candidates' (students) understanding of support for people with disabilities. Candidates use information regarding special needs to identify appropriate assistive and adaptive technology supports.

Outcomes:

Teacher candidates will apply information related to students with significant support needs when identifying assistive and adaptive technology to be incorporated within individualize education plans

TLSC 433 Transition Planning (2 Credit Hours)

This module further develops and deepens candidates' understanding of support for people with disabilities. Candidates use information regarding special needs to develop transition support plans.

Outcomes:

Teacher candidates will apply information related to students with significant support needs when supporting the development of the transition components of individualized education plans

TLSC 440 Language and Literacy (3 Credit Hours)

This module introduces candidates to the foundational knowledge for effective literacy instruction, including phonemic awareness, phonics, vocabulary, fluency, and comprehension. Candidates develop the knowledge and skills required for core curriculum based literacy instruction, then apply these skills and knowledge while designing and teaching lessons focused on supporting linguistically diverse students language and literacy development through the use of research based literacy strategies.

Outcomes:

Teacher candidates will learn to design and teach lessons, focusing on standard-based reading skills to linguistically diverse students through use of research based reading strategies

TLSC 441 Using Classroom Data in a Collaborative Environment (1 Credit Hour)

This module develops candidates' ability to collect, represent, and analyze appropriate classroom data. Students will use this ability to determine the level of objective mastery and measure student growth. Reflection on the analysis will guide candidates' decisions regarding instructional adjustment and individual student needs.

Outcomes:

Teacher candidates will be proficient in the use of data based decision making that informs instruction and guides students' academic and behavioral modifications

TLSC 442 Disciplinary Literacy (3 Credit Hours)

This module supports candidates in developing their knowledge and skills related to literacy in discipline specific contexts, with an emphasis on culturally responsive texts, evidence based strategies, data based decision making skills, and new literacies to target all students' literacy needs, including those with linguistically diverse backgrounds. Additionally, teacher candidates will collect, represent, and analyze classroom data, and use this analysis to adjust literacy instruction for students, as well as target individual students' needs. Teacher candidates will design and teach disciplinary literacy lessons using data based decision making, as well as technology during lesson delivery. They will be required to collect and utilize data to teach targeted standards based reading skills to linguistically diverse students and to utilize technology in their lesson delivery.

Outcomes:

Teacher candidates will apply understanding of literacy lesson design, assessment and instruction in discipline specific contexts

TLSC 443 Adolescent Literacy Instruction (3 Credit Hours)

This course focuses on developing effective instructional practices that promote the ongoing development of adolescent literac(ies) including essential reading skills, critical literacy skills, multimodal literacy skills, and disciplinary literacy skills. Foundational in the premise that all adolescents have and can develop a variety of literacies that facilitate reading the word to read the world, teacher candidates will develop a repertoire of strategies for building essential reading skills and developing academic language informed by CCSS and WIDA standards. They will also learn how to bring together their content knowledge, understandings of academic language and literacy, criticality, and the importance of using multimodal texts to create lessons that address the needs of all learners, including emerging bilinguals.

Outcomes:

Use research and evidence-based practices to design instruction that includes the alignment of goals, objectives, assessments and instructional strategies to meet the individual needs of students; Hold high expectations and build on the assets of diverse students (including, but not limited to race, ethnicity, culture, language, SES, immigration status, exceptionality, ability, sexual orientation, gender, and gender identity)

TLSC 450 Teaching and Learning in an Area of Specialization (3 Credit Hours)

This module further develops and deepens candidates' (students) understanding and application of designing instruction in an area of specialization. Candidates use data, select essential content, implement strategic pedagogy, and integrate technology to meet the needs of PreK-12 students in a particular curricular area.

Outcomes:

Teacher candidates will reflect on their implementation of the full instructional cycle and after analysis of the data generated from that instruction will identify research that informs instruction future teaching

TLSC 451 Teaching and Learning with a Global Framework (3 Credit Hours)

Teacher candidates will work with PreK-12 teachers to develop and implement a trans-disciplinary/interdisciplinary curriculum unit with a service component. This module's (course) experiences are specifically designed to prepare candidates for teaching in schools that offer an International Baccalaureate program.

Outcomes:

Teacher candidates assess their instruction using a global framework in this module and develop an action plan to improve practice as they move into the final phase of the teacher preparation program

TLSC 455 Secondary Content Methods: Curriculum, Instruction and Assessment in Secondary Content Areas (6 Credit Hours)

This 6-credit course content-area methods course focuses on three primary areas: curriculum design, instruction, and assessment within the secondary content areas.

Outcomes:

This course module focuses on current bodies of knowledge in the field of Science Education; Candidates must demonstrate understanding of A Framework for K-12 Science Education and the Next Generation Science Standards], as well as current literature; They will also critically evaluate curriculum, instructional and assessment practices in a variety of diverse classroom and community settings, with a focus on equity

TLSC 456 Language & Literacy in the Secondary Content Area (3 Credit Hours)

This 3-credit course content-area methods course focuses on three primary areas: curriculum design, instruction, and assessment within the secondary content areas - language and Literacy.

TLSC 460 Developing Rigorous and Relevant Instruction and Assessment (2 Credit Hours)

This module requires candidates, with increasing independence and more limited support from a mentor teacher, to develop rigorous and relevant instruction and assessment. Candidates will demonstrate their ability to use individual student data to plan appropriate and relevant instruction and assessment for all.

Outcomes:

Teacher candidates will obtain and analyze a variety of individual and whole class data and use this data to inform their development of differentiated and rigorous instruction and assessment

TLSC 461 Designing and Implementing Rigorous and Relevant Instruction (3 Credit Hours)

This module requires candidates, with increasing independence and more limited support from a mentor teacher, to implement rigorous and relevant instruction and assessment. Candidates will be required to use a variety of assessments, provide reflection and feedback on the results of assessment using assessment data and make adaptations in order to improve student achievement.

Outcomes:

Teacher candidates will explain how what they have learned from the assessment data will influence their planning and future instruction for students

TLSC 470 Student Teaching for Change (7 Credit Hours)

This module represents the candidate's full-time student teaching experience. It serves as the culmination of candidate's full-time student teaching experience and allows for focused reflection on student teaching and their entire teacher preparation program.

Outcomes:

Candidates will complete the edTPA to document and demonstrate each candidate's ability to effectively teach his/her subject matter; Candidates also complete the School of Education's Professional Practice Profile essay

TLSC 470A Student Teaching for Change (1-6 Credit Hours)

This module represents the candidates full-time student teaching experience. It serves as the culmination of candidates full-time student teaching experience and allows for focused reflection on student teaching and their entire teacher preparation program.

Outcomes:

Candidates will complete part of the edTPA to document and demonstrate each candidate's ability to effectively teach his/her subject matter

TLSC 470B Student Teaching for Change (1-6 Credit Hours)

This module represents the candidates' full-time student teaching experience. It serves as the culmination of candidates' full-time student teaching experience and allows for focused reflection on student teaching and their entire teacher preparation program.

Outcomes:

Candidates will complete the edTPA to document and demonstrate each candidate's ability to effectively teach his/her subject matter; Candidates also complete the School of Education's Professional Practice Profile essay

TLSC 471 Curriculum Processes in the IB PYP (3 Credit Hours)

This course focuses on developing an understanding of the International Baccalaureate Organization and its curriculum with a particular focus on the Primary Years Programme.

Outcomes:

Candidates will create a presentation focusing on how the PYP curriculum supports and promotes aspects of the International Baccalaureate learner profile

TLSC 472 Teaching and Learning in the IB Primary Years Prog (3 Credit Hours)

This course focuses on unit and lesson planning within the International Baccalaureate Primary Years Programme curriculum.

Outcomes:

Candidates will be able to design and carry out transdisciplinary global instruction for diverse learners

TLSC 473 Assessment and Learning in the IB PYP (3 Credit Hours)

Pre-requisites: TLSC 471 & 472 *Outcomes:* Candidates will develop an assessment plan using the PYP unit planner

In this course, candidates examine a PYP unit and the summative assessment used to assess students' understanding of the central idea and PYP essential elements.

TLSC 474 Professional Learning IB Primary Years Programme (1 Credit Hour)

Pre-requisites: TLSC 471 & 472 *Outcomes:* Candidates carry out their instructional unit and evaluate their teaching based on post-assessment results

In this course, candidates implement an IB Impact on Student Learning project in which they implement a PYP unit.

TLSC 475 Curriculum Processes in the IB MYP (3 Credit Hours)

This course focuses on developing an understanding of the International Baccalaureate Organization and its curriculum with a particular focus on the Middle Years Programme.

Outcomes:

Candidates will create a presentation focusing on how the MYP curriculum supports and promotes aspects of the International Baccalaureate learner profile

TLSC 476 Teaching and Learning in the IB MYP (3 Credit Hours)

This course focuses on unit and lesson planning within the International Baccalaureate Middle Years Programme curriculum.

Outcomes:

Candidates will be able to design interdisciplinary global instruction for diverse learners

TLSC 477 Assessment in the IB Middle Years Programme (3 Credit Hours)

In this course, candidates analyze the MYP community project and the MYP personal project. Candidates become familiar with the DP Theory of Knowledge, Creativity, Arts & Service, and the extended essay.

Outcomes:

Candidates develop an assessment plan using the MYP unit planner

TLSC 478 Professional Learning IB MYP (1 Credit Hour)

Pre-requisites: TLSC 475 and TLSC 476

In this course, candidates conduct an IB Impact on Student Learning project in which they implement the MYP unit designed in TLSC 476 and TLSC 477. Candidates carry out their instructional unit and evaluate their teaching based on post-assessment results.

TLSC 480 Teaching for Change Field Seminar (1 Credit Hour)

This module introduces teacher candidates' to learning and development through observation, investigation, and analysis of teaching practice and student learning in secondary-level classrooms. Candidates will complete a classroom profile assignment and develop a related action plan for enhancing a constructive classroom environment. Recognize the role of choice, motivation, and scaffolded support in creating a low-risk and positive social environment; (5F) Identify significant components of healthy learning environments (e.g., where students, teachers, and families feel safe, mutual respect, connected, and demonstrate high levels of self-efficacy). (4A, 4E) (IB)

Outcomes:

EU7K7 - Summarize the connection between teacher expectations and attitudes and student academic achievement, inclusion, and excellence; (3H)

Theatre (THTR)

Discover, search, courses!

THTR 100 Intro to Theatre Exp (3 Credit Hours)

This course is an introductory study of the theatrical art form and its contemporary production practice. Students engage in a series of workshops and participatory creative projects.

Knowledge Area: Artistic Knowledge and Experience

Outcomes:

Students will demonstrate the ability to identify the variety of collaborating arts and artists that combine to create a work of theatre; to analyze a play script for live performance; to evaluate theatrical production; and to creatively apply knowledge of theatrical process through expressive and creative endeavors

THTR 142 Class Voice for Beginners (3 Credit Hours)

This class is for the student who has never had voice instruction and is interested in learning the art of performance in voice. Strongly recommended for those interested in the music major, theater or public speaking/performance

Course equivalencies: THTR242/THTR142/MUSC142

Outcomes:

Students will demonstrate understanding and application of the fundamentals of music theory, diction, and tone

THTR 154 Introduction to Opera (3 Credit Hours)

Survey of opera from 1600 to the present and consideration of opera as an art form which combines music and drama. Analysis of libretto structure and study of the variety of operatic styles are included.

Outcome: Fundamental acquaintance with a wide selection of operatic literature and the principle eras of the European and American traditions.

Course equivalencies: X-MUSC154/THTR154

THTR 203 Dramatic & Theatrical Process (3 Credit Hours)

This course is an introduction to the basic methods of analyzing and interpreting plays representative of the modern stage (from Ibsen to the present). It explores how text analysis is, for all theatre artists, a critical first step in transferring the printed play text to the stage.

Outcomes:

Students will acquire the ability to analyze a play's structure and ideational content, its characters, and the potential challenges each play presents to theatre artists seeking to produce the play on the stage for a modern audience

THTR 204 Playwriting (3 Credit Hours)

Pre-requisites: THTR 100 or THTR 203 *Outcomes:* Students will demonstrate an understanding of the theories and techniques of playwriting and dramatic structure through application of these skills in several playwriting exercises and the development of a one act play. This course is an introduction to the theories and techniques of playwriting with particular emphasis on the analysis of dramatic structure.

Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies

This course satisfies the Engaged Learning requirement.

THTR 205 Theatre in Chicago (3 Credit Hours)

This course is an introduction to live theatre in the rich Chicago theatre scene. Students will develop an appreciation and enjoyment of drama through attendance at live theatre performance and sharpen critical thinking skills through written critiques and discussion of those productions.

