Research Methods in Black World Studies
Chicago has a growing number of newly formed communities whose ancestors are/were African. Among such
populations are Cuban, Haitian, Nigerian, Belizean, and Jamacian peoples. These neo-African communities in
Chicago tend to cluster in patterns related to available housing, ethnicity and natality. Many factors
including language barriers, educational and employment disadvantages as well as cultural ubiquity often
leave these newcomers' needs unattended. This course provides instruction in research methods useful in
understanding the social and political needs of such marginalized populations. The primary research model for
this course is Participatory Action Research methods.
