Students will complete smaller labs and a larger research project in the field.  
 Pre-requisites: PSYC 101, 304, 306.

## Outcomes:

1. Learn about the scholarly study of body image and eating disorders.
2. Learn general research methods in Psychology and specific ones pertaining to the topic.
3. Learn about computer packages, including SPSS to analyze data.

**Components:** Laboratory

College of Arts and Sciences - Psychology - Subject: Psychology**PSYC 332(3)** Course ID:013815 15-JUN-2019**Affective Neuroscience**

Affective experiences promote human adaptability and survival, and healthy emotion function is critical to promoting physical and psychological well being. The course will provide an overview of fundamental neurobiological correlates associated with emotion function and processing affective stimuli.

Prerequisite: PSYC 101 or NEUR 101 ( formerly PSYC/BIOL 202)

Outcome: Students will understand theories regarding brain mechanisms associated with emotion processing and the techniques used for studying these mechanisms.

**Components:** Lecture(In person)  
**Attributes:** Neuroscience  
**Requirement Group:** Prerequisite : PSYC 101(C-) and NEUR 101 (C-)

**Neuropsychology**

Neuropsychology is the interdisciplinary study of the relation between human brain function and behavior. This course is an undergraduate survey of topics related to neuropsychology, including neuroanatomy, psychophysiology, and cognitive neuroscience. A primary goal of the course is to introduce undergraduate students to neuropsychological concepts in research and applied settings.

Prerequisites: PSYC 101 and NEUR 101

Outcomes: Successful completion of this course leads to mastery of CNS function and structure. The ability to integrate this information will allow students to develop and test hypotheses about brain-behavior relationships.

**Components:** Lecture(In person)

The way that information is represented and processed in the brain is central to a broad range of topics in psychological science. In this course we will consider how the methods of cognitive neuroscience including brain imaging (e.g., EEG/ERP, fMRI) and dissociation-based techniques such as neuropsychology and TMS, have revolutionized the exploration of these topics. We will pay particular attention to how these techniques can be used to understand higher-level cognition during development and in questions related to social psychology and psychopathology. Class participants will be introduced to these techniques, read, critique and present results from the primary literature, and also have an opportunity to develop ideas using these methods relating to their own research interests.

**Language Demands and Development in Disciplinary Classrooms**

Everything we do in classrooms and schools requires language, yet the nuances and complexities of language are rarely explored in educator-preparation programs. As the population diversifies and more students come to schools with competencies in languages other than English, teachers must understand how language works so that they can support students in developing language spanning grades and disciplines. In this course, teachers will explore the language demands within and across academic disciplines and enact scaffolds to support multilingual students; language development by attending to these demands. Course understandings and related pedagogical practices emphasize the value of students; multilingual repertoires and competencies with foci on building metalinguistic awareness and encouraging translanguaging with students; languages and language varieties. Pedagogical practices will focus primarily on building classroom environments to support students; language development, including contextual features,

**Social Justice for Multilingual Learners**

**COURSE DESCRIPTION** This course introduces educators to foundational principles and practices for promoting social justice and educational equity while teaching multilingual learners in today's classrooms. A central component to teaching for social justice for students labeled as English learners (ELs), this course prompts educators to deconstruct their identities, experiences, and perspectives on cultural and linguistic diversity as a means to recognize and deconstruct language ideologies, deficit-based perspectives, personal biases, and institutionally driven assumptions. Framed by larger sociolinguistic and sociopolitical themes in the field of EL/bilingual education, educators explore students; diversity in their classrooms and schools and reflect upon current practice with that lens. Participants then draw from the literature to develop personal philosophy statements for serving multilingual learners with goals for their own professional learning.

**Literacy Teaching for Bilingual & Multilingual Students****COURSE DESCRIPTION**

Literacy is widely seen as one of the most important skills that children need in order to be successful in school and beyond, however the teaching of reading and writing are largely still approached from a monolingual paradigm even though the vast majority of classrooms have students who speak (and are often literate to varied degrees in that language) in at least one other language beyond the language of instruction. Therefore, it is essential that educators acquire the knowledge and skills to consider the development of literacy from a broader, less restrictive linguistic paradigm in order to engage and effectively teach reading and writing to their students who are bi/multilingual. Regardless of teaching context (e.g., grade level;

**Curr Theory & Research with Schools & Communities: Positionalities, Perspectives, & Transformations**

The purpose of this course is to advance students' understanding of contemporary theoretical underpinnings of curriculum. In this course, the curriculum is understood as both the explicit planned course of learning put before students, and the hidden or latent experiences that students encounter in school and community settings. Students become familiar with the theoretical orientation of research on curriculum and to be able to evaluate the worth of research related to curriculum issues.

Outcome: Students will pose a problem, a question or a series of questions that would address the problem, collect data to facilitate answering some or all of the questions, analyze the data, and produce a series of reports on the state of their research in school and community settings.

**Curriculum Policy across Schools and Communities**

This course offers a critical examination of the intersections of curriculum politics, policy, and practice in schools and communities. The goal is to increase students' understanding of the complexities of educational policy in practice as a means to assist them in becoming effective leaders and practitioners who influence and implement curricular policy in service of social justice.

Outcome: Students will examine historical and current trajectories of curricular policy spanning educational contexts, using various theoretical frameworks to probe how policy layers, locales, and actors influence the design and implementation in practice.

**Curriculum Improvement and School-Community Change**

Recognizing that the growth and development of schools and communities are inextricably linked, this course develops candidates' understanding of curriculum and school reform as well as community improvement. It examines historic school reform and contemporary school change models in addition to school-based reform strategies intended to improve teaching and learning in schools. The course further examines contemporary community development strategies such as community organizing, community economic development, and social service approaches in order to grant insights into the role communities play as potential partners in school improvement.

Outcome: Students will assess current research on curriculum reform and community development and their implications for improving student learning and achievement in school settings. Students will work with a

This module develops candidates' ability to collect, represent, and analyze appropriate classroom data. Students will use this ability to determine the level of objective mastery and measure student growth. Reflection on the analysis will guide candidates' decisions regarding instructional adjustment and individual student needs.

Outcome: Teacher candidates will be proficient in the use of data based decision making that informs instruction and guides students' academic and behavioral modifications.

**Disciplinary Literacy**

This module supports candidates in developing their knowledge and skills related to literacy in discipline specific contexts, with an emphasis on culturally responsive texts, evidence based strategies, data based decision making skills, and new literacies to target all students' literacy needs, including those with linguistically diverse backgrounds. Additionally, teacher candidates will collect, represent, and analyze classroom data, and use this analysis to adjust literacy instruction for students, as well as target individual students' needs. Teacher candidates will design and teach disciplinary literacy lessons using data based decision making, as well as technology during lesson delivery.

Outcome: Teacher candidates will apply understanding of literacy lesson design, assessment and instruction in discipline specific contexts. They will be required to collect and utilize data to teach targeted standards

**Adolescent Literacy Instruction**

This course focuses on developing effective instructional practices that promote the ongoing development of adolescent literac(ies) including essential reading skills, critical literacy skills, multimodal literacy skills, and disciplinary literacy skills. Foundational in the premise that all adolescents have and can develop a variety of literacies that facilitate reading the word to read the world, teacher candidates will develop a repertoire of strategies for building essential reading skills and developing academic language informed by CCS and WIDA standards. They will also learn how to bring together their content knowledge, understandings of academic language and literacy, criticality, and the importance of using multimodal texts to create lessons that address the needs of all learners, including emerging bilinguals.

Outcomes: Use research and evidence-based practices to design instruction that includes the alignment of

**Teaching and Learning in an Area of Specialization**

This module further develops and deepens candidates' (students) understanding and application of designing instruction in an area of specialization. Candidates use data, select essential content, implement strategic pedagogy, and integrate technology to meet the needs of PreK-12 students in a particular curricular area.

Outcome: Teacher candidates will reflect on their implementation of the full instructional cycle and after analysis of the data generated from that instruction will identify research that informs instruction future teaching.

**Teaching and Learning with a Global Framework**

Teacher candidates will work with PreK-12 teachers to develop and implement a trans-disciplinary/interdisciplinary curriculum unit with a service component. This module's (course) experiences are specifically designed to prepare candidates for teaching in schools that offer an International Baccalaureate program.

Outcome: Teacher candidates assess their instruction using a global framework in this module and develop an action plan to improve practice as they move into the final phase of the teacher preparation program.

Outcomes: This course module focuses on current bodies of knowledge in the field of Science Education. Candidates must demonstrate understanding of A Framework for K-12 Science Education and the Next Generation Science Standards], as well as current literature. They will also critically evaluate curriculum, instructional and assessment practices in a variety of diverse classroom and community settings, with a focus on equity.

 Presentation skills

Scientists must communicate their work in numerous venues, from giving oral presentations in seminars and conferences to writing papers and grant proposals. This course is designed to train students in the design and delivery of effective oral presentations, a skill that can be readily adapted to serve as a starting point for written communications.

## Outcomes:

1. Identify elements of an effective oral presentation
2. Deliver an effective oral presentation
3. Judge the effectiveness of oral presentations

Components:                      Seminar(In person)

**Grad Schl at Medical Center - Clinicl&Appl Mass Spectrometry - Subject: Clinicl&Appl Mass Spectromet****CAMS 401(4) Course ID:014338 15-JUN-2022****Theory and Physics of Mass Spectrometry**

This course will cover the fundamental physical principles that are used in mass spectroscopy, with a primary focus on basic electricity and magnetism theory. This course will not be calculus based.

Pre-requisite: Enrollment in CAMS-MS program

Outcomes: At the end of this course students will be able to: 1) Describe the fundamental principles of Newton's Laws and Conservation of Energy; 2) Describe basic interactions between charged particles and electric fields; 3) Define electric potentials; 4) Describe the relationship between electric and magnetic fields; 5) Identify the direction a charged particle will move in a magnetic field; and 6) Derive the relationship between charge, mass and velocity.

 This course offers a topical survey of bioethical issues pertinent to clinical practice in the Catholic context. The United States Conference of Catholic Bishops' document, Ethical and Religious directives for Catholic Health Care Services, 5th Edition, serves as the guiding document of the course. Topics and concepts considered include abortion, contraception, sterilization, nutrition and hydration, withdrawal of life support, care of the dying, cooperation, conscience, human dignity and personhood.

Outcomes: This course aims to assist students in establishing a substantive familiarity with the positions and moral reasoning of the Catholic tradition in clinical bioethics through a consideration of Church documents, scholarly texts and articles and formative debates within contemporary Catholic bioethics.

**Catholic Bioethics and Social Justice**  
 This course involves an historical study of the development of the body of official Catholic Social Teaching (CST) specific to its impact on healthcare delivery in the United States. Current developments in select key social issues and movements are also addressed insofar as those issues and movements influenced healthcare delivery. The pastoral letters of the U.S. Bishops, especially their teachings on healthcare reform, also receive attention. The interface between religious faith and public policy debates is a constant concern throughout the course. Practical strategies for fostering a social justice consciousness in healthcare settings are also considered.

Outcomes: Extensive use of case discussion and analysis will help to develop the participants' understanding of the principles of CST and their application to the healthcare context.

**Grad Schl at Medical Center - Microbiology and Immunology - Subject: Microbiology and Immunology****MIIM 415(2) Course ID:012607 07-MAY-2013****Medical Immunology**

Prerequisites: General Biology and/or Cell Biology Course is open to all Integrated Program in Biomedical Sciences PhD and MS students, graduate Nursing students, medical students, and advanced undergraduate students.

The medical immunology course provides an in depth description of the components of the innate and adaptive immune system and how they interact to protect humans against infectious microorganisms. The course will have two 3 hour sessions per week for 8 weeks as well as 2 written exams.

Outcomes: Be able to describe the development and mechanism(s) of activation of the innate and adaptive immune systems, their regulation and outcomes of their inability to do so.

**Components:** Lecture(In person)  
**Requirement Group:** Restricted to Graduate School students.  
**Req. Designation:** Fieldwork

Prerequisites: Include undergraduate or graduate-level courses in cell biology and biochemistry, graduate course 402 Microbes and Hosts, and / or prior approval from the course director(s).