Knowledge Area: Artistic Knowledge and Experience

Outcomes:

Students will demonstrate knowledge of and appreciation for the range of theatrical experiences, traditions and expressions available in the City of Chicago

THTR 209 Screenwriting (3 Credit Hours)

This course introduces students to the process of writing for the screen. Through exercises and analysis of structure and story-telling fundamentals, writers develop a working sense of the paradigm and the art of dramatic writing. Extensive writing requirements cover all aspects of screenwriting, culminating in the development of a workable screenplay.

Course equivalencies: X-COMM326/THTR209/IFMS209

Outcomes:

Students will demonstrate an understanding of the fundamentals of screenwriting through the completion of various writing exercises and the creation of a screenplay

THTR 227 Stage Management (3 Credit Hours)

This course explores the role of the stage manager in theatrical production from pre-production through closing documentation.

Outcomes:

Students will demonstrate understanding of the responsibilities and duties of a Stage Manager to a production; develop the necessary communication and organizational skills to fulfill these responsibilities in a production experience; and be exposed to various techniques and tools used in professional stage management

THTR 235 Figure Studio (3 Credit Hours)

Pre-requisites: FNAR 113 or 114 or permission of the instructor This is an advanced level studio course designed to introduce the human form with an emphasis on the application of drawing and wet media. No course description is available

Course equivalencies: X-FNAR235/THTR235

Outcomes:

Students will be able to demonstrate an understanding of the human form and anatomy through expanded practice and articulation of both formal and artistic ideas

THTR 241 Voice & Diction for Stage I (3 Credit Hours)

This course focuses on the techniques of effective voice and speech production.

Course equivalencies: THTR 241 / THTR 241E

Outcomes:

Through class exercises and presentations, students will demonstrate greater knowledge and control over their breath support, tonal placement, vocal resonance, projection, clarity of articulation, Standard American vowel and consonant formation, language orchestration and coloration

THTR 244 Voice & Diction for Stage II (3 Credit Hours)

Pre-requisites: THTR 241 This course is for students who have completed Voice and Diction for the Stage I and explores advanced voice and speech techniques

Students will continue work on their individual voice/speech challenges as well as focusing on the special voice/speech skills required of the stage actor.

Outcomes:

Through a series of in class presentations, students will demonstrate their control over the voice, speech, and language challenges which confront the actor in the performance of non-realistic plays (Shakespeare, Restoration Comedy, Expressionism, and Absurd) and in realistic plays with heightened language

THTR 252 Theatrical Design I (3 Credit Hours)

This course introduces the theatre student to the fundamentals of design especially as they relate to the theatrical design of sets, lights, and costumes.

Knowledge Area: Artistic Knowledge and Experience

Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies

Outcomes:

Students will demonstrate understanding of the tools a set, costume, and lighting designer use to express their ideas; improve their abilities to communicate their creative ideas; appreciate how design affects an overall theatrical experience; and be prepared to engage in practical design experience in our theatre

THTR 261 Beginning Acting (3 Credit Hours)

This course is designed for students who are interested in study acting, but who are not majoring in the Department of Theatre.

Knowledge Area: Artistic Knowledge and Experience

Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies

Outcomes:

Students will develop skills in observation, concentration and imagination, as well as critical skills in script analysis

THTR 266 Acting Theories and Techniques I (3 Credit Hours)

This course is an introduction to the art of Acting with specific emphasis on development of the student's interpretive skills.

Course equivalencies: THTR 266 / THTR 266E

Outcomes:

Students will demonstrate the ability to analyze a play with character in mind, develop relationships with fellow actors on stage, and play clear and effective character objectives

THTR 267 Acting Theories & Techniques II (3 Credit Hours)

Pre-requisites: THTR 266 This course builds on the skills introduced in THTR 266 and development of physical and vocal skills towards performance of character from classical texts

No course description is available

Interdisciplinary Option: Shakespeare Studies

Outcomes:

Students will develop skills to research historical information for application in performance of characters and improve use of the body and voice to communicate character

THTR 275 Teleplay Production (3 Credit Hours)

Pre-requisites: THTR 266 or Permission of ICVM director This course explores the challenges and methods of producing, acting and directing for the camera

No course description is available

Course equivalencies: X-THTR275/IFMS275

Outcomes:

Students will demonstrate and understanding of the process of problem solving of producing, acting and directing for the camera through the production of on camera scenes

THTR 300 Design Technology: Special Effects, Sound Engineer (3 Credit Hours)

Special Effects, Sound Engineering, Moving Light Programing, Projections, Computer Aided Drafting and Automation Design

Outcomes:

To provide a broad overview of current state of the art stage design technologies through lectures, demonstrations, and hands-on work

THTR 301 Costume Technology (3 Credit Hours)

Pre-requisites: THTR 252 and 253 This course introduces the student to the fundamentals of costume construction including: pattern draughting, corsetry, different stitch uses, pleating and gathering techniques, tools of the shop, and basic draping

No course description is available

Outcomes:

Students will be able to: use a basic pattern or sloper to generate their own period costumes, understand why different stitches or construction methods are used, know the tools of the shop, improve their knowledge of fabric choices, and understand the process of draping

THTR 305 Theatre Workshop: Special Topics (3 Credit Hours)

This course introduces the student to a style, genre or method theatre making through active application in exercises, demonstrations, games and workshops.

This course satisfies the Engaged Learning requirement.

Outcomes:

Students will develop skills in applying performance theory to practice; develop performance skills in a particular style or genre; expand a repertoire of rehearsal techniques; and develop skills to create original theatre pieces

THTR 321 Practicum: Costumes (2 Credit Hours)

This course is a practical application of the material studied in a variety of theatre classes, and provides hands on experience scenic or costume construction.

Course equivalencies: THTR321/THTR 321E/THTR321C

Outcomes:

Students will acquire a variety of skills necessary for producing theatre; including collaboration and organization skills and will gain appreciation for the complexity play production

THTR 321C Practicum: Costumes (2 Credit Hours)

This course is a practical application of the material studied in a variety of theatre classes, and provides hands on experience scenic or costume construction.

Course equivalencies: THTR321/THTR 321E/THTR321C

Outcomes:

Students will acquire a variety of skills necessary for producing theatre; including collaboration and organization skills and will gain appreciation for the complexity play production

THTR 321E Practicum: Electrics (2 Credit Hours)

This course is a practical application of the material studied in a variety of theatre classes, and provides hands on experience with electrics.

Course equivalencies: THTR321/THTR 321E/THTR321C

Outcomes:

Students will acquire a variety of skills necessary for producing theatre; including collaboration and organization skills and will gain appreciation for the complexity play production

THTR 321P Theatre Practicum: Production Staff (1 Credit Hour)

Pre-requisites: Permission of the Department This course is a practical application of the material studied in a variety of theatre classes, and provides hands on experience as production staff

No course description is available

Outcomes:

Students will acquire a variety of skills necessary for producing theatre; including collaboration and organization skills and will gain appreciation for the complexity play production

THTR 321R Theatre Practicum: Running Crew (1 Credit Hour)

This course is a practical application of the material studied in a variety of theatre classes, and provides hands on experience with a running crew.

Outcomes:

Students will acquire a variety of skills necessary for producing theatre; including collaboration and organization skills and will gain appreciation for the complexity play production

THTR 321S Practicum-Scenic (2 Credit Hours)

Theatre Practicum (Scenery) is one of four experiential learning courses that will provide the student with an opportunity for practical application of varied techniques and theories in planning and construction of theatrical scenery and properties. The specific topics and skills the course will focus on vary from semester to semester as per the demands of each design.

THTR 323 Rehearsal & Performance (1-12 Credit Hours)

Pre-requisites: permission of the instructor This course allows students to receive credit for stage managing, acting in or directing a campus production during the semester

Completion and submission of a journal or paper is required. Course may be repeated up to 12 times for a total of no more than 12 credit hours.

This course satisfies the Engaged Learning requirement.

Outcomes:

Students will gain performance experience, assess personal artistic growth, and reflect on application of performance theory and technique covered in coursework to production practice

THTR 324 Applied Design and Management (1-3 Credit Hours)

This independent study course supports student scene, costume, lighting, make-up, sound or property designers and stage managers selected by the faculty to design or manage for university productions. Department Permission Required.

This course satisfies the Engaged Learning requirement.

Outcomes:

Students will deepen their understanding of a design process via first hand experience in our theatre

THTR 324D Applied Design (1-3 Credit Hours)

This class will teach Stage Design techniques in practice in production through mentorship. Students will design productions or assist faculty designers.

This course satisfies the Engaged Learning requirement.

Outcomes:

Students will accomplish goals in Communication, Collaboration and Conception; Design, Application and Reflection

THTR 324M Applied Management (1-3 Credit Hours)

This class will teach Stage Management techniques in practice in production through mentorship. Students will Stage Manage or Assistant Stage Manage productions.

Outcomes:

Students will accomplish goals in Communication, Collaboration and Conception; Application; Reflection

THTR 325 Costume Design I (3 Credit Hours)

This course exposes students in the planning, design and execution of costumes for the stage through a variety of costume design projects throughout historical periods and stylistic genres.

Outcomes:

Students will demonstrate understanding of how a costume designer makes choices based on color, silhouette, line, texture, historical research, personal style, collaborative input, and intended response from the audience through application on projects

THTR 326 Costume Design II (3 Credit Hours)

Pre-requisites: THTR 325 This course continues the project work from Costume Design I, exploring more detail in style and historical accuracy. No course description is available

Outcomes:

Students will demonstrate the ability to prepare a costume design in any genre or period

THTR 327 Theatre Operation (3 Credit Hours)

This course is an introduction to the economic, managerial and operating aspects of American Theatre with an emphasis on the Chicago Theatre Industry and practical and contemporary aspects of the field.

Outcomes:

Students demonstrate knowledge of the evolution of arts organizations and theatrical management; practical management tools; the economic challenges of producing theatre; production trends in the industry; the theories and processes behind planning and decision making; and students will gain appreciation for the importance of management in theatrical productions and organizations

THTR 328 Lighting Design I (3 Credit Hours)

This course is an introduction to the principles of theatrical lighting design and the process by which a designer makes choices based on script analysis, period research and collaborative interaction.

Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies

Course equivalencies: X-THTR328/ICVM328/IFMS328

Outcomes:

The student will develop a process by which to approach lighting design as well as an understanding of instrumentation and control of stage lighting

THTR 329 Make-up and Mask Design (3 Credit Hours)

This course involves a hands-on study of make-up techniques especially as they relate to basic theatrical needs, character make-up, and special effects make-up.

Outcomes:

Students will be prepared to use make-up effectively in the theatre either as performers or beginning make-up designers, and to understand the variety of techniques and tools a make-up designer has available

THTR 330 Lighting Design II (3 Credit Hours)

This course is a continuation of the study of the principles of theatrical lighting design and the process by which a designer makes choices based on script analysis, period research and collaborative interaction

Outcomes:

The student will develop a process by which to approach lighting design as well as an understanding of instrumentation and control of stage lighting

THTR 331 Movement:Theories & Tech I (3 Credit Hours)

This course examines the relationship between the kinetic and kinesthetic experiences and personality development.

Course equivalencies: THTR 331 / THTR 331E

Outcomes:

Through a series of exercises, students will demonstrate an awareness of one's physical mannerisms, increased confidence in one's physical presence on stage and demonstrate physical transformation into character

THTR 335 London Theatre Experience (3 Credit Hours)

This course is a month long study abroad experience which allows the student to intensively study British theatre through excursions within London, special guest lecturers, walking tours, workshops, gallery and museum visits, and attendance of at least eight plays.

Outcomes:

Students will gain an understanding of the importance of London theatre and its influence on the rest of the world's theatre

THTR 336 Stage Combat for Actors (3 Credit Hours)

This class will teach Stage Combat techniques that will allow actors to perform fights effectively and safely. Students will work towards a final performance involving all students in a story told through violence.

Outcomes:

Be able to perform a choreographed stage combat sequence effectively and safely at full speed and before a live audience

THTR 341 Studies in Dramatic Form (3 Credit Hours)

This course studies the various structural forms drama has taken from the Greeks to the present. In particular it looks at tragedy, comedy, and melodrama and seeks to find their roots in the cultures which nurtured them.

Outcomes:

the student will be able to distinguish various dramatic forms as well as their roots in their cultures, and will have a vocabulary with which to discuss and evaluate them

THTR 344 Dialects for the Stage (3 Credit Hours)

This course provide instruction in the dialects most frequently used by the American actor and to explore a systematic approach to dialect acquisition which will serve the student in further independent dialect study.

