PHYSICS MINOR

Curriculum
A minimum grade of C- must be earned to satisfy a course requirement and a 2.0 minimum overall GPA is required for each major or minor. Final confirmation of degree requirements is subject to department, school, and university approval.

**Physics Elective**

Select one 200/300 level Physics or equivalent course 3

- MATH 355 Methods of Applied Mathematics
- PHYS 2## Physics 200 level
- PHYS 3## Physics 300 level

**Math Courses**

- MATH 161 Calculus I 4
- MATH 162 Calculus II 4
- MATH 263 Multivariable Calculus 4
- MATH 264 Ordinary Differential Equations 3

**Total Hours** 30

Learning Outcomes

The minor in Physics is a perfect fit for students interested in science and with aptitude in mathematics, but who do not wish to pursue a career in physics. A minor in physics gives a strong basic background in physics and mathematics that will enhance a career in other areas such as: chemistry, biology, social sciences, computational sciences, humanities, or business.

Students take the basic lecture and laboratory physics courses with the physics majors, including a participation in the Freshman Projects; they also take the basic mathematics courses.

By completing the Minor in Physics, students will:

- Acquire foundational knowledge in the physical sciences
- Possess an understanding of the basic mathematics needed to solve problems
- Acquire basic skills for analytical thinking and problem solving
- Gain an understanding and appreciation of interdisciplinary approach involving physical sciences, mathematics and other disciplines.