The course will cover molecular biology and biochemistry of virus infections. Current understanding of virus-cell entry, replication, and assembly will be prominent themes. Course will include lectures on viral evolution, ecology, pathogenesis and viral immunology. The interactive course will include lectures, review of current virology literature, and student-led presentations.

Outcomes: Detailed understanding of virology; be able to integrate concepts in this field with chemistry and health science; comprehend and appreciate current literature; be prepared for lab studies.

**Components:** Lecture(In person)  
**Course Equivalents:** BMB 431  
**Requirement Group:** Prerequisite: Cell Biology BMSC 412, and Molecular Biochemistry BMSC 410 or permission from the instructor

CMO 499 is designed to give credit for laboratory research efforts that will result in a M.S. thesis. Students will learn theoretical and laboratory technical tools to investigate and test a hypothesis. Students will search the literature for background, rationale, and protocols for their research project. Students will communicate results and knowledge through written and oral communications.

Restricted to students enrolled in CMO MS program

The outcomes are: 1. Clearly communicate, describe, and implement techniques used for a research problem; 2. Describe results-obtained; 3. Draw conclusions based on data-obtained; 4. List future directions; and 5. Understand the significance of the work

Prerequisites: Restricted to Master of Physiology Program students.

The major goal of the Cellular Physiology course is to define the molecular and cellular basis of systems Physiology and Pathophysiology. The course consists in distinct sessions of teaching, problem solving, and reviews.

## Outcomes:

- Understand the relationships among molecular, cellular and systems physiology.
- Understand membrane structure and function.
- Understand distinct metabolic and signaling pathways.

**Function of the Human Body I**

This course will present the basic concepts and principles of human physiology. The course topics will include: introductory cell & neurophysiology, skeletal and smooth muscle, cardiac electrophysiology, EKG, cardiac muscle mechanics, circulation, special circulations and pulmonary physiology. The format will be lectures, simulations, small group problem sessions and scheduled reviews. Small group problem sessions will be held after each subject area and will focus on clinical application and integration of conceptual information presented in lectures. Small group sessions and reviews also will provide the student with the opportunity to obtain clarification from instructors of any outstanding questions and are designed to encourage active learning, as well as develop critical thinking and problem solving skills. Students will be evaluated by multiple choice and essay exams given after each of the 5 major topic areas. Course material will be geared toward non-thesis Masters students. Given that physiology is the basis of medicine, this

**EXCM 458(3) Course ID:013905 01-JUL-2019****Cardiac and Pulmonary Disease and Rehabilitation**

This course focuses on two prevalent areas of public health concern for the exercise scientist: cardiac and pulmonary health and disease. Emphasis is placed on prevention, etiology, pathophysiology, and understanding the diagnosis and treatment of cardiac and pulmonary disease. The role of the clinical exercise scientist in preventive and rehabilitative exercise intervention and programming to promote cardiac and pulmonary health is emphasized. Key factors in the development, management, and evaluation of cardiopulmonary rehabilitation programs are integrated into the course.

## Outcomes

1. Understand anatomy and physiology associated with cardiopulmonary health and disease.

This course emphasizes theory, techniques, and procedures of clinical exercise stress testing for diagnostic and functional assessment of individuals. Students will develop competencies in clinical testing skills ranging from electrocardiography to graded exercise and physical performance testing. Data from diagnostic testing and functional assessments will be integrated into individualized exercise prescriptions, based on risk assessment and stratification. Responses to emergency situations in the exercise environment are addressed.

## Outcomes:

Schl of Health Sci & Pub Hlth - Healthcare Administration - Subject: Healthcare Administration**MHA 405(3)** Course ID:014200 15-JUN-2021**U.S. Health Systems Management**

This course provides a foundation for understanding the contribution of formal US healthcare services to the nation's health. Content includes how the structure of healthcare in the US healthcare impacts operational management of provider systems focus on how care is organized, delivered, financed and regulated. Major challenges that impact healthcare cost, quality and access are examined with underpinnings of social justice and impact on communities served. Emphasis is placed on management of quality, patient safety and information technology as centerpieces of the modern health care environment.

Outcomes: Distinguish roles, functions and responsibilities of healthcare system components. Analyze the interaction of social, political and economic forces shaping healthcare delivery and impact on cost, quality and access.

**Components:** Lecture(Online)**Req. Designation:** Internship**MHA 415(3)** Course ID:014233 15-JUN-2021**Culture of Quality & Safety in Health Care**

Developing, managing healthcare safety and quality programs by demonstrating strategic importance of concepts inside healthcare organizations and clients. Discussion of safety science, high reliability organizations, trends in patient safety, healthcare quality, practices in different healthcare environments, development of organizational cultures, safety & quality, tools for monitoring performance improvement will be examined.

Outcomes: Students will explain forces driving safety and quality in healthcare, evaluate strategies for improving safety/quality in healthcare, describe influence of systems on outcomes. Analyze role of various systems, factors in creating safe environments of care. Explain "just culture" thinking on safety, quality improvement. Develop plan for improvement of safety/quality.

**Components:** Lecture(Online)**Req. Designation:** Internship**Room Requirements:** Classroom Not Needed(1)**MHA 430(3)** Course ID:014234 15-JUN-2021**Managerial Epidemiology**

Introduces epidemiological principles, tools pertinent to population health management, delivery of healthcare services, fundamentals of epidemiologic inquiry, population health, community health needs assessment introduced. Methods to effective planning, monitoring, and evaluation of healthcare services. Emphasis given to practical applications, decision-making in healthcare administration, planning, management, financing, outcome evaluation, within healthcare organizations.

Outcomes: Students will distill the central role of population health management in healthcare administration, epidemiology in evidence-based management, basic principles/methods of descriptive epidemiology to healthcare, administration functions.

**Components:** Lecture(Online)**Req. Designation:** Internship**Room Requirements:** Classroom Not Needed(1)**MHA 440(3)** Course ID:014235 15-JUN-2021**Healthcare Management and Ethics**

This course deepens insights into profession of healthcare administration, presents key principles, practices of management within healthcare organizations. Emphasis given to knowledge, skills necessary to effectively manage healthcare organizations. The interplay between management and the larger environment of internal/external stakeholders explored, ethical issues common to healthcare management examined. Provides foundation for developing effective management.

Outcomes: Students will differentiate key principles of management, articulate the governance and management structure of healthcare organizations, synthesize core functions of healthcare manager.

Identify/frame/evaluate healthcare management challenges, define strategies for addressing challenges.

**Schl of Health Sci & Pub Hlth - Public Health Sciences - Subject: Master of Public Health****MPBH 425(3) Course ID:013811 01-JAN-2020****Policy Analysis**

This course will provide an introduction to the issues and methods of health policy analysis. Health policy analysis requires several distinct sets of skills: technical understanding of analytical tools, understanding the policy and managerial context within and outside of your organization, and the ability to produce and communicate practical advice.

This is a track-specific requirement for MPH Graduates in the Health Policy track

Outcome: Students will develop a good working understanding of the methods specific to these issues examined through this course and will also learn how to apply these to specific problems.

This course provides an introduction overview of the health consequences associated with climate change and the local, federal, and global response to mitigate these negative health outcomes. During the course students will be expected incorporate course content and develop a realistic response public health plan to climate change for a locality of their choosing.

This course is offered both online and in-person.

## Outcomes:

- 1) Outline fundamental public health concerns that have been associated with climate change.
- 2) Identify and critique future steps forward to reduce public health concerns of climate change.

**Energy Law & Policy**

This course looks at the laws that shape traditional energy production and the growing regulation of renewable and sustainable energy.

Restricted to GRAD students.

Outcomes: Understand how key laws and policies impact production and use of energy; and how energy is controlled by federal and local regulations and policies.

**Conservation Biology**

Students will learn to apply ecological and evolutionary biological principles to the preservation of wild plant/animal species, and to the preservation/management of ecosystems. Conservation approaches and challenges for all types of ecosystems, will be covered, with emphasis on contemporary threats to biodiversity, including habitat fragmentation, invasive species, and climate change.

Restricted to GRAD students.

Outcomes: Students will understand how the science of ecology can be used to address issues in species/ecosystem conservation, and recognize that consideration of human actions is essential to address conservation problems.

**Invasive Species**

Invasive species are one of the greatest global threats to biodiversity, ecosystem function, economies, and human health. Species become invasive when moved beyond native range, become established, and cause harm. This course covers how species are moved, how and when they become established, and potential harm they can cause.

Restricted to GRAD students.

Outcomes: Understanding that because invasive species are moved by humans, and because many of their impacts are felt by humans, they are an inherently multi-disciplinary problem.

**Sustainable Agriculture**

This course provides an introduction to the environmental, social, and economic implications of sustainable agriculture. Students will learn the origins, major concepts, and current issues of sustainability in agriculture. Ecological concepts and principles applied to manage sustainable food production to support community health and economic justice will be explored.

Restricted to GRAD students.

Outcomes: Students will be able to explain the characteristics of the U.S. agricultural system, the inter-relation among components of sustainable agriculture, and steps necessary to develop a sustainable agricultural system.

Inst of Environmntl Sustainabl - Inst of Environmntl Sustainabl - Subject: Environmental Science**ENVS 426(3) Course ID:013787 15-JUN-2019****Agroecosystems**

In this hands-on course, students will build knowledge and skills in agriculture and ecology through work in greenhouse, laboratory, classroom, and field settings. Students will build on foundations of Environmental Science and Biology by examining challenges of food production, management decisions, and environmental change facing agroecosystems both locally and abroad.

Restricted to GRAD students.

Outcomes: Students will develop understanding of agricultural systems as related to sustainable practices, develop skills in ecological analysis of these systems, and demonstrate proficiency in communicating scientific information to diverse audiences.

Prioritizing a healthy brain is important not only because learning the law is intellectually challenging, but also because lawyers suffer from anxiety, stress and substance abuse at an alarming rate. The objectives of this course include learning how mindfulness meditation, food choices, exercise, and various stress reduction techniques can improve brain health and well-being. You will practice meditating regularly both in class and on your own and will be introduced to science that demonstrates how mindfulness meditation can physically change your brain in a short period of time. This course will also cover using mindfulness to heal from technology and other addictions. You will also learn how mindfulness practice builds a variety of human capacities and skills that can be consciously applied with clients, colleagues, staff, opposing counsel, judges, juries and others. We will make these connections throughout the course using readings, meditation (together and apart), videos,

**Class Actions**

Some of the most cutting-edge and challenging litigation in the courts today are class actions or complex cases involving numerous parties and/or very complicated claims. These cases can take up enormous resources of our courts and the litigants and yet result in resolutions that are fair and efficient if litigated and adjudicated properly. This course focuses on the emerging issues in such cases, the innovative uses to which scientific evidence is being put in class actions, and the methods used to resolve such disputes. Students will be expected to participate as part of litigation teams in strategic discussions and exercises highlighting the material covered in the course and will be evaluated on those exercises as well as a final examination. The class would meet, at a mutually convenient time, once a week for two credits and feature at least two guest speakers (e.g., class action lawyer, jurist, expert).

Argument and persuasion are essential human activities. Both have been practiced, in one form or another, for as long as human beings have interacted with each other; both have also been the subject of study since earliest times. Much of what guides us today comes to us from the ancient Greeks, but modern cognitive psychology also contributes to our understanding as how audiences of various types are persuaded in various circumstances. This course is particularly interested in what constitutes effective legal argument, particularly in the resolution of constitutional questions by appellate courts. The first part of the course will consider the general problem of persuasion by focusing on classical theories of argument and, to some extent, on the understanding of effective persuasion derived from contemporary cognitive psychology. Since the aim of appellate advocacy is to persuade a particular and specialized audience, namely, appellate judges, the second part of the course will consider the particular demands and requirements of persuasion that arise

**Law & Catholic Social Thought**

On its website Loyola University Chicago defines itself as "Chicago's Jesuit, Catholic university." It also makes clear that Loyola is fiercely dedicated to promoting "social justice." Likewise, in its Mission Statement, the Law School claims to be "inspired by the Jesuit tradition" and that it seeks "to prepare graduates who will be ethical advocates for justice and equity."

Did you ever wonder what this means? What is the justice that Loyola claims to support?

