

PHILOSOPHICAL KNOWLEDGE AND INQUIRY

Area Goal: This Core Area of Inquiry will invite students to explore key philosophical questions and traditions.

Area Objectives: Through these courses, students will explore influential philosophical questions, positions, and methods of inquiry. Students will develop intellectual attitudes that enable them to identify and assess implicit presuppositions and formulate and defend responses to philosophical issues, including ethical issues.

PHIL 288R	Culture & Civilization in Rome	
PLSC 100	Political Theory	
PSYC 280	Psychology of Judgment and Decision-Making	

AREA LEARNING OUTCOMES

After completing the two courses in this Area, students will be able to:

- describe the historical or conceptual development of major philosophical questions.
- explain the contributions major philosophical questions make to the understanding of ourselves as humans.
- articulate some of the major problems and range of responses central to philosophical inquiry, including questions concerning truth and knowledge, reality, moral values, or social justice.
- construct philosophical arguments, which means students will support their ideas with reasons, assess critically the underlying assumptions of their positions, and evaluate the strengths and weaknesses of alternative positions.