Outcomes:

Students will acquire a working knowledge of the International Phonetic Alphabet, an understanding of the historical and cultural background of each dialect, skills in applying dialects to dramatic texts, and an introduction to the work of the dialect coach in the theatre

THTR 345 Drafting for the Theatre (3 Credit Hours)

This course introduces the student to basic theatrical drafting techniques and mediums.

Outcomes:

Students will demonstrate the ability to draft ground plan and section, scenic elevations as well as a light plot

THTR 346 Scenic Art: Color Elevation to Scene Painting (3 Credit Hours)

This course is introduces the student to basic scene painting techniques for the theatre.

Outcomes:

Students will demonstrate understanding of the role of the scenic artist in relationship to the scenic designer, develop basic level skills required to execute the designer's intention or vision and execute a paint elevation

THTR 347 Children's Theatre (3 Credit Hours)

This course is an introduction to the basic principles and techniques of producing theatre for young audiences. Methods of working with child performers will be applied to in a laboratory setting with children.

Outcomes:

Students will identify the age-level characteristics of child audiences and appropriate script choices for each level

THTR 348 Creative Dramatics (3 Credit Hours)

This course explores the process of engaging children with theatre games and techniques as a means towards self-expression, personal development and content learning. Laboratory experiences working with children are provided.

This course satisfies the Engaged Learning requirement.

Course equivalencies: THTR348/CIEPM95

Outcomes:

Students will articulate the differences and similarities between theatre for children and creative dramatics disciplines, develop age appropriate materials and exercises, identify appropriate facilitating methods and techniques and apply these techniques in a laboratory setting

THTR 352 Theatrical Design II (3 Credit Hours)

Pre-requisites: THTR 252 *Outcomes:* The purpose of this course is to develop intermediate design skills building upon those learned THTR 252

An Intermediate course of study to explore the process of Theatre Design (Scenic, Costumes, and Lighting.) Collaboration and storytelling thru visual means is the key to understanding text-based theatre. Each individual will have the opportunity to express ideas in class discussions, written critical analysis and execution of design while enhancing the process of design

THTR 353 Theatrical Design III (3 Credit Hours)

Pre-requisites: THTR 252 and THTR 352

This team taught course will alternate between full group discussions on topics valuable to all disciplines and small group instruction on specific techniques within sub-disciplines. Students will declare a discipline at beginning of the course. Students can repeat the course to pursue a second discipline. Students will be placed in teams of complimentary disciplines.

THTR 354 Storytelling Design: Puppetry, Properties and Toy (3 Credit Hours)

Puppetry is one of the oldest forms of storytelling. This course is intended to allow the student to several explore different forms of storytelling through the use of puppets and puppetry. The course will explore shadow puppetry, toy theatre and hand & rod puppetry. Each student will develop, as a member of a series of "production teams", a brief performance piece base. Prerequisites THTR 252, and either THTR 261 or 266

Outcomes:

Students will gain skill in design through the storytelling techniques of puppetry and toy theatre

THTR 355 Sound Design I (3 Credit Hours)

Pre-requisites: THTR 252 *Outcomes:* The student will develop a process by which to approach sound design as well as an understanding of equipment and control of theatrical sound production

This course is an introduction to the principles of sound design with and emphasis on theatrical performance. The student will develop a process for approaching sound design, and for expressing their concept and intention in a collaborative and presentation setting.

THTR 356 Sound Design II (3 Credit Hours)

Pre-requisites: THTR 355 Sound Design I *Outcomes:* The student will develop a process by which to approach sound design as well as an understanding of equipment and control of theatrical sound production This course is a continuation of work begun in THTR 355: Sound Design I. The student will develop a process for approaching sound design, and for expressing their concept and intention in a collaborative and presentation setting.

THTR 364 Theatre History and Literature I (3 Credit Hours)

Pre-requisites: THTR 203 Theatre History and Literature is a part of a four-course sequence that examines works of dramatic literature in their historical context

Theatre History and Literature I focuses on the development of theatre from Greek through Jacobean and Caroline periods. Learning They will also apply research to creative practice.

Interdisciplinary Option: Shakespeare Studies

Outcomes:

Students will identify and describe events, practitioners, practices, theatre architecture and significant plays within their historical context

THTR 365 Theatre History and Literature II (3 Credit Hours)

Pre-requisites: THTR 203 Theatre History and Literature is a four course sequence that examines works of dramatic literature in their historical context

Theatre History and Literature II focuses on the development of theatre from the 16th through 19th centuries. This class is Writing Intensive. Learning They will also apply research to creative practice.

Interdisciplinary Option: European Studies, Shakespeare Studies
Outcomes:

Students will identify and describe events, practitioners, practices, theatre architecture and significant plays within their historical context

THTR 366 Theatre History and Literature III (3 Credit Hours)

Pre-requisites: THTR 203 Theatre History and Literature is a part of a four-course sequence that examines works of dramatic literature in their historical context

Theatre History and Literature III focuses on the development of theatre from the 19th through mid-20th centuries. This class is writing intensive. Learning They will also apply research to creative practice.

Interdisciplinary Option: European Studies
Outcomes:

Students will identify and describe events, practitioners, practices, theatre architecture and significant plays within their historical context

THTR 367 Theatre History and Literature IV (3 Credit Hours)

Pre-requisites: THTR 203 Theatre History and Literature is a four-course sequence that examines works of dramatic literature in their historical context

Theatre History and Literature IV focuses on contemporary and post-modern theatre. Learning They will also apply research to creative practice.

Outcomes:
Students will identify and describe events, practitioners, practices, theatre architecture and significant plays within their historical context

THTR 368 Acting Theories and Techniques III (3 Credit Hours)

This course continues the work of THTR 267, based on the needs of the students, using plays by modern and contemporary playwrights as the primary material.

Outcomes:
Students will be able to demonstrate an understanding of how to interpret and effectively perform plays written since the early 19th century up to present day

THTR 369 Acting Theories and Techniques IV (3 Credit Hours)

Pre-requisites: THTR 267 This course continues the work of THTR 368 based on the needs of the students

Performance material is at discretion of the instructor.
Outcomes:

Students will further develop performance skills and workshop areas of weakness based on individual needs and interests

THTR 371 Stage Design I (3 Credit Hours)

Pre-requisites: THTR 252 This course introduces the student to the role of the scenic designer and the process of script analysis, period research and graphic communication utilized to develop a scenic design with a focus on how collaborative interaction may inform those choices
No course description is available

Outcomes:

The student will develop a systematic approach to the scenic designer's creative process and demonstrate the ability to communicate a scenic idea through the practice of sketches, ground plans and scale models

THTR 372 Stage Design II (3 Credit Hours)

Pre-requisites: THTR 371 This is an advanced course in the development of the scenic designer's creative process, skills, and techniques
No course description is available

Outcomes:

Student will further develop the skills required of a scenic designer and develop a diverse design portfolio

THTR 375 Play Direction: THTR Capstone (3 Credit Hours)

Pre-requisites: THTR 203, 252, 266, 267, 364, 365, 366 and 367, or 375 may be taken concurrently with THTR 367

This course explores the fundamental principles of play direction.

Students are required to direct a monologue, select a play script for production, develop a production concept, stage a fifteen-minute scene, and develop a detailed Director's Notebook.

This course satisfies the Engaged Learning requirement.

Outcomes:

Students acquire the skills to identify the basic elements of stage direction; analyze a play script from the point of view of the director; articulate and defend a production concept; develop actor-coaching skills; and identify elements of direction that communicate story, theme, and concept

THTR 376 Advanced Play Direction (3 Credit Hours)

Pre-requisites: THTR 375 This intensive lecture-performance course will expand on principles and practices of play direction covered in THTR 375, with particular emphasis on staging, spatial dynamics, and collaboration with design artists

No course description is available

Outcomes:

Students acquire the skills to place current trends in Directing in historical and theoretical context; articulate a personal artistic mission in relation to the Directing craft; articulate and defend a concept for production; and translate conflict, story, and theme to practical application in ground-plans, staging, actor-coaching, and design choices

THTR 377 Audition Seminar (3 Credit Hours)

Pre-requisites: THTR 368 This course focuses on preparing to audition for professional theatre, commercial and film with particular emphasis on audition for Chicago Theatre

No course description is available

Outcomes:

Students will demonstrate the ability to engage an auditor through an audition, demonstrate the ability to score and read copy truthfully, develop a head shot and resume and develop a personal repertoire of suitable audition pieces

THTR 393 Shakespeare Seminar (3 Credit Hours)

Pre-requisites: ENGL 326, THTR 365, and 9 credit hours for electives in the minor
Outcomes: Students will engage in advanced scholarly work in Shakespearean Studies towards development of a scholarly thesis or significant project

This course provides a capstone seminar experience for students, focusing on how Shakespeare has been interpreted on the page and the stage. It will culminate with a thesis project, either scholarly or creative, that will serve as the capstone for the Shakespeare Studies Minor.

Interdisciplinary Option: Shakespeare Studies

THTR 394 Internship in Theatre (1-6 Credit Hours)

Theatre students complete a semester long internship providing an opportunity to use their technical, research or organizations skills in a professional setting. Students must complete and reflect upon 50 hours of internship experience per credit hour that is pre-approved by the Department of Fine and Performing Arts. Department Permission Required. No more than 6 credit hours of Internship or Fieldwork may be applied to the major.

This course satisfies the Engaged Learning requirement.

Outcomes:

Students gain professional experience working at a theatrical organization while reflecting on their work experience and applying theories and techniques acquired from their theatre courses

THTR 395 Seminar in Theatre: X (3 Credit Hours)

Subject and requirements of this course will be determined by needs and interests of the students.

Outcomes:

To be determined by the instructor in consultation with the chairperson

THTR 396 Seminar in Theatre II: X (3 Credit Hours)

Subject and requirements to be determined by needs and interests of the students.

Outcomes:

To be determined by the instructor in consultation with the chairperson

THTR 397 Fieldwork in Chicago - Theatre (1-6 Credit Hours)

Variable credit (1-6 hours) given for performances or projects undertaken with professional theatre organizations outside the university. Students keep a journal and write evaluative papers. Permission of the Department of Fine and Performing Arts Required. Repeatable for up to 6 credit hours, however no more than 6 credit hours of Internship or Fieldwork can be applied towards the major.

This course satisfies the Engaged Learning requirement.

Outcomes:

Specific outcomes and credit hours assigned to be determined by the student in consultation with the Director of Theatre and the project supervisor

THTR 399 Independent Study (3 Credit Hours)

Pre-requisites: written permission of chairperson

Independent study projects may be of various kinds and in any recognized area of the theatre arts. Such projects should be done under the close supervision of a theatre faculty member.

Outcomes:

To be determined by the student in consultation with the chairperson and theatre faculty supervisor

Theology (THEO)

Discover, search, courses!

THEO 100 Christian Theology (3 Credit Hours)

This course is an introduction to reflection on and analysis of the Christian theological tradition.

Knowledge Area: Foundational Theological Knowledge

Interdisciplinary Option: Catholic Studies, European Studies

Course equivalencies: ACTHE 101 / THEO 100

Outcomes:

Students will be able to demonstrate understanding of the tasks of Christian theology in its efforts to understand the human situation from the perspective of faith, various challenges to theology in the contemporary world, and will focus on one or more current theological issues

THEO 107 Introduction to Religious Studies (3 Credit Hours)

This course is an introduction to the contemporary field of religious studies, focusing on both the theoretical investigations of religious traditions, as well as on the study of selected religious texts and practices (such as creation stories, sacred biographies, sacred scriptures of a religious tradition(s) rituals, ritual taboos, religiously motivated behaviors.

Knowledge Area: Foundational Theological Knowledge

Interdisciplinary Option: Interreligious and Interfaith Studies

Course equivalencies: THEO170 / THEO270 / ACTHE 107

Outcomes:

Students will be able to analyze and interpret various ways in which religious traditions intersect with contemporary issues

THEO 167 Religions in China (3 Credit Hours)

This course is a survey of various religions in China that may include, not only Confucianism and Taoism, but also Buddhism, Christianity, Islam, Judaism, Zoroastrianism, Manicheism and popular or "folk" religion. The course will consider the function of these various religions in the development of Chinese society and their significance in Chinese civilization from ancient mythology to contemporary practices and developments."

Interdisciplinary Option: Asian Studies, Global Studies

Course equivalencies: X-THEO167/ASIA167/INTS167

Outcomes:

Students will be able to demonstrate knowledge of the beliefs, practices, and institutions in varied contexts and historical periods in China, of various religions, both indigenous and "foreign

THEO 168 Sacred Texts of China (3 Credit Hours)

Through the study of primary sacred texts of China (in translation), this class will provide a basic understanding of Chinese thought and its historical development. Interconnections among the various periods and different schools of Chinese philosophy such as Confucianism, Taoism, Buddhism and Neo-Confucianism will be demonstrated and discussed from ancient through the medieval and modern periods.