There are, of course, many ways of defining justice, and many critical perspectives through which law may be examined: Law & Economics, Legal Positivism, Classical Liberalism, Rawlsian Welfare State Liberalism, Legal Feminism, Legal Realism (and its successor Critical Legal Studies) and Critical Race Theory. **International Arbitration: Public and Private**

This course will familiarize you with what has emerged as the primary means of resolving cross-border and multi-jurisdictional commercial disputes in today's global economy, international arbitration. You will first learn about international commercial arbitration, which is carried out between private companies having disputes over international commercial contracts. You will then focus on international investment arbitration, which is a dispute mechanism provided for by treaty that permits an investor to have recourse to international arbitration when a dispute arises, rather than to the courts of the host country. Throughout the course, you will explore the similarities and differences between international arbitration and the procedures used in common law (i.e. the U.S. and U.K.) and civil law (i.e. most of Europe, Asia and Latin America) systems. You will develop an appreciation for the cross-cultural nature of international transactions and disputes and attain a certain facility with key international arbitration rules,

The class covers the rise of the carceral state from the 1970s onward, with a particular focus on the disproportionate impact on Black and Brown people.

We trace the roots of the carceral state to slavery and its end, and then move into the war on drugs and war on crime. We will spend the semester exploring the causes of the carceral state (or mass incarceration), its consequences; particularly with respect to families and children and public health, and then we focus on how to address changes to it.

Readings vary from poems and law review articles by people who have been formerly incarcerated to scholarship by historians and activists, and political scientists, and a few cases from the Supreme Court. We

The instructor's principal goals is to expose students to the "nut and bolts" of pleading, discovery and fact gathering - with particular emphasis on writing - so that they will be more effective junior lawyers on their first day or practice. Throughout the semester, each student will represent a client in simulated litigation of a fictional civil case in which one of their classmates is opposing counsel. Class time is devoted to discussing how to prepare and complete the tasks that arise in litigation generally and in the mock litigation in particular. As a result, students become familiar with the Federal Rules of Civil Procedure and obtain actual, albeit simulated, experience drafting pleadings, discovery and other writings. The course includes the study of public and private housing, with reference to federal and state constitutional and statutory law. In 1949, Congress declared the goal of a "decent home in a suitable living environment for every American family." However, more than 60 years later, over 95 million Americans confront serious housing problems or have no housing at all. Students will gain an understanding of the history of housing law, the lack of adequate housing in the United States, the consequences of inadequate housing, as well as the programs and legal tools designed to meet housing needs. Students will examine various programs designed to facilitate access to decent and affordable housing and develop strategies for addressing the housing crisis. Each student will prepare a seminar paper (or series of papers) on an aspect of housing as well as present in class on that topic.

The purpose of this course is to introduce students to the role of natural law in the development of the law, with an emphasis on the position of natural rights in American Law and International Law. The specific context of our examination will be the natural rights of the human person. Three interrelated objectives of this course are (1) to develop an understanding of what the natural law is and what it is not; (2) to dispel the skepticism (myths) about the role of natural law; and (3) to demonstrate the critical role in the evolution of natural human rights in American Law and International Law. Several particular rights will be examined to sharpen the focus of our investigation and discussion. Our readings will consist of primary and secondary sources compiled into a reader that will be made available in electronic form. There is one required book that will have to be purchased, viz. This class is designed to be a space for reimagining our world, and how we, as lawyers and future lawyers, can work to dismantle the systems of White supremacy and oppression that incarcerate, punish, and harm Black and brown people in the U.S. while failing to prevent, address, or repair harm or facilitate accountability. Abolition is not just about the dismantling or absence of systems, but as Ruth Wilson Gilmore states, abolition is about presence. Movement lawyering/community lawyering is about taking direction from directly impacted communities and from organizers, as opposed to imposing our leadership or expertise as legal advocates. What can we work to build that is life-affirming instead of life-destroying, that is in solidarity and not another manifestation of the underlying problems? This class will discuss the difference between reform and abolition, the history of abolitionist organizing in Chicago, and the historical and current role of lawyers in social movement.

The Attorney General is the state's chief legal officer and is responsible for protecting the public interest of the state and its people through advocacy, legislating, and litigating. Protecting consumers and businesses that have been victimized by fraud, deception or unfair competition is one of the primary functions of the Attorney General. Her office receives 25,000 consumer complaints each year. In her many years of service since 2003, Attorney General Madigan has gained a solid, national reputation for prosecuting offenders perpetrating fraud against Illinois consumers. Most recently, she paired with a couple of other mid-west states Attorney Generals to prosecute the many big banks [too big to fail] for their predatory lending tactics, recovering billions of dollars. The course will focus on Consumer Law, including the role of the state in enforcing legislation protecting consumers. The course will also address the role of private

The aim of this seminar is to provide students with a deeper understanding of the Supreme Court of the United States, its personnel and work, and the important role it plays in American government and society. Students will consider the processes by which Justices are appointed to the Court; the standards and processes the Court uses to choose cases for review and decision on the merits from among the multitude decided each year by the lower courts, leading to the creation of precedents of national applicability; the ways in which advocates endeavor to persuade the Court that it should (or should not) grant review in a particular case; and the ways in which the so-called "merits cases" (those in which review has been granted) are briefed, argued, and decided. A substantial part of the semester will be devoted to the study of a small number of cases currently pending before the Court, either as candidates for review or for decision on the merits. Students will learn about the work of the Court by studying briefs that were actually filed and transcripts

Learning litigation skills task-by-task can leave the young practitioner with little guidance on how to form the overall strategy necessary to develop and present an effective civil case. While covering a wide range of specific skills, including opening statement and closing argument, the careful researching of local rules, techniques for examining witnesses, techniques for oral argument and applying a structured approach to settlement negotiations, this course will emphasize the aspects of these skills that support an overall civil litigation strategy. This course will require students to review a variety of materials in preparation for class, to participate in in-class exercises and to submit written work that displays the learning acquired through the in-class exercises. Evaluation of each student's performance will be based primarily on the student's written work.

The majority of practicing lawyers represent businesses or individuals with business or investment interests. Unfortunately, the majority of law students have had limited exposure to business law and the first year curriculum offers few opportunities to explore this area. This course is intended to expose first year law students to the fundamental issues and perspectives that pervade business law. The goal is to make these topics accessible to all students, particularly those who have not taken many, if any, undergraduate courses in business, economics or accounting.

The course will be divided into three segments. The first segment, entitled "The Law of Business," will introduce students to fundamental business and tax law concepts as well as transactional issues that business lawyers confront. These issues include the alternative ways of organizing a business (corporation,

Learn everything you need to know to be a successful associate in a domestic relations firm. Most family law firms have little or no training programs. Theoretical knowledge of the law is not enough to step into a firm and start practicing. This course is designed to teach you all of the practical basics Partners want you to know as an Associate family law attorney. This course addresses the practical application of the Illinois Marriage and Dissolution of Marriage Act and related statutes. Topics will focus on developing the skills necessary to excel in domestic relations practice such as strategic planning for a dissolution of marriage case, complex financial analysis, developing and maintaining the attorney client relationship, and practical drafting skills.

This 2 hour course will examine the legal profession which remains one of the least diverse of American professions. Lawyers have unique and varying roles as counselors, advocates, confidants, government officials, adjudicators, and civic leaders. In this course, students will have an opportunity to learn about the legal profession's diversity and inclusion history and challenges, organizational and individual roles and strategies, and current research. This course will engage students with lectures, guest speakers, group discussion, and readings--all materials will be provided by instructors. There will be no cost to the students for materials utilized in this course.

There will be a final presentation where students can discuss and elaborate on important topics in the legal profession. Students will gain a deeper understanding of how diversity and inclusion efforts intersect with professional responsibility and its impact on social justice.

**LAW 197(2)** Course ID:007394 25-OCT-2013**Advanced Business Organizations including a Comparative Perspective**

This course focuses on U.S. corporate law and governance. It begins with an introduction to the different legal issues encountered in business entities across jurisdictions: agency problems between (1) directors and shareholders, (2) majority and minority shareholders, and (3) shareholders and other stakeholders (employees, creditors, the State, etc). It then turns to the three agency problems as they arise in private or publicly held corporations. This covers the questions of allocation of powers between shareholders and the board, directors; elections, executive compensation (say-on-pay), self-dealing transactions, going private transactions, insider trading, mergers and acquisitions, fiduciary duties and participation of other stakeholders in the corporate governance. For each topic, we will define the legal issues involved and examine how U.S. statutory and case law respond to them. We will also take a comparative perspective to analyze how other jurisdictions respond to the same legal issues. The comparison will thus provide students

**Emerging Issues in Public International Law**

Over the past several decades, largely within the context of international organizations, the global legal community has faced complications posed by the threat of terrorism and the reemergence of genocide. As a result of these developments, there has been a reexamination of the traditional role of the sovereign state as the constitutive element of public international law. Consequently, there is an emerging trend to regard, at least by some, the need to augment the role of the sovereign state with that of the international organization to respond to these new global challenges. A principle illustration of this is the concept of the "responsibility to protect". Readings will be taken from primary sources (especially documents of international organizations) as well as contemporary secondary sources, principally scholarly articles. Students will be required to purchase a short book that introduces the major topics of public international law. While federal and state prosecutions in this area are at an all-time high, law enforcement and prosecutors continue to miss critical opportunities because they fail to fully understand the nature of the threat, and lack a solid grasp on the integrated arsenal of statutory tools at their disposal. Similarly, members of the judiciary, as well as victim

**Housing Discrimination**

This class will introduce you to U.S. housing laws and policies with a focus on fair housing and fair lending. The class will provide an overview of civil rights litigation strategies and compliance with federal regulations from the perspective of a variety of participants in the housing market, including lawyers, developers, tenants, banks, government officials, and fair housing organizations.

In addition to addressing housing policies and the intersection between segregation, housing discrimination and gentrification, the class will also examine leading cases in fair housing litigation. It will also focus on alternative dispute resolution of housing discrimination cases, and students will participate in a mock fair housing mediation.

**Climate Change Law & Policy**

Anthropogenic climate change has become one of the most significant environmental, economic, and societal challenges confronting the global community. This seminar will explore the legal, political, and scientific challenges involved in addressing and responding to climate change. The class will consider international strategies and laws, including the Kyoto Protocol, the Paris Agreement, emissions trading schemes, and efforts to involve the developing world in climate change mitigation. The class will also focus on U.S. law and policy, including regulation of greenhouse gases under the Clean Air Act and other statutes, federal litigation, and state and regional efforts to mitigate climate change. Finally, we will cover adaptation efforts at various levels of government, as well as geoengineering. Assessment will be based on in-class exercises, regular class participation, seminar papers, and presentations.

**LAW 227(2)** Course ID:012629 26-JUN-2013**Transportation Law**

Transportation and logistics is a multi-trillion dollar industry. Every item you purchase or use in your everyday life was delivered by a truck or other mode of transportation (rail, ocean, air). America could not function without the transportation industry. There have been a series of deregulations affecting the transportation industry over the years. After September 11, 2001, cargo security became an important issue for the United States, which lead to many new laws and regulations. This constant roller coaster of deregulation and regulation makes being a transportation attorney very exciting. This course will briefly describe the different modes of transportation and the regulating bodies for each. We will focus on the surface modes of transportation, namely trucking and rail. The main topics discussed will be contracts, tariffs, liability for loss and damage to cargo, tort liability of shippers, carriers, customers, and brokers during and after the transportation of freight and a comprehensive understanding of insurance and the various

Bar Exam Fundamentals is a two-credit course that will teach you the analytical and organizational skills necessary to enhance your bar exam preparation. In this pass/fail course, we will focus on a combination of substance and skill through the presentation of specific techniques for maximizing performance on all parts of the bar exam. The course will focus on the most heavily tested doctrine in three bar exam topics, exhibiting how those topics have been tested on the Multistate Bar Exam (MBE) and on the Multistate Essay Exam (MEE). In this class, you will learn and review heavily tested subtopics, learn essay and MBE test-taking strategies, increase proficiency in taking MBE questions, and learn how to write a passing bar exam essay answer. You will receive individualized feedback on written assignments that will help you hone your writing skills and give you the tools you need to successfully self-grade during bar prep.

