MANAGEMENT/INSTRUCTIONAL DESIGN (BA/MPS)

The Management/Instructional Design (BA/MPS) program is an accelerated, online program that gives students the opportunity to pursue admission to and begin classes for the MPS degree in Instructional Design while still working toward the completion of their BA degree. This program will allow students in the BA Management program to take four of the courses from the MPS Instructional Design program in their senior/final year. A career in Instructional Design can be attractive to BA Management students as it builds upon the curriculum of the Management degree such as project management, HR, and communications. Instructional design will help define a career path and provide relevant skills and knowledge for managers, trainers, and HR personnel who deliver training and instruction.

CURRICULUM

Students may take up to 12 credit hours of 400 level courses required for the MPS Instructional Design while an undergraduate student. The four graduate courses, taken during the students’ senior year will count toward the degree requirements for both the undergraduate and graduate degree.

They will be considered general elective hours counting toward the 120 credit hours needed for the undergraduate degree and count toward the 30 credit hour MPS degree requirements. With four courses double-counting, the total credit hours needed for both the degrees will be reduced by 12 credit hours, for a total of 138 credit hours across both programs.

The number of hours remaining toward Core requirements can vary due to transfer credit.

Mission Specific Requirements
Mission specific requirements can vary from 0 to 15 credit hours based on your prior credit.

General Elective Requirements
Students may have some general elective coursework to complete if their transfer credit and remaining required hours (Core, mission specific, major, etc.) do not total 120.

BA/MPS Requirements
Students may take up to 12 credit hours of 400 level courses required for the MPS Instructional Design while an undergraduate student. The four graduate courses, taken during the students’ senior year will count toward the degree requirements for both the undergraduate and graduate degree.

CIEP 470 should be taken first as it serves as a pre-requisite to other courses. The remaining course suggestions included here can be changed based on the student’s scheduling needs.

Suggested Sequence of Courses

The School of Continuing and Professional Studies provides a high-touch advising model in order to incorporate the professional and educational outcomes of the student as well as any transfer credit accepted. In order to provide students with maximum flexibility in their education and because everyone’s academic background will vary, advisors will work directly with students to determine an appropriate sequence of courses starting at admission into their respective program based on their needs and expected time to completion.

Guidelines for Accelerated Bachelor’s/Master’s Programs

Terms
- Accelerated Bachelor/Master’s programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as Shared credits.

Admission Requirements

Accelerated Bachelor/Master’s programs are designed to enhance opportunities for advanced training for Loyola’s undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program’s admissions committee. Accordingly, the admission requirements for these programs may be

higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,¹
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.²

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor’s degree will face no consequences.³

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter “D”).³

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelor's/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.⁴

Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.⁵

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.

If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.¹,²

¹ Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.
² The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.
³ If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.
⁴ Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.
⁵ In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.
Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation
Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence.

LEARNING OUTCOMES FOR THE BA
The Management (BA) degree program offers adult learners training in business principles, ethical leadership, critical thinking and strategic planning. Students will be prepared for professional advancement in organization communications, community relations and project management.

Students in this program will be able to:
• Communicate purposefully and effectively
• Develop productive team processes, team-building and leadership skills
• Make informed and strategic decisions in a complex work environment
• Describe the context of commerce and industry from a regional, national, and international perspective
• Utilize common business applications and technology in solving business problems
• Impact organizational goals through project management strategies
• Creatively solve problems by drawing from best practices and strategic collaboration
• Apply quantitative analysis to business problems
• Apply an understanding of law and regulation to business processes

LEARNING OUTCOMES FOR THE MPS
The Master of Professional Studies (MPS) in Instructional Design will prepare students to become generalist instructional designers who are equipped to work in a variety of fields and professional settings, including both education and business environments. This fully online and application-oriented master's degree will provide a strong foundation in instructional design as well as the tools and perspective needed for flexible career paths and continuing professional development in the field. It provides a breadth of foundational knowledge and skills in different areas, rather than a focus on a narrower area of specialization within the field, such as learning technologies. It will prepare instructional designers to work with technical specialists as well as subject matter experts and allow them to develop more specialized interests as they grow in their profession.

Upon successful completion of the MPS in Instructional Design candidates will be able to:
• Utilize instructional design processes and appropriate theoretical approaches to design effective and innovative learning experiences.
• Employ a variety of technologies and multimedia authoring tools to produce instructional materials.
• Adapt instructional design processes to a variety of professional settings (K-12 schools, corporate organizations, higher education institutions, etc.)
• Manage the iterative lifecycle of instructional design projects progressing from conception to implementation to revision.
• Apply culturally responsive and ethical practices that engage diverse communities and promote social justice.
• Conduct research designed to inform practice and stay abreast of emerging trends in the field of instructional design.
• Build collaborative relationships with diverse stakeholders (e.g., administrators, faculty, students, technologists, project managers, public) in support of meeting organizational needs.
