

ENVIRONMENTAL SCIENCE AND SUSTAINABILITY (MS)

The SES Master of Science in Environmental Science & Sustainability takes a whole-systems, interdisciplinary approach to global environmental and sustainability challenges. The program offers a choice of two tracks, Research and Professional, and can be pursued by students of any academic background.

Students in both tracks will complete 30 credit hours of instruction, including 6 credit hours in two core courses. Research Track students will pursue an original, in-depth research project, culminating in the writing and defending of a thesis. Professional Track students will complete coursework in one of four professional concentration areas, Environmental Law & Policy, Geographic Information Systems, Sustainable Assessment & Planning and Sustainable Business.

Professional Track students will complete coursework in one of four professional concentration areas, Environmental Law & Policy, Geographic Information Systems, Sustainable Assessment & Planning and Sustainable Business.

MS in Environmental Science & Sustainability: Research Track Curriculum

Research track students will complete 30 hours of coursework and research with an SES research faculty, culminating in a final written thesis and defense.

Required Courses

- ENVS 401 Sustainable Systems - Natural Science Perspectives
- ENVS 402 Sustainable Systems - Social Science Perspectives

Electives

Work with your thesis advisor to choose from our many courses to best advance your individual interests.

Choose from our robust set of courses in environmental science and sustainability, including at least two from more than 45 courses we offer in environmental science and quantitative methods. You will also be able to choose from more than 20 of the courses we offer in Sustainable Society and Business.

Natural Science and Quantitative Courses

Code	Title	Hours
ENVS 420	Conservation Biology	3
ENVS 422	Invasive Species	3
ENVS 423	Environmental Microbiology	3
ENVS 425	Sustainable Agriculture	3
ENVS 426	Agroecosystems	3
ENVS 427	Food Systems Analysis	3
ENVS 430	Restoration Ecology	3
ENVS 435	Ecological Economics	3
ENVS 438	Climate Change and Human Health	3
ENVS 451	Introduction to Sustainability Concepts & Impacts	3
ENVS 452	Sustainability Assessment & Reporting I	3
ENVS 453	Sustainability Assessment & Reporting II	3
ENVS 454	Sustainability Plan Development & Reporting	3
ENVS 480	Introduction to Geographic Information Systems	3
ENVS 481	Advanced GIS Applications	3
ENVS 482	Remote Sensing	3
ENVS 484	Conservation Economics	3
ENVS 487	Principles of Ecotoxicology	3
ENVS 488	Applied Environmental Statistics	3
ENVS 489	Ecological Risk Assessment	3
ENVS 491	Independent Environmental Research (upon approval)	1-4
ENVS 495	Environmental Internship	3
ENVS 498	Special Topics (upon approval)	1-12
ENVS 498L	Special Topics with Lab (upon approval)	1-4
ENVS 499	Directed Readings (upon approval)	1-3
BIOL 495	Special Topics	1-4
BIOL 416	Limnology Lec/Lab	4
BIOL 418	Aquatic Insects Lecture & Laboratory	4
BIOL 470	Biostats & Exp Design Lec/Lab	4
MPBH 400	Determinants of Population Health	3
MPBH 401	Environmental Health	3
MPBH 403	Introduction to Epidemiology	3
MPBH 404	Biostatistics for Health and Biological Science	3
MPBH 407	Public Health Policy: Concepts and Practice	3
MPBH 409	Biostatistics I	3
MPBH 412	Intro to Statistical Computing for Public Health	2
MPBH 414	Introduction to Global Health	3
MPBH 421	Biostatistics II	3
MPBH 423	Intermediate Epidemiology	3
MPP 401	Analytical Tools in Public Policy	3
MPP 402	Cost Benefit Analysis	3
MPP 403	Public Budget and Finance	3
MPP 405	Statistical Methods & Analysis for Public Policy I	3
MPP 406	Statistical Methods & Analysis Public Policy II	3
MPP 408	Political Feasibility Analysis	3

SOCL 414	Statistical Methods Analysis I	3
SOCL 415	Statistical Methods of Analysis II	3
STAT 403	SAS Program & Applied Statistics	3
STAT 407	Statistical Design	3
STAT 436	Topics in Biostatistics	3