Section 001 (2 credits) Human trafficking is one of the most egregious crimes that occurs both globally and domestically. While there have been improvements to both global and domestic responses to human trafficking, children who are compelled into forced labor and sexual exploitation continue to be the least identified cohort of survivors. This interactive and interdisciplinary seminar will explore the legal, social, and practical issues confronting children who are survivors of human trafficking, as well as an examination of efforts to prevent and intervene in this social problem. While the seminar will focus on unique issues affecting (international and US citizen) survivors of child trafficking, students will gain knowledge and skills that are applicable to other marginalized populations of children and youth, as well as adult trafficking survivors.

**LAW 264(2)** Course ID:004487 29-OCT-2007**Contract Negotiation and Drafting**

The purpose of this course is to provide exposure to contract drafting and negotiation to students with an interest in transactional law. During the course of the semester we will examine the purpose and process of drafting documents. We will also spend time discussing the business side of transactional law and how best to work with and counsel clients. In some instances, we will start with form documents borrowed from prior transactions (precedent) and we will revise these documents to reflect the particular facts and circumstances surrounding our transaction. In other instances we will work through drafting a document from scratch. Finally, we will spend time reviewing and revising existing documents and discussing the logistics of working through a variety of business transactions. The course will include numerous drafting exercises and some negotiation. By the end of the semester, students should have a basic understanding of how and why contracts are drafted and negotiated. In addition, each student should be able to draft a precise and practical

**Black Traditions in International Law**

This class will trace the international legal claims of African American and the black diaspora to freedom from slavery and its continuing remnants in the United States. The goal is to trace the freedom dreams of blacks that have been sidelined and marginalized by the international legal visions of white and liberal international lawyers. Its specific objectives will be:

(a) to discuss the international legal contributions of African Americans to international law and practice, and in particular how African Americas inaugurated new streams of black international legal thought in the last several decades;

(b) to analyze the global vision of black traditions of international law by highlighting the whole spectrum of African American experience and engagement with international law without distortion and

This course gives brief treatment to agency and covers partnership as an alternative to the corporate form. Principal emphasis is on the law as it applies to the organization and functioning of corporations. The course focuses on structure and mechanics, capitalization, distributions, organic changes, and duties and liabilities of directors, officers, and controlling shareholders. The federal securities acts are introduced with particular attention to Rule 10b-5. Substantial attention is given to the special problems of the close corporation.

This course counts as a Bar course.

**Refugee Law and Policy: Welcoming the Stranger**

Refugee law is one of the most dynamic and rewarding areas of law. Nonetheless, in observing the administration of refugee law, we bear witness to some of the United States' most egregious human rights abuses and the abandonment, in some cases, of the rule of law. The goal of this course is to teach students the history of the norm of non-refoulement, in doing so to understand how political, religious, racial and other minority groups are intended to be protected (from persecution, from torture, and from death). Students will learn the history of the Refugee Convention-for whom the document was written, and, consequently, who is left out of protection (considering for example the treatment of victims of private-sphere persecution or climate refugees). Students will learn the role of xenophobia, racism, and subjugation of the "other" in this case the "alien"-other in administering the rule of asylum law. The class will contain a comparative analysis of refugee law under various international and domestic systems. Finally, students will learn about

**International Arbitration**

This is a one credit course taught sometimes in one of the summer programs. In this course, students will learn how international commercial arbitration works. In most international contracts, the parties agree that all disputes will be resolved by arbitration. This private dispute mechanism provides a number of advantages over litigation. One of the most important advantages is that by agreeing to arbitrate, a party avoids ending up in the other party's court system. An arbitration award is also more easily enforced in a foreign jurisdiction than a court judgment, because of an international treaty known as the New York Convention. Students will learn about the various laws and rules governing international arbitration, as well as specific, practical knowledge about arbitrating, such as how to draft an arbitration clause, how to choose an arbitral institution, how to select arbitrators, the ethical rules that apply to arbitrators, the bases for challenging arbitrators, the conduct of the arbitral hearing, rules governing admission of evidence,

**Spanish for Lawyers**

The course is designed for law students who are looking to supplement their existing knowledge of the language with Spanish that focuses on the legal field. Its main objective is to develop adequate communication skills that will allow you to advise Spanish-speaking clients on issues related to criminal, property, civil, labor, administrative, tax, commercial, and litigation law.

We will work with real documents and texts, analyzing cases, as well as reinforcing knowledge of both Spanish in the legal field as well as of different branches of law in the judiciary system. Coursework will be carried out in groups, and a system of continuous evaluation will be implemented using assignments and projects. The course will also include a cultural component, the aim of which will be to understand, contextualize, and handle effective exchanges with Spanish-speaking clients.

The course will use a text written by the professor and a colleague who have the distinctive perspective of two individuals who have spent their careers in the trenches investigating, prosecuting, and adjudicating these intricate and commonly emotional cases. The course will offer open debate about human trafficking by stripping it of its unhelpful, constricted definitions, and by candidly discussing the state of the law, the criminal justice process, and the treatment of offenders and victims. The course examines today's system of federal anti-trafficking laws in relation to the global efforts to eradicate this pervasive human rights violation. Historically, the field of communications has been divided between the traditional mass media (broadcasting, cable, satellite broadcasting) and telecommunications media (wireline and wireless telephone carriers). Today, the two general divisions are converging. One of the vehicles of that convergence is the Internet, which is capable of providing both mass media and individual communications services. This course will examine legal issues affecting all of these media. Much of the course material necessarily covers the history and theory of communications regulation as practically applied through FCC rulemakings.

**Intellectual Origins of "Othering" in the Law of Nations**

Today, many nations and peoples with formal legal equality are not, in practice, treated equally in international relations. One reason for this is that some nations and peoples were once unequal under prevailing law and legal theory. This course surveys key Western political and legal thought that led to "othering," or legal inequality, in the "Law of Nations," which was a general body of law that eventually became what we today call "international law." After setting out key concepts and themes, the course traces the evolution of thought regarding: the nature of human societies, the interrelationship of human societies, the rights and rules of war, and the acquisition and possession of land by peoples and nations. As necessary, students will be required to review relevant geopolitical history that both influenced and resulted from this evolution. A note of caution: this course will encounter detestable concepts, such as the persistent idea that some humans were "natural slaves," "infidels," "savages," or "barbarians" unworthy of equal

This a unique course offered once a year to a select group of students from Loyola and Chicago-Kent. Enrolled students read and discuss draft articles of nationally renowned professors in the field of intellectual property; the articles are typically draft law review articles. The discussions are focused on helping the professors to refine and improve their articles, such that a strong foundation of intellectual property is expected, even though there is no official pre-requisite. This course meets every week, but the students only meet in person roughly half the time, with the other half of the sessions done by videoconference. Three of the in-person classes will be at Chicago-Kent; for those days, the class will begin at 4:10 pm and end by 5:50pm to allow students adequate travel time. There is no final exam or research project required for this class. Instead, students are required to attend and actively participate in all classes. **Intro to Comparative Law**

This course will provide an introduction to the "civil law" legal systems (which include almost all of Western and Eastern Europe and Latin America, as well as, portions of Africa and Asia). The course will begin with the roots of the Civil Law in Rome around 450 BC and subsequent developments, including its preservation by Byzantine Jurists in the Corpus Juris Civilis, and its revival by scholars in medieval Italy. The various events and influences that led to the modern Civil Law will be considered. Differences between the modern Civil Law and Common Law approaches and attitudes toward law will be covered. (Perspective Elective course)

Note: Students who have taken Comparative Law (LAW 172) may not enroll in this course.

**Courtcraft Excellence in Advocacy**

Courtcraft is the foundation and the discipline which makes for excellence in advocacy. It is a holistic approach to advocacy which harnesses together at least four principles: purpose, preparation, presentation and persuasion. Courtcraft should never be an option for the would-be advocate. It is not a luxury, but an essential grounding without which no law student can begin to call himself/herself an advocate. Like any skill, advocacy can be taught. Few of us are born advocates. Most need training and guidance. Courtcraft develops and enhances all that the student of law has been taught and prepares him/her for excellence in advocacy.

Our courtcraft programme is not founded simply on theory or academia. It is based on our own many years of experience as advocates appearing almost daily in court. Purpose Your role as a lawyer and advocate. Your duty

This course will empower you to practice in Illinois state courts (where 90% of all litigation is heard) with the efficacy of a seasoned litigator. Teaming star civil litigators with veteran judges, this redesigned two-session intensive course will focus sharply on the crucial knowledge and skills needed to survive the confusing and hectic civil court system. The course will enhance your written and oral argument skills in the context of the labyrinth of procedural rules and statutes that govern different phases of civil litigation in Illinois. Using hypothetical scenarios, students will learn how the rules apply to the facts and substantive law in a concrete way, as well as how to argue issues arising in the pre-trial setting. You will write briefs (up to 8 pages), argue motions, serve as a judge, and instruct your fellow students on the law, all over two sessions, each one lasting one and a half days. The first session will generally focus on pleadings and motions directed to pleadings, while the second session will generally focus on discovery and

There are over two trillion dollars invested in hedge funds; investment giants that move and shape today's international financial markets. Yet many do not understand their significance or their complex workings. This course is designed to give you a practical understanding of hedge funds and the documentation that supports the formation and operation of these funds. We will examine the regulatory, compliance and business issues surrounding hedge funds and provide tools for successful fund implementation. We will also explore practical concerns with the Investment Advisers Act of 1940 and the Investment Company Act of 1940 as well as current changes to the regulatory scheme, including Dodd-Frank. This course examines state court decisions from around the country to illustrate the array of state constitutional issues occurring in modern American law. State constitutions are a source of rights independent of the Federal Constitution and frequently are applied by state courts to grant more expansive protection for individual rights than the Federal Constitution afford. Moreover, state constitutional law, like its federal counterpart, is not limited to issues involving individual rights. Course coverage may include equality, due process of law, criminal procedure, property rights, religion, freedom of speech, school funding, the right to a remedy, the structure of state government, judicial power, and amendment processes.

This course deals with the legal ramifications of disputes involving contracts with two or more states or other jurisdictions. When such disputes reach the courts, what law should be applied and how should the determination be made? The course explores these questions and the various methods courts and scholars have proposed and adopted to answer them. The contrasting points of view regarding choice of law, jurisdiction and recognition of foreign judgments are analyzed in terms of which policies best promote harmony and efficiency in the federal system and accord with the federal constitutional requirements of due process of law and full faith and credit to the judgments of sister states .A special focus this year will be on the application of these areas of law to family law issues.

The course explores and addresses the causes of wrongful convictions. We will also explore how the law has changed in response to what we've learned about wrongful convictions. Among other factors, the course will specifically consider interrogations and false confessions, forensics and their (mis)use in the criminal law, and eyewitness testimony and memory and factors that may make it fallible. The course will draw from case law, national academy of science reports and related research, and multidisciplinary research in the areas of psychology, social sciences, and the law. The course will also focus on solutions: how have system actors responded? What changes in law have emerged? What changes in practice, including practices in prosecution or police departments. We address the systemic causes of wrongful convictions and consider the impact of such convictions on men and women of color, particularly on Black men and teenagers, who have been disproportionately impacted.

**Remedies**  
This course examines what courts, including juries, have the power to do in civil cases once a litigant shows he or she has been legally wronged or is threatened with legal wrong. The subject matter of Remedies, now a required subject of inquiry on most state bar examinations, is very broad, meaning, in part, that it draws on many topics of legal study. Constitutional Law, Torts, Contracts, and Federal Civil Procedure, in particular, bear directly on the subject matter of the course. Remedies is therefore sometimes called a ¿capstone course,¿ because it provides students an opportunity to bring together what they have learned in other courses on substantive and procedural law. One important component of the course is review problem sets (problems similar to examination questions and often presaging them) that are discussed in class. Another is an emphasis on how the remedial issues that become the subject of appellate opinions arise in the first instance, and are presented and play out at the trial court level. Open to all second and third year

**Telecommunications Law**  
This course surveys the field of electronic communications, from the telephone to broadcast media to the Internet. Historically, the field of communications has been divided between the traditional mass media (broadcasting, cable, satellite broadcasting) and telecommunications media (wireline and wireless telephone carriers). Today, the two general divisions are converging. One of the vehicles of that convergence is the Internet, which is capable of providing both mass media and individual communications services. This course will examine legal issues affecting all of these media. Much of the course material necessarily covers the history and theory of communications regulation as practically applied through FCC rulemakings.

