## Major

- Secondary Education (BSEd) (https://catalog.luc.edu/undergraduate/ education/secondary-education-bsed/)

## Curriculum

Requirements include the Loyola Core Curriculum including the writingintensive and language requirement, fifteen chemistry/biochemistry courses totaling 43 credit hours, four physics courses totaling 8 credit hours, two mathematics courses totaling 6 credit hours, seven biology courses totaling 16 credit hours. CHEM 300 Undergraduate Research is strongly recommended. Credit hours earned in CHEM 300 Undergraduate Research or CHEM 380 Chemistry Seminar do not count as elective hours satisfying the BS degree requirement. CHEM 300 Undergraduate Research and CHEM 380 Chemistry Seminar are required for Departmental Honors.

| Code | Title | Hours |

- For chemistry course descriptions, pre and co-requisite information, and math requirement information please visit http://www.luc.edu/ chemistry/courses_undergrad.shtml (https://www.luc.edu/ chemistry/courses_undergrad.shtml/).

All chemistry majors are assigned a chemistry faculty advisor. Please meet with your advisor on a regular basis, at least twice a year, for assistance with your chemistry schedule, research possibilities, graduate school information and more. If you do not know who your advisor is please call the chemistry department at 773/508-3100 or come to the department office located in Flanner Hall room 125.

## Suggested Sequence of Chemistry, Biology, Math, and Physics Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Students not placing in MATH 118 Precalculus II or higher cannot start the Chemistry sequence until MATH 117 Precalculus I is completed with a grade of C - or better. Such students are advised to enroll in first-year Chemistry courses in the summer sessions (after meeting the math requirement) in order to complete the major in four years

CHEM 300 Undergraduate Research and CHEM 380 Chemistry Seminar are strongly recommended and required to receive Departmental Honors with graduation. Credit hours earned in CHEM 300 Undergraduate Research and/or CHEM 380 Chemistry Seminar do not count as elective hours satisfying the BIOC degree requirement. CHEM 361 Principles of Biochemistry does not count towards the BIOC-BA degree.

## College of Arts and Sciences Graduation Requirements

All Undergraduate students in the College of Arts and Sciences are required to take two Writing Intensive courses ( 6 credit hours) as well as complete a foreign language requirement at 102-level or higher (3 credit hours) or a language competency test. More information can be found here (https://www.luc.edu/cas/college-requirements/).

## Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (https://catalog.luc.edu/ undergraduate/university-requirements/) area.

## Learning Outcomes

At the completion of the Undergraduate Major in Chemistry or Biochemistry, students will be able to:

- answer knowledge and comprehension type questions related to fundamental chemical concepts and demonstrate fluency with basic facts, terminology, and principles in the various subfields of chemistry.
- understand and describe the chemical basis of life, our natural resources and environments, and the universe.
- retrieve, research, synthesize, and critically evaluate scientific literature.
- design and implement experiments that test predictive hypotheses, gather relevant data, analyze results, and interpret the significance of these results.
- operate state of the art equipment used by chemists and biochemists.
- engage in scientific reasoning with claims based on supported evidence and communicate effectively results and interpretations of scientific research.