Sustainable Society and Business Courses

Code	Title	Hours
ENVS 410	Introduction to Environmental Law & Policy	3
ENVS 411	Natural Resources and Land Use Law & Policy	3
ENVS 412	Water Law & Policy	3
ENVS 413	Energy Law & Policy	3
ENVS 433	Introduction to the Circular Economy	3
ENVS 436	Design for Circular & Sustainable Business	3
ENVS 454	Sustainability Plan Development & Reporting	3
ENVS 463	Sustainable Business Management	3
ENVS 464	Sustainability Management in the Global Context	3
ENVS 483	Human Dimensions of Conservation	3
ENVS 491	Independent Environmental Research (upon approval)	1-4
ENVS 495	Environmental Internship	3
ENVS 498	Special Topics (upon approval)	1-12
ENVS 499	Directed Readings (upon approval)	1-3
MPBH 407	Public Health Policy: Concepts and Practice	3
MPP 400	Policy Design and Analysis	3
MPP 404	Public Policy Process	3
PSYC 460	Social Psychological Theory	3
PSYC 461	Attitude and Attitude Change	3
PSYC 486	Methods of Program Evaluation	3
SOCL 412	Qualitative Methods in Social Research	3
SOCL 446	Knowledge, Power & Expertise	3
SOCL 463	Sociology & Natural Environment	3

Thesis Research

Devote 12 credit hours to designing and conducting your research thesis work under the guidance of your thesis advisor and thesis committee.

Research track students are required to complete and defend their thesis to graduate.

MS in Environmental Science & Sustainability: Professional Track Curriculum

Professional track students will complete a concentration in one of the following areas as part of their 30-credit-hour graduation requirement.

Required Courses

- ENVS 401 Sustainable Systems - Natural Science Perspectives
- ENVS 402 Sustainable Systems - Social Science Perspectives

Concentrations

Environmental Law and Policy

This Concentration provides essential knowledge in relevant areas of environmental law and policy for professionals who want to better understand the role of government, industry, non-profit, and other

institutions involved in environmental advocacy, consulting, and compliance.

Code	Title	Hours
ENVS 410	Introduction to Environmental Law & Policy	3
ENVS 411	Natural Resources and Land Use Law & Policy	3
ENVS 412	Water Law & Policy	3
ENVS 413	Energy Law & Policy	3

Geographic Information Systems (GIS)

This Concentration provides essential knowledge on Geographic Information Systems (GIS) - a compilation of sophisticated, multidimensional software and tools used to capture, store, analyze, manage and present geospatial data. This curriculum provides essential training in the fundamental principles and concepts behind contemporary geographic mapping technology needed to solve complex geospatial problems commonly encountered in environmental sciences, urban planning, social sciences, public health, as well as business, engineering, and many more fields.

Code	Title	Hours
ENVS 480	Introduction to Geographic Information Systems	3
ENVS 481	Advanced GIS Applications	3
ENVS 482	Remote Sensing	3

Sustainable Assessment & Planning

This Concentration delivers valuable skills for professionals who want to better understand how organizations can - and do - measure, regulate and report their own natural resource use. Students will develop essential skills used by sustainability professionals in government, industry, non-profit, and other institutions striving to improve and document their sustainability impact.

Code	Title	Hours
ENVS 451	Introduction to Sustainability Concepts & Impacts	3
ENVS 452	Sustainability Assessment & Reporting I	3
ENVS 453	Sustainability Assessment & Reporting II	3
ENVS 454	Sustainability Plan Development & Reporting	3

Sustainable Business

Code	Title	Hours
ENVS 433	Introduction to the Circular Economy	3
ENVS 435	Ecological Economics	3
ENVS 436	Design for Circular & Sustainable Business	3
ENVS 463	Sustainable Business Management	3

ENVS 410	Introduction to Environmental Law & Policy	3
ENVS 411	Natural Resources and Land Use Law & Policy	3

Learning Outcomes

- Deepen your understanding of complex socio-ecological systems and their connection with sustainable development goals.
- Increase your ability to make accurate and ethical evidence-based decisions from scientific literature.
- Expand your capacity to communicate environmental science and sustainability issues to the scientific community, professional colleagues, policy makers, and the general public.
- Demonstrate competence of in-depth knowledge and skills through completion of an original research project and thesis.
