## SOFTWARE ENGINEERING (BS)

With software applications of enormous size, complexity, and expense now prevalent in diverse domains, software engineering has never been as important a field as it is now. Students gain necessary talents to be successful in today's organizations, following current industry practices: designing and developing software; understanding and applying software development processes and methodologies in their work; leveraging software development tools used in the various phases of the development life cycle, and functioning as an effective member of a software development team or organization. Students develop their knowledge and skill through high-level electives where they write major projects in diverse areas such as client/server programming for the web, distributed programming for large clusters of processors, database programming, and markup language transformation. While working on modern applications with current software engineering practices such as Extreme Programming, students learn to analyze and apply good algorithms and other relevant tools.

The Bureau of Labor Statistics indicates high median pay and estimates a $17 \%$ increase (much higher than average) in the demand for software developers for the period 2014 to 2024.

## Curriculum

| Code | Title | Hours |
| :---: | :---: | :---: |
| Major Requirements |  |  |
| Select one of the | following: | 3-4 |
| MATH 131 | Applied Calculus I |  |
| MATH 161 | Calculus ${ }^{1}$ |  |
| Select one of the following: |  | 3 |
| STAT 103 | Fundamentals of Statistics |  |
| STAT 203 | Introduction to Probability \& Statistics |  |
| ISSCM 241 | Business Statistics |  |
| PSYC 304 | Statistics |  |
| COMP 141 | Introduction to Computing Tools and Techniques | - 3 |
| COMP 163 or MATH 201 | Discrete Structures <br> Introduction to Discrete Mathematics \& Number Theory | 3 |
| COMP 170 | Introduction to Object-Oriented Programming | 3 |
| COMP 264 | Introduction to Computer Systems | 3 |
| COMP 271 | Data Structures I | 3 |
| COMP 272 | Data Structures II | 3 |
| COMP 313 | Object-Oriented Design | 3 |
| COMP 317 | Social, Legal, and Ethical Issues in Computing | 3 |
| COMP 330 | Software Engineering | 3 |
| SWEN-BS Restricted Electives |  |  |
| Select nine credits hours from the following: |  | 9 |
| COMP 332 | Requirements Engineering |  |
| COMP 335 | Formal Methods in Software Engineering |  |
| COMP 370 | Software Quality |  |
| COMP 371 | Programming Languages |  |
| COMP 373 | Advanced Object-Oriented Programming |  |
| COMP 382 | Compiler Construction |  |

## Practicum Capstone

| Select six credit hours from the following: ${ }^{2}$ |  | 6 |
| :---: | :---: | :---: |
| COMP 312 | Open Source Software Practicum |  |
| COMP 390 | Broadening Participation in STEM (Computing, Math \& Science) |  |
| COMP 391 | Internship in Computer Science |  |
| COMP 398 | Independent Study |  |
| Computer Science Electives |  |  |
| Select one of the following: |  | 3 |
| COMP 125 | Visual Information Processing |  |
| COMP 150 | Introduction to Computing |  |
| COMP 300-Level Course |  |  |
| COMP 300-Lev | Courses | 10 |

Total Hours 61
${ }^{1}$ By arrangement with the Undergraduate Program Director, the extra credit from MATH 161 Calculus I may be applied towards the "Computer Science Free Electives" category.
2 See the details of registering in the links for each course. Students are encouraged to complete these credits during junior and senior years to draw on prior experience.

## Suggested Ordering of Courses SWEN-BS Sample Schedule

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

| Course | Title | Hours |
| :---: | :---: | :---: |
| Year 1 |  |  |
| Fall |  |  |
| COMP 150 | Introduction to Computing ${ }^{1}$ | 3 |
| COMP 141 | Introduction to Computing Tools and Techniques | 3 |
| MATH 131 | Applied Calculus ${ }^{2}$ | 3 |
| CORE: Philosophical Knowledge Tier 1 |  | 3 |
| CORE: College Writing Seminar |  | 3 |
| UNIV 101 | First Year Seminar | 1 |
|  | Hours | 16 |
| Spring |  |  |
| COMP 170 | Introduction to Object-Oriented Programming ${ }^{3}$ | 3 |
| COMP 163 | Discrete Structures | 3 |
| STAT 103 | Fundamentals of Statistics ${ }^{4}$ | 3 |
| CORE: Historical Knowledge Tier 1 |  | 3 |
| CORE: Ethics |  | 3 |
|  | Hours | 15 |
| Year 2 |  |  |
| Fall |  |  |
| COMP 271 | Data Structures I | 3 |
| COMP 317 | Social, Legal, and Ethical Issues in Computing | 3 |

