PSYCHOLOGY (PSYC)

Discover, search, courses [link](https://catalog.luc.edu/course-search/)

PSYC 100 Psychological Perspectives on the Experience of Globalization (3 Credit Hours)
Globalization from a psychological perspective. Applying core psychological concepts, research and theory to cross-cultural issues of behavior and development. Topics may include human rights of children, human trafficking, immigration, moral issues of international trade, parenting across cultures.

**Knowledge Area:** Foundational Societal Knowledge

**Outcomes:**
Students will learn basic concepts and theories and apply them to real-world globalization problems

PSYC 101 General Psychology (3 Credit Hours)
Requirement: ANTH 100, PLSC 102, PSYC 100 or SOCL 101 for students admitted to Loyola University for Fall 2012 or later. No requirement for students admitted to Loyola prior to Fall 2012 or those with a declared major or minor in the Department of Anthropology, Department of Criminal Justice, Department of Economics, Department of Psychology, Department of Political Science, the Department of Sociology, Human Services or the School of Nursing. Introduction to concepts, theories, and methods in psychology. Emphasis is given to the scientific study of consciousness and human behavior. Topics include: human development, learning, thinking, perception, personality, testing, mental illness and mental health, biological and social aspects of behavior.

**Knowledge Area:** Tier 2 Societal Knowledge

**Interdisciplinary Option:** Human Services, Psychology of Crime and Justice

**Course equivalencies:** ACPSY 201 / PSYC 101

**Outcomes:**
Students will master basic concepts and key theories and learn to apply them to real-world situations

PSYC 201 Psychology Advising and Career Development (1 Credit Hour)

**Pre-requisites:** PSYC 101, PSYC-BS major Outcomes: Students will learn about career options in psychology and plan their psychology major to support and develop their career interests

Overview of the psychology major at Loyola and career options in psychology. Introduces students to psychology career development resources. Students will also prepare for opportunities in independent research and internships and plan for a career including creating a resume and CV.

PSYC 225 Psychology of Peace (3 Credit Hours)

Application of psychological theories, concepts, and research to issues of peace and conflict. Areas covered include international conflicts and international peacebuilding (including war, terrorism, and global environmental issues) as well as interpersonal conflicts and conflict resolution (including crime, family violence, and conflict arising from prejudice and perceived threat). Classic theories of peace are also analyzed and connected to psychological theory and research.

**Interdisciplinary Option:** Peace Studies

**Course equivalencies:** PSYC 225/PAX225

PSYC 235 Psychology of Human Sexuality (3 Credit Hours)

**Pre-requisites:** PSYC 101 Sexuality as an important aspect of human functioning and its integration into the total person will be emphasized. Topics include sexual anatomy and physiology, gender identity and roles, attraction and love, sexual orientation, human reproduction, sexual development, sexual dysfunction.

**Interdisciplinary Option:** Bioethics, Human Services, Women & Gender Studies

**Outcomes:**
Students will demonstrate an understanding of the biological, psychological and socio-cultural aspects of human sexuality, along with sexual dysfunction, and sex roles

PSYC 237 Cross-Cultural Psychology (3 Credit Hours)

**Pre-requisites:** PSYC 101 Outcomes: Students will demonstrate an understanding of concepts and research methodologies in cross-cultural psychology; Students will develop critical thinking skills, as well as increased cultural awareness and sensitivity towards others

Students will learn about cultural factors that influence cognition, perception, emotion, behavior, motivation, and mental health. Similarities and differences in both explicit and implicit cultural factors will be emphasized. Students will explore their identities, values, and biases. Students will engage in reflection to increase cultural awareness and sensitivity towards others.

This course satisfies the Engaged Learning requirement.

PSYC 238 Gender & Sex Diff & Similar (3 Credit Hours)

Requirement: ANTH 100, PLSC 102, PSYC 100 or SOCL 101 for students admitted to Loyola University for Fall 2012 or later. No requirement for students admitted to Loyola prior to Fall 2012 or those with a declared major or minor in the Department of Anthropology, Department of Criminal Justice, Department of Economics, Department of Psychology, Department of Political Science, the Department of Sociology, Human Services or the School of Nursing. Overview of psychological research and theory concerning differences and similarities between genders included.

**Knowledge Area:** Tier 2 Societal Knowledge

**Interdisciplinary Option:** Bioethics, Human Services, Women & Gender Studies

**Course equivalencies:** PSYC238/WOST238/WSGS238

**Outcomes:**
Students will understand similarities and differences between genders, comprehend the diversity of ideas about gender and how ideas of gender are determined by societies and cultures

PSYC 239 Understanding Bias and Inclusivity (3 Credit Hours)

Using an intersectional lens, students learn about how privilege, power, and oppression shape ourselves, perceptions of others, and our social world. They consider how ourselves and others are shaped by and operate within the larger social system. Students explore their identities, values, and biases. Students engage in self-reflection to increase self-awareness. Articulate how personal power can be used to create change.

**Interdisciplinary Option:** Race and Ethnicity, Women & Gender Studies

**Course equivalencies:** X - PSYC 239/ SOCL 239

**Outcomes:**
Identify feelings about course topics; Demonstrate self-awareness of identities and values, including the value of difference; Engage in intergroup dialogue
PSYC 240  Psych-Biol of Perception  (3 Credit Hours)
Pre-requisites:  PSYC 101; For Biology majors:  BIOL 102, BIOL 112, and  PSYC 101 Introduction to the study of sensory systems, especially vision and audition, emphasizing historical development of the field, multidisciplinary scientific approaches; recent research and theory on the mechanisms of seeing and hearing; and applications of research to real-world problems
PSYC 240 is cross-listed with BIOL 240.
Interdisciplinary Option: Neuroscience
Course equivalencies:  X-PSYC240/BIOL240
Outcomes:
Students will understand and be able to explain how knowledge of the functioning of sensory systems is obtained using a variety of experimental methods, how stimulus energy is translated into neural signals, how the brain processes sensory information, and how these processes determine conscious perception

PSYC 250  Cognitive Psychology  (3 Credit Hours)
Pre-requisites:  PSYC 101 Outcomes:  Students will understand and be able to explain how knowledge about mental events is obtained using a variety of experimental methods, discuss current empirical research and theories of cognition, understand well established cognitive theories about attention, memory, language processing, reasoning and decision-making
Overview of cognitive psychology. Topics include: human information processing, object recognition, memory, attention, language production and comprehension, reasoning and problem solving.