This course will explore the application of economic principles to legal doctrines. The economic approach to law seeks (1) to explain, at least in part, why certain legal rules exist; (2) determine the consequences of legal rules by identifying the incentives created by a legal framework; and (3) provide guidance about how legal rules should be structured or ambiguities interpreted. The course is intended to enable the student to develop an understanding of the economic implications of legal rules, how economic concepts can be incorporated into legal rules, and how economic analysis fits into litigation. Topics covered will include the economics of property, torts, contracts, crime and punishment, and more.

During this two credit hour course, students will learn who can be an expert, what an expert can testify about, the pretrial disclosure requirements for experts, differences between Illinois and federal law regarding experts, and the fundamentals of direct and cross-examination of experts. Students will then participate in simulations including a discovery deposition and a mock trial where students will present and cross-examine psychology graduate students serving as expert witnesses. Students will be graded on their performance of these exercises as well as written exercises and classroom participation. The mock trial will serve as the final examination for the course. Completion of Trial Practice or Evidence is highly recommended.

The fundamental idea of this course is that, seen through the lens of history, law has molded and been molded by our social, political and economic relations. American law has been essential in determining the most fundamental questions affecting us; slavery, voting, property-holding, the status of women, the role of religion, what agreements we may make, who is responsible for accidents, whether wealth may be taxed, pollution, and countless other topics. **LAW 356(2)** Course ID:012195 15-MAR-2018**Storytelling and Presentation Skills for Lawyers**

This course is designed to train student lawyers in the art of storytelling and persuasive presentation for the courtroom. Training will focus on the goal of persuading juries by presenting complex material in narrative form with the ease of a conversation. Students will learn how to construct powerful stories that illustrate critical aspects of the case, using simple language, effective pacing, and vivid character development. Students will also learn how to use vocal inflection and body language to tell the story between the words, project confidence, and how to make a mental/emotional connection with the jury. Courtroom delivery is examined through principles that apply to all spoken interaction: use of space, use of visuals, and use of time. The course focuses concepts drawn from literature, theatre, and public speaking. Students learn the practical skills that apply to openings, closings, witness interrogation, and prospective client interviews. Each day includes both lecture and practical workshop components. Students will prepare and

This course considers how patents impact access to medicine in today's global economy. While there are many issues that impact access to medicine, patents are the highlight here because patents are often poorly understood, yet have an enormous impact on access to medicine. After all, the existence of a life-saving or sustaining drug is essentially of no utility if it is priced beyond reach. This class aims to broaden students' consideration of different views of patents in the context of exploring a growing web of international agreements that require nations to adopt specific types of patent laws that have implications for the cost of drugs. No prior knowledge of patents or international law is required, although students will learn some aspects of each by the conclusion of the course. Student grades will be based on class participation, as well as a final project and presentation; there will be no final exam.

This course is designed to give you an important skill set: preparing for and negotiating on behalf of a client in a mediation setting. Unlike a trial, arbitration or appellate setting, where the people listening to you are neutral, in a mediation you are dealing with the decision makers on the other side, people who often behave in a hostile manner towards you and your client. Through practice you can acquire skills that will make you an effective advocate in a mediation setting, including learning to communicate information to the other side in a way they can hear it, identifying the various needs and interests of the parties (as opposed to just the positions), and approaching a dispute as an opportunity to solve a problem creatively. We will touch on the decision science (neuroscience, psychology, and behavioral economics) and cultural competency tools that can make you more effective, and also explore Online Dispute Resolution (ODR), which is quickly emerging as a way to resolve disputes using AI in combination with human mediators.

**Federal Litigation Practice**

A significant portion of federal litigation occurs prior to the filing of a dispositive motion or a trial. This course will explore complex areas of federal litigation that are likely to result in a hearing before a federal judge. Each week, during the first part of the class, the students will explore a different area of substantive law involving frequently litigated topics in federal court such as attorney/client privilege, review of electronic evidence, use and scope of protective orders, and motions to compel. The second half of each class will involve the "litigants" presenting their arguments to the Court based on fact scenarios given to the litigants the prior week. The course is taught by federal judge, Hon. Virginia M. Kendall, and will take place in her courtroom in the Dirksen Federal Building.

**Professional Identity Formation**

Loyola's mission is to educate diverse, talented students to be responsible leaders in a rapidly changing, interdependent world, to prepare graduates who will be ethical advocates for justice and the rule of law, and to contribute to a deeper understanding of law and legal institutions through a commitment to research, scholarship and public service. The Professional Identity Formation course seeks to advance the mission of the law school by fulfilling two of the main education goals as Loyola Law: advancing the Jesuit tradition of social justice and ethics and law; and to prepare students to be accomplished and ethical leaders in the legal profession and the larger community. The individual development of a professional identity is critical to meeting these goals. This required 1 credit, 5 week first year course seeks to assist students in the recognition and elimination of personal bias and building awareness of how diversity and inclusion of others whose world view is different from one's own is critical to professional development and success in the

An estimated 12 million people live and work in the United States illegally, according to many news accounts. As the immigration debate rages, the focus is on both the immigrant workers and the employers who supply the jobs. It has been illegal to employ unauthorized immigrants in the U.S. since 1986. The Immigration Form & Control Act (IRCA) requires all employers to verify employment eligibility through the I-9 form, but the government has not been consistent enforcing immigration laws in the workplace. Moreover, many states and municipalities have taken on the issue and have passed their own immigration laws. The Immigration and Customs Enforcement (ICE) agency is responsible for ensuring that employers comply with the law and has issued new priorities in workplace enforcement. **Mediation Seminar**

Mediation is a dispute resolution process that enables parties to negotiate their own settlement with the assistance of an impartial third party neutral (the mediator), instead of having a judge decide the outcome for them. As it has become increasingly institutionalized within the legal system, it is important that lawyers be familiar with its benefits, as well as with how it works.

This course will offer an overview of mediation theory, techniques, applications, and history. Through simulations and other in-class exercises, students will consider how mediation differs from other types of dispute resolution processes, how mediation styles differ from one another, in what different contexts mediation is used (including commercial, divorce, community, and employment conflicts), and what the role of the attorney-advocate is during mediation.

**Business Legislation Practicum**

Each student enrolled will choose a current project of the Institute of Illinois Business Law and work with the members of that project sub-committee. The Institute has been located at Chicago-Kent for the past four years, under the Directorship of Prof. Philip Hablutzel. Over the past 30 years, the Institute and its predecessor has written all the major business statutes in Illinois. Each year, the Institute has six to eight law reform projects in various states of drafting or submission to the Illinois General Assembly. One or more students will work with a project sub-committee and do legal research and other assistance. The time commitment is four hours per week. Supervision will be by Prof. Hablutzel and the project chair.

Prerequisite: Business Organizations completed or taken concurrently; and permission of instructor. Students will be required to perform four hours of fieldwork each week.

**Canon Law Seminar**

Canon law plays a central role in determining how the Catholic Church handles the broad spectrum of issues involved in the daily management of a worldwide multinational organization that includes dioceses, parishes, colleges, universities, grade schools, high schools, hospitals, nursing homes and other charitable entities. Examples of these issues involve personnel and real estate matters, rights and duties of the Christian faithful, professional misconduct, foreign religious workers, the administration of ecclesiastical goods, mergers and joint ventures, and, of course, marriage and family law, especially divorces and annulments. This Canon Law Seminar should be of particular interest for students interested in the management of Catholic institutions. This course will be conducted as a seminar in which students will be invited to write a research paper and make a classroom presentation on some issue of canon law.

This seminar will explore the difficult legal, political and practical issues currently confronting American education. The course will begin with an analysis of the fundamental political and legal principles underlying the American public education system. Students will then be challenged to apply these principles to difficult areas of education law, such as: (1) the adequacy and equity of school funding; (2) the nature of a constitutional right to education; (3) the relationship between public education and religious institutions and practices; (4) legal issues relating to curriculum; (5) equal educational rights, including issues of desegregation and affirmative action; (6) the constitutional rights of students; (7) special education; and (8) the rights and responsibilities of educators. Students will be required to participate actively in class, to facilitate class discussion of a selected topic, and to submit a paper which analyzes critically an important issue raised in the class. There will be no final examination.

Securitization is a form of highly sophisticated business transaction in which a company seeking financing gathers together pools of its financial assets, such as auto loans, deposits them in a bankruptcy remote subsidiary and causes the subsidiary to issue securities or borrow loans that are backed by the pool of financial assets. Well-known types of securitizations include mortgage-backed securities and collateralized debt obligations. Although these types of transactions received a great deal of scrutiny during and after the financial crisis, securitization also includes other forms of asset-backed securities that are an essential component of modern financial markets.

As this course will demonstrate, a successful securitization integrates a bunch of different bodies of commercial law, including securities law, bankruptcy law, secured transactions, corporation law, tax, and

Art Law and Transactions is a study of the main legal issues involved in the acquisition, ownership and disposition of works of art. The primary perspective is that of an attorney in the representation of an art collector, and how the transactional arc involves regular concerns, such as contract law, as well as art specific concerns, such as Nazi-era looted art. Part I Acquisition begins with a focus on the legal issues raised by the various venues for art purchases (art commissions, through a dealer, at auction) and follows with the two core issues of authenticity and good title. Part II Ownership concerns three topics that could arise during the ownership phase: crossing borders, moral rights and art loans. Part III Disposition completes the transactional loop with a discussion of how one transfers works of art during life or at death, whether by sale or gratuitous transfers, including valuation concerns. The course will include several drafting exercises (some of which will be done in teams) and a one-hour in-class final.

**Federal Tax Clinic I**

The purpose of the Federal Tax Clinic is to educate the student in the practice and procedures of federal tax law and dispute resolution before the Internal Revenue Service (IRS) and the United States Tax Court. The tax clinic is neither exclusively a "skills center" nor a "theory center." Instead, all the numerous components of tax law practice are integrated in the curriculum of both classroom study and legal practice with actual clients. Some of the subjects include client interviewing and counseling, negotiations, and tax litigation. Students handle cases at the IRS and Tax Court level on a clinical basis and, with the clinic attorneys, prepare all appropriate written responses to the IRS, prepare Tax Court petitions, and litigate tax cases. Federal Income Tax is a prerequisite.

This course focuses on the attorney's ability to understand the differences in the practice of mediation and the more recent development of the Collaborative law process and understand the application of each. Students will learn through didactic as well as skill-centered methods, giving each the opportunity to practice skills through role play and "fishbowl" exercises. We will cover the basics of mediation and Collaborative practice while emphasizing useful derivative skills that will serve students well in their future law careers. A client-centered approach, the primary goal of this class is to expose students to effective communication methods and skills that lead to settlement without litigation. Guest lecturers will bring their specific areas of expertise to the class so that students will be able to see first-hand the application of the processes we will be studying and be able better to emulate them. The final grade will awarded based partly

**The Art of the Presentation**

Lawyers are always giving presentations, both formally and informally. From interviewing to meeting with senior attorneys to engaging with clients to advocating for one's client in court, it's essential for a new lawyer to know how to speak confidently and persuasively. Students will learn how to become positive, clear, and articulate speakers and presenters. Topics include: how to create excellent formal presentation's summarizing one's work, how to engage others in the networking and interviewing processes, how to handle difficult conversations in the workplace, how to understand one's role and add value during formal and informal meetings, and how to be eloquent and efficient while conveying information to attorneys, clients, and the court.

**Federal Courts**

This course builds on the knowledge gained in constitutional law and civil procedure. One of the most important features of our constitutional system is the general division of governmental authority between state and national governments, and nowhere is that division of authority more important to practicing lawyers than in the allocation of judicial power between the state and federal courts. The former are, of course, courts of general jurisdiction, while the latter are courts of limited jurisdiction. The overall design of the course seeks to assist students in thinking about this allocation of power, not as a merely theoretical matter, but as one of real practical consequence in connection with a client's substantive goals and how best to serve them. Litigants typically want access to the federal courts for very specific (and often very important) reasons: to obtain remedies for violations of federal constitutional and statutory law, or, in some cases, to secure a forum that they believe will be more hospitable to their claims. Seen in this

Each year, students are selected to travel to London for about two weeks between semesters. In London, students engage in a number of activities focusing on the British legal professions, the system of advocacy in the U.K., and legal history. For students who hope to be selected for the program, completion of Evidence is recommended. Applications for the program are due each April and the program faculty selects the participants for the following year. There are always far more applicants to the program than available space.