Interdisciplinary Option: Asian Studies, Global Studies

Course equivalencies: X-THEO168/ASIA168/INTS168

Outcomes:

Students will be able to demonstrate knowledge of the major Chinese sacred texts and teachings of various religious and philosophical traditions, and how they developed and interacted historically

THEO 169 Taoism (3 Credit Hours)

Students will study the history and main ideas and practices of Taoism, meet the sages who wrote the Taoist texts, be introduced to the various schools of Taoist philosophy, and get a feel for what it means to practice Taoism today. The course will illustrate how religious Taoism established a relationship with Confucian thought and practice as well as how at each stage of its historical development, Taoism exerted a profound influence on Chinese politics, economy, culture, art, natural sciences, and social life.

Knowledge Area: Tier 2 Theological Knowledge

Interdisciplinary Option: Asian Studies, Chinese Language & Culture, Global Studies

Course equivalencies: X-THEO169/ASIA169/INTS169

Outcomes:

Students will be able to demonstrate knowledge of philosophical and religious Taoist beliefs, practices, and institutions in varied contexts and historical periods

THEO 185 Christian Ethics (3 Credit Hours)

Introduction to Christian Ethics is a core course that explores the major sources, methods, and insights of Christian social and theological ethics. Particular attention is given to Roman Catholic thought. The course will concentrate on the foundational sources in Christian ethics and examine the moral significance of major theological themes and affirmations.

Knowledge Area: Ethics

Outcomes:

Students will identify the major sources of Christian ethics (Scripture, Church tradition, philosophy, the social and human sciences, and human experience), and gain practice in identifying how different thinkers use, interpret, and prioritize these sources

THEO 186 Global Religious Ethics (3 Credit Hours)

Religious Ethics explores fundamental moral sources and methods in Christian ethics in dialogue with the ethical understandings of at least one other religious tradition, and with special attention to Roman Catholic thought. In doing so, it explores moral issues faced by individuals and communities from theological perspectives, particularly mindful of how the economic, political and cultural structures in a religiously plural world affect those issues.

Knowledge Area: Ethics

Interdisciplinary Option: Peace Studies

Outcomes:

In this course, students will explore and compare the ethical understandings of Christianity and at least one other religious tradition; With respect to each tradition, students will learn about the foundational sources, doctrines and questions that guide its ethical thinking

THEO 190 Loyola's Mission: Ignatian Traditions (3 Credit Hours)

The course introduces students to LUC's mission through theological reflection on the main themes of the Transformative Education mission-statement: spirituality and faith, interlinked human knowing, moral compass, civic and environmental responsibility.

Knowledge Area: Foundational Theological Knowledge

Course equivalencies: THEO190 / THEO290

Outcomes:

Integration into the LUC community, ethos, and vision

THEO 192 Topics in Moral Problems (3 Credit Hours)

A critical examination of one or more areas of moral concern from the viewpoint of Christian ethics. May include: medical ethics, professional ethics, social justice issues, racism, environmental concerns, and war and peace studies.

Course equivalencies: THEO192 / THEO292

Outcomes:

Students will be able to demonstrate understanding of ethical comprehension, analysis, and decision-making within the context of select theological and religious traditions

THEO 203 Social Justice and Injustice (3 Credit Hours)

The Dept. recommends that students take Theo 100 or 107 before taking 2nd tier Theology Core The course introduces students to Catholic and Protestant approaches to social justice. Students will also study theories and analyses of social injustice. Students will study specific instances of social injustice (gender, race, and class). It will increase student awareness of diversity, in the United States and globally.

Knowledge Area: Tier 2 Theological Knowledge

Interdisciplinary Option: Bioethics, Peace Studies

Outcomes:

*Summarize relevant social, economic, policy history/context that related to current sites of injustice related to racial-ethnic inequalities, economic inequality, immigration status, healthcare, and sex/gender inequality

*Distinguish among distinct theories of justice in both theological and philosophical thought *Describe the moral challenges posed by injustice *Relate key ideas, traditions, & practices in Christian theological, philosophical, and other religious thought that may help individuals and societies move closer to approximating justice in society/world

THEO 204 Religious Ethics and the Ecological Crisis (3 Credit Hours)

The Dept. recommends that students take Theo 100 or 107 before taking 2nd tier Theology Core Advances in technology and industry confront us with unprecedented abilities for altering long standing climate patterns. These capacities challenge many traditional religious and ethical assumptions about humanity and our relationship to the nonhuman world. We will examine the resources that religious traditions of the world offer for promoting ecological responsibility.

Knowledge Area: Tier 2 Theological Knowledge

Interdisciplinary Option: Bioethics, Catholic Studies, Peace Studies

Outcomes:

students will be able to: *Summarize relevant history related to scientific, policy & political data and decisions *Describe central scientific and ethical challenges posed by the climate crisis *Relate key ideas, traditions, & practices in Christian theological, philosophical, and other religious thought that may help address this crisis

THEO 231 Hebrew Bible/Old Testament (3 Credit Hours)

Pre-requisites: THEO 100 or THEO 107

This course provides an introduction to the Old Testament / Tanakh (Hebrew Scriptures).

Knowledge Area: Tier 2 Theological Knowledge

Outcomes:

Students will be able to demonstrate understanding of central texts, beliefs, ethical understanding, and practices of Judaism and Christianity

THEO 232 New Testament (3 Credit Hours)

Pre-requisites: THEO 100 or equivalent (transfer courses: THEO 190 or PHIL 190 and Honors: HONR D101)

Outcomes: Students will be able to demonstrate understanding of the literary genres found in the New Testament and explain why the recognition of genre is essential to the interpretation of the New Testament, as well as the importance of how the New Testament documents have reached their present state This course is an introduction to the historical and theological reading of the various documents of early Christianity known as the New Testament.

Knowledge Area: Tier 2 Theological Knowledge

Interdisciplinary Option: Catholic Studies

Course equivalencies: X-THEO112/CATH112

THEO 265 Sacraments and the Christian Imagination (3 Credit Hours)

Pre-requisites: THEO 100 or equivalent (transfer courses: THEO 190 or PHIL 190 and Honors: HONR D101) *Outcomes:* Students will be able to demonstrate how a sacramental system of aesthetics is often embedded in cultural artifacts such as poetry, music, painting, literature, and film, and recognize and interpret the impact of history and cultures on the development of Christian doctrine and practices

This course studies the realities of Christian faith life as expressed and celebrated in the concrete rituals of the Christian communities.

Knowledge Area: Tier 2 Theological Knowledge

Interdisciplinary Option: Catholic Studies

Course equivalencies: X-THEO265/CATH106

THEO 266 Church & Global Cultures (3 Credit Hours)

Pre-requisites: THEO 100 or THEO 107

This course provides an introduction to ways in which the Christian churches, and primarily the Roman Catholic Church, understand and enact their identity in relation to the secular world of culture, economics, and politics, both nationally and globally.

Knowledge Area: Tier 2 Theological Knowledge

Interdisciplinary Option: Catholic Studies, Italian Studies

Course equivalencies: X-THEO105/CATH105

Outcomes:

Students will be able to analyze and interpret contrasting Christian understandings of the notion of original sin, and demonstrate knowledge, with attention to historical development, of the central texts, beliefs, ethical understandings, and practices of at least one religious tradition

THEO 267 Jesus Christ (3 Credit Hours)

Pre-requisites: THEO 100 or equivalent (transfer courses: THEO 190 or PHIL 190 and Honors: HONR D101) *Outcomes:* This course examines the life of Jesus Christ, utilizing the Gospels, the writings of Paul and other biblical authors, the early ecumenical councils, and the history of church doctrine, including contemporary scholarship

This course examines the life of Jesus Christ, utilizing the Gospels, the writings of Paul and other biblical authors, the early ecumenical councils, and the history of church doctrine, including contemporary scholarship.

Knowledge Area: Tier 2 Theological Knowledge

Interdisciplinary Option: Catholic Studies

Course equivalencies: THEO104/CATH104

THEO 272 Judaism (3 Credit Hours)

Pre-requisites: THEO 100 or THEO 107 for students admitted to Loyola University for Fall 2012 or later

No requirement for students admitted to Loyola prior to Fall 2012. This course provides an introduction to Judaism.

Knowledge Area: Tier 2 Theological Knowledge

Interdisciplinary Option: Global Studies

Course equivalencies: THEO172/THEO272/INTS172

Outcomes:

Students will be able to name and discuss some of the most important Jewish scriptures, articulate the general outline of the historical evolution of Judaism, and define and discuss key concepts, terms, values, and religious practices foundational to Judaism

THEO 276 Black World Religion (3 Credit Hours)

Pre-requisites: THEO 100 or THEO 107

This course explores the revelatory manner in which the divine comes to unique presence and expression among African peoples throughout human history. It will examine the religious experiences and traditions of: Africa's ancient Nile valley civilizations, long recognized as cradling the world's spiritual and philosophical wisdom and as influencing the formative development of Judaism, Christianity, and Islam.

Interdisciplinary Option: African Studies and the African Diaspora, Black World Studies, Black World Studies, Interreligious and Interfaith Studies, African Studies and the African Diaspora, Black World Studies, Black World Studies, Interreligious and Interfaith Studies

Course equivalencies: THEO176 / THEO276/BWS288

Outcomes:

Students will demonstrate their knowledge of African peoples' religious experiences within their various historical and cultural contexts

THEO 278 Religion & Gender (3 Credit Hours)

Pre-requisites: THEO 100 or THEO 107

This course will study the role of women in at least one (if not more) of the major world religious traditions.

Knowledge Area: Tier 2 Theological Knowledge

Interdisciplinary Option: Women & Gender Studies

Course equivalencies: THEO178/THEO278/WSGS278

Outcomes:

Students will be able to demonstrate understanding of the influence of religion on gender roles, and how women in the contemporary world are reinterpreting their religious traditions

THEO 279 Roman Catholicism (3 Credit Hours)

Pre-requisites: THEO 100 or equivalent (transfer courses: THEO 190 or PHIL 190 and Honors: HONR D101) *Outcomes:* Students will be able to demonstrate understanding of the most important Roman Catholic beliefs, the historical evolution of Roman Catholicism, the key Roman Catholic concepts, terms, values, and religious practices, and the main lines of current Roman Catholic identity in today's world

This course provides an introduction to Roman Catholicism.

Knowledge Area: Tier 2 Theological Knowledge

Interdisciplinary Option: Catholic Studies, Italian Studies

Course equivalencies: THEO179/THEO279/CATH179

THEO 280 Theo & Interdisciplinary Std (3 Credit Hours)

Study of contemporary issues in religion in conversation with a variety of disciplines, including humanities, social sciences, and physical sciences.

Course equivalencies: THEO180 / THEO280

THEO 281 Christianity Through Time (3 Credit Hours)

Pre-requisites: THEO 100 or THEO 107 The course is a survey course in the history of Christian thought

Not a course in Church history, this is a course whose primary goal is to investigate the major interactions between Christian thought and practice and the cultures that it has been a part of in its two thousand year history.

Knowledge Area: Tier 2 Theological Knowledge

Interdisciplinary Option: Catholic Studies, German Studies, Medieval Studies

Course equivalencies: THEO181/ THEO281/CATH181

Outcomes:

Students will learn to analyze and interpret religious texts, beliefs and practices using standard scholarly methods and tools

THEO 282 Hinduism (3 Credit Hours)

Pre-requisites: THEO 100 or THEO 107 for students admitted to Loyola University for Fall 2012 or later

No requirement for students admitted to Loyola prior to Fall 2012. This course provides an introduction to Hinduism.

Knowledge Area: Tier 2 Theological Knowledge

Interdisciplinary Option: Asian Studies, Global Studies

Course equivalencies: THEO196/ASIA196/INTS294

Outcomes:

Students will be able to demonstrate understanding of the most important Hindu scriptures, the general outline of the historical evolution of Hinduism, the key Hindu concepts, terms, values, and religious practices, and the basic narratives and imagery of Hinduism

THEO 293 Christian Marriage (3 Credit Hours)

Pre-requisites: THEO 100 or THEO 107 This course examines the Christian understanding of marriage

No course description is available

Knowledge Area: Tier 2 Theological Knowledge

Interdisciplinary Option: Catholic Studies

Course equivalencies: THEO193/THEO293/CATH193

Outcomes:

Students will be able to demonstrate understanding of historical & ethical principles used to evaluate particular issues relevant to the understanding of the Christian tradition of marriage

THEO 295 Islam (3 Credit Hours)

Requirement: THEO 100 or THEO 107 for students admitted to Loyola University for Fall 2012 or later. No requirement for students admitted to Loyola prior to Fall 2012. This course will provide an introduction to Islam.