| COMP 264 | Introduction to Computer Systems | 3 |
| :---: | :---: | :---: |
| CORE: Theology and Religious Studies Tier 1 3 |  |  |
| CAS Language Requirement 101 level ${ }^{5}$ 3 |  |  |
|  | Hours | 15 |
| Spring |  |  |
| COMP 272 | Data Structures II | 3 |
| COMP 330 | Software Engineering | 3 |
| CORE: Scientific Knowledge Tier 1 3 |  |  |
| CORE: Societal \& Cultural Knowledge Tier 1 3 |  |  |
| CAS Language Requirement 102 level 3 |  |  |
|  | Hours | 15 |
| Year 3 |  |  |
| Fall |  |  |
| SWEN-BS Restricted Elective 3 |  |  |
| COMP Free Elective |  |  |
| COMP Free Elective |  |  |
| CORE: Literary Knowledge \& Experience Tier 1 |  |  |
| CORE: Artistic Knowledge \& Experience |  |  |
| CORE: Philosophical Knowledge Tier 2 |  |  |
|  | Hours | 16 |
| Spring |  |  |
| COMP 313 | Object-Oriented Design | 3 |
| SWEN-BS Restricted Elective |  |  |
| CORE: Theology and Religious Studies Tier 2 |  |  |
| CORE: Scientific Knowledge Tier 2 |  |  |
| CORE: Historical Knowledge Tier 2 |  |  |
| Hours 15 |  |  |
| Year 4 |  |  |
| Fall |  |  |
| COMP Practicum 3 |  |  |
| SWEN-BS Restricted Elective |  |  |
| CORE: Literary Knowledge \& Experience Tier 2 |  |  |
|  |  |  |
| CAS Elective 3 |  |  |
|  | Hours | 15 |
| Spring |  |  |
| COMP Practicum 3 |  |  |
| COMP Free Elective 3 |  |  |
| COMP Free Elective 3 |  |  |
| COMP Free Elective if COMP 150 not taken 3 |  |  |
| CAS Elective 3 |  |  |
|  | Hours | 15 |
| Total Hours 122 |  |  |
| ${ }^{1}$ COMP 150 Introduction to Computing will apply to COMP Free Electives; students with prior experience in computer programming, for example a high school course modeled on the Exploring Computer Science (https://www.exploringcs.org/) or Computer Science Principles (https://apcentral.collegeboard.org/courses/ap-computer-scienceprinciples/) curriculum may replace this course with a different COMP Free Elective at any time during the program. A score of 4 or 5 on the AP CS Principles Exam will earn actual credit for this course. <br> ${ }^{2}$ May substitute MATH 161 Calculus I and may use the extra credit towards COMP Free Electives. |  |  |

${ }^{3}$ A score of 4 or 5 on the AP CS A Exam will earn credit for this course.
${ }^{4}$ May substitute STAT 203 Introduction to Probability \& Statistics or ISSCM 241 Business Statistics or PSYC 304 Statistics.
${ }^{5}$ Language must be completed through the 102 course level or through an exam (https://www.luc.edu/cas/college-requirements/).

## General Notes

- Credits never can be double-counted for different categories of the requirements for the major. But a course may satisfy a major requirement and also satisfy a University and/or College requirement (e.g., Core, residency, Engaged Learning, Writing Intensive).
- It is usually not meant to combine a computing major or minor with another, the principal exception being CCFR-MINR; see more detail in the double-dipping rules (https://catalog.luc.edu/undergraduate/arts-sciences/computer-science/\#policiestext).

## College of Arts and Sciences Graduation Requirements

All Undergraduate students in the College of Arts and Sciences are required to take two Writing Intensive courses ( 6 credit hours) as well as complete a foreign language requirement at 102-level or higher (3 credit hours) or a language competency test. More information can be found here (https://www.luc.edu/cas/college-requirements/).

## Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (https://catalog.luc.edu/ undergraduate/university-requirements/) area.

## Learning Outcomes

- Knowledge of Software Development Lifecycle: Students should understand the various stages of software development, from requirements elicitation, to design, implementation, testing, and maintenance.
- Proficiency in Programming: Graduates should be proficient in several programming languages and have a deep understanding of objectoriented design and other software paradigms.
- Software Design Skills: Graduates should be able to design, implement, validate, and maintain software systems. This includes the ability to work with complex software architectures and design patterns.
- Understanding of Software Quality Assurance: This includes knowledge of testing methodologies, debugging, and techniques to ensure software reliability, usability, security, and performance.
- Project Management Skills: Students should understand software project planning and management techniques. This includes knowledge of cost estimation, risk management, project scheduling and tracking.
- Teamwork and Communication: Similar to computer science, students should be able to work effectively on teams and be able to communicate their ideas and work effectively both verbally and in writing.
- Ethical and Professional Responsibility: Graduates should understand professional, ethical, legal, and societal responsibilities related to software engineering.
