

CHEMISTRY (BS)

Related Programs

Major

- Secondary Education (BSEd) (<https://catalog.luc.edu/undergraduate/education/secondary-education-bsed/>)

Curriculum

Requirements include the Loyola Core Curriculum including the writing-intensive and language requirement, fifteen chemistry courses totaling 45 credit hours, four physics courses totaling 8 credit hours, three mathematics courses totaling 11 hours. CHEM 300 Undergraduate Research is strongly recommended. Credit hours earned in CHEM 300 Undergraduate Research or CHEM 380 Chemistry Seminar do not count as elective hours satisfying the BS degree requirement. Both CHEM 300 Undergraduate Research and CHEM 380 Chemistry Seminar are required for Departmental honors. The CHEM-BS degree is accredited by the American Chemical Society.

Code	Title	Hours
Chemistry Courses Required		
CHEM 160	Chemical Structure and Properties	3
CHEM 161	Chemical Structure and Properties Laboratory	1
CHEM 180	Chemical Reactivity I	3
CHEM 181	Chemical Reactivity I Lab	1
CHEM 240	Chemical Reactivity II	3
CHEM 242	Chemical Synthesis Laboratory	2
CHEM 260	Quantitative Methods in Chemistry	3
CHEM 272	Analytical Chemistry Laboratory	2
CHEM 280	Environmental & Chemical Analysis	3
CHEM 301	Physical Chemistry I	3
CHEM 302	Physical Chemistry II	3
CHEM 303	Physical Chemistry Lab I	2
CHEM 370	Biochemistry I	3
CHEM 314	Instrumental Analysis	4
CHEM 340	Advanced Inorganic Chemistry	3
CHEM 341	Advanced Inorganic Laboratory	1
Chemistry Elective		3
Chemistry Elective		3
Physics Courses Required		
PHYS 121	College Physics I Lec/Dis	3
PHYS 122	College Physics II Lec/Dis	3
PHYS 111L	College Physics Laboratory I	1
PHYS 112L	College Physics Lab II	1
Math Courses Required		
MATH 161	Calculus I	4
MATH 162	Calculus II	4
STAT 203	Introduction to Probability & Statistics	3
Total Hours		65

- Please visit http://www.luc.edu/cas/academics_degreerequirements.shtml#college (https://www.luc.edu/cas/academics_degreerequirements.shtml/#college) to view other CAS requirements.

cas/academics_degreerequirements.shtml/#college) to view other CAS requirements.

- For chemistry course descriptions, pre and co-requisite information, and math requirement information please visit http://www.luc.edu/chemistry/courses_undergrad.shtml (https://www.luc.edu/chemistry/courses_undergrad.shtml/).

All chemistry majors are assigned a chemistry faculty advisor. Please meet with your advisor on a regular basis, at least twice a year, for assistance with your chemistry schedule, research possibilities, graduate school information and more. If you do not know who your advisor is please call the chemistry department at 773/508-3100 or come to the department office located in Flanner Hall room 125.

Suggested Sequence of Chemistry, Math, and Physics Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Students **not** placing in MATH 118 Precalculus II or higher cannot start the Chemistry sequence until MATH 117 Precalculus I is completed with a grade of C- or better. Such students are advised to enroll in first-year Chemistry courses in the summer sessions (after meeting the math requirement) in order to complete the major in four years.

Course	Title	Hours
Freshman		
Fall		
CHEM 160	Chemical Structure and Properties	3
CHEM 161	Chemical Structure and Properties Laboratory	1
MATH 161	Calculus I	4

¹ Capstone Course: CHEM 314 Instrumental Analysis for Junior or Senior year

CHEM 300 Undergraduate Research and CHEM 380 Chemistry Seminar are strongly recommended and required to receive Departmental Honors with graduation. Credit hours earned in CHEM 300 Undergraduate Research and/or CHEM 380 Chemistry Seminar do not count as elective hours satisfying the CHEM-BS degree requirement. CHEM 361 Principles of Biochemistry does not count towards the CHEM-BS degree.

College of Arts and Sciences Graduation Requirements

All Undergraduate students in the College of Arts and Sciences are required to take two Writing Intensive courses (6 credit hours) as well as complete a foreign language requirement at 102-level or higher (3 credit hours) or a language competency test. More information can be found here (<https://www.luc.edu/cas/college-requirements/>).

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SPCS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (<https://catalog.luc.edu/undergraduate/university-requirements/>) area.

Learning Outcomes

At the completion of the Undergraduate Major in Chemistry or Biochemistry, students will be able to:

1. answer knowledge and comprehension type questions related to fundamental chemical concepts and demonstrate fluency with basic facts, terminology, and principles in the various subfields of chemistry.
2. understand and describe the chemical basis of life, our natural resources and environments, and the universe.
3. retrieve, research, synthesize, and critically evaluate scientific literature.

4. design and implement experiments that test predictive hypotheses, gather relevant data, analyze results, and interpret the significance of these results.
5. operate state of the art equipment used by chemists and biochemists.
6. engage in scientific reasoning with claims based on supported evidence and communicate effectively results and interpretations of scientific research.