Knowledge Area: Tier 2 Theological Knowledge

Interdisciplinary Option: Arabic Language and Culture, Asian Studies, Global Studies, Islamic World Studies, Arabic Language and Culture, Asian Studies, Global Studies, Islamic World Studies

Course equivalencies: THEO195/ASIA195/INTS295/IWS195

Outcomes:

Students will be able to demonstrate understanding of the most important Muslim scriptures, the general outline of the historical evolution of Islam, the key Islamic concepts, terms, values, and religious practices, and the diversity within Islam

THEO 297 Buddhism (3 Credit Hours)

Pre-requisite: THEO 100 or THEO 107 for students admitted to Loyola University for Fall 2012 or later. No requirement for students admitted to Loyola prior to Fall 2012. This course provides an introduction to Buddhism.

Knowledge Area: Tier 2 Theological Knowledge

Interdisciplinary Option: Asian Studies, Global Studies, Japanese Language and Culture

Course equivalencies: THEO197/ASIA197/INTS297

Outcomes:

Students will be able to demonstrate understanding of the most important Buddhist scriptures, the general outline of the historical evolution of Buddhism, including its different major branches, and the key Buddhist concepts, terms, values, and religious practices

THEO 299 Religions of Asia (3 Credit Hours)

An introductory survey of selected teachings, institutions, and practices of the great religious traditions of South Asia and East Asia placed in historical context.

Interdisciplinary Option: Asian Studies, Global Studies

This course satisfies the Engaged Learning requirement.

Course equivalencies: X-THEO199/ASIA199/INTS199

Outcomes:

Students will be able to demonstrate understanding of the central texts, beliefs, ethical understandings, and practices of at least three Asian religions

THEO 302 Wisdom Literature and Psalms (3 Credit Hours)

Pre-requisites: THEO 111

A study of the wisdom literature of the Old Testament, attention to the nature of the wisdom tradition in Israel; study of the Psalms as the prayer of Israel.

Outcomes:

Students will be able to demonstrate understanding of central texts, beliefs, ethical understanding, and practices of Judaism and Christianity

THEO 303 Pentateuch (3 Credit Hours)

Pre-requisites: THEO 111 The literary structure of the first five books of the Bible

No course description is available

Outcomes:

Students will be able to demonstrate understanding of central texts, beliefs, ethical understanding, and practices of Judaism and Christianity

THEO 304 Israel Conq to Exile (3 Credit Hours)

Pre-requisites: THEO 111 A study of the so-called historical books of the Bible (Joshua, Judges, Samuel, Kings) with attention to the history of Israel from conquest to exile

No course description is available

Outcomes:

Students will be able to demonstrate understanding of central texts, beliefs, ethical understanding, and practices of Judaism and Christianity

THEO 308 Biblical Hebrew I (3 Credit Hours)

The sound, forms and grammar of biblical language. Selected readings from the Old Testament.

Course equivalencies: X-THEO308/CLST101

Outcomes:

Students will demonstrate an understanding of Biblical Hebrew

THEO 309 Biblical Hebrew II (3 Credit Hours)

Pre-requisites: THEO 308 Further study of biblical language. Selected readings from the Old Testament.

Course equivalencies: X-THEO309/CLST102

Outcomes:

Students will demonstrate an understanding of Biblical Hebrew

THEO 311 The Meaning of Jesus Christ (3 Credit Hours)

Pre-requisites: THEO 104 Interpretations of the person and work of Jesus

No course description is available

Interdisciplinary Option: Catholic Studies

Outcomes:

Students will be able to demonstrate understanding of the nature of Jesus Christ as both human and divine, what this might mean, how this formulation was derived, and the varieties of understanding of Christ within the Scriptures, the church, and modern scholarship

THEO 313 Gospels of Matthew, Mark & Luke (3 Credit Hours)

Pre-requisites: THEO 112 An analysis of the development of the synoptic tradition (the gospels of Matthew, Mark and Luke)

No course description is available

Interdisciplinary Option: Catholic Studies

Outcomes:

Students will be able to demonstrate understanding of the various literary elements found in these particular gospels

THEO 317 Christn Tht:Anct-Med (3 Credit Hours)

The development of various Christian doctrines in light of their historical milieu during the first fourteen centuries of Christian thought.

Interdisciplinary Option: Catholic Studies, European Studies, Medieval Studies

Course equivalencies: X-THEO317/CATH317/MSTU360

Outcomes:

Students will be able to assess how various configurations of theological perspectives can both expand and foreshorten the way human thinking has gone on

THEO 318 Christian Thought: Reformation to Modern (3 Credit Hours)

The development of various Christian doctrines in light of their historical milieu during the last six centuries of Christian thought.

Interdisciplinary Option: Catholic Studies, European Studies

Course equivalencies: X-THEO318/CATH318

Outcomes:

Students will be able to assess how various configurations of theological perspectives can both expand and foreshorten the way human thinking has gone on

THEO 330 Liberation Theology (3 Credit Hours)

An introduction to the contemporary theologies of liberation emerging in Latin American, African, and Asian Christian.

Interdisciplinary Option: Catholic Studies, Global Studies, Latin American Studies, Peace Studies

Course equivalencies: X-THEO/INTS/LASP330/PAX332

Outcomes:

Students will be able to demonstrate understanding of ethical comprehension, analysis, and decision-making within the context of select theological and religious traditions

THEO 331 Theology of Secularization (3 Credit Hours)

An exploration of the history of secularization and the context it establishes for American Christianity. Focus on practical issues of Christian living.

Outcomes:

Students will be able to analyze and interpret various ways in which religious traditions intersect with contemporary issues

THEO 340 Found of Christ Morality (3 Credit Hours)

A survey of theological and philosophical issues which shape the articulation of specific moral principles.

Outcomes:

Students will be able to demonstrate understanding of ethical comprehension, analysis, and decision-making within the context of select theological and religious traditions

THEO 342 Perspectives on Life and Death (3 Credit Hours)

Examination of the exploration of our perception of the life range for possible reevaluation and rearticulation, in view of modern scientific developments.

Interdisciplinary Option: Bioethics

Course equivalencies: X-THEO342/BIET342

Outcomes:

Students will be able to demonstrate understanding of ethical comprehension, analysis, and decision-making within the context of select theological and religious traditions

THEO 343 Contemporary Christn Sexuality (3 Credit Hours)

Examination of inter-religious perspectives in contemporary sexual ethics.

Interdisciplinary Option: Bioethics

Course equivalencies: X-THEO343/BIET343

Outcomes:

Students will be able to demonstrate understanding of ethical comprehension, analysis, and decision-making within the context of select theological and religious traditions

THEO 344 Theology and Ecology (3 Credit Hours)

Examination of the ecological, ethical and theological analyses of humanity's relationship to the natural world.

Interdisciplinary Option: Bioethics, Environmental Studies

Course equivalencies: X-THEO344/ESP 344/BIET344

Outcomes:

Students will be able to demonstrate understanding of ethical comprehension, analysis, and decision-making within the context of select theological and religious traditions

THEO 348 Supervised Ministry (3 Credit Hours)

Placement in a ministerial position, on-site supervision, and biweekly individual or group meetings with the course director is required. This course satisfies the Engaged Learning requirement.

Outcomes:

Students will be able to demonstrate how a sacramental system of aesthetics is often embedded in cultural artifacts

THEO 349 Theological Topics for the Bioethics Capstone (3 Credit Hours)

Pre-requisites: Two Science courses and two Ethics courses *Outcomes:* Students will understand the connection between ethical and scientific issues with regard to the special topic in theology

The interdisciplinary team-taught Bioethics capstone course examines a topic in bioethics from both scientific and ethical points of view.

Topics may include bio-technologies, concepts of race and gender, the environment, reproduction, and others. This course number provides an elective for Theology students when the Bioethics capstone's topic is theological.

Interdisciplinary Option: Bioethics

THEO 350 Topics in Islam (3 Credit Hours)

A deeper and more focused study of significant aspects of the religion of Islam.

Interdisciplinary Option: Asian Studies, Global Studies, Islamic World Studies

Course equivalencies: XTHEO350INTS387ASIA350IWS350

Outcomes:

Students will be able to demonstrate understanding of Islam

THEO 352 Topics in Buddhism (3 Credit Hours)

A deeper and more focused study of significant aspects of Buddhism.

Interdisciplinary Option: Asian Studies, Global Studies, Japanese Language and Culture

Course equivalencies: X-THEO352/INTS352/ASIA352

Outcomes:

Students will be able to demonstrate understanding of Buddhism

THEO 353 Religious Traditions: (3 Credit Hours)

This course investigates the historical, social, ritual and reflective positions of one or more religious traditions. It likewise develops the student's abilities to use contemporary methods of historical, theological, and social scientific analysis of religious traditions.

This course will consider contemporary Islamic thought and movements world-wide. After a brief introduction to Islam and the historical development of the tradition up to the present, students will learn about a range of contemporary Muslim intellectual and activist movements and thinkers through the study of original writings and secondary analysis. Some major figures to be considered include: Syed Maududi, Sayyid Qutb, Fazlur Rahman, and other Muslim intellectuals representing movements such as Jama'at-i Islami, the Muslim Brotherhood, and Islamic liberalism. We will focus on the 20th century up to the most current trends. Some of the theological and social issues that will be discussed are gender, the ideal political order, Islamic law and its role in society, and pluralism.

Interdisciplinary Option: Asian Studies, Global Studies, Islamic World Studies

Course equivalencies: X-THEO/ASIA/IWS366/INTS366A

THEO 373 Theology Capstone (3 Credit Hours)

Students enrolling in this course must have junior status and be Theology majors. This 3 credit capstone course gives students an opportunity to integrate various aspects of their theological education, drawing upon the major sources of Christian and Catholic tradition, including Scripture, History, Systematic Theology, and Ethics.

Outcomes:

Students will be able to demonstrate an understanding of the varied sources within Christian theological traditions and how to make reasoned theological arguments

THEO 376 Language and Faith (3 Credit Hours)

A cultural approach to the study of religious faith through the framework of language.

THEO 378 Theology and Culture (3 Credit Hours)

This course can count as an elective for the major or minor. The course will be divided into three parts: (1) an exploration of the interaction between theological reflection & culture; (2) a look at some theological texts that compare Christian and non-Christian practices and practices in the U.S. where different cultural understandings interact; (3) a study of postmodernism.

Outcomes:

A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 382 Readings-Liturgy (3 Credit Hours)

Examination of the readings, prayers, songs, rites of contemporary liturgies. Comparison of these materials with those of traditional liturgies and evaluation of the underlying principles.

Outcomes:

Students will be able to demonstrate how a sacramental system of aesthetics is often embedded in cultural artifacts

THEO 383 Theology Arts & Literature: (1-3 Credit Hours)

Study of theological and religious symbols and themes in modern literature and/or in the arts.

Interdisciplinary Option: Catholic Studies

Course equivalencies: X-THEO383/ENGL383/CATH383

Outcomes:

The student who successfully completes this course will be able to demonstrate knowledge about religion and its intersections with selected contemporary ethical, social, political, economic, or cultural issues

THEO 392 Readings in Theology (3 Credit Hours)

A reading course with variable content in the area of theology. Open to major and non-majors with permission of instructor.

THEO 393 Seminar (3 Credit Hours)

An undergraduate seminar course for majors and minors in the Theology department; variable content, addressing topical issues that are not covered by the regular offerings at the 300 level.

Interdisciplinary Option: Islamic World Studies

Outcomes:

Students will gain an in-depth understanding of a selected topic

THEO 395 Theology Tutorial (3 Credit Hours)

Tutorials for seniors on selected topics in biblical, systematic, historical or moral theology.

Outcomes:

Students will gain an in-depth understanding of a selected topic

THEO 401 Tutorial in Bib Studies (3 Credit Hours)

A reading course with variable content and readings in the area of biblical studies.

THEO 403 Topics in Rabbinic & Medieval Lit (3 Credit Hours)

Topics in post-biblical Jewish literature and thought, covering texts from approximately 200 to 1600.

THEO 404 History of Israel (3 Credit Hours)

A study of the history of ancient Israel, with particular attention to the principal features of its religion and its historical evolution, in the context of the ancient Near East.

Course equivalencies: IPS 440/THEO 404

Outcomes:

A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 405 Formation of The Pentateuch (3 Credit Hours)

An in-depth examination of the first five books of the Hebrew Bible and the Christian Old Testament, in their unity and discreteness, with a view to articulating the principal themes of the Pentateuch and the history of its composition.