This course is the second credit of a two-credit ungraded program. To prepare for the visit to London, students are required to take ¿Introduction to the English Legal Profession¿ (1 credit) during the fall semester prior to the trip. Participants are then required to register for this course in the spring

Construction law draws upon many areas of law from contracts to torts to insurance and land use. This course allows students to understand how they interact and work together. It will focus on the legal issues common to the construction industry from transaction considerations to litigation. We will examine the parties involved in a construction project, project delivery systems, negotiation of contracts, scheduling and delays, insurance and bonding considerations, mechanics liens, defects, claims procedures, remedies, warranties, and termination. Students will gain practical experience in drafting construction contracts as well as writing complaints for a construction dispute. Readings will include state and federal cases and statutes, with a focus on Illinois law. In addition, this course will look at current construction projects and disputes going on in Chicago.

**Media Law**

This course will teach students the fundamentals of traditional media law with a particular focus on the intersection between injury law and constitutional speech and press protections. This area of study poses intriguing questions about the American balance between the rights of individuals to protect their reputation and privacy and the rights of those who speak via media ¿ whether traditional mainstream news reporters or citizens using social media platforms such as Facebook or Google Glass. In the words of former New Republic counsel Scott Gant, ¿we're all journalists now.¿ As a result, it is almost inevitable that even lawyers whose practice does not focus on media will confront questions about rights and liabilities arising from client speech. In addition to discussing defamation and privacy doctrine, we will cover statutory regimes that apply to public speech, such as the privilege to protect sources and rights of access to government institutions and documents, and consider whether and how those statutes apply to both old and new media

**LAW 528(2)** Course ID:012457 22-AUG-2012**Contract Drafting**

This course will teach the fundamentals of drafting precise and clear contracts. Drafting concepts will be taught through assigned readings, lectures, in-class exercises, hands-on drafting in pairs and alone, and review of, and comments to, an individual's work and the work of others. The majority of the semester will be devoted to drafting without the use of forms or precedent documents. For the first several weeks of class, students will draft the components of a contract, each component being either peer-reviewed or reviewed by the instructor. The components will be revised according to the comments received and integrated into a complete contract. The individual drafting will be supported by independent in-class exercises and review of the assigned reading and relevant cases. The final project will simulate a real-world drafting experience in which students will receive precedent documents, term sheets, emails, relevant statutes, and due diligence and will be required to prepare the first draft of the operative document for a transaction.

Discussions will focus on topics such as what organizations expect from law students, how to more effectively handle assignments, what resources are available to help with research and drafting, and how to better deal with, and possibly avoid, some of the pitfalls associated with public interest practice. Emphasis will be placed on professionalism, identifying certain basic institutional do's and don'ts.

Law student attendees will receive instruction in how to navigate and use Illinois Legal Aid Online, an extraordinary research tool for the legal aid community. They will also have the opportunity to participate

A practical skills course on 4th Amendment/Search & Seizure law as it applies in Illinois, and how the most common issues are litigated in criminal cases. The class explores applicable Illinois statutes, Illinois Supreme Court rules, and federal and state case law that sets forth the prevailing legal basis for individuals' rights against unreasonable search and seizure. Taught by a Cook County Assistant State's Attorney and with question and answer sessions with a defense attorney and law enforcement; the course takes a balanced look at both the prosecution and defense approaches to Motions to Quash and Suppress, the bread and butter of pretrial litigation and the chief avenue for deciding 4th Amendment issues. After learning the legal basics, students will be tested on their ability to identify and analyze Search & Seizure issues in various scenarios and argue for or against 4th Amendment violations, as well as, practice some basic motion writing and oral arguments.

**Electronic Discovery and Problem Solving**

Electronic discovery ("e-discovery") is the practice of working with digital evidence during legal proceedings. It is at the intersection of law and such information technology disciplines as computer forensics, information governance, data analytics, machine and rule based learning, and artificial intelligence (and so that we do not scare anyone away, we expect that most students will have little experience with these concepts).

Proficiency in e-discovery has become a must-have skill set for litigators. The Federal Rules of Civil Procedure and Evidence have already been modified multiple times in the last few years to try to address e-discovery concerns, and additional changes are under review by the drafters. The states have followed suit with their own rules. A burgeoning body of case law comes down each year, attempting to define the legal and

Students in this practicum will administer a skills component of the traditional Family Law foundational course, focusing specifically on the drafting of an antenuptial agreement in a complex case hypothetical. Practicum students will serve as clients in the drafting exercise. In this capacity, students will meet face-to-face with the collective group of student attorneys representing each client and engage in ongoing, timely and detailed electronic communication with student attorney teams throughout the course of the skills exercise. Practicum students will also assist in evaluating the client counseling facet of the exercise, and in reviewing each prenup for its substantive terms. Each practicum student will spend approximately 40 hours engaged in work related to the exercise. Students may enroll in this practicum only with permission from the instructor.

This course aims to help law students become effective problem solvers through development of their knowledge and skills in negotiation, mediation, and arbitration as applied to a range of legal disputes. Students will learn to assist clients in identifying their goals and searching for creative solutions that produce efficient, expansive and effective outcomes. Students will learn about negotiation, mediation, and arbitration through lectures, but primarily through case simulations followed by critical feedback. Class attendance is critical.

Class focus will be on the mediation and collaborative legal forums of Alternative Dispute Resolution, with an emphasis on learning procedural aspects of mediation and arbitration, and the collaborative skills of negotiation. This course will provide students with the opportunity to gain practical knowledge and familiarity with the different methods of alternatives to litigation. Classes will include lectures,

**Design Thinking and Early Childhood Education**

This unique law school class will immerse students in the principles of design thinking and apply them to issues involving the law, policy, and pedagogy of early childhood education. Design thinking is a human centered approach to solving complex problems that includes empathy, ideation, prototyping, testing, and iteration.

In presenting the material, we hope to model best educational practices used in a variety of educational environments, particularly the social construction of knowledge through meaningful relationships. Accordingly, students are required to participate actively in collaborative design thinking activities such as empathy mapping and building prototypes, as well as role-playing, multiple means of expression, and documentation of learning. Students also are required to complete an impactful paper of publishable quality

People use the expression "trial and error" in reference to a continual experiment yielding both positive and negative results. Yet, it is all but forgotten that the federal courts developed in precisely this manner at the hands of many successive (and sometimes shortsighted) Congresses. Since 1789, Congress has tinkered with every conceivable detail pertaining to the Third Branch, from the important (such as defining federal jurisdiction) to the trivial (such as micromanaging times for holding court). Some of these efforts were short-lived, while others have persisted since the first Judiciary Act of 1789 and today constitute cornerstones of the modern federal judiciary. With that pedigree in mind, this course will examine certain aspects of the evolution of the federal courts from 1789 to the present, with particular emphasis on the structure and function of current, abolished and reconstituted Article III (i.e., constitutional) courts, federal judicial legislation, the federal judiciary, specialized Article III courts, the advent of Article I

Some of the most common complaints about lawyers stem from a single fundamental truth: we are trained to talk, but we are not trained to listen. Clients tell us frankly that we "have poor listening skills," and further that we "don't genuinely care about them or their case," that we "think we know everything" and "nitpick every word they say." [1] Other client frustrations, such as "not communicating clearly," "not keeping [them] informed," and "kill[ing deals]" [2] are superficially unrelated to our listening skills, but at bottom reflect a failure to appreciate the client's point of view. In short, all lawyers need to know how to elicit and contextualize information from those they represent in order to represent them well. While interviewing is crucial to client relationships, its value does not end there. Young attorneys juggle many audiences in a day. These include assigning partners or department supervisors and those encountered in the course of doing the legwork that is a beginner's bread and butter: opposing counsel and their staff, or

In this digital, global age, how does modern banking and finance work so that payments can be made, funds transferred, and money borrowed? What is the law governing your credit or debit card, phone "apps" for point-of-sale payments, ATM machines, direct deposits into your bank account, promissory notes and checks, wire transfers, letters of credit, and more methods for moving funds? Modern payment systems exist within an evolving scheme of banking and finance. They depend on networks of laws, regulations, customs, and agreements that balance the speed of transferring funds domestically and internationally against the risks of error and fraud. As such, they pose provocative questions of consumer protection and national security. They have adapted older methods of banking and payment to the computer revolution. But, they have gone beyond traditional practices to create new ways for funds to be moved locally, nationally, and around the world. This class allows you to master the law governing these and older systems to effectively advise clients. It

**Legal Issues in Student Discipline**

The legal issues surrounding student discipline in public elementary and secondary schools involve the intersection of Constitutional and statutory law with the administrative hearing process. By developing a working knowledge of the school disciplinary process, course participants will build analytical and substantive skills applicable to a wide variety of practice areas.

The course will address the Constitutional implications of student discipline and the statutory provisions governing student discipline and the administrative hearing process. Students will learn about `zero tolerance; policies, the role that school discipline plays in the `school-to-prison pipeline,; and the discriminatory impact of school discipline policies. Issues relating to discipline in charter schools and discipline of students with disabilities will also be addressed. Other topics to be discussed include

**Externship Long Distance**

Students who have completed their first year of law school may receive two or three hours of credit per semester for supervised work done in chambers under the supervision of a member of the judiciary and his or her clerks. The externship course includes a classroom component which has been designed to compliment and support the field placement. The course is taught on Tuesday, Wednesday and Thursday evenings from 5:00pm - 6:00pm. Students may elect the day of the week they wish to attend the class at the time they apply for the externship. Applications are available on the law school website and in the offices of the Director of Experiential Learning.

**Community LawCtr Clinic I**  
The Community Law Center Clinic (LUCLC) course is designed to teach students the essential skills involved in the practice of law, including client interviewing and counseling, hearing advocacy, negotiation and practice management. These skills are taught in conjunction with the representation by students of clients in civil cases under the supervision of Professor Theresa Ceko and the law school's clinical faculty. The Law Center is located in Room 1005 of the law school.  
Students who enroll in the clinic course must be available to be in the clinic either one morning or one afternoon each week (Monday-Friday). The course also has a classroom component that meets each Wednesday from noon to 2 p.m. The purpose of the classroom component is to provide students with a theoretical overview of the lawyering skills that they perform at the clinic. In addition to regular clinic hours and classroom work, clinic students work on their cases during an additional 6 hours a week, most of this work done on the

Students in the LUCLC represent children in contested guardianship cases and clients in civil cases involving landlord/tenant, family and elder law problems. Many of LUCLC's clients are low income persons. Serving persons who cannot afford legal services sensitizes students to the special ways that the law affects the lives of the indigent.  
  
Another important aspect of the LUCLC course is the opportunity for students to develop their own sense of the lawyer's professional role. Students experience the complexity of the attorney-client relationship and the myriad ethical dimensions of lawyering. Students are exposed for the first time to the conflicts, frustrations and rewards inherent in legal practice.

This course examines the legal relationships among children, families, and the state. Areas of law to be examined include child welfare, education, and juvenile justice. The course will explore Supreme Court jurisprudence on the issue of parental rights and family privacy as well as the doctrine of children's rights. Attention will be paid to the role of race, gender, and class and their intersection in shaping the ways in which children and families interface with governmental systems. Students in the course will be asked to grapple with critiques of governmental systems impacting children and families, explore calls to reconstruct and reconstitute these systems, and examine the role of lawyers working from within and outside these systems.

<b>Interdisciplinary Seminar on Domestic Violence</b>			
This seminar explores issues of family violence, with an emphasis on domestic violence, through an interdisciplinary lens. An overview of the laws, public policy, and psychosocial approaches and trends addressing family violence issues. The course seeks to provide an opportunity for students in different disciplines to learn about the theories, philosophies, ethics, and practices of the range of professions that must confront family violence issues, and the impact of decision making in one forum on the practices and decisions made in another forum. Student are challenged to consider the strengths and weakness of the responses of various disciplines, and their interaction. Students that are interested in a live-client experience working at the Domestic Violence Legal Clinic should enroll in the Domestic Violence Practicum (LAW 215) class instead of this seminar.

