Who is the entrepreneur - that is, what activities or characteristics make one an entrepreneur?  
 Why did the entrepreneur largely disappear from intellectual discourse in the middle 20th century?  
 How ought we to evaluate the entrepreneur morally - and does the answer depend upon who we understand the entrepreneur to be?

**Culture, Identity and Performance**  
This course examines the beliefs, values, sub-cultural traditions and performance of identity(ies) typically associated with persons of African heritage in various areas and contexts across the African world. Each of these elements of Black/Africana culture will be viewed through the lenses of social science, literature and other articulations and postulations which attempt to name and characterize these populations, historically and contemporarily in print and electronic media, filmic and popular cultural discourses. This interdisciplinary approach will engage early black film, ethnography, slave narratives, performance and performance theory as tools to unpack multiple contested ideas, beliefs and ideologies concerning the nature of black self-identity and expression.

 Chicago has a growing number of newly formed communities whose ancestors are/were African. Among such populations are Cuban, Haitian, Nigerian, Belizean, and Jamacian peoples. These neo-African communities in Chicago tend to cluster in patterns related to available housing, ethnicity and natality. Many factors including language barriers, educational and employment disadvantages as well as cultural ubiquity often leave these newcomers' needs unattended. This course provides instruction in research methods useful in understanding the social and political needs of such marginalized populations. The primary research model for this course is Participatory Action Research methods.