Course equivalencies: IPS441/THEO 405

Outcomes:

A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 406 Basic Hebrew Grammar (3 Credit Hours)

Study of the fundamental elements of classical Hebrew.

Outcomes:

A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 407 Hebrew Exegesis (3 Credit Hours)

Introduction to the fundamentals of classical Hebrew, including the Hebrew alphabet, basic syntax, and the basic grammatical forms of the language, designed to advance reading knowledge of the Old Testament.

THEO 418 Theo Prophets-Ancient Israel (3 Credit Hours)

This course examines the prophetic literature of ancient Israel, in its ancient historical context and as it can be illuminated by contemporary sociological and anthropological perspectives. Standard historical-critical methods will be used throughout.

Course equivalencies: IPS 442/THEO 418

Outcomes:

A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 420 Seminar: (3 Credit Hours)

No course description is available

Outcomes:

A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 421 Dir Reading in Bible Studies (1-3 Credit Hours)

No course description is available

Outcomes:

A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 422 Dir Reading in Bible Studies (3 Credit Hours)

Independent research in topics in bible studies according to program developed jointly by the student & faculty director.

THEO 424 The Synoptic Gospels (3 Credit Hours)

Study of the diversity of early Christianity as represented in the Synoptic Gospels, particularly the commonalities and contrasts in the worldviews operative in Mark, Luke, and Matthew.

Course equivalencies: IPS 445/THEO 424

THEO 425 Luke-Acts & New Testmt Church (3 Credit Hours)

This course examines the material on the early church in the Gospel of Luke and the Acts of the Apostles from a historical and critical point of view.

Course equivalencies: IPS 446/THEO 425

Outcomes:

A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 427 St Pauls Cntrbntn to Chrstnty (3 Credit Hours)

Examination of Paul's thought through exacting analysis of Pauline passages; an attempt to formulate what is uniquely Pauline in the New Testament witnesses; and an awareness of how deeply Paul affected the formation of Christianity.

Course equivalencies: IPS 448/THEO 427

Outcomes:

A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 429 Person of Jesus in New Testmt (3 Credit Hours)

In this course, attention will be given to the presentation of the meaning of Jesus Christ within the earliest Christian communities.

Course equivalencies: IPS 449/THEO 429

Outcomes:

A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 436 Christology (3 Credit Hours)

This course will study the speculations and formulations concerning the person of Christ and the redemptive incarnation from the early fathers and councils up to and including modern times.

Outcomes:

A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 437 Mystery of God in Chrst Theo (3 Credit Hours)

The Christian church has insisted, from the beginning, that Jesus Christ is decisive in humanity's access to, and understanding of, God. This realization was expressed in the doctrine of the Trinity.

Outcomes:

A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 440 Seminar in Syst Theo: (1-12 Credit Hours)

No course description is available

Outcomes:

A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 441 Dir Reading in Syst Theo (3 Credit Hours)

Independent research in topics in systematic theology according to program developed jointly by the student & faculty director.

THEO 447 Philosophical Theology (3 Credit Hours)

A study of the ways in which philosophical assumptions, systems, and methodologies shape theological reflection.

Outcomes:

A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 449 Phenomenology of Religion (3 Credit Hours)

This course will examine religion from a phenomenological point of view, allowing the methods and texts of phenomenology to shape our understanding of religious phenomena, such as revelation, givenness, metaphysics, incarnation, etc.. Topics may also include investigations of the borders between phenomenology and theology.

THEO 459 Contemporary Theology (1-12 Credit Hours)

Advanced study of readings and themes in contemporary theology, in conversation with a variety of disciplines.

THEO 460 Seminar in Hist of Theology (1-12 Credit Hours)

A consideration of the organizing models characteristic of theology in particular periods. The seminar is organized around a specific doctrinal theme determined, in part, by the specialized interests of the students. Outcome: A deep level of understanding and of critical thinking with respect to the subject matter of the course.

THEO 461 Dir Read in Hist of Theology (3 Credit Hours)

Independent research in topics in history of theology according to program developed jointly by the student and faculty director.

THEO 464 Religion & Politics in Christian History (3 Credit Hours)

Exploration of the intersections of religious and political thought in Christian history from the 19th century to today.

THEO 470 Found Crit Issues Theo Ethics (1-12 Credit Hours)

Devoted to a critical analysis of theological ethics firmly rooted in the historical method, studying the various methodologies, critical issues and the personalities.

Outcomes:

A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 475 Natural Law & Theo Ethics (3 Credit Hours)

Some of the many theological interpretations of natural law developed in Western Christian thought will be examined. The issue of a specific Christian ethic vis-à-vis a universal humanistic ethic will be investigated.

Outcomes:

A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 477 Feminist Issues in Theology and Ethics (3 Credit Hours)

Designed around current issues in feminist theology and ethics. Issues include the role of the Bible in feminist theology, hermeneutics, theological education, church and sacraments, as well as normative theory, sexuality and reproduction, and ecology.

Interdisciplinary Option: Women & Gender Studies

Course equivalencies: X-THEO477/WOST468/WSGS468

Outcomes:

A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 478 Issues in Medical Ethics (3 Credit Hours)

The course will deal with the problems of abortion, genetic engineering, technological reproduction, sterilization of the handicapped, prolonging life, etc.

Interdisciplinary Option: Bioethics

Outcomes:

A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 480 Seminar in Christian Ethics (1-12 Credit Hours)

In-depth study of select topics in contemporary Christian ethics. Topics vary from faith and morality, religion and politics, church-state relations, and work to ecology, sexuality, and eschatology.

Outcomes:

A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 481 Dir Read Christian Ethics (3 Credit Hours)

Independent research in topics in Christian ethics according to program developed jointly by the student and faculty director.

Interdisciplinary Option: Bioethics

THEO 515 Gospels in Erly Chris: (3 Credit Hours)

This course will focus on the study of one or the other of the four gospels.

Outcomes:

A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 517 Erly Chrst Letrs: (1-12 Credit Hours)

This course studies letters from Christian leaders of the first two centuries A.D. in their original Greek language.

Outcomes:

A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 519 Latr Nt-Subapost Writ: (3 Credit Hours)

This course studies New Testament and non-canonical Christian writings in their original Greek language from the late first and early second century A.D.

Outcomes:

A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 523 Cultural-Rel Envrnmt Early Christianity (3 Credit Hours)

This course examines specific aspects of the cultural and religious environment of the Mediterranean world between 200 B.C. and A.D. 300 relevant to early Christianity. Outcomes A deep level of understanding and of critical thinking with respect to the subject matter of the course.

THEO 527 Var Comunity Erly Chris: (3 Credit Hours)

The course will examine the identity, cohesion, and institutions of various communal groups in early Christianity.

Outcomes:

A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 530 Seminar - Variable Titles (1-12 Credit Hours)

Extensive and in-depth study of selected topic.

THEO 536 Chris Doctrn-Cath Theo: (3 Credit Hours)

This course will examine the dialectical relationships between Christian doctrine and theological learning.

Outcomes:

A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 560 Contemp Authrs: (1-12 Credit Hours)

This course will examine the methods, concerns, major issues, achievements, and lasting influence of twentieth century writers whose work has significantly shaped theology today.

Outcomes:

A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 570 Fundamental Issues in Christian Ethics (1-12 Credit Hours)

Fundamental issues raised in defining Christian ethics, delineating its sources and methods, developing normative theories, and analyzing processes of moral decision-making.

Outcomes:

A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 573 Romn Cath Eth: (3 Credit Hours)

This course will concentrate on one or more classic topics in Roman Catholic ethics.

Outcomes:

A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 575 Religious Ethics and Social Theory (3 Credit Hours)

This course investigates what religious ethics gains from and contributes to basic concerns.

Outcomes:

A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 580 Chris Socl Eth: (3 Credit Hours)

The course will examine the sources, transformation, problematics, and potential directions in developing the middle principles which articulate the interaction of theological ethics and social questions.

Outcomes:

A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 585 Issues Applied Theo Eth: (3 Credit Hours)

An examination in depth one or more areas which have traditionally engaged religious ethicists.

Outcomes:

A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 590 Directed Readings and Research (3 Credit Hours)

No course description is available

Outcomes:

A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 592 Dir Read: (3 Credit Hours)

Independent research according to program developed jointly by the student and faculty director.

THEO 593 Dir Read: (3 Credit Hours)

Independent research according to program developed jointly by the student and faculty director.

THEO 600 Dissertation Supervision (0 Credit Hours)

Students who have filed the dissertation paperwork and are currently writing, should be enrolled in this course. You must be enrolled in some course every semester. Outcome: A deep level of understanding and of critical thinking with respect to the subject matter of the course.

THEO 605 Master's Study (0 Credit Hours)

Students who have completed their Master's level course work and are preparing for the comprehensive exams should enroll in this course, unless they plan to take the exam while taking courses. You must be enrolled in some course every semester.

Outcomes:

A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 610 Doctoral Study (0 Credit Hours)

Students who have completed their doctoral level course work and are studying for the written and oral comprehensive exams should be enrolled in this course. You must be enrolled in some course every semester.

Outcomes:

A deep level of understanding and of critical thinking with respect to the subject matter of the course

University CORE Literary Foundations (UCLR)

Discover, search, courses!

UCLR 100 Interpreting Literature (3 Credit Hours)

This class will be a prerequisite for all second tier literature courses, as designated by each department. The foundational course of literary studies will require students to read closely and analyze carefully a representative variety of prose, poetry, and drama, master key literary and critical term, and explore a variety of core critical approaches to the analysis and interpretation of literature. Only one section of UCLR 100, UCLR 100C, UCLR 100E, or UCLR 100M may be taken for credit as an undergraduate.

Knowledge Area: Foundational Literary Knowledge

Course equivalencies: ACENG 110 / UCLR 100

UCLR 100C Interpreting Literature - Classical Studies (3 Credit Hours)

This foundational class will require students to read closely and analyze carefully a representative variety of prose, poetry, and drama. It will be a prerequisite for all second tier literature courses, as designated by each department. Only one section of UCLR 100, UCLR 100C, UCLR 100E, or UCLR 100M may be taken for credit as an undergraduate. Outcomes - Students will master key literary and critical terms, and explore a variety of core critical approaches to the analysis and interpretation of literature.

Knowledge Area: Foundational Literary Knowledge

UCLR 100E Interpreting Literature - English (3 Credit Hours)

This foundational class will require students to read closely and analyze carefully a representative variety of prose, poetry, and drama. It will be a prerequisite for all second tier literature courses, as designated by each department. Only one section of UCLR 100, UCLR 100C, UCLR 100E, or UCLR 100M may be taken for credit as an undergraduate. Outcomes - Students will master key literary and critical terms, and explore a variety of core critical approaches to the analysis and interpretation of literature.

Knowledge Area: Foundational Literary Knowledge

UCLR 100M Interpreting Literature - Modern Langs&Literatures (3 Credit Hours)

This foundational class will require students to read closely and analyze carefully a representative variety of prose, poetry, and drama. It will be a prerequisite for all second tier literature courses, as designated by each department. Only one section of UCLR 100, UCLR 100C, UCLR 100E, or UCLR 100M may be taken for credit as an undergraduate. Outcomes - Students will master key literary and critical terms, and explore a variety of core critical approaches to the analysis and interpretation of literature.

Knowledge Area: Foundational Literary Knowledge

University Course (UNIV)

Discover, search, courses!

UNIV 100 Chicago Summer Leadership Academy: College Prep (1-4 Credit Hours)

This is a seminar course for CSLA participants. The course is designed to advance student's confidence to navigate the college search process and prepare them to apply and secure admissions to a college of their choice. Enrollment Conditions: This seminar course is for CSLA participants. Students in this course will be part of the CSLA program through Student Transitions and Outreach.

Outcomes:

Upon completion students will have gained knowledge in navigating the college application process

UNIV 101 First Year Seminar (1 Credit Hour)

This class is intended to help first year students enhance their academic skills and social integration into Loyola University Chicago.

Course equivalencies: UNIV101 / ACUNI 101

UNIV 102 Loyola Seminar (1 Credit Hour)

This is a 1-credit, letter-graded, elective, special topics course taught by faculty or staff experts at Loyola. These small classes are intended to connect students to a faculty or staff member and their peers through meaningful discussions on topics of shared interest.

UNIV 103 Orientation to Living Abroad (1-3 Credit Hours)

Students must be participating in a Loyola Study Abroad Program.

Provides an orientation to living abroad to students in a Loyola Study Abroad Program. Provides exposure to life and culture in study abroad setting through lectures, discussions and guided study trips.