In this course, we will explore legal and policy questions centered on how society should respond to children, adolescents and youth adults who commit crimes. To what degree should developmental differences between youth and adults be reflected in law and policy? Are legislators or individual judges in the best position to decide how to meet the needs of youthful offenders while at the same time protecting the interests of victims and the larger community? What responsibility do parents and communities bear in providing children and opportunity to change their behavior? How should the justice system interact with other systems, including education, mental health and child welfare?

In the last decade, children have become "the newest kids on the human rights block." This seminar examines new laws and treaties developed to respond to age-old problems faced by children around the world. The course begins with a study of the U.N. Convention on the Rights of the Child, the most rapidly and widely accepted human rights document in the history of international law. It then examines ways in which these laws are being implemented, including a review of child and family law cases decided by the European Court of Human Rights in Strasbourg. The course explores such substantive areas as the comparative treatment of child abuse and delinquency, and the issues of child labor, international abduction, the plight of child soldiers, and the sexual exploitation of children.

Mediation is an alternative to litigation which enables disputing parties to negotiate their own agreed settlement. It involves an impartial third party neutral, the mediator, who assists disputing parties in this alternative dispute resolution (ADR) process. This course will offer an overview of mediation techniques, applications, and history. Through simulations and other in-class exercises, students will consider how mediation differs from other types of ADR processes, how mediation styles and models differ from one another, and how the role of the attorney-advocate changes during mediation. This course will be conducted in an intensive workshop format over the course of one weekend where students will role play as client and attorney. This mediation course allows students to mediate family cases through several community projects. Students are required to have participated in some type of 40-hour mediation training in order to register for this course. These students receive additional training in family mediation, co-mediation and related issues. Students mediate in family group conferences and other multiple party mediations. Students participate in multiple simulation and mediations and receive feedback on their skills. The course meets once a week for the two hours for most of the semester, however students are also required to mediate at other times during the semester. There is no examination. Grading is based on participation in mediations, simulations and discussions and self-evaluations. Students may take the course for 1 or 2 credits. For 2 credits, a paper on mediation theory or practice is required. Where the student is taking the course for 2 credits, the research paper is included in the grade. Enrollment is limited to eight students.

 Current Issues in Children's Law Seminar

This interdisciplinary seminar is designed to give students an opportunity to engage in an in-depth exploration of current and emerging issues in children's law. The seminar will focus on the legal implications of current child welfare policy and practice, ongoing efforts at child welfare and juvenile justice reform through state and federal initiatives, the use of empirical research in guiding child welfare and juvenile justice initiatives, and long term implications for families and children. Specific topics include, among others, an introduction to the concept of therapeutic jurisprudence, advocacy for children in the child welfare and juvenile justice systems, the role of race and class in permanency planning for children, the legal and ethical implications of privatized child welfare services, and ancillary domestic relations issues that often arise within child welfare.

**Introduction to the Study of Law and Legal Systems**

This required foundational course introduces students to the sources and functions of law in our society.

The course begins with an explanation of the structure and traditions of the American court system. Students then learn to read and analyze cases and statutes and develop basic legal written and oral presentation skills. The course uses child and family law cases and problems and provides students with the background they will need for future children's law and policy studies.

**Introduction to Children's Law , Policy and Practice**

Prerequisite: Introduction to the Study of Law and Legal Systems

This required course is designed to give students an introductory overview of the law as it affects children.

It begins with a discussion of the constitutional relationship among children, parents and the state, as well as the respective roles of the federal and state governments in the regulation of children and families.

The course then introduces students to the principal areas of civil and criminal law that affect children and families. With this baseline of understanding, students can choose elective courses that provide a more in-depth study of a particular topic (e.g. education law, child welfare, etc.)

Mental health and substance abuse impacts everyone. According to the National Institute of Mental Health, in a given year approximately one quarter of adults in the United States are diagnosable for one or more mental illnesses. Additionally, one out of five children, either currently or at some point during their life, are diagnosed with a mental illness. Mental illness has a profound impact on children and families, including the legal response to these issues. Students will study the cases, statutes, and legal doctrines relating to the rights and inpatient/outpatient treatment of persons with mental illness or a developmental disability, with a special emphasis on children, youth, and parents and/or legal guardians. Topics covered include: informed consent to outpatient and inpatient treatment, admission/transfer/discharge, confidentiality of mental health records, litigation issues addressed by practitioners, and risk management strategies for mental health practitioners. The purpose of this course is to teach interested students the application of law to critical public health issues that affect children and youth. Students will first learn basic principles of public health including the distinction between health promotion, disease prevention, and health protection. Next, the course will address the constitutional and statutory foundation of public health law, how legislative and regulatory decisions must negotiate the balance between individual rights and public good, and how the principles of parens patriae and state police powers affect child health. Cases studies in the areas of obesity, reproductive health rights of minors, mandatory school immunizations, student drug testing, and violence prevention will illustrate the application of public health jurisprudence from the national to the state levels.

The student will be engaged in research and in initiating the development of a curriculum targeted to a teen audience that educates teens about local and federal laws that have an impact on their lives as adolescents, including juvenile justice issues, mental health laws, custody issues, drinking and driving. The student has been working with adolescents on psychological issues as part of her field placement for the Masters of Social Work degree. This course will allow her to broaden that focus to include legal considerations that play an important role in helping teens who will soon be emancipated and facing lives as adults.

The first part of the course will require the student to identify the specific issues and laws that will be included in the curriculum and to explore resources, both in law journals and in interviews with teaching faculty, that will inform her presentation of the issues. The second part of the course will be devoted to developing the format for the curriculum that will be most effective in reaching this media savvy audience.

**System Consultation in School Discipline Reform**

The purpose of this course is to integrate and apply two interrelated broad literature bases within the field of education: (1) system change and data analysis literature informing best practices in analyzing system school data and needs assessment findings and using the findings to plan for system level discipline change; and (2) best practices in the school leadership and teaming to effect system level reform in school discipline. The focus of the course will be on the systems change process as it relates to the issue of school discipline. Through the course, students will gain skills and experience reviewing and analyzing school and district-level data, and they will develop and administer a needs assessment tool relating to school discipline and multi-tiered systems of support in their respective settings. They will also analyze system level variables, which have historically prevented true discipline reform (e.g., unreliable data collection systems, poorly structured teaming, access to systematic and ongoing professional development and

**Restorative Justice**

This course begins with an intensive in-person weekend retreat where students will build relationships with each other and, through experiential exercises and lively discussion, internalize core principles. Throughout the retreat and course, students compare and contrast restorative and retributive justice models, practice proactive and responsive restorative techniques, and identify personal and professional shifts to exemplify a restorative mindset. Specific restorative techniques which students will learn include restorative language, facilitation of a variety of types of circles, restorative dialogue processes, and systems and structures to accommodate restorative practice within school life. Through additional seminars, students will strengthen their knowledge of the history, theory, research, and practice of restorative justice. The culminating focus of the course invites students to apply restorative principles and practices in their own school or district setting.

**School Discipline Reform: Linking Law, Policy and Practice**

This course will serve as the capstone for the certificate. It will examine in-depth three to four major themes in the field of school discipline from the perspectives of law, policy and practice. The focus will be on analyzing "best practice" examples as a means to address the challenges relating to fundamental reform of school discipline practices. Potential themes to be addressed include: (1) racial inequities in school discipline; (2) the interlinkages between special education and school discipline; (3) the relationship between the school and the juvenile/criminal justice system; and (4) professional development to support teachers and other school stakeholders. As part of this course, participants will develop an action plan for school discipline reform in their respective settings. They will determine how potential system-wide barriers will be addressed (e.g., resources for teaming, support for MTSS planning, implementation and evaluation, teaming, leadership/administrative support, teacher buy-in and support, community engagement).

**LAW 732(1)** Course ID:004791 18-FEB-2014**Health Care Fraud and Abuse**

This course will examine the three major Federal laws governing healthcare fraud and abuse: the Stark law, the Anti-Kickback Statute, and the False Claims laws. Students will learn how to navigate through the complex maze of statutes and regulations. In addition, the public policy concerns which underlie each law will be discussed in great detail throughout the semester. The goal of the course is to equip the future lawyer with the tools necessary to properly identify healthcare fraud and abuse issues, and to effectively advise their clients on these issues.

**Health Justice Project**

The Health Justice Project is a medical-legal partnership clinic that provides law students with an intensive, challenging education in the fundamentals of legal practice, interdisciplinary collaboration, creative upstream problem solving, poverty law, systemic advocacy, and professionalism. Through collaborative and holistic representation of vulnerable low-income families and individuals, student attorneys will address the social, legal and systemic barriers that prevent long-term health and stability. HJP student attorneys may handle cases in a variety of areas of law including public benefits, access to health care, disability, education, housing, family law, as well as other areas of law that impact client health and well-being. Enrollment in the Clinic requires a significant time commitment and flexibility in the student's schedule. Students are required to manage their own cases in teams of two, maintain client relationships, attend hearings and court appearances, collaborate with interdisciplinary partners, and tend

This course is designed to expose law students to key legal concepts in the health care corporate compliance and ethics fields, which may be broadly defined as the application of internal corporate initiatives to ensure compliance with applicable federal and state laws and regulations. Health care is a highly regulated industry, and a health care attorney must have a broad understanding of compliance issues. Through readings and class discussion on common health law topics such as the Anti-kickback Statute, the Stark law, the False Claims Act and its whistleblower provisions, students will develop an understanding of the need for and the role of the Compliance Officer in a health care institution. Students also will begin to explore recent movement toward more broadly-based organizational integrity and ethics programs. Underlying course themes will include how to structure an effective compliance program and the role of government enforcement in controlling health care costs.

This a unique course offered once a year to a select group of students from Loyola and DePaul. Enrolled students read and discuss draft articles of nationally renowned professors in the field of health law. They must also write a three page memo (double spaced) with comments on the article that will be useful to the professor. The articles are typically draft law review articles. The discussions are focused on helping the professors to refine and improve their articles, such that a strong foundation of health law is expected, even though there is no official pre-requisite. This course meets every week, but the students only meet in person roughly half the time, with the other half of the sessions done by videoconference. Three of the in-person classes will be at DePaul and the other three in-person classes will be a Loyola. Please be sure that your schedule allows you to arrive at either law school by 4 p.m. There is no final exam or research project required for this class. The Business Law Clinic (the "BLC") is a live client transactional legal clinic that represents for profit and not for profit businesses in the Chicagoland area. Student clinicians work with several BLC clients during the course of a semester. All work is overseen by BLC faculty. In addition to client work, the BLC includes a weekly seminar (Wednesday from 3:00 to 4:50 p.m.), which covers relevant substantive law, ethical issues and pragmatic lawyering skills, such as drafting, negotiating and client counseling. The work in the BLC is completely transactional in nature. The BLC does not handle contested matters or complex tax. Participation in the BLC requires a significant time commitment (a minimum of 3 hours per week per credit hour, in addition to the seminar), and a degree of flexibility in the student's schedule. All student clinicians are expected to communicate with their clients regularly, meet with their clients as needed, efficiently and effectively perform the related transactional work, maintain their client's files in an

European Union Regulation 2016/679 was adopted by the European Parliament and European Council in 2016 and has world-wide privacy law implications, not merely for activities inside the European Union. The law seeks to protect natural persons when their personal data is used by any regulated entity doing business in the EU. The law also requires regulated entities to have organized compliance efforts on a global scale. The course will examine: (a) the history of privacy law in the EU, (b) the response of the EU member states to past EU privacy directives and the current law, (c) the current EU privacy law's impact on business and data storage around the world, (d) the compliance organizational structures needed to respond to the law, and (e) liability associated with non-compliance. No background on EU law is needed; the course will begin with teaching the basic legal and constitutional structure of the European Union in order to situate the course privacy law material.