PSYC 251  Learning and Memory  (3 Credit Hours)
Pre-requisites:  Grade of C- or better in PSYC 101 and (NEUR 101 or PSYC/ BIOL 240)
This course surveys the field of learning and memory, including working, episodic, and semantic memory, nonassociative learning, classical and operant conditioning, skill learning, and neuroplasticity. Behavioral, neuroscientific, and clinical perspectives will be considered.
Interdisciplinary Option: Neuroscience

PSYC 273  Developmental Psychology  (3 Credit Hours)
Pre-requisites:  PSYC 101 Survey of theory and research relevant to human growth and development with emphasis on physical, cognitive, and social development from infancy through adolescence
No course description is available
Interdisciplinary Option:  Human Services
Course equivalencies:  X-CPSY273/PSYC273
Outcomes:
Students will demonstrate understanding of basic theory and research in human development, and will develop skills in critical examination of psychological research as applied to current issues in human development

PSYC 274  Lifespan Development  (3 Credit Hours)
Pre-requisites:  PSYC 101 Outcomes:  Students will demonstrate an understanding of theory and research in development across the lifespan; Students will develop critical thinking skills, applying research to contemporary issues in lifespan development
This course provides a survey of current theory, research, and applications on development (physical, cognitive, and social/emotional development) that are present at each stage of the lifespan. Normal development is emphasized; however, special human circumstances are also explored.

PSYC 275  Social Psychology  (3 Credit Hours)
Introduction to the field of social psychology; including topics such as social cognition, impression formation, social influence, attitude formation and change, stereotyping and prejudice, aggression, pro-social behavior, and group behavior.
Knowledge Area:  Tier 2 Societal Knowledge
Interdisciplinary Option:  Human Services, Psychology of Crime and Justice
Course equivalencies:  ACPSY 275 / PSYC 275
Outcomes:
Students will demonstrate the ability to think critically about fundamental theoretical approaches within social psychology, scientific methods of hypothesis testing, and potential applications of social psychology that address real-world problems

PSYC 276  Philosophy of Mind  (3 Credit Hours)
Pre-requisites:  PHIL 130 Students will be able to demonstrate understanding of the various philosophical views and problems regarding the mind and its relation to matter
This course is a study of the different philosophical views regarding the nature and the existence of the mind and its relation to material bodies.
Course equivalencies:  X-PSYC 276/ PHIL 276/PHIL 176

PSYC 277  Environmental Psychology  (3 Credit Hours)
Human behavior is at the root of environmental degradation. This course examines how psychological processes influence behaviors that help or hurt the environment and how psychology can promote conservation. The course identifies theory-based interventions and evaluates their effectiveness. Class activities allow students to practice applying psychology to promote environmental sustainability.
Outcomes:
Students will be able to identify the psychological bases of environmental problems; Students will be introduced to theories and practical strategies to change behavior as it relates to environmental issues

PSYC 280  Psychology of Judgment and Decision-Making  (3 Credit Hours)
Pre-requisites:  PHIL 130 Outcomes:  Students will learn fundamental principles and theories - including various biases and decision-making errors, and learn to apply the course to improve thinking, problem-solving, and decisions
This course examines the forces that shape decision-making, from the individual and day-to-day to the shaping of public policy. Psychological research on cognitive biases, economic models, and philosophical perspectives on deductive reasoning and what makes a good decision will be discussed. Students can only take one course from PHIL 279, PSYC 279, PSYC 280.
Knowledge Area:  Tier 2 Philosophical Knowledge

PSYC 302  History & Systems in Psyc  (3 Credit Hours)
Pre-requisites:  PSYC 101 A systematic treatment of the historical roots and foundation of psychology
Special emphasis is placed on relating past trends to current developments in the field.
Outcomes:
Students will demonstrate knowledge of the foundations of psychology as a science, including major schools and theoretical frameworks, and make connections between past trends and current approaches
PSYC 304 Statistics (3 Credit Hours)
Pre-requisites: PSYC 101 This course is an introduction to fundamentals of statistical analysis in psychology
Outcome: Students will demonstrate the ability to analyze data, interpret the results of research using basic statistical methods, and understand the conceptual foundation, appropriate use, and limitations of these statistical methods.
Interdisciplinary Option: Human Services

PSYC 306 Research Methods in Psych (3 Credit Hours)
Pre-requisites: PSYC 304 Logic and theory of the scientific method. Basic principles of scientific research methodologies employed in approaching major problem areas in psychology. This class is writing intensive.
Interdisciplinary Option: Human Services, Urban Studies
Outcomes: Students will demonstrate knowledge and skills necessary to formulate research questions and hypotheses, develop research designs, operationalize variables and gather data in an ethical manner, choose appropriate statistical methods for analyzing data, interpret results of statistical analyses, write a scientific paper in APA style, and critically evaluate research

PSYC 307 Psychology of Language (3 Credit Hours)
Pre-requisites: PSYC 101 Analysis of language as symbol-behavior specific to humans, language structure and competence, language performance, and the neurophysiological basis of language Methods for investigating language processing, acquisition, bilingualism, and language disorders will be considered.
Outcomes: Students will demonstrate understanding of major theories, research methodologies, and empirical knowledge in the study of language

PSYC 310 Lab in Program Evaluation (3 Credit Hours)
Pre-requisites: PSYC 306 PSYC 275 is also recommended. Special attention is given to the fundamental skills needed to evaluate human service programs including research methodology and research diplomacy. The strengths and weaknesses of several evaluation strategies will be discussed in terms of scientific validity, ethical constraints, and political acceptability.
Outcomes: Students apply their developing evaluation skills in a class project and present the data in a written report