Outcomes:

Knowledge of and appreciation for different cultural and living setting

UNIV 110 Exploring the United States through Chicago (3 Credit Hours)

This course will introduce international students to the culture and realities of contemporary Chicago and the United States. Enrollment is limited to participants in the Chicago Center at Loyola University Program. ESL sessions will be incorporated as needed in class sessions.

Outcomes:

Participate in onsite learning experiences and in a forum to discuss perspectives on the United States through the lens of their experiences

UNIV 111 Guided Research in American Studies (1 Credit Hour)

Pre-requisites: Completion of UNIV 110

Taken in the second semester with the Chicago Center Program, it will focus on the students' completion of a research project dealing issue in American Culture. Through in depth research students will identify their topic, gather information, compose a research paper, and present their findings to their classmates. (Other outcomes detailed in syllabus).

Outcomes:

Broaden knowledge of both their own and American culture through comparative study of a social, political, or economic issue

UNIV 112 Strategies for Learning (1 Credit Hour)

This course is designed primarily for first and second year students to strengthen their academic skills. This course provides an opportunity for students to evaluate their goals and motivation for studying at Loyola and to develop effective strategies for academic success.

Course equivalencies: CIEP 112/UNIV 112

Outcomes:

Students will gain a clear view of their goals and the steps and strategies needed for achieve academic success

UNIV 113 Critical Skills Seminar (1 Credit Hour)

This one-credit course is open to incoming first-year STEP students only.

Students will complete assignments related to personal and academic goals and strategies for achieving academic success.

Course equivalencies: UNIV 113/CIEP 113

UNIV 114 Bridge to Loyola Workshop (1-3 Credit Hours)

As part of the Bridge to Loyola program this course is designed to develop critical thinking and effective strategies for academic success. Restricted to students in the LEAP and STEP programs.

Course equivalencies: UNIV 114/CIEP 111

Outcomes:

Students will develop a capacity for critical and ethical judgements, effective study strategies, an introduction to scientific inquiry, and an understanding of the Loyola Mission

UNIV 190 Understanding Service and Social Justice (3 Credit Hours)

Students contribute 25 hours of service in a community or campus project, and reflect on those experiences in relation to social justice and the particular topic of their course section. Outcome: Students will contribute to and understand service in relation to social justice in a certain topical area.

This course satisfies the Engaged Learning requirement.

UNIV 201 Transfer Seminar (1 Credit Hour)

Enrollment restricted to Transfer Students. This seminar course is designed for students who transferred to Loyola from other institutions. Students in this course will develop strategies to succeed academically, transition smoothly and strengthen their connection with Loyola.

Understand Loyola's mission/identity and participate in the Loyola Experience; 2. Improve study habits and academic motivation; 3. Enhance ability to find and utilize campus support and resources.

Outcomes:

1

UNIV 224 Career & Life Planning Seminar (3 Credit Hours)

Unsure of how your classes and previous experiences will turn into a career? Many students feel unsure about how to plan for life post-graduation. This seminar will allow you to reflect on who you are as a person (not just as a particular "major"), as well as how to research and connect with relevant opportunities and plan effectively for the next chapter of your life. Highly recommended for 3rd/4th year students. Clarify career identity and appropriate pathways; develop effective application materials, networking, and job/internship search skills; develop plan for next steps.

Course equivalencies: CPSY 224/UNIV 224

UNIV 301 Ricci Seminar Rome (3 Credit Hours)

A research seminar in which a Ricci Scholar develops a project and refines it under the tutelage of a faculty member based in Rome. The focus of the project will be Rome-, Italy-, or Euro-centered.

Interdisciplinary Option: Global Studies, Rome Studies

This course satisfies the Engaged Learning requirement.

UNIV 302 Ricci Seminar Vietnam (3 Credit Hours)

A research seminar in which a Ricci Scholar develops a project and refines it under the tutelage of a faculty member based in Vietnam. The focus of the project will be Ho Chin Minh City, Vietnam, or Asia centered. Restricted to Vietnam students.

Interdisciplinary Option: Asian Studies, Global Studies

This course satisfies the Engaged Learning requirement.

UNIV 340 Ricci Scholars Seminar (1 Credit Hour)

Pre-requisites: UNIV 301 and UNIV 302

This course is the culmination of one year junior study abroad experience of RICCI scholars who have done their two supervised individual research projects on East (Vietnam) and on West (Italy). In the course, student's East and West research studies are combined and compared to make a cohesive final report of their findings.

UNIV 370 Responsible Conduct in Research and Scholarship (0 Credit Hours)

Loyola University actively promotes a culture of responsible and ethical behaviors among all people associated with the University. This includes the LUC faculty, staff, and students of all levels. This course provides students with a strong foundation of the basic ethical principles and professional standards that can then be built upon by future experiences. Topics include the nine identified by Office of Research Integrity critical to research activities as well as those of value to scholars here at LUC. Taught over a three day period, students will be presented with information and relevant background and given the opportunity to apply these ethical principles in a small group setting. NOTE: This course satisfies the LUC policy requirements for students that are enrolled in graduate programs, undergraduate students that are involved in research activities, and faculty and staff that receive funds from external agencies that require evidence of ethics training.

UNIV 392 Internship Seminar in Ignatian Praxis (3 Credit Hours)

Pre-requisites: Approval by the Office of Student Transitions and Outreach
Students in this internship course will complete at least 100 internship hours in Office of Student Transition and Outreach programs
Students reflect on their work experience in the context of Ignatian critical reflection and will put theory into practice. Development understanding of reflection on actions and Ignatian traditions; 2. Enhance connection to the institution through internship work, and academic and professional learning and development; 3. Foster critical thinking and reflective writing skills.

This course satisfies the Engaged Learning requirement.

Outcomes:

1

Urban Studies (URB)

Discover, search, courses!

URB 125 Chicago-Growth of a Metropolis (3 Credit Hours)

This course explores the development of Chicago metropolitan region from the 1830's to the present day. Students will explore the urban area not only through texts, but also through fieldwork.

Course equivalencies: SOCL125/URB125

Outcomes:

Students will be able to demonstrate understanding of the geography, history and people of the Chicago metropolitan region

URB 201 Social Welfare Policy & Serv I (3 Credit Hours)

Pre-requisites: sophomore standing

Analysis of institutional structures of welfare as they relate to social problems. Selected major values and interests in American society are used to analyze the social welfare institution. Students will be able to describe and analyze current social welfare policies and social services within a historical, societal and political context.

Course equivalencies: SOWK201/URB201

URB 234 City, Suburbs & Beyond (3 Credit Hours)

Study of the historical emergence of cities, focusing on the ecological, demographic, and organizational processes involved in the continuing growth and change of metropolitan areas and in the relationship of a metropolitan area to the surrounding region.

Course equivalencies: X-SOCL234/URB234

Outcomes:

Students will understand fundamental facts and theories about the character and development of cities and urban regions

URB 320 Urban Economics (3 Credit Hours)

Pre-requisites: Sophomore standing, minimum grade of "C-" in ECON 201 and 202

This course analyzes the economic role and functioning of cities and examines urban issues such as real estate markets, transportation, economic development, and crime.

Course equivalencies: X-ECON320/URB320

Outcomes:

Students will understand the economic forces that shape urban agglomerations; Students will understand the economic and ethical trade-offs of various urban economic policies; They will be able to think critically about the economic forces that make a city grow and contract over time

URB 352 Gang Activity & Control (3 Credit Hours)

The course examines the emergence of street gangs in American society with a view toward understanding their structure, characteristics, purpose and activities, and reviews and evaluates prevention and control strategies.

Course equivalencies: CRMJ352/URB352

Outcomes:

Students will be able to demonstrate an understanding of the causes of street gangs, the methods used to control street gangs, and the impact of street gang activity on society and the criminal justice system

URB 354 Chicago Justice: CRMJ System Cook County (3 Credit Hours)

This course provides a comprehensive examination of the organization and functions of the criminal and juvenile justice systems/agencies in Cook County - the largest jurisdiction of its kind in the U.S.

Course equivalencies: CRMJ354/URB354

Outcomes:

Students will be able to describe the organization, functioning, and challenges facing the justice system and agencies within Cook County, and discuss how this system relates to criminal justice agencies at the state and federal level

URB 370 Cultural Diversity (3 Credit Hours)

Pre-requisites: Junior Standing

This course examines economic, social, institutional and political forces that shape the experiences and life chances of persons within Asian, Latino, and Native American cultures. Social and economic justice in relation to diversity will be explored. Students will understand the relevance of diversity to social work values and interventions.

Course equivalencies: ASIA/SOWK/URB370/AFR369/SOWK50

URB 385 The History of Chicago (3 Credit Hours)

This course surveys the history of Chicago from its origins to the present, using the city as a case study of American urbanization.

Course equivalencies: X-HIST385/URB385

Outcomes:

Students will be able to demonstrate historical knowledge of Chicago's environmental, economic, social, cultural, and political history, to draw links between race relations and urban change, and to develop critical thinking and communication skills

URB 386 American Urban History (3 Credit Hours)

This course examines the process and impact of urbanization in North America from the Precolumbian era to the twenty-first century.

Course equivalencies: X-HIST386/URB386

Outcomes:

Students will be able to demonstrate historical knowledge of the environmental, economic, social, cultural, and political history of North American cities and develop critical thinking and communication skills

URB 397 Urban Studies Research (3 Credit Hours)*Pre-requisites:* Junior or Senior standing

In Urban Studies Research, undergraduates work on collaborative, community-based research projects through CURL (Center for Urban Research and Learning). The research teams include graduate students, faculty, and community leaders. This course must be taken concurrently with SOC/PLSC 335. Students will contribute to a research project that addresses inequities in urban communities.

Interdisciplinary Option: Urban Studies

This course satisfies the Engaged Learning requirement.

Course equivalencies: X-PLSC397/URB397

Urdu (URDU)

Discover, search, courses!

URDU 101 Introductory Urdu 1 (3 Credit Hours)

This course is an introduction to the Urdu language. No previous knowledge is assumed. It also introduces the Urdu script.

Interdisciplinary Option: Asian Studies, Islamic World Studies*Outcomes:*

Students will be introduced to the spoken language and the script in which Urdu is written

URDU 102 Introductory Urdu 2 (3 Credit Hours)*Pre-requisites:* URDU 101 This course is a continuation of Urdu 101

The course imparts basic grammatical structures and vocabulary of Urdu as well as greater familiarity in reading and writing using the Urdu script.

Interdisciplinary Option: Asian Studies, Islamic World Studies*Outcomes:*

Students will be able to develop basic proficiency in the language and will be able to speak, read and write in simple sentences at the elementary level

Vietnamese (VIET)

Discover, search, courses!

Women & Gender Studies (WSGS)

Discover, search, courses!

WSGS 101 Introduction to WSGS from a Global Perspective (3 Credit Hours)

This is an introduction to the interdisciplinary fields of both Women's Studies and Gender Studies which explore the ways that sex and gender manifest themselves in social, cultural, and political arenas. It draws upon scholarship in women's studies, masculinities studies, and queer studies which themselves draw upon a variety of intellectual perspectives, including historical, psychological, rhetorical, sociological, literary, and biological.

Knowledge Area: Foundational Societal Knowledge*Interdisciplinary Option:* Women & Gender Studies*Outcomes:*

students will demonstrate understanding of historical developments, key concepts, theories and themes in women's studies and gender studies, the impact that gender can have on social, cultural, political and economic material conditions

WSGS 201 Contemporary Issues in WSGS (3 Credit Hours)

This course explores issues in women's studies, feminism, and gender studies from the perspective of a particular discipline, depending on the faculty member teaching the course. This may, for example, include Communication, English, History, Sociology, or Theology.

Knowledge Area: Tier 2 Societal Knowledge*Interdisciplinary Option:* Women & Gender Studies*Course equivalencies:* WOST201/WSGS201*Outcomes:*

Students will examine the subjects of women and gender, as well as the challenges of conducting feminist or gender scholarship, within the discipline and how new research changes or transforms that scholarship

WSGS 297 TP: Topics in WSGS (3 Credit Hours)

This course allows students to explore intermediate courses or seminars focused on the intersection of gender, sexuality, race, class, and other categories of power, privilege, and oppression.

Interdisciplinary Option: Women & Gender Studies**WSGS 330 History of Feminist Thought and Social Action (3 Credit Hours)**

This course focuses on the history and development of feminist thought and activism since the late eighteenth century. Attention goes beyond just U.S. and European feminist history, exploring Indigenous, Black, and postcolonial feminism to investigate their unique feminist ideas and the challenges they pose to "traditional" feminist thought and action.

