

ADVERTISING & PUBLIC RELATIONS/ ENVIRONMENTAL SCIENCE AND SUSTAINABILITY (BA/ MS)

Loyola's School of Communication, in partnership with the School of Environmental Sustainability, offers a program that enables students to earn an undergraduate and graduate degree in environmental communication in five years.

The Accelerated Bachelor's to Master's program allows SOC students to earn their undergraduate degree in their declared major, plus a master's degree in Environmental Science and Sustainability.

Similarly, SES students can earn their undergraduate degree in their declared major, while also earning a master's degree from the SOC in either the Digital Media and Storytelling or Global Strategic Communication graduate programs.

The two schools developed the Accelerated Bachelor's to Master's program to train environmental scientists to be better communicators, and communication professionals to better understand environmental science.

These 4+1 programs are uniquely applied and strongly interdisciplinary. They integrate basic science concepts, communication theory and practice, and socio-cultural dimensions to cultivate the interdisciplinary problem-solving and communication skills necessary for developing sustainable solutions. The goals of these programs are to:

- Educate students across the sciences, social sciences and humanities, providing knowledge and interdisciplinary perspectives needed to effectively address complex environmental problems through grounding in solid scientific understanding of ecosystem operation.
- Develop skills in environmental and sustainability sciences including GIS, sustainability tracking, and environmental communications as well as important professional skills, such as interdisciplinary thinking, systems thinking, research design, data collection, data analysis, research ethics, technical writing, and communication.
- Improve communication skills by teaching students how to tell stories through enhanced speaking and presentation methods, better writing, video production, recording podcasts, developing blogs and social media.
- Prepare students for advancement in careers in the public and private sectors, including in government agencies, consulting firms, media organizations, businesses, and not-for-profit organizations.

CURRICULUM

Code	Title	Hours
BA Requirements		
<i>SOC Foundation Courses</i>		
COMM 100	SOC Career Prep Seminar	1

COMM 175	Introduction to Communication	3
COMM 200	Digital Communication and Society	3
COMM 215	Ethics & Communication	3

Required BA Courses

COMM 210	Principles of Public Relations	3
COMM 211	Principles of Advertising	3
COMM 213	Digital Foundations	3
MARK 201	Principles of Marketing	3

Research Course

Select one of the following:

COMM 363	Research Methods in Advertising/Public Relations
ISSCM 241	Business Statistics
STAT 103	Fundamentals of Statistics

Choose One Specialized Focus 9

Advertising Focus

COMM 214	Introduction to Creative Concepts
COMM 317	Media Planning

Select one of the following:

COMM 331	Social Media Advertising
COMM 334	Mobile Advertising
COMM 336	Search & Display Advertising

Public Relations Focus

COMM 314	Public Relations Cases
COMM 318	Public Relations Writing

Select one of the following:

COMM 313	Corporate and Organizational Communication
COMM 320	Public Service Communication
COMM 375	Media Relations

Integrated Focus

Select one of the following:

COMM 317	Media Planning
COMM 331	Social Media Advertising
COMM 334	Mobile Advertising

Select one of the following:

COMM 313	Corporate and Organizational Communication
COMM 314	Public Relations Cases
COMM 320	Public Service Communication
COMM 375	Media Relations

Select one of the following:

COMM 214	Introduction to Creative Concepts
COMM 318	Public Relations Writing

Internship & Capstone ¹

COMM 389	Advertising Creative Capstone: Portfolio II	3
COMM 391	Advertising/Public Relations Internship	3

Electives ²

COMM 406	Environmental Advocacy	3
COMM 479	Digital Sustainability	3

MS Requirements

Required MS Courses ² 6

ENVS 401	Sustainable Systems - Natural Science Perspectives
ENVS 402	Sustainable Systems - Social Science Perspectives

Choose One of Four Concentrations:³

9-12

Environmental Law & Policy

ENVS 410	Introduction to Environmental Law & Policy
ENVS 411	Natural Resources and Land Use Law & Policy
ENVS 412	Water Law & Policy
ENVS 413	Energy Law & Policy

Geographic Information Systems

ENVS 480	Introduction to Geographic Information Systems
ENVS 481	Advanced GIS Applications
ENVS 482	Remote Sensing

Sustainable Assessment and Planning

ENVS 451	Introduction to Sustainability Concepts & Impacts
ENVS 452	Sustainability Assessment & Reporting I
ENVS 453	Sustainability Assessment & Reporting II
ENVS 454	Sustainability Plan Development & Reporting

Sustainable Business

ENVS 433	Introduction to the Circular Economy
ENVS 435	Ecological Economics
ENVS 436	Design for Circular & Sustainable Business
ENVS 463	Sustainable Business Management

Environmental Science & Quantitative Methods Electives⁴

6-9

Students will take at least two courses from the list of electives

Total Hours**70**¹ A student must be junior or senior standing with a minimum of 18 major credit hours completed before an internship.² Courses to be taken as an undergrad in student's Senior year.³ Begin MS program full-time at the start with the concentration work.⁴ Students choosing the Geographical Information Systems track must take an additional elective course to meet a total of 24 credit hours for the MS.**MS Environmental Science & Quantitative Methods Electives**

Code	Title	Hours

STAT 407	Statistical Design	3
STAT 408	Applied Regression Analysis	3
STAT 410	Categorical Data Analysis	3
STAT 411	Applied Survival Analysis	3

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

With MS Law & Policy Track

Guidelines for Accelerated Bachelor's/Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,¹
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.²

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's

program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.³

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

¹ Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.

² The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.

³ If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (<https://gpem.luc.edu/portal/admission/?tab=home>).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.^{1,2}

Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").³

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.⁴

Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.⁵

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

¹ If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.

² Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.

³ In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.

⁴ For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.

⁵ Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence.

learning outcomes

1. Create and implement strategic communication campaigns that integrate advertising, public relations and integrated marketing communication, and are responsive to community needs and organizational goals in local and global contexts.

2. Understand the implications and applications of integrated strategies for digital media in marketing, advertising and public relations practices.
3. Apply appropriate research methods to plan, monitor and evaluate public relations, advertising and other communication campaigns and activities.
4. Practice ethical communication in professional practices that are socially responsible and in the mutual interests of the organization and the community.
5. Articulate the foundational principles of natural and social sciences and humanities essential to solving environmental problems.
6. Critically evaluate the accuracy and credibility of information relating to environmental topics.
7. Employ knowledge and skills to design and implement solutions that contribute to a just and sustainable world.
8. Exemplify the values of environmental and social justice through actions to care for our common home and one another.

SES Shared Learning Outcomes

All SES majors share the following Program Learning Objectives, in addition to their unique major-specific Program Learning Objectives:

1. Articulate the foundational principles of natural and social sciences and humanities essential to solving environmental problems.
2. Critically evaluate the accuracy and credibility of information relating to environmental topics.
3. Employ knowledge and skills to design and implement solutions that contribute to a just and sustainable world.
4. Exemplify the values of environmental and social justice through actions to care for our common home and one another.