PSYC 311 Lab in Psychobiology (3 Credit Hours)
(BIOL/STAT 335 or PSYC 304) and (NEUR 101, PSYC/BIOL 240, or PSYC 382/BIOL 284); OR for PSYC-BS and Cognitive/Behavioral Neuroscience majors: PSYC 306 and (NEUR 101, PSYC/BIOL 240, or PSYC 382/BIOL 284) Minimum grades of C- Introduction to the structures and functions of vertebrate nervous systems, how these systems compute and process information; laboratory experience with concepts and methods in the neurophysiological study of the bases of perception and other behaviors. Hearing is used as an example. PSYC 311 is cross-listed with BIOL 313.
Interdisciplinary Option: Neuroscience
Course equivalencies: X-PSYC311/BIOL313
Outcomes: Students will learn the concepts of basic neurophysiology and the theory of signal detectability, and have experience applying the logic and formulation of neurophysiological theories of perception

PSYC 312 Lab in Cognitive Neuroscience (3 Credit Hours)
Pre-requisites: PSYC 306 and PSYC 382 Outcomes: Students will develop scientific research skills as they relate to the field of cognitive neuroscience, including experimental design, physiological methods of data collection, statistical analysis and interpretation, and reporting findings
This course is a laboratory practicum in the techniques of cognitive neuroscience, with an emphasis on electrophysiological and hemodynamic methods of measuring nervous system function during cognitive and behavioral tasks and the effects of noninvasive brain stimulation.
Interdisciplinary Option: Neuroscience

PSYC 313 Lab in Behavioral Neuroscience (3 Credit Hours)
Pre-requisites: PSYC 306 and either PSYC 251 or PSYC 382 Outcomes: Develop a breadth of neuroscientific knowledge and skills involving critical thinking, research ethics, experimental design, animal behavior, data collection and analysis, and dissemination of scientific findings in different formats
Provides an understanding of the structure and function of the brain as it relates to behavior through empirical data collection and analyses. Course objectives will be met through demonstrations, hands-on laboratory experience with different behavioral assays, histology, an evaluation of scientific literature, and scientific communication via poster presentations.

PSYC 314 Lab in Exper Psych: Cognition (3 Credit Hours)
Pre-requisites: PSYC 306 (C-) and (C- in PSYC 250, PSYC 251, PSYC 307, or PSYC 382) Outcomes: Students gain skills and experience in experimental design, measurement, statistical analyses, and report writing as they relate to research on human cognition Laboratory demonstrations, experiments, and microcomputer applications in the area of human cognition. Topics vary, but include learning, memory, thinking and language processing.
Interdisciplinary Option: Neuroscience

PSYC 315 Lab:Tests & Measurements (3 Credit Hours)
Pre-requisites: PSYC 306, PSYC 331 or 338 is recommended Topics include: theory of psychological testing and assessment; historical context and related legal and ethical considerations; basics of test construction and evaluation, including reliability, validity, and standardization; and common measures of personality, attitudes, and ability and their psychometric properties.
Outcomes: Students will learn to demonstrate proficiency with psychological testing terminology and concepts

PSYC 316 Lab in Exper Psych:Sens & Perc (3 Credit Hours)
Pre-requisites: PSYC 306, NEUR 101 (formerly PSYC/BIOL 202) or PSYC 240 Laboratory demonstrations, experiments, and microcomputer applications to the psychophysical and physiological study of sensory systems
The course stresses the research methods and quantitative measures that are used in characterizing sensory processes, especially visual and auditory systems.
Interdisciplinary Option: Neuroscience
Outcomes: Students gain skills and experience in experimental design, measurement, statistical analyses, and report writing as they relate to research in sensory processes
PSYC 318 Lab in Developmental Psych (3 Credit Hours)
Pre-requisites: PSYC 273 and 306
Lecture and laboratory on empirical studies of developmental processes in humans. Focus is on research in particular content areas within developmental stages (e.g., infancy, childhood, adolescence, adulthood) and research on changes in behavior across time.
Outcomes:
Students will demonstrate skills and knowledge of developmental methodology, designing, conducting, and analyzing and interpreting the results of a research project, and writing a research paper in APA format.

PSYC 321 Laboratory-Social Psychology (3 Credit Hours)
Pre-requisites: PSYC 275 and 306
Lectures, demonstrations, readings, and individual or group research projects illustrating various methods, such as observation, interviewing, archives, standardized tests, and experimentation, are used to learn about topics such as group influences on the individual, attitudes, prosocial and antisocial behavior, and perception of self and others.
Outcomes:
Students will demonstrate skills and knowledge of methodology in social psychological research; designing, conducting, and analyzing and interpreting the results of a research project, and writing a research paper in APA format.

PSYC 327 Lab on Body Image (3 Credit Hours)
Lab on Body Image is a new course that can be used by Psychology students to fulfill the B lab requirement. It will focus on the scholarly study of body image and eating disorders, as well as how research is conducted in the field. Students will complete smaller labs and a larger research project in the field. Pre-requisites: PSYC 101, 304, 306. Learn about the scholarly study of body image and eating disorders; 2. Learn general research methods in Psychology and specific ones pertaining to the topic; 3. Learn about computer packages, including SPSS to analyze data.
Outcomes:
1

PSYC 331 Psychopathology (3 Credit Hours)
Pre-requisites: PSYC 101 Nature and causes of maladjustment and mental disorders
History of mental illness, diagnosis, research, and treatment of mental disorders.
Interdisciplinary Option: Human Services, Psychology of Crime and Justice
Course equivalencies: X-CPsy333/PSYC331/ACPSY280
Outcomes:
Students will demonstrate understanding of current approaches to researching maladaptive behavior, current views of maladaptive behavior, major categories of "mental disorders", factors contributing to development of problems, different types of intervention strategies, and appreciation of social, ethical, and legal issues.

PSYC 332 Affective Neuroscience (3 Credit Hours)
Pre-requisites: PSYC 101 or NEUR 101 (formerly PSYC/Biol 202)
Affective experiences promote human adaptability and survival, and healthy emotion function is critical to promoting physical and psychological well being. The course will provide an overview of fundamental neurobiological correlates associated with emotion function and processing affective stimuli.
Interdisciplinary Option: Neuroscience
Outcomes:
Students will understand theories regarding brain mechanisms associated with emotion processing and the techniques used for studying these mechanisms.

