

BIOPHYSICS (BS)

The Biophysics major is an interdisciplinary program on the cutting edge of new developments in the biosciences. Offered by the Departments of Physics and Biology, the biophysics major provides rigorous training in biosciences, mathematics, and lab skills. The degree prepares students for research careers in biophysics, biochemistry, biomedical engineering, and physics. Biophysics is an ideal major for students considering careers in medicine, optometry, dentistry, and other applied health sciences.

Curriculum

This course of study prepares one for careers in medicine, medical research, nano-sciences, biophysics, medical physics, biomedical engineering, and biotechnology. A strong physics and mathematics background is fortified with biology and chemistry classes. A minimum grade of C- must be earned to satisfy a course requirement and a 2.0 minimum overall GPA is required for each