Although the course will draw primarily from the experiences in the United States and Europe, we will discuss and compare many jurisdictions around the world and the challenge of applying multiple merger laws to the same merger. We will start by distinguishing mergers from other types of business conduct which implicate antitrust and competition laws and address the question of why mergers are treated differently. The course will then address basic principles used in the substantive review of mergers. We will start by identifying the economic rationale supporting the prohibition of mergers and the basic economic theories used to distinguish permissible mergers from impermissible mergers. We will then ask whether these theories apply across jurisdictions. We also will devote several sessions to the procedural context of merger review. We will discuss the basic

**Health Law Seminar Series**

This course exposes students to seven unique and emerging issues impacting the health care industry. Each issue has the potential to impact providers, health care organizations, health care attorneys, and consumers. Each emerging issue is selected based on its likely impact on the industry and its timeliness, given current political and health care challenges. This course is structured over 14 weeks, in which we alternate between reading weeks, where students are given reading material to introduce them to each issue, and synchronous classroom lectures by national experts on each subject. At the end of the course, each student is asked to write a reflective paper on one of the issues presented and describe the impact that they believe it will have on their practice or the delivery of health care in general. This course is graded pass/fail. THIS CLASS IS ONLY AVAILABLE ONLINE AND WITH PERMISSION.

This course will develop the students' knowledge and skills required to provide advice and assistance in a country with a culture and a legal tradition different from the culture and legal system in which they received their education. The course will examine and compare the main elements of particular relevance to rule of law assistance work in major world legal traditions: common law, civil law, Islamic law, customary law and mixed legal traditions. It will also explore how the force of their normativity is effectively applied and how institutional frameworks deal with overlaps. Finally, the course will encourage students to consider the ethical dimension of cross-systems rule of law advising.

This course provides an overview of the main intellectual foundations supporting the view that law and development are linked. While this connection may appear obvious, the course seeks to show that the relationship may not be as straightforward as first impressions might lead one to believe. Indeed, proponents of the presumed relation between law and development must confront two important distinctions well known to social scientists: causation versus correlation. Evidence that societies, which have achieved high levels of development, typically have good legal systems is incontrovertible. What is less clear is how they got where they are and in what sequence. Put differently, do good laws and institutions generate good development outcomes or does development lead to good laws and institutions? The course applies interdisciplinary and comparative research in history, economics, sociology, political science, regulatory theory, and philosophy to questions of law and the development of legal institutions and does not assume any prior knowledge in any

This course will provide students with the knowledge and skills required to undertake assessments, the crucial lynchpin which supports the design of specific policies, legal and regulatory reforms and administrative actions. The course demonstrates how developing a clear understanding of problems facing a society is fundamental to good governance and the rule of law. The course assumes that such understanding can be facilitated through professionally prepared assessments which identify the root causes of problems facing a country in a given area and put forward options for remedial action. Students will learn how to use the rich body of documented experience and guidance available on structuring and preparing assessments by learning how to plan and carry out assessments linked, for instance, to justice sector reform, access to justice, the improvement of the legal framework for investment and sustainable business and the control of human trafficking.

**PLAW 104(3) Course ID:012073 16-MAR-2020****International Development Architecture**

This course covers the rule of law and governance dimensions to international development assistance. It examines both the institutional frameworks and legal mechanisms by which international development assistance is distributed for rule of law and state-building activities and the legal and regulatory structures that apply to development assistance. The course begins by considering the reasons that donors provide aid generally and for rule of law, followed by the examination of the normative frameworks and standards that shape the manner in which aid is distributed, institutions and actors, mechanisms by which aid is programmed and actual use of aid by recipients. The overall approach begins at the global level and follows the chain of development aid through its various elements down to the national level. A key theme of the course is that the approach to international development assistance is broadening. Historically, financing for development was understood primarily in terms of public sector resources. As a result of a confluence of factors,

**Rule of Law Project Management, Monitoring & Evaluation**

This course will analyze the main principles, tasks and tools commonly used to manage a rule of law project, particularly in comparison to other types of project management. Topics will include the control of the timing of various steps in implementation (start up, work planning, activities, monitoring and evaluation, reporting, and close out), human resource management, stakeholder management, procurement, inventory, and budgeting. The course will also address common challenges including managing a project with weak design or insufficient budget, managing conflicts, dealing with emergencies and mid-course corrections, and the key requirements for successful project management: teamwork, accountability, leadership, substantive knowledge and skills, and cultural literacy. Students will have an opportunity to apply their knowledge and skills by working through a model project in teams and producing a sample deliverable on time, on budget, and according to specifications.

This course is designed to introduce key policy issues and processes in public policy development. The impact of health care policy on management and health system improvement is discussed. The student is provided with advanced policy knowledge, frameworks, and skills required to assume a leadership role in health care. Emphasis is placed on using evidence to develop an understanding of the effect of health care policy on practice.

Outcomes: 1. Identify key policy issues in contemporary health systems. 2. Analyze the effect of health policy on practice. 3. Analyze strategies for health system improvement through public policy. 4. Advocate for policy adoption to a health care decision maker. 5. Identify the effects of government regulation on education and practice.

**Fiscal Management in Health Care Organizations**

This course prepares the graduate student to develop a framework for understanding key issues in financial management in health care from two perspectives. First, the course explores the relationship between the national economic environment and the financial context for current models of health care delivery. Second the course introduces a variety of fiscal concepts and techniques as applied to nursing and healthcare administration. Emphasis is placed on the way cost data influences operational decision making in healthcare administrative practice.

Outcomes: Upon successful completion of the course, the student will: 1) Analyze the impact of political, social and economic factors on the cost of patient care delivery. 2) Examine cost behavior concepts as they relate to nursing and other health care models in healthcare organizations. 3) Apply cost accounting

**Comparative Effective Research in Healthcare**

Prerequisites: GNUR 450 or equivalent required. CMAN 439 and 440 recommended.

Comparative effective research (CER) is a central tenet of health care reform. This course offers an overview of policy implications and rationale for CER and explores different approaches of developing, analyzing and communicating CER. Research comparing the clinical and economic merits of different treatments, devices and procedures will be explored.

Outcomes: Apply political, social and ethical perspectives to uses of CER, Demonstrate effective retrieval of CER reviews from public sources, Demonstrate knowledge of major CER methods and tools, Evaluate quality of evidence from CER reports, Assess treatment options in defined patient population.

**Theories & Concepts for Advanced Clinical Practice**

This course focuses on the development and use of disciplinary knowledge as a foundation for advanced nursing practice. Basic philosophical assumptions and the history of knowledge development in nursing are presented. The relation between concepts, theory, research, and practice are emphasized, with a focus on concepts and middle-range theories that are applied in advanced nursing practice.

Upon successful completion of the course the student will be able to: 1. Understand the history and driving forces for knowledge development in nursing. 2. Describe the philosophical foundations of nursing and advanced nursing practice. 3. Understand the levels of theory development in nursing. 4. Explain the use of selected concepts and middle-range theories to guide advanced nursing practice. 5. Analyze concepts and theories for use in nursing practice. 6. Analyze the relation between theory, research, and nursing practice.

**Social Justice and Ethics in Health Care**

This course examines social justice, ethics, and nursing advocacy in healthcare at global, national, and local levels for the doctorally prepared nurse. Social justice and ethical issues in healthcare are analyzed using established theories and frameworks. Recommendations for resolution of social justice and ethical issues will be addressed.

## Outcomes:

Upon successful completion of this course the student will be able to: 1. Understand the historical, cultural, economic, and political theories and perspectives of social justice and ethics. 2. Analyze social justice and ethical issues at local, national, and global levels. 3. Apply professional codes to individual and interwoven issues of social justice, ethics and leadership, 4. **Psychiatric Mental Health Assessment Across the Lifespan**

This course focuses on the major principles and skills to conduct a psychiatric mental health assessment across the lifespan. Clinical interviewing skills, eliciting important information, and developing a therapeutic rapport with patients and families are foundational knowledge and skills. Students will learn components of the psychiatric evaluation, including psychiatric review of symptoms and mental status examination, and the development of differential diagnoses and diagnostic formulation. Integrating laboratory findings and medical history into the psychiatric evaluation and utilizing evidence-based clinical practice guidelines will be emphasized. This course will also incorporate theories and practice of diversity and inclusion as it relates to the biopsychosocial and cultural understanding of mental illness.

The emphasis is on the role of the advanced practice nurse.

Outcomes: Upon completion of this course the student will be able to:

- 1) Describe the structure of DNA and differentiate among the various forms of genetic inheritance.
- 2) Describe the cancer burden in United States and how the science of genetics will assist with cancer control.
- 3) Explain oncogenesis, and function of oncogenes and tumor suppressor genes.

**Psych Mental Health Adv Pract Nursing Practicum**

The practicum course guides the development and transition of students to the advanced practice psychiatric nurse practitioner role. Synthesizing knowledge and experience gained from previous courses, the practicum helps students advance their proficiency and skills in caring for patients with acute, chronic, and complex psychiatric mental health problems. With understanding of various psychiatric mental health settings and levels of care, students in the practicum experience will apply their knowledge and synthesis of content with patients, families, and communities across the lifespan. Emphasis will be on the assessment, diagnosis, treatment, and care coordination of psychiatric mental health disorders. Students are expected to progress throughout the clinical practicum from requiring assistance to becoming primarily independent within their population and specialty practice.

**Management of Complex Adult Health Problems**

This course is designed to prepare nurse practitioner students to assume responsibility for coordination and management of complex primary health care problems across the adult age spectrum. A major focus of the course is to prepare the student to assess and manage selected complex health problems of adults/older adults in primary care settings. Indications for collaboration, consultation, and/or referral to other health care providers are emphasized as an integral part of the nurse practitioner role. Evidence-based practice is discussed for evaluation and treatment of cardiovascular, peripheral vascular, respiratory, palliative care, neurological, musculoskeletal, hematologic, endocrine, infectious disease, and renal disease problems.

Prerequisite: Advanced Pathophysiology, Advanced Pharmacology and Advanced Health Assessment across the Lifespan.

**Components:** Lecture(Online)  
**Requirement Group:** Restricted to Graduate Nursing Students.

**Family-Focused Health Promotion and Disease Prevention**

This course emphasizes a family-focused approach to health promotion, disease prevention, and risk reduction from birth to end of life. Common issues impacting individual, family, population, community, and global health are explored. Strategies for health promotion and disease prevention are addressed with consideration for culture, social determinants of health, and social justice.

Prerequisite(s): GNUR 442 Advanced Physiology; GNUR 413: Advanced Pharmacology; and GNUR 425 Advanced Health Assessment

Outcomes: By the end of this course, advanced practice nursing students will:

**Research Internship**

This course provides an opportunity for the student to undergo a mentored experience in scientific inquiry. With the Course Director, students will identify a faculty mentor who has an active program of research and can provide an environment for a mentored experience in scientific investigation. The student and faculty mentor will mutually develop achievable objectives with measureable outcomes. This experience can encompass a broad range of research activities that span the scope of scientific investigation. Successful completion of the internship will provide the student with an experiential base of research, which will enhance their knowledge and skills in the conduct of research and facilitate their socialization into the multifaceted role of an investigator.

This course provides an opportunity for students to analyze ethical issues and personal, institutional/organizational, societal and global values and beliefs that have an impact on nursing practice, the nursing profession, and healthcare delivery. Students will clearly and carefully articulate their thinking and approach to moral reasoning about various contemporary issues and justify their responses. Presuppositions about clinical practice, education, administration, and their impact will be explored. The realities of the social context and the effects on moral/ethical practice will be discussed.

Outcomes: 1. Analyze the multi-faceted ethical problems in healthcare, nursing practice, education, research, administration and policy. 2. Articulate one's own approach to moral reasoning when responding to bioethical issues in nursing. 3. Identify presuppositions/assumptions underlying one's positions and the bases for

**Neurodevelopment and Trauma**

This course is an advanced concentration year practice elective focused on assessing the neurodevelopmental impact of trauma and selecting interventions consistent with this assessment. Students will learn to identify major regions of the brain, appreciate the sequential nature of brain development, and determine which areas of the brain have likely been affected by developmental trauma. Consistent with a neurosequential understanding of development, students will be taught to recognize which interventions involve specific brain regions in order to assist them in choosing those most likely to promote growth in areas of the brain impacted by trauma. This assessment and intervention process occurs within the frameworks of systems and attachment theories, which recognize that the relational environments and communities in which clients live must be adequately safe and supportive for any intervention to be effective. This course is a hybrid course, incorporating recorded material supplied by The Child Trauma Academy. By the end of the course, students