PSYC 338 Psychology of Personality (3 Credit Hours)
Pre-requisites: PSYC 101 Facts and principles of personality study
Nature of personality, its structure, development, expression, and measurement. Exposition and evaluation of personality study methods with critical review of traditional and modern theories of personality.
Interdisciplinary Option: Psychology of Crime and Justice
Course equivalencies: X-CPsy338/PSYC338
Outcomes:
Students will acquire an understanding of different personality theories, critically evaluate these theories, and apply what they have learned.

PSYC 340 Psychology of Women (3 Credit Hours)
Pre-requisites: PSYC 101 Review of psychological aspects of women’s experiences
Topics include psychological aspects of biological events such as menarche, pregnancy, menopause; aspects of women’s work and family roles; and mental health issues relevant to women.
Interdisciplinary Option: Human Services, Women & Gender Studies
Course equivalencies: PSYC340/WOST340/WSGS340
Outcomes:
Students will demonstrate knowledge of critical contemporary issues impacting women and girls, and critically evaluate/analyze academic theory, social institutions, and media.

PSYC 346 Psychopathology of Childhood (3 Credit Hours)
Pre-requisites: PSYC 273 Consideration of the nature and causes of maladjustment, emotional disorders, and learning disabilities in children in conjunction with approaches to prevention and remediation
No course description is available
Interdisciplinary Option: Human Services, Psychology of Crime and Justice
Outcomes:
Students will demonstrate knowledge of the major categories of childhood psychopathology and methods of diagnosis, theories of causes of maladjustment and mental illness in children and adolescents, and types of intervention strategies.

PSYC 348 Psychology of Adolescence (3 Credit Hours)
Pre-requisites: PSYC 273
In-depth study of adolescence using an interdisciplinary approach. Integration of cultural, social, psychological, and biological perspectives.
Interdisciplinary Option: Human Services, Psychology of Crime and Justice
Outcomes:
Students will appreciate the various factors leading to similarities and differences in the experience of adolescence in America and in other cultures, and will demonstrate understanding of major theories, research methodologies, and empirical knowledge in the study of adolescence.

PSYC 350 Developmental Cognitive Neuroscience (3 Credit Hours)
Pre-requisites: PSYC 101, NEUR 101 (formerly PSYC/Biol 202) Outcomes:
Students will gain knowledge of basic theory and research in the field of developmental cognitive neuroscience and will acquire understanding of brain and behavior relationships in a developmental context.
An overview of theory and research relevant to the study of the developing child through the use of neuroscience methods; topics may include: brain plasticity and maturation, sensorimotor systems, attention, memory, executive function, language, social cognition, and typical and atypical development.
Interdisciplinary Option: Neuroscience
PSYC 352 Neuropsychology (3 Credit Hours)
Pre-requisites: PSYC 101 and NEUR 101
Outcomes: Successful completion of this course leads to mastery of CNS function and structure. The ability to integrate this information will allow students to develop and test hypotheses about brain-behavior relationships. Neuropsychology is the interdisciplinary study of the relation between human brain function and behavior. This course is an undergraduate survey of topics related to neuropsychology, including neuroanatomy, psychophysiology, and cognitive neuroscience. A primary goal of the course is to introduce undergraduate students to neuropsychological concepts in research and applied settings.

Interdisciplinary Option: Neuroscience

PSYC 353 Applied Social Psychology (3 Credit Hours)
Pre-requisites: PSYC 275
Applications of principles and methods of social psychology to social issues and problems in such areas as: law and justice, health and health care, education, natural and built environments, population, work, life and intergroup relations.

Outcomes:
Students will demonstrate the ability to apply knowledge of major theories, research methodologies, and empirical knowledge in social psychology to real-world issues and problems.

PSYC 355 Neuroethics (3 Credit Hours)
Pre-requisites: students must have taken at least two philosophy courses
This course focuses on ethical considerations emerging from contemporary research in neuroscience, as well as neuroscientific techniques for studying ethical questions. Students will be able to demonstrate understanding of the ways in which the study of ethics and neuroscience inform each other.

Interdisciplinary Option: Bioethics
Course equivalencies: X - PSYC355/PHIL355

PSYC 356 Consumer Psychology (3 Credit Hours)
Pre-requisites: PSYC 101
Introduction to the field of consumer psychology; including topics such as consumer attitude formation and change, persuasive communication and consumer behavior, the psychology of advertising, consumer decision making, personality and consumer behavior, identity and consumer behavior, and culture and consumer behavior.

No course description is available

Outcomes:
Students will understand and apply theoretical approaches within consumer psychology and the psychology of advertising.

PSYC 360 Understanding Prejudice (3 Credit Hours)
Prejudice from a psychological perspective. Applying psychological concepts, research, and theory to understand the origins and consequences of prejudice as well as potential remedies. Pre-requisites: PSYC 101

Interdisciplinary Option: African Studies and the African Diaspora, Black World Studies, Psychology of Crime and Justice, Race and Ethnicity, Women & Gender Studies
Course equivalencies: BWS360/WSGS360

Outcomes:
Students will learn the origins of stereotypes and prejudice, the nature of prejudice against different social groups, how people are affected by prejudice and cope with prejudice, and the processes that may change stereotypes, reduce prejudice, and improve intergroup relations.

PSYC 362 Industrial/Organizational Psychology (3 Credit Hours)
Pre-requisites: PSYC 101
Study of human behavior in work settings. Topics include principles of employee selection, job analysis, motivation and morale, managerial behavior, organization development and socialization, leadership, conflict management, work design and group process.

Course equivalencies: PSYC362 / PSYC364
Outcomes:
Students will demonstrate understanding and ability to think critically about how the science of behavior is applied to work environments.

PSYC 368 Counseling (3 Credit Hours)
Pre-requisites: PSYC 101; PSYC 331 or 338 is also recommended
Introduction to the theory, techniques, and research behind major helping interventions, focusing on individual psychotherapy with adults.

Interdisciplinary Option: Human Services

Outcomes:
Students will critically evaluate different approaches to intervention in terms of their theoretical underpinnings, applications, goals and effectiveness, and will develop the ability to utilize some basic counseling skills.

PSYC 369 Psychology Honors Readings (3 Credit Hours)
Pre-requisites: Membership in the Psychology Honors award program and approval of the Department Honors Advisor
Directed readings and development of a formal research proposal on a topic of interest to the student and the faculty member with whom he/she has chosen to work. Students are not restricted to working with the faculty member whose name is listed in the schedule of classes.