Interdisciplinary Option: Women & Gender Studies*Course equivalencies:* X - WSGS 330 / HIST 339F*Outcomes:*

Students will learn to identify key concepts, thinkers, activists; analyze and critique some of the major works; and develop an integrated understanding of the history of feminist thought, broadly conceived

WSGS 350 Global Feminisms (3 Credit Hours)

Pre-requisites: WSGS 101 or WSGS 201 *Outcomes:* Students will acquire and utilize key theoretical concepts in the study of feminisms, race theory, border studies, postcolonial studies, transnationalism, and migration studies

This course offers critical and theoretical tools to evaluate feminist theories by women of color in the global South. Adopting a decolonial, anti-racist approach, the course evaluates how women and gender relations are affected by economic, cultural, and political changes related to the racial regimes of globalization and migratory movements.

Interdisciplinary Option: Women & Gender Studies**WSGS 360 Migration, Identity, Sexuality (3 Credit Hours)**

Pre-requisites: WSGS 101 or WSGS 201 *Outcomes:* Acquire and utilize key theoretical concepts in the study of borders, identity politics, transnationalism, and sexuality from an intersectional lens

In this seminar WSGS course we will explore how crossing borders, identity politics, and sexuality intersect to produce a rich and necessary conversation on contemporary global immigration issues. We will explore the gendered dynamics and experiences of recent immigrants.

Interdisciplinary Option: Women & Gender Studies**WSGS 370 Sexual Assault Advocacy (3 Credit Hours)**

Pre-requisites: WSGS 101 or WSGS 201 *Outcomes:* Students who successfully complete the course may be eligible to serve as Loyola University Chicago sexual assault advocates

This course provides specific skills of support and advocacy services to sexual assault survivors. Students will gain an understanding of the impact of sexual assault on victims, the social and cultural context in which sexual assault occurs, and the roles systems play to both support and inhibit survivors recovery.

Interdisciplinary Option: Women & Gender Studies

WSGS 375 Masculinity Studies: Equity, Race, Transformation (3 Credit Hours)

Pre-requisites: WSGS 101 Outcomes: Students will acquire and utilize key theoretical concepts in Masculinity studies from an international lens; Students will apply a wide critical terminology to literary texts and visual/cultural phenomena globally

This course highlights the intersectional exploration of how masculinity is embodied, experienced, and replicated in the United States and globally. With this transnational lens, students gain a better understanding of contemporary global masculinity sociocultural issues and concerns which include race/racism, "angry white men," and the "crisis of masculinity."

Interdisciplinary Option: Women & Gender Studies

Course equivalencies: WSGS 375/WSGS 475

WSGS 380 Queer Theory: Beyond the Binary (3 Credit Hours)

Pre-requisites: WSGS 101 or 201 Outcomes: Students will be able to identify key concepts and thinkers of this influential field of study; they will develop an intersectional, global understanding of this field of critical theory

This course maps the field of Queer Theory from an interdisciplinary, global perspective in order to cover a wide range of theoretical and disciplinary approaches (race theory, transnational theory, postmodernism, Latinx-American Studies, among others) and interpretative applications (film, literature).

Interdisciplinary Option: Women & Gender Studies

WSGS 388 Women's Studies Practicum (3 Credit Hours)

This supervised field experience uses experiential learning at a wide variety of uses experiential learning at a variety of women's political, cultural or educational organization as the basis for learning and refining skills which can benefit gender equity.

Interdisciplinary Option: Women & Gender Studies

This course satisfies the Engaged Learning requirement.

Course equivalencies: WOST388/WSGS388

Outcomes:

Students demonstrate skill proficiency, professional conduct, and systematic reflection on their experience; Students learn about public and private sector responses to women's issues and concerns

WSGS 389 Independent Study (1-3 Credit Hours)

This course consists of independent research or engaged learning in a specific area of WSGS; work must be completed under the supervision of a WSGS faculty member.

Interdisciplinary Option: Women & Gender Studies

Outcomes:

Students will gain a deeper understanding of a specific WSGS topic through research, service, reading, or other mode of learning; The product of this work will vary depending on the interests of the student

WSGS 390 Directed Readings Women Studies (3 Credit Hours)

An independent program of reading and research arranged between the student and the supervising faculty member in the student's major department. Students will complete a final research project integrating their major fields with women's studies. Permission of women's studies director is required.

Interdisciplinary Option: Women & Gender Studies

Course equivalencies: WOST390/WSGS390

WSGS 391 WSGS Methodologies (3 Credit Hours)

Pre-requisites: WSGS 101 or WSGS 201, and WSGS 330 Outcomes:

Students will produce a project proposal that (1) demonstrates an interdisciplinary approach; (2) draws on theory and scholarship in WSGS; and (3) reflects the use of feminist methodologies in practice

This course is part of a two-semester sequence for the final year of the WSGS major and minor. In this course we review several approaches to feminist research methods and consider ways to put them into practice, individually or combined with other methods. Enrollment by permission.

Interdisciplinary Option: Women & Gender Studies

WSGS 397 Special Topics in WSGS (3 Credit Hours)

This course allows students to explore advanced courses or seminars focused on the intersection of gender, sexuality, race, class, and other categories of power, privilege, and oppression.

Interdisciplinary Option: Women & Gender Studies

Course equivalencies: WOST397/WSGS397

Outcomes:

Students demonstrate an understanding of a unique topic in women's studies

WSGS 398 Women's Studies Internship (3 Credit Hours)

This course uses supervised project-based experiential learning to allow students the opportunity to apply feminist analysis and practical skills to a student-designed project that will be completed within the timeframe of a course term.

Interdisciplinary Option: Women & Gender Studies

This course satisfies the Engaged Learning requirement.

Course equivalencies: WOST398/WSGS398

Outcomes:

Students learn application of feminist concepts and principles to pragmatic outcomes; leadership, planning, time management, and assessment skills

WSGS 399 WSGS Capstone (3 Credit Hours)

Pre-requisites: WSGS 330, WSGS 391

This is a project-oriented course that represents the culmination of the WSGS major. Students build on their work in WSGS 391/WSGS Methodologies to complete a project under the direction of a faculty or community organization mentor, either individually or as a group. Enrollment by permission. Prerequisite: WSGS 330 and WSGS 391

Interdisciplinary Option: Women & Gender Studies

This course satisfies the Engaged Learning requirement.

Course equivalencies: WOST399/WSGS399

Outcomes:

Students will complete a project that (1) demonstrates an interdisciplinary approach; (2) draws on theory and scholarship in WSGS; and (3) reflects the intentional use of feminist methodologies in practice

WSGS 401 History of Feminist Thought (3 Credit Hours)

This course surveys the historical development of feminist thought from Mary Wollstonecraft to second wave feminism and beyond and analyzes the impact of feminism on the general culture.

Course equivalencies: WOST401/WSGS401

WSGS 402 Foundations of Women's Studies (3 Credit Hours)

This course investigates how gender has become a critical category in education and knowledge and traces the institutional and intellectual development of women's and gender studies as a field, focusing on the evolution of WGS in the academy (here and in other countries) and on the changes in concepts of knowledge, in methodologies, and in pedagogy that women's studies scholarship has produced in various fields.

Interdisciplinary Option: Women & Gender Studies

Course equivalencies: WOST402/WSGS402

WSGS 450 Global Feminisms (3 Credit Hours)

This course is a course that explores feminism and the study of gender in a global dimension. Chosen texts privilege the study of women, gender, and sexuality from an international perspective. The course highlights the intimate relationship between the study of feminism, (post/de)colonialism, and racism.

Course equivalencies: WOST450/WSGS450

WSGS 455 Feminist Pedagogy (3 Credit Hours)

Pre-requisites: Graduate Status This course will focus on distinctly feminist ways of learning and teaching

As with feminist theory and research methods, feminist pedagogy has been understood to include characteristics like self-reflexivity, de-centered authority, standpoint epistemologies, examinations of power dynamics, and attention to embodied ways of learning and knowing.

Outcomes:

Understand the foundational principles of feminist pedagogy and related approaches to teaching; Develop skills to analyze and produce sound teaching practices within a feminist intersectional framework

WSGS 460 Migration, Identity, Sexuality (3 Credit Hours)

Pre-requisites: Graduate Status We will explore how crossing borders, identity politics, gender, and sexuality intersect to produce a conversation on contemporary global immigration issues

Focus is on movement from three geographic locations from/to the Global South and North: Latin America to the US and Europe; Africa to Europe; Europe to Latin America and back.

WSGS 470 Sexual Assault Advocacy (3 Credit Hours)

Pre-requisites: Graduate Status This course provides specific skills of support and advocacy services to sexual assault survivors. Students will gain an understanding of the impact of sexual assault on victims, the social and cultural context in which sexual assault occurs, and the roles systems play to both support and inhibit survivors recovery.

Course equivalencies: WOST370/WSGS370/WSGS470

Outcomes:

Students who successfully complete the course may be eligible to serve as Loyola University Chicago sexual assault advocates

WSGS 475 Masculinity Studies: Equity, Race, Transformation (3 Credit Hours)

Pre-requisites: Graduate Status This course highlights the intersectional exploration of how masculinity is embodied, experienced, and replicated in the United States and globally

With this transnational lens, students gain a better understanding of contemporary global masculinity sociocultural issues and concerns which include race/racism, "angry white men," and the "crisis of masculinity."

Course equivalencies: WSGS 375/WSGS 475

Outcomes:

Students will acquire and utilize key theoretical concepts in Masculinity studies from an international lens; Students will apply a wide critical terminology to literary texts and visual/cultural phenomena globally

WSGS 480 Queer Theory (3 Credit Hours)

Pre-requisites: Graduate status This graduate level course maps the field of queer theory from an interdisciplinary perspective in order to cover a wide range of theoretical and disciplinary approaches and interpretive applications

Outcome: Students will acquire and utilize theoretical concepts in queer studies, develop cultural competency in queer studies and present information about the field orally and in writing.

Interdisciplinary Option: Women & Gender Studies

WSGS 497 Topics in Women's Studies and Gender Studies (3 Credit Hours)

This topics course may originate in Women's Studies and Gender Studies or as a cross-listed course and deals with women's and gender topics including identity, sexuality, diversity, relationships of power in national, transnational and international contexts. The ethical and social justice implications of topics include feminist perspectives.

Course equivalencies: WOST497/WSGS497

Outcomes:

Students understand feminist perspectives on gender in literature; Students connect theory and practice in writing, performance, action or in combined formats

WSGS 498 Practicum (1-3 Credit Hours)

WSGS Practicum gives students the option of doing a teaching or research assistantship under the supervision of a faculty member. This practicum counts as an elective credit towards the student's MA degree.

Interdisciplinary Option: Women & Gender Studies

Course equivalencies: WOST498/WSGS498

WSGS 499 Independent Study (1-3 Credit Hours)

An independent study provides students with the opportunity to work closely and one-on-one with a faculty member. The student can choose her/his/their topic or creative project. The independent study should be comparable to a graduate-level course.

Interdisciplinary Option: Women & Gender Studies

Course equivalencies: WOST499/WSGS499

WSGS 500 Thesis Research (3 Credit Hours)

A Thesis Research course allows graduate students to fine tune their research skills, academic writing, and independent thought while they are preparing their thesis proposal and/or writing their thesis.

Interdisciplinary Option: Women & Gender Studies

Course equivalencies: WOST500/WSGS500

WSGS 595 Thesis Supervision (0 Credit Hours)

The focus of a Thesis Supervision is to help students better strategize, structure, and organize themselves as they write their thesis. Students will also be advised about how to prepare for a successful oral defense.

Interdisciplinary Option: Women & Gender Studies

Course equivalencies: WOST595/WSGS595

WSGS 599 Capstone Presentation (0 Credit Hours)

Pre-requisites: Successful completion of 12 hours in the MA program in WSGS

WSGS 599 is the culmination of the Master's program in Women's Studies and Gender Studies. Requirements include a 10 page synthesis paper or detailed outline, annotated bibliography, and public presentation at our biannual capstone ceremony.

Outcomes:

Synthesis of the students' graduate coursework; performance of the diversity of outcomes in WSGS; celebration of students' achievements; networking

WSGS 605 Master's Study (0 Credit Hours)

Continuing work on completion of the Master's Degree in Women's Studies and Gender Studies.

Interdisciplinary Option: Women & Gender Studies

Writing and Communications (CEWC)

Discover, search, courses!

CEWC 38 Hybrid Fiction Writing (0 Credit Hours)

Writing workshop that combines different genres of writing.

CEWC 40 Resourcing the Web for Visual Design (0 Credit Hours)

Learn to use the current web programs that helps to create a practical website in terms of software, internet programs/companies, and visual design. For professional and personal enhancement.

CEWC 51 Nature Writing (0 Credit Hours)

Focus on writing about nature/elements.

CEWC 53 Corporate Communications (0 Credit Hours)

Grammar and style for those in corporate jobs.
