

PSYCHIATRIC MENTAL HEALTH NURSE PRACTITIONER WITH SUBSTANCE USE AND ADDICTIONS SPECIALTY (DNP)

The Psychiatric-Mental Health Nurse Practitioner track of the DNP program is designed to prepare graduates to conduct psychiatric mental health evaluations and advanced health assessment and histories, develop therapeutic rapport with clients and families, promote mental health, develop and implement mental health treatment plans including medication management and counseling and provide leadership in interprofessional team management of clients with psychiatric and mental health conditions.

The Substance Use and Addiction specialty preparation is focused on the comprehensive diagnosis and treatment of substance use disorders and the impact of these disorders on psychiatric mental health and treatment options. Students complete additional coursework and practicum experiences with a specific focus on substance use and addiction.

Curriculum

The Psychiatric Mental Health NP with Substance Use and Addictions specialty is offered in a hybrid learning format with both online and in-person instruction. This program is 73 credit hours.