Outcomes:
Students will write a literature review and research proposal for the honors thesis.

PSYC 370 Psychology Honors Research (3 Credit Hours)
Pre-requisites: PSYC 369
Students carry out the research proposed in PSYC 369 and prepare a formal report constituting the honors thesis. Approval of the thesis by the honors committee earns the psychology honors award. PSYC 370 is a capstone course.

This course satisfies the Engaged Learning requirement.

Course equivalencies: PSYC370H / PSYC370

Outcomes:
Students will conduct research, analyze and interpret data, and write a thesis.

PSYC 371 Psychology of Political Behavior (3 Credit Hours)
Examination of the determinants of political judgments and decision; including topics such as voting preference, stereotypes and political thinking, racism and political behavior, ideology and public opinion, the effect of the media on political thought.

Outcomes:
Understanding of core theoretical and methodological approaches commonly applied to the study of political psychology.
PSYC 372 Psychology & Law (3 Credit Hours)
Pre-requisites: PSYC 101 Introduction to the areas of overlap between psychology and the law
Topics include roles of psychologists in legal settings, accuracy of eyewitness testimony, jury processes, accuracy of polygraph examinations, and issues surrounding the insanity defense.
Interdisciplinary Option: Psychology of Crime and Justice, Sociological Studies
Course equivalencies: X-CJC 377 / PSYC 372
Outcomes:
Students will learn to analyze biases in the U.S. jury system, elucidate the weaknesses of eyewitness testimony, outline the issues in the insanity defense, understand the issues in Rape Trauma Syndrome and Battered Spouse Syndrome, understand the methods and effects of scientific jury selection, understand the complex issues surrounding confessions, and view the US justice system in a social justice context

PSYC 373 Health Psychology (3 Credit Hours)
Pre-requisites: PSYC 101 Survey of psychological and behavioral influences on how people stay healthy, why they become ill, and how they respond when they do become ill.
Topics include: health behavior and primary prevention, stress and coping, patient-physician interaction, and management of chronic illness.
Interdisciplinary Option: Bioethics, Human Services
Outcomes:
Students will understand the role of psychology and physical health, as well as understanding of different intervention and prevention programs, the structure of the health care system, and the various roles psychologists play in this system

PSYC 374 Community Psychology (3 Credit Hours)
Pre-requisites: PSYC 101 Understanding of the methods of community psychology, effects of societal, cultural, and environmental influences on psychological and community well-being.
Prevention of mental disorder and promotion of well-being, primarily through creating more mentally healthy environments, but also by enhancing individual resilience. Recognizing the toxicity of psychosocial stressors such as inequality, poverty, alienation, and discrimination, community psychologists also fight for social justice through empowerment of oppressed groups and policy advocacy.
Interdisciplinary Option: Human Services, Neuroscience
Outcomes:
Students will understand theories regarding brain mechanisms associated with emotion processing and the techniques used for studying these mechanisms.

PSYC 375 Psych of Addiction (3 Credit Hours)
Pre-requisites: PSYC 101 Survey of historical, demographical, and statistical aspects of substance abuse
Abuse of alcohol and drugs, as well as eating disorders, may be considered. A variety of theoretical models and interventions are discussed.
Interdisciplinary Option: Psychology of Crime and Justice
Outcomes:
Students will understand theories regarding brain mechanisms associated with addiction, including illicit drugs and drugs used to treat psychiatric disorders.

PSYC 376 Psychology of Religion (3 Credit Hours)
Introduction to the major issues, theories and empirical approaches in the psychology of religion; effect of religion on beliefs, motivations, emotions and behaviors, adjustment, prejudice, and prosocial behavior.
Outcomes:
Understanding of the relationship between religion and psychological variables (e.g.

PSYC 377 Psychology of Music (3 Credit Hours)
Pre-requisites: PSYC 101 Outcomes: Students will understand theories regarding brain mechanisms associated with emotion processing and the techniques used for studying these mechanisms.
Engagement in musical activities is common across all human cultures. This course will introduce students to the interdisciplinary field of psychology of music and will focus on how humans perceive and are affected by music, how we create music, and how music is integrated into human life.

PSYC 378 Drugs and Behavior (3 Credit Hours)
Pre-requisites: NEUR 101 Outcomes: Knowledge of the mechanisms of action of drugs, including illicit drugs and drugs used to treat psychiatric disorders.
This course will introduce students to neuropsychopharmacology. Acute and long term effects of addictive drugs and drugs used to treat psychiatric disorders on neural function and behavior are discussed by integrating human and preclinical animal studies. Major types of drugs of abuse, antidepressants, antipsychotics, and anxietytics will be discussed.

PSYC 381 Adv Stat Anls-Computer:Soc Sci (3 Credit Hours)
Pre-requisites: PSYC 304 or SOCL 301 Expanded treatment of topics covered in PSYC 304 with emphasis on using standard computer analysis packages (SPSS)
No course description is available
Outcomes:
Students will understand theories regarding brain mechanisms associated with emotion processing and the techniques used for studying these mechanisms.

PSYC 382 Behavioral and Cognitive Neuroscience (3 Credit Hours)
Pre-requisites: NEUR 101 (formerly PSYC 202 /BIOL 202) Overview of topics and methodologies used in behavioral and cognitive neuroscience including: attention, learning and memory, language, reasoning, decision making, intelligence, emotions, social cognition, and consciousness.
BIOL 284 is cross-listed with PSYC 382.
Interdisciplinary Option: Neuroscience
Outcomes:
Students will understand theories regarding brain mechanisms associated with emotion processing and the techniques used for studying these mechanisms.

PSYC 385 Practicum in Peace Activism (3 Credit Hours)
Students will learn how to recognize and navigate the psychological pitfalls that accompany work as a peace activist. Topics include building programs, recruiting volunteers, managing media messages, avoiding burnout, handling conflict within organizations, and securing funding for peace activities. Psychological constructs and theories such as group dynamics, perceived control, learned helplessness, attitude change, and altruism will be used to increase understanding of processes related to peace activism.
Interdisciplinary Option: Peace Studies

PSYC 386 Psychology Seminar:Selected Topics (3 Credit Hours)
Pre-requisites: PSYC 101 An upper-level, intensive seminar on selected aspects of psychology
No course description is available
Outcomes:
Students will understand theories regarding brain mechanisms associated with emotion processing and the techniques used for studying these mechanisms.
PSYC 387  Seminar in Behavioral and Cognitive Neurosciences  (3 Credit Hours)
Pre-requisites: NEUR 101 (formerly PSYC/BIOL 202); PSYC 382/BIOL 284, limited to NRCB-BS seniors
Lecture/discussions will focus on issues central to behavioral neuroscience, emphasizing human and animal mental processes and neural information processing mechanisms. Students will read primary research papers and practice analytical skills in class discussion and presentations. Presentations and exams will promote critical thinking and a general understanding of current issues in behavioral and cognitive neurosciences.
Interdisciplinary Option: Neuroscience
Outcomes:
Students will become familiar with principles of cognitive and behavioral approaches to the study of the neural bases of behavior; Students will also learn how to critically read primary research papers and present these papers to the class

PSYC 388  Laboratory in Neuroscience I  (4 Credit Hours)
Pre-requisites: NEUR 101, BIOL 251; and students must be either a Molecular/Cellular Neuroscience Major, a Cognitive/Behavioral Neuroscience major, or a Neuroscience Minor
Students will be trained in various anatomical, physiological, behavioral, and neurobiological modeling techniques used to study the nervous system and the brain in the laboratory. This course is cross-listed as NEUR 301 & PSYC 388.
Interdisciplinary Option: Neuroscience
Course equivalencies: X-NEUR301/PSYC388/BIOL373
Outcomes:
Students will demonstrate understanding of several research designs and methodologies of use in neuroscience research and will gain experience with basic neuroscience laboratory techniques

PSYC 390  Internship in Psychology  (3 Credit Hours)
Pre-requisites: PSYC 304 and approval via an internship application due on the 5th Friday of the previous semester
Capstone service-learning experience for psychology majors, involving application and development of psychological knowledge and skills through an internship (100 hours) in a human service organization or applied research setting, combined with regular class meetings, reading and writing assignments. Students arrange placements and complete a project on site. Application details may be found here: https://luc.edu/psychology/undergraduate/internshippsychology. Practical, pre-professional job skills, critical analysis and connection between theory and practice, on topics of: human service agency operation; effective working relationships; professional communication; cultural competence; values and ethics.
This course satisfies the Engaged Learning requirement.

PSYC 397  Independent Research  (3 Credit Hours)
Pre-requisites: PSYC 306 and approval of internship coordinator
Limited to psychology majors with senior standing. Capstone opportunity to conduct research under the guidance of a psychology faculty member. Only one of PSYC 397 and 399 may count toward the psychology major.
Interdisciplinary Option: Neuroscience
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will gain experience in all aspects of psychological research, including literature review, formulating hypotheses, designing and conducting research, analyzing data and interpreting results, communicating the results of research in written reports

PSYC 399  Special Studies in Psychology  (1-3 Credit Hours)
Pre-requisites: permission of instructor and department
Opportunity for individual reading or research in a specialized area not otherwise covered by the Department's course offerings. Only one of PSYC 397 and 399 may count toward the psychology major, integrating research results from various sources, conducting research) working directly with a faculty member on a current topic in psychology. This course satisfies the Engaged Learning requirement.
Outcomes:
Students will gain experience (e.g

PSYC 401  History & Systems of Psy  (3 Credit Hours)
Description: History and systems is a survey course that covers past events and persons that directly influenced the formation of contemporary psychology in the United States.
Outcomes:
Students will become familiar with the history of psychology and influential theoretical systems in the field of psychology; The course is partly designed to aid in preparation for the EPPP licensing exam for those students intending to seek professional licensure

PSYC 412  Introduction to the Profession of Clinical Psychology  (3 Credit Hours)
Required course for PhD program in Clinical Psychology an introduction to our field. This course provides an introduction to the profession of Clinical Psychology by focusing on basic research and clinical skills necessary for a career as a clinical scientist and practitioner.
Outcomes:
Students will develop skills such as establishing rapport, empathic and reflective listening, gathering information, and making intervention decisions via supervised interview experiences

PSYC 420  Research Methods in Psychology  (3 Credit Hours)
An intensive coverage of classical and current psychological research methodology and a review and implementation of various strategies for proposing research, collecting and analyzing data, and writing scholarly articles.
Outcomes:
Students will learn multiple methods for conducting psychological research, how to critique published research, and how to write research proposals and reports

PSYC 432  Intell & Personality Assessment  (3 Credit Hours)
Description: This course covers the psychometric properties, administration procedures, and applications of the most common adult psychological measures. Students will gain an understanding of psychometric theory.
Outcomes:
Students will be able to administer and become familiar with how to interpret a WAIS-III, the MMPI-2, the Sentence Completion Test, and the TAT

PSYC 435  Seminar in Cognitive Neuroscience  (3 Credit Hours)
The way that information is represented and processed in the brain is central to a broad range of topics in psychological science. In this course we will consider how the methods of cognitive neuroscience including brain imaging (e.g., EEG/ERP fMRI) and dissociation-based techniques such as neuropsychology and TMS, have revolutionized the exploration of these topics. We will pay particular attention to how these techniques can be used to understand higher-level cognition during development and in questions related to social psychology and psychopathology. Class participants will be introduced to these techniques, read, critique and present results from the primary literature, and also have an opportunity to develop ideas using these methods relating to their own research interests.
PSYC 436 Psychopharmacology (3 Credit Hours)
Description: The types and mechanisms of medications used in the treatment of mental disorder are reviewed. Emphasis is given to behavioral effects and treatment effectiveness of drugs. Psychopharmacological research design and literature are reviewed.
Outcomes:
Students will learn basics of neurotransmission and be informed about medications including antidepressants, mood stabilizers, anti-psychotics, and substance abuse

PSYC 438 Prin of Psyc Asstm Child & Adlt (3 Credit Hours)
Description: This course is designed to expose students to a variety of assessment tools and tests available for children ranging from 1 month to 18 years of age.
Outcomes:
Students will develop competence in the administration and write-up of basic intelligence, achievement, and visual motor tests for children presenting with, for example, learning disabilities, mental retardation, social/communication disorders

PSYC 440 Th & Res in Psych of Lang (3 Credit Hours)
This course provides an overview of theory and research on the psychology of language.

PSYC 446 Psychopathology (3 Credit Hours)
Description: This course reviews concepts, research, and theory (historical and current) in psychopathology and emphasizes diagnosis and etiology.
Outcomes:
Students will gain an appreciation for the major issues in the area of psychopathology, the ability to think clearly and scientifically about these issues, and an understanding of major mental disorders

PSYC 451 Psychopath of Childhd & Adol (3 Credit Hours)
Description: This course provides an overview of theory and research on adjustment problems during childhood and adolescence using an ecological-developmental perspective.
Outcomes:
By gaining insight into the factors that enhance or interfere with positive developmental processes, students learn how to apply research and theory to improve the services they will offer to children and families in their professional careers

PSYC 452 Clin Treat of Children & Adol (3 Credit Hours)
Description: This course provides an overview of theory and research on empirically-supported interventions for children and families.
Outcomes:
Students learn how to select and evaluate needed prevention programs and interventions for children and families to achieve therapeutic goals

PSYC 455 Developmental Psychology (3 Credit Hours)
This course provides an overview of theory and research on developmental psychology.

PSYC 460 Social Psychological Theory (3 Credit Hours)
Survey of basic concepts, theories, and research in social psychology. Contents include foundations of social psychology; broad theoretical orientations (e.g., evolutionary, behavioral, cognitive, affective, individual, societal, cultural); specific theories at the intrapersonal, interpersonal, intra-group, and inter-group levels of analysis.
Outcomes:
Knowledge and skills in theory construction and criticism; understanding relation between theory and research methods; applying theories to social problems

PSYC 461 Attitude and Attitude Change (3 Credit Hours)
Survey of attitude formation and change literature. Topics include the nature and measurement of attitudes, explicit versus implicit attitudes, effects of attitudes on cognition and behavior.
Outcomes:
Knowledge and skills that enable the integration of multiple theories to conceptualize attitudinal phenomena, critical evaluation of research, written and oral expression about attitude topics, application of attitude theories to practical problems

PSYC 462 Cognitive Social Psychology (3 Credit Hours)
In depth examination of the human cognition within its social context; including topics such as impression formation, attribution, stereotyping, prejudice, social information processing, mental control, affect and social information processing, unconscious social cognition.
Outcomes:
An understanding of basic theoretical approaches and scientific methods of hypothesis testing within social cognition; Development of skills needed to perform research within social cognition

PSYC 464 Practicum in Psychotherapy I (3 Credit Hours)
Description: This two semester practicum course provides applied experience conducting psychotherapy at Loyola University Chicago's Wellness Center.
Outcomes:
For client populations seeking psychotherapy, practicum students will be able to develop a treatment plan, articulate treatment goals, develop a working therapeutic alliance, and execute elementary psychotherapeutic techniques

PSYC 472 Organizational Psychology (3 Credit Hours)
Covers theory, research, and methods associated with behavior in organizational settings. Learning outcomes include knowledge of theory and methods of personnel selection, performance measurement and appraisal, knowledge and skills training; theory and research on leadership, motivation, group behavior, etc.

PSYC 473 Social Development (3 Credit Hours)
Description: This course is designed to provide an advanced level introduction and discussion of critical issues essential to the study of social development. The contribution of multiple contexts (e.g., family, peers, culture) to social development is a major focus of this class.
Outcome: Students will become familiar with the several theoretical accounts as well as major empirical findings in the core areas of social development.

PSYC 474 Research in Group Dynamics (3 Credit Hours)
Covers theory, methods, and research on behavior in and by groups from a social psychological perspective. Learning outcomes include knowledge of theory and research on group structure, group performance, group decision making, negotiation, and intergroup behavior; ability to design research about group behavior and to analyze data from group research.

PSYC 475 Cognitive Development (3 Credit Hours)
This course is designed to provide an advanced level introduction to critical issues in the study of cognitive development from infancy through childhood.
Outcomes:
Students will be expected to draw connections between the major theoretical accounts of cognitive development and the empirical literature in core areas of children's cognition
PSYC 477 The Self and Self-esteem (3 Credit Hours)
Pre-requisites: Graduate Standing
Outcomes: Knowledge of psychological theory and research on the self and self-esteem
Graduate seminar focusing on psychological theory and research on the self and self-esteem. Course will focus on where self knowledge comes from and how it affects human behavior.

PSYC 479 Cognition and Emotion (3 Credit Hours)
Pre-requisites: Graduate Standing
Outcomes: Knowledge of psychological theory and research on cognition and emotion
Graduate seminar focusing on psychological theory and research on the role that emotion plays in cognitive activity and behavior. Course will focus on how emotion affects cognition and how different emotions have different effects.

PSYC 482 Advanced Statistics (3 Credit Hours)
Covers analysis of factorial designs and other multifactor data sets.
Outcomes:
Learning outcomes include theory and assumptions underlying analysis of variance and multiple regression; ability to use SPSS to analyze data from factorial designs and other multifactor research endeavors

PSYC 484 Prejudice and Intergroup Relations (3 Credit Hours)
Pre-requisites: Graduate Standing
Outcomes: Knowledge of psychological theory and research on intergroup relations and prejudice
Graduate seminar focusing on psychological theory and research on intergroup relations, stereotyping and prejudice. Course will focus on the perceptions, cognitions and behaviors toward members of our own group and members of outgroups.

PSYC 485 Psychology and Law (3 Credit Hours)
Application of social psychological theory and research to criminal behavior and the criminal justice system. Specific topics include crime causation, mass media effects, jury selection, eyewitness accuracy, and crime prevention.
Outcomes:
An understanding of core theoretical and methodological approaches to criminal justice research, development of skills needed to perform psychologically oriented criminal justice research

PSYC 486 Methods of Program Evaluation (3 Credit Hours)
Overview of program evaluation methods, politics, ethics, and applications; including topics such as quasi-experimental design, statistical analysis issues, ethical guidelines, implementation strategies, and presentation styles.
Outcomes:
An understanding of the methods, strategies, ethical issues, and implementation obstacles of evaluation research; Development of skills needed to perform high quality evaluation research in a variety of applied settings

PSYC 489 Political Cognition (3 Credit Hours)
Examination of the cognitive determinants of political judgments and decision; including topics such as political information processing, voting preference, political stereotyping, racism, ideology and public opinion, and media effects.
Outcomes:
An understanding of core theoretical approaches within political psychology, scientific methods of hypothesis testing within political psychology, and the development of skills needed to perform research within political psychology

PSYC 491 Multivariate Analysis (3 Credit Hours)
Description: An introduction to the theory and application of multivariate statistical techniques in psychology.
Outcomes:
Students will learn the conceptual underpinnings (including matrix algebra) and will also learn to conduct analyses for the following procedures: multiple and logistic regression, MANOVA, loglinear analysis, canonical correlation, factor analysis, and cluster analysis

PSYC 493 Structural Equation Modeling (3 Credit Hours)
An introduction to structural equation modeling as a multivariate statistical tool, including confirmatory factor analysis, path analysis, causal modeling, diagramming structural models, assessing model fit, model development and identification, multi-sample analysis, and longitudinal analysis.
Outcomes:
An understanding of the logic and mechanics of structural equation modeling, and the skills necessary to use LISREL 8 software to conduct structural analyses

PSYC 509 Seminar on Teaching Psychology (0 Credit Hours)
This course provides an introduction to the psychology teaching and learning.

PSYC 510 Ethics & Professional Practice (3 Credit Hours)
Description: The ethical standards and practice of psychologists, including basic principles of ethics, application of ethics to professional practice and to research, and professional problems and practices are reviewed.
Outcomes:
Students will learn to manage complex ethical problems encountered in psychological practice, research, and education

PSYC 513 Adolescence (3 Credit Hours)
Description: This course offers an in-depth study of adolescence from a psychological as well as cultural and historical perspective, with a focus on biological, cognitive, psychological, and social changes.
Outcomes:
Students will learn important components of psychological health and maladaptation during the adolescent developmental period and how family, peer, and school contexts affect adolescent development

PSYC 514 Research in Development Psych (3 Credit Hours)
The goal of this course is to survey important methods, issues, research designs, and other topics specific to research in developmental psychology and cultivate students' scientific skills like critical thought and evaluation of research.
Outcomes:
Students will be able to demonstrate understanding of developmental methodology, design, ethical concerns, and other issues relevant to developmental science

PSYC 515 Infancy (3 Credit Hours)
The goal of this course is to survey important topics in the field of infancy, the period of development from birth through approximately 3 years.
Outcomes:
Students will demonstrate understanding of infant developmental science in particular content areas and the processes underlying change

PSYC 518 Seminar Selected Topics-Clinical Psychology (3 Credit Hours)
This course provides an overview of selected topics in clinical psychology.
PSYC 525  Seminar in Social Psychology  (3 Credit Hours)
This course provides an overview of theory and research on social psychology.

PSYC 535  Internship in Applied Social Psychology  (0 Credit Hours)
Students complete an applied social psychology internship during this course.

PSYC 540  Psych of Lang Development  (3 Credit Hours)
This course provides an overview of theory and research on the psychology of language development.

PSYC 545  Sel Tp in Developmental Psyc:  (3 Credit Hours)
This course provides an overview of selected topics in developmental psychology.

PSYC 548  Risk and Opportunity in Childhood and Adolescence  (3 Credit Hours)
This course provides an overview of theory and research on risk an opportunity in childhood and adolescence.

PSYC 552  Neuropsychology  (3 Credit Hours)
Neuropsychology involves the interdisciplinary study of the relations between human brain function and behavior.

PSYC 553  Neuropsychological Assessment  (3 Credit Hours)
Description: This course covers the major areas of neuropsychological assessment, including major assessment techniques, interviewing, report writing, and psychometric issues., attention, language, memory, visual perception, motor functioning, executive functioning, and emotional functioning).

Outcomes:
Students will learn major issues and topic areas in neuropsychological assessment (e.g

PSYC 555  Social Psychology Research and Professional Development  (8 Credit Hours)
Course will involve research presentations and other forms of professional development. Graduate student standing in Social Psychology.

Interdisciplinary Option: Women & Gender Studies

PSYC 560  Human Diversity  (3 Credit Hours)
This course provides a foundation in human diversity as it relates to the practice of clinical psychology. The course will examine theoretical perspectives and research findings related to human diversity. The goal of this course is to challenge students to think critically about the influence of human diversity on their psychological practice, research, and teaching.

PSYC 568  Evidence-Based Practice in Clinical Psychology  (3 Credit Hours)
Pre-requisites: Psychology 412, or approval of instructor This course provides a theoretical and skills-based overview of evidence-based practice (EBP) in clinical psychology, and surveys the theoretical and applied aspects of various evidence-based intervention approaches in psychology, including Motivational Interviewing (MI), Interpersonal Therapy (IPT), Cognitive Behavior Therapy (CBT), and Dialectical Behavior Therapy (DBT)
Students will demonstrate an understanding of current theories and methods in evidence-based psychotherapy.

PSYC 595  Thesis Supervision  (3 Credit Hours)
Enrollment is Restricted to Psychology graduate students. Students will make supervised progress towards completion of their theses.

PSYC 596  Internship in Clin Psychology  (0 Credit Hours)
Students complete a full time APA approved clinical internship during this course.

PSYC 597  Integrative Readings in Psych  (3 Credit Hours)
Students complete integrated readings under the supervision of a faculty member.

PSYC 598  Research  (3-6 Credit Hours)
Students complete research under supervision of a faculty member.

PSYC 599  Directed Readings  (3-6 Credit Hours)
Students complete directed readings under the supervision of a faculty member.

PSYC 600  Dissertation Supervision  (0 Credit Hours)
Students complete dissertation research under the supervision of a faculty member.

PSYC 605  Master's Study  (0 Credit Hours)
Students complete master's thesis readings and research under the supervision of a faculty member.

PSYC 610  Doctoral Study  (0 Credit Hours)
Students complete dissertation readings and research under the supervision of a faculty member.
